

Exam Questions 1z0-932

Oracle Cloud Infrastructure 2018 Architect Associate

<https://www.2passeasy.com/dumps/1z0-932/>

NEW QUESTION 1

Which two resources are availability domain constructs? (Choose two.)

- A. VCN
- B. Groups
- C. Block Volume
- D. Compute Instance
- E. Object Storage

Answer: CD

NEW QUESTION 2

Which two statements are true about an Oracle Cloud Infrastructure object storage bucket? (Choose two.)

- A. You can associate a bucket with multiple compartments
- B. You cannot change a bucket from private to public after it is created
- C. You can associate a bucket with only a single compartment
- D. You cannot edit or append data to an object, but you can replace the entire object

Answer: CD

NEW QUESTION 3

Which two are valid options when migrating a database from on-premise to Oracle Cloud Infrastructure? (Choose two.)

- A. snapping or cloning storage form on-premise to Oracle Cloud Infrastructure
- B. performing a backup to Oracle Cloud Infrastructure Object Storage, and then restoring to a database server on Oracle Cloud Infrastructure
- C. performing RMAN backup to an on-premise storage device, and then shipping to Oracle Cloud Infrastructure
- D. converting the Oracle database to a NoSQL database and migrating to Oracle Cloud Infrastructure by using rsync file copy

Answer: AC

NEW QUESTION 4

Your Operations team has recently created a new, standard image that will be used to launch all new application servers in the Finance compartment. The custom image currently exists in the Operations compartment. You have access to manage all-resources in the Finance compartment and do not have access to the Operations compartment.

Which two methods would make the new image available for you to use when deploying new servers in the Finance compartment? (Choose two.)

- A. Instruct the Operations team to reassign the custom image to the Finance compartment so you can select it from a drop-down list when launching new compute resources.
- B. Instruct the Operations team to export the image to an object storage bucket, create a pre-authenticated request (PAR), and provide you with the UR
- C. Download the custom image to your laptop and import it as a custom image in the Finance compartment.
- D. Instruct the Administrators team to grant you access to use instance-images in the Operations compartmen
- E. Use the Oracle Cloud Identifier (OCID) of the custom image when launching new compute resources in the Finance compartment.
- F. Instruct the Operations team to export the image to an object storage bucket, create a PAR, and provide you with the UR
- G. Use that URL as the source when importing a custom imag
- H. Import the custom image into the Finance compartment.
- I. Instruct the Operations team to export the image to an object storage bucke
- J. Instruct the Administrators team to grant you access to the object storage bucket where the custom image is store
- K. Use the download URL of the custom image as the image source when launching new compute resources in the Finance compartment.

Answer: CE

NEW QUESTION 5

You are designing a high bandwidth, redundant connection between your data center and Oracle Cloud Infrastructure (OCI). While researching for OCI FastConnect locations, you notice that you are co-located with Oracle at one of the Oracle FastConnect locations in the Ashburn region.

What is the recommended design in this scenario?

- A. Create a cross-connect group and have two or more cross-connects in that grou
- B. Create an IPsec VPN connection on this group.
- C. Setup two IPsec connections between your data center and OCI Ashburn regio
- D. Create a OCI load balancer to distribute the traffic across the two connections.
- E. Create a cross-connect group and have at least two or more cross-connects in that grou
- F. Create at least two or more virtual circuits in the group.
- G. Create a cross-connect group and have at least one cross-connect in that grou
- H. Create at least one virtual circuit in the group.

Answer: C

NEW QUESTION 6

Which two use Oracle dynamic routing gateway (DRG) for connectivity? (Choose two.)

- A. Remote virtual cloud network (VCN) peering across region
- B. Oracle IPsec VPN
- C. Local VCN peering
- D. Oracle Cloud Infrastructure FastConnect public peering

Answer: AB

NEW QUESTION 7

Which two statements are true about Database Cloud Service (DBCS)? (Choose two.)

- A. Data Guard as a Service is offered among regions.
- B. You have full control over backup schedule and retention.
- C. You can manage Oracle parameters at a global system level.
- D. You cannot manage the database as sys/sysdba.

Answer: AB

NEW QUESTION 8

Which two statements are true about adding secondary VNICs to an existing compute instance? (Choose two.)

- A. The primary and secondary VNIC association must be in the same availability domain
- B. You can assign an Ephemeral Public IP to a secondary VNIC
- C. You can remove the primary VNIC after the secondary VNIC's attachment is complete
- D. The primary and secondary VNIC association can be in different virtual cloud networks (VCNs)

Answer: AB

NEW QUESTION 9

An instance is launched with a primary VNIC that is created during instance launch.

Which two operations are true when you add secondary VNICs to an existing instance? (Choose two.)

- A. You can remove the primary VNIC after the secondary VNIC's attachment is complete.
- B. You can remove the secondary VNIC later if it is not needed.
- C. The primary and secondary VNIC association should be within the same Availability Domain.
- D. It is not possible to connect two VNICs to an instance.

Answer: BC

NEW QUESTION 10

Your company has decided to move a few applications to Oracle Cloud and you have been asked to design it for both High Availability (HA) and Disaster Recovery (DR).

Which two should you consider while designing your Oracle Cloud Infrastructure architecture? (Choose two.)

- A. Region
- B. Instance Shape
- C. Compartments
- D. Availability Domain

Answer: AD

NEW QUESTION 10

Which two statements define the types of DNS resolvers that exist? (Choose two.)

- A. A custom resolver allows instances to use the host names of the hosts in your on-prem network that are connected to your VCN by an IPSec VPN connection.
- B. A VCN resolver allows instances to use the host names of the hosts in your on-prem network that are connected to your VCN by an IPSec VPN connection.
- C. A VCN resolver allows instances to use host names to communicate with instances on other VCNs in your tenancy.
- D. An Internet resolver allows instances to use the host names that are published on the Internet.

Answer: AD

NEW QUESTION 14

You are designing a shared storage solution for your company in Oracle Cloud Infrastructure. The proposed storage solution should allow users to create a hierarchical structure (similar to the directory structure in Linux or Windows based systems). The solution should provide data encryption and a large amount of storage space.

Which would be the best implementation strategy?

- A. Use block storag
- B. Create and attach a large block storage volume to one compute instanc
- C. Assign a public IP to the compute instanc
- D. Store data on the block storage and access it by connecting to the compute instance.
- E. Use object storag
- F. Create a single namespace and multiple buckets to create the hierarchical directory structure.
- G. Use object storag
- H. Create multiple namespaces with one bucket eac
- I. Make the buckets publicly accessible.
- J. Use file storage servic
- K. Create a file system and a mount targ
- L. Share the private IP of the mount target.

Answer: D

NEW QUESTION 15

Which resource is required when connecting to your on-premise network from your Virtual Cloud Network (VCN) via IPSec VPN or FastConnect?

- A. Internet Gateway (IGW)
- B. Dynamic Routing Gateway (DRG)
- C. local peering gateway
- D. NAT

Answer: B

NEW QUESTION 19

What is the maximum CIDR range that can be assigned when configuring a Virtual Cloud Network?

- A. /16
- B. /26
- C. /24
- D. /8

Answer: A

NEW QUESTION 23

Which tool can automatically install Oracle Cloud Infrastructure CLI?

- A. Python
- B. RPM
- C. APT
- D. PIP

Answer: A

NEW QUESTION 28

You have been tasked with creating one virtual cloud network (VCN) each for two line of business (LOB) applications. LOB A and LOB B will need to communicate with each other. To ensure that you can utilize VCN peering, which network CIDR ranges should be used?

- A. VCN A (10.0.0.0/16) and VCN B (10.1.0.0/16)
- B. VCN A (10.0.2.0/16) and VCN B (10.0.2.0/25)
- C. VCN A (10.0.0.0/16) and VCN B (10.0.16.0/24)
- D. VCN A (172.16.0.0/24) and VCN B (172.16.0.0/28)

Answer: A

NEW QUESTION 29

Which deployment architecture is offered when you deploy the Platform Service Manager based Database Cloud Service (DBCS) onto Oracle Cloud Infrastructure?

- A. Two node Primary RAC database leveraging ACFS for the shared file system
- B. Single Instance database with a Single Instance Data Guard in Maximum Performance mode
- C. Single Instance database with a Single Instance Data Guard in Maximum Protection mode
- D. Two node Primary RAC database with a two node RAC Data Guard Standby in Maximum Performance mode

Answer: D

NEW QUESTION 32

You have created a virtual cloud network (VCN) with three private subnets. Two of the subnets contain application servers and the third subnet contains a DB System. The application requires a shared file system so you have provisioned one using the file storage service (FSS). You also created the corresponding mount target in one of the application subnets. The VCN security lists are properly configured so that both application servers and the DB System can access the file system. The security team determines that the DB System should have read-only access to the file system. What change would you make to satisfy this requirement?

- A. Create an NFS export option that allows READ_ONLY access where the source is the CIDR range of the DB System subnet.
- B. Connect via SSH to one of the application servers where the file system has been mounted
- C. Use the Unix command chmod to change permissions on the file system directory, allowing the database user read only access.
- D. Modify the security list associated with the subnet where the mount target reside
- E. Change the ingress rules corresponding to the DB System subnet to be stateless.
- F. Create an instance principal for the DB System
- G. Write an Identity and Access Management (IAM) policy that allows the instance principal read-only access to the file storage service.

Answer: C

NEW QUESTION 37

You have a shared file system between two web servers using File Storage Service (FSS) and you were tasked to create a backup plan for this environment to protect the data placed into the shared file system. What is the recommended approach to create this backup using FSS features?

- A. Implement a backup policy to execute a snapshot of the shared volume.
- B. Implement a backup policy to copy data from the shared volume to object storage.
- C. Compress the data that is in the shared volume and copy it into a different folder on the boot volume disk.

- D. Use the rsync tool to send data from the shared volume to a boot volume disk.
- E. Use the rsync tool to send data from the shared volume to a block volume.

Answer: A

NEW QUESTION 38

Which two statements are true about data guard service on DB Systems in Oracle Cloud Infrastructure (OCI)?

- A. Data guard implementation requires two DB Systems, one running the primary database on a virtual machine and the standby database running on bare metal.
- B. Data guard implementation requires two DB Systems, one containing the primary database and one containing the standby database.
- C. Data guard configuration on the OCI is limited to a virtual machine only.
- D. Both DB Systems must use the same VCN, and port 1521 must be open.

Answer: BD

NEW QUESTION 40

Which two options are available when setting up DNS for your bare metal and virtual machine DB Systems? (Choose two.)

- A. Internet and custom resolver
- B. Google DNS servers
- C. custom resolver
- D. Internet and virtual cloud network (VCN) resolver

Answer: CD

NEW QUESTION 42

Your company has decided to move a few applications to Oracle Cloud Infrastructure and you have been asked to design it for Disaster Recovery (DR). One of the items of your design is to deploy the DR at least 300 miles from the home site and minimize the network latency as much as possible.

Based on that, what will be the recommended deployment?

- A. Deploy applications in two separated VCNs in different Availability Domains and use VCN RemotePeering
- B. Deploy applications in different regions and have them connected using VCN Remote Peering
- C. Deploy applications in two separated VCNs in different regions and use VCN Local Peering
- D. Deploy applications on the same region splitting workloads across Availability Domains.

Answer: D

NEW QUESTION 46

What is the maximum number of security lists that can be associated with a subnet?

- A. four
- B. three
- C. five
- D. two

Answer: C

NEW QUESTION 51

Which statement is true about a pre-authenticated request in Oracle Cloud Infrastructure Object Storage?

- A. You can create only 1, 000 pre-authenticated requests per bucket.
- B. You can create a pre-authenticated request only for public buckets.
- C. You cannot retire a pre-authenticated request before it expires.
- D. You cannot extend the expiration date on a pre-authenticated request.

Answer: D

NEW QUESTION 54

Which two are required to create an IPSec VPN connection? (Choose two.)

- A. security list
- B. static route CIDR
- C. name
- D. compute instance

Answer: AB

NEW QUESTION 56

At the end of a terraform apply operation, what is the default output?

- A. nothing by default
- B. statistics about what was added, changed, and destroyed
- C. the entire state file
- D. statistics about what was added, changed, and destroyed, and the values of outputs

Answer: D

NEW QUESTION 60

What is a valid option when exporting a custom image?

- A. object storage URL
- B. archive storage URL
- C. file storage service
- D. block volume

Answer: A

NEW QUESTION 65

Which statement is true about Oracle Cloud Identifiers (OCID)?

- A. mytenancy.oc.ocid is a valid OCID.
- B. If you delete a user, and then create a new user with the same name, the user will be considered a different user because of different OCIDs.
- C. Users can customize OCIDs for all the resources in their compartments.
- D. If you delete a user, and then create a new user with the same name, the new user will be assigned the exact same OCIDs as the system remembers.

Answer: B

NEW QUESTION 66

Your application front end consists of several Oracle Cloud Infrastructure compute instances behind a load balancer. You have configured the load balancer to perform health checks on these instances.

If an instance fails to pass the configured health checks, what will happen?

- A. The instance is replaced automatically by the load balancer.
- B. The instance is terminated automatically by the load balancer.
- C. The instance is taken out of the back end set by the load balancer.
- D. The load balancer stops sending traffic to that instance.

Answer: D

NEW QUESTION 70

You have an Oracle Cloud Infrastructure (OCI) load balancer distributing traffic via an evenly-weighted round robin policy to your backend web servers. You notice that one of your web servers is receiving more traffic than other web servers.

How can you resolve this imbalance?

- A. Check security lists and route tables of your virtual cloud network (VCN) and fix any issues associated with the rules
- B. Create separate listeners for each backend web server
- C. Delete and re-create your OCI load balancer
- D. Disable session persistence on your backend set

Answer: A

NEW QUESTION 73

When creating a subnet, one or more placeholder security lists are often associated with the subnet. Why?

- A. Each operator needs its own security list.
- B. Each protocol needs its own security list.
- C. Each network endpoint or instance in the subnet needs its own security list.
- D. It is not possible to add or remove security lists after a subnet is created.

Answer: C

NEW QUESTION 74

You are running a mission-critical database in Oracle Cloud Infrastructure (OCI). You take regular backups of your DB system to OCI object storage. Recently, you notice a failed database backup status in the console.

What two steps can you take to determine the cause of the backup failure? (Choose two.)

- A. Ensure the database archiving mode is set to NOARCHIVELOG
- B. Ensure that your database host can connect to the OCI object storage
- C. Restart the dcsagent program if it has a status of stop or waiting
- D. Make sure that the database is not active and running while backup is in progress

Answer: AC

NEW QUESTION 79

You have an application server that needs to copy data on Oracle Cloud Infrastrucutre (OCI) object storage in the same region. You have created a service gateway for OCI object storage in your virtual cloud network (VCN) and modified security lists associated with the subnet to allow traffic to the service gateway. You are able to connect to the OCI object storage, however, you notice that the connectivity is over the Internet instead of the service gateway.

What is the reason for this behavior?

- A. The route table associated with the subnet has no route rule where the destination is object storage service

- B. The service gateway created in the VCN resides in a different availability domain
- C. The security list associated with the subnet has an egress rule that allows all traffic to be forwarded to a destination CIDR 0.0.0.0/0
- D. Identity and Access Management (IAM) policies restrict the access to the object storage bucket

Answer: B

NEW QUESTION 83

Which two options are available when configuring DNS resolution for your virtual cloud network? (Choose two.)

- A. Internet and custom resolver
- B. Google DNS servers
- C. custom resolver
- D. Internet and virtual cloud network (VCN) resolver

Answer: CD

NEW QUESTION 87

Which three are valid Terraform configuration components? (Choose three.)

- A. variable
- B. region
- C. metadata
- D. instance
- E. resource
- F. data source

Answer: AEF

NEW QUESTION 92

You have an external facing web server running in the Oracle Cloud Infrastructure (OCI) London region. You are notified that customers in North America and Australia are facing high latency while connecting to your web server.

Which services are available on OCI that can help you get current latency statistics to your web server from these markets?

- A. Use DNS Zone Management service to check latency over that connection
- B. Setup an IPsec VPN with customers in those markets and check latency over that connection
- C. Use the Internet Intelligence too
- D. Run tests using the web server's public IP address and review traceroute details from different vantage points
- E. Setup a FastConnect with customers in those markets and check latency over that connection

Answer: A

NEW QUESTION 95

Which three actions are required to configure a highly available and secure hybrid network between Oracle Cloud and your data center? (Choose three.)

- A. Define a non-overlapping IP Address Space between the data center and the cloud.
- B. Configure each of the CPEs to leverage each of the IPSec Tunnels created by the connection process.
- C. Create two or more CPEs that map to the private IP addresses of the customer routers used in the IPSec VPN Tunnel.
- D. Define a default route table entry for the VCN that directs all traffic to the data center network to a single DRG.
- E. Create dynamic routing gateways in more than one AD within your region.

Answer: CDE

NEW QUESTION 96

Which statement is true about Oracle Cloud Infrastructure Object Storage Service?

- A. An Archive Object Storage tier bucket can be upgraded to the Standard Object Storage tier.
- B. You cannot directly download an object from an Archive Object Storage bucket.
- C. An existing Standard Object Storage tier bucket can be downgraded to the Archive Object Storage tier.
- D. Data retrieval in Archive Object Storage is instantaneous.

Answer: B

NEW QUESTION 97

Which statement is true about cloning a volume?

- A. You can clone a volume in another region.
- B. You need to detach a volume before cloning it.
- C. A cloned volume is the same as a snapshot that has a dependency on the source volume.
- D. You can change the block volume size when cloning a volume.

Answer: C

NEW QUESTION 102

Which does NOT set a variable in Terraform?

- A. Passing the variable with a var statement to Terraform
- B. Setting the variable as key value pairs in a file in a subdirectory named tfvar
- C. A default value in the variable declaration within a TF plan file
- D. Setting the environment variable using a TF_VAR_ predicate in front of the variable name

Answer: A

NEW QUESTION 105

Which two identity providers can your administrator federate with Oracle Cloud Infrastructure? (Choose two.)

- A. Microsoft Active Directory
- B. Oracle Identity Cloud Services
- C. AWS Directory Services
- D. Google Directory Federation Services

Answer: AB

NEW QUESTION 109

You are implementing Oracle Cloud Infrastructure (OCI) FastConnect to access OCI public access points (e.g.– object storage). You want other Internet traffic from your on-premises environment to use your existing connection with your ISP.

What is the correct way to establish OCI FastConnect to access these OCI public endpoints?

- A. Configure private peering on your FastConnect lin
- B. Redistribute BGP routes learned into your existing routing table and advertise a default from your network infrastructure to OCI.
- C. Configure private peering on your FastConnect link with a static route that points to OCI object storage service.
- D. Configure public peering on your FastConnect link with a static route that points to OCI object storage service.
- E. Configure public peering on your FastConnect lin
- F. Redistribute BGP routes learned into your existing routing table and advertise a specific route for your network infrastructure to OCI.

Answer: A

NEW QUESTION 111

Which two statements are true about restoring a block volume from a manual or policy-based block volume backup? (Choose two.)

- A. It can be restored as new volumes with different sizes from the backups
- B. It can be restored as a new volume to any AD across different regions
- C. It must be restored as a new volume to the same availability domain (AD) on which the original block volume backup resides
- D. It can be restored as a new volume to any AD in the same region

Answer: AC

NEW QUESTION 115

What is the default backup location for database backup on Database Cloud Service (DBCS)?

- A. Object Storage on Oracle Cloud Infrastructure
- B. ASM diskgroup
- C. block volume
- D. locally attached NVMe on Virtual Machine

Answer: A

NEW QUESTION 117

Which three components can you configure in Oracle Infrastructure Identity and Access Management? (Choose three.)

- A. Groups
- B. Users
- C. Instances
- D. Policies
- E. VCNs

Answer: ABD

NEW QUESTION 118

Which is a customer's responsibility on an Oracle Cloud Infrastructure database?

- A. patching the database and OS
- B. creating the first default database on the DBCS server
- C. creating an ASM diskgroup for data file or temp file storage
- D. installing the operating system (OS), Grid Infrastructure, and database software

Answer: B

NEW QUESTION 119

You need to transfer over 12 TB of data from on-premises to your cloud account. You started copying this data over the internet and noticed that it will take too long to complete.

Without increasing the costs of your subscription, what is the recommended way to send this amount of data to your cloud account?

- A. Use Data Transfer Service to send your data.
- B. Split the data into multiple parts and use the multipart tool.
- C. Use a 10 GB FastConnect line to send the data.
- D. Send the data over a VPN IPsec tunnel.
- E. Compress the data and use the multipart tool.

Answer: A

NEW QUESTION 123

You deployed a compute instance (VM.Standard2.16) to run a SQL database. After a few weeks, you need to increase disk performance by using NVMe disks; the number of CPUs will not change. As a first step you terminate the instance and preserve the boot volume.

What is the next step?

- A. Create a new instance using a VM.DenseIO2.16 shape using the preserved boot volume and move the SQL Database data to block volume
- B. Create a new instance using a VM.DenseIO2.8 shape using the preserved boot volume and move the SQL Database data to NVMe disks
- C. Create a new instance using a VM.Standard1.16 shape using the preserved boot volume and move the SQL Database data to NVMe disks
- D. Create a new instance using a VM.DenseIO2.16 shape using the preserved boot volume move the SQL Database data to NVMe disks

Answer: A

NEW QUESTION 124

Which three are default Virtual Cloud Network (VCN) components? (Choose three.)

- A. Security List
- B. Dynamic Routing Gateway
- C. DHCP options
- D. Internet Gateway
- E. Route Table

Answer: ACE

NEW QUESTION 127

In which two ways does Oracle Cloud Infrastructure (OCI) file storage (FSS) differ from OCI object storage and block volume services? (Choose two.)

- A. Block volume service is NVMe based, while FSS is not
- B. Object storage and block volume services offer default encryption, but FSS does not
- C. A file system is created within an availability domain, whereas object storage buckets exist at the region level
- D. FSS uses the network file system (NFS) protocol, whereas block volume uses iSCSI

Answer: CD

NEW QUESTION 129

Which statement is true about restoring a block volume from a manual or policy-based block volume backup?

- A. It can be restored as new volumes to any Availability Domain within the same region.
- B. It must be restored as new volumes to the same Availability Domain on which the original block volume backup resides.
- C. It can be restored as new volumes to any Availability Domain across different regions.
- D. It can be restored as new volumes with different sizes from the backups.

Answer: A

NEW QUESTION 134

You are in the process of setting up a highly available student registration website on Oracle Cloud Infrastructure (OCI). You use a load balancer and a database service on OCI. You launch two compute instances each in a different subnet and add them to the back end set of a public load balancer. The load balancer is configured correctly and working. You then deploy the student registration application on these two compute instances. The application can communicate with the database service. However, when you type the URL of this student registration application in your browser, no web page appears. What could be the cause?

- A. The security lists of the subnets on which the two instances are located do not have “allow” rules for port 80 and 443.
- B. The load balancer performed a health check on the application and found that compute instances were not in a healthy state and terminated the instances.
- C. The client requested https access to the application and the load balancer service does not support end-to-end SSL from the client to the listener to the back-end set.
- D. The Dynamic Routing Gateway is preventing the client traffic from your data center network from reaching the public IP of the load balancer.

Answer: A

NEW QUESTION 139

Why are two subnets required to create a public load balancer when additional subnets are often used for back-end servers? (Choose two.)

- A. Routing is simpler when the load balancer is not in the same subnet as the back-end server.
- B. Performance is higher when more subnets are used.
- C. Additional subnets for back-end servers allow for separate route tables for these servers.
- D. Additional subnets for back-end servers allow for separate security lists for these servers.

Answer: BD

NEW QUESTION 140

In which language are Terraform and Terraform providers written?

- A. Python
- B. Go
- C. C
- D. Ruby

Answer: B

NEW QUESTION 142

Which three load-balancing policies can be used with a back end set? (Choose three.)

- A. Throughput
- B. IP Hash
- C. Weighted Round Robin
- D. CPU Utilization
- E. Least Connections

Answer: BCE

NEW QUESTION 145

Which three types of credentials are used to manage Oracle Cloud Infrastructure Identity and Access Management (IAM)? (Choose three.)

- A. Windows Password
- B. API Signing Key
- C. Swift Password
- D. SSH Key
- E. Console Password

Answer: BCE

NEW QUESTION 147

Which statement is true about DB Systems?

- A. Data Guard as a Service is offered between regions.
- B. You cannot manage the database as sys/sysdba.
- C. You have full control over the automatic backup schedule and retention periods.
- D. You can manage Oracle database initialization parameters at a global level.

Answer: AC

NEW QUESTION 148

Which two statements are true about Oracle Cloud Infrastructure Compute Service? (Choose two.)

- A. You can launch a virtual or bare metal instance by using the same LaunchInstance API.
- B. You cannot launch a bare metal server in Oracle Cloud Infrastructure Compute Service.
- C. You can attach a block volume in an Availability Domain other than your compute instance.
- D. You can share custom images across tenancies and regions.

Answer: AD

NEW QUESTION 153

Which two are true for achieving High Availability on Oracle Cloud Infrastructure? (Choose two.)

- A. Store your database across multiple regions so that half of the data resides in one region and the other half resides in another region.
- B. Attach your block volume from Availability Domain 1 to a compute instance in Availability Domain 2 (and vice versa) so that they are highly available.
- C. Configure your database to have Data Guard in another Availability Domain in Sync mode within a region.
- D. Store your database files on Object Storage so that they are available in all Availability Domains in all regions.
- E. Distribute your application servers across all Availability Domains within a region.

Answer: BE

NEW QUESTION 157

You are the Cloud Architect of a company, and are designing a solution on Oracle Cloud Infrastructure where you want to have all your compute instances resistant to hardware failure.

Which two are recommended best practices to achieve the requirement on Oracle Cloud Infrastructure? (Choose two.)

- A. Create a custom image of your system drive each time you change the image.
- B. Attach block volumes from different Availability Domains to compute instances in different Availability Domains for high availability.
- C. Design your system with redundant compute modes in different Availability Domains to support the failover capability.
- D. Create backups of your block volumes that are associated with compute instances in different regions.

Answer: AC

NEW QUESTION 160

Which two statements are true about the Oracle Cloud Infrastructure Object Storage Service? (Choose two.)

- A. It provides higher IOPS than Block Storage.
- B. It can be directly attached or detached from a compute instance.
- C. Data is stored redundantly only in a single AD.
- D. Data is stored redundantly across multiple availability domains (ADs).
- E. It provides strong consistency.

Answer: DE

NEW QUESTION 165

Your organization has deployed a large, complex application across multiple compute instances in Oracle Cloud Infrastructure (OCI). These compute instances also have block volume storage attached to them. You want to create a time consistent backup of these block volume storage. Which implementation strategy should be used?

- A. Create a manual backup of each volume
- B. Use scripts available in OCI to backup block volume storage
- C. Group volumes in a volume group first and then use available scripts in OCI
- D. Group volumes in a volume group and create a manual backup of the volume group

Answer: B

NEW QUESTION 166

Which two statements are true about data guard service on DB Systems in Oracle Cloud Infrastructure (OCI)? (Choose two.)

- A. Data guard implementation requires two DB Systems, one running the primary database on a virtual machine and the standby database running on bare metal
- B. Data guard configuration on the OCI is limited to one standby database per primary database
- C. Data guard configuration on the OCI is limited to a virtual machine only
- D. Data guard implementation requires two DB Systems, one containing the primary database and one containing the standby database

Answer: BD

NEW QUESTION 170

Which statement is true about Oracle Cloud Infrastructure FastConnect?

- A. For private peering, FastConnect extends your existing infrastructure to allow you to consume object storage from your on-premises data center
- B. For private peering, FastConnect extends your existing infrastructure to a virtual cloud network
- C. The FastConnect provider network offers only 1 Gbps port connection speed increments
- D. For public peering, a dynamic routing gateway must be configured and attached to the virtual cloud network (VCN)

Answer: B

NEW QUESTION 173

Your company has decided to move a few applications to Oracle Cloud Infrastructure (OCI) and you have been asked to design a cloud-based disaster recovery (DR) solution. One of the requirements is to deploy the DR resources at least 300 miles from the home OCI region and minimize the network latency. What will be the recommended deployment?

- A. Deploy production and DR applications in the same VC
- B. Create production subnets in one AD, and DR subnets in another AD.
- C. Deploy production and DR applications in two separate VCNs in different availability domains (ADs) within your home region, and then use a VCN remote peering connection for connectivity.
- D. Deploy production and DR applications in two separate VCNs, each in different region
- E. Connect them using a VCN remote peering connection.
- F. Deploy production and DR applications in two separate virtual cloud networks (VCNs), each in different regions, and then use VCN local peering gateways for connectivity.

Answer: B

NEW QUESTION 176

Which two actions will occur when a back-end server that is registered with a backend set is marked to drain connections? (Choose two.)

- A. It disallows new connections to that backend server.
- B. It keeps the connections to that instance open and attempts to complete any in-flight requests.
- C. It redirects the requests to a user-defined error page.
- D. It immediately closes all existing connections to that instance.
- E. It forcibly closes all connections to that instance after a timeout period.

Answer: AD

NEW QUESTION 179

Which two options are valid for loading data directly into Autonomous Data Warehouse (ADW)? (Choose two.)

- A. Data Integrator
- B. Data Pump
- C. Data Transfer Service
- D. SQL *Loader

Answer: BD

NEW QUESTION 181

You have just created an Autonomous Data Warehouse (ADW) and you want to connect to the ADW using SQL Developer. What three items are needed to connect to the ADW using SQL Developer? (Choose three.)

- A. the keystore password
- B. a security list with an ingress rule for TCP port 1521
- C. the client credentials file
- D. the public IP address of the ADW server
- E. the admin password

Answer: ACE

NEW QUESTION 185

You have been notified of an application failure indicating that one or more of the Oracle Cloud Infrastructure (OCI) resources have become unavailable. After scanning the Compute and Database consoles, you notice that one of the DB Systems is missing. What would you do to identify the reason for this missing resource?

- A. Navigate to the Audit console and search the previous 24 hours for all Delete actions to get a list of any resource that was deleted in the past 24 hours.
- B. Create a serial console connection to the DB System that does not appear in the management console. Connect to the serial console connection, and then review the system logs under /var/log/messages.
- C. View the service limits associated with your account to ensure that you have not exceeded the available number of DB system in your tenancy.
- D. Navigate to the Audit console and search the previous 24 hours for all List actions to get a list of every event that occurred in the past 24 hours.

Answer: D

NEW QUESTION 187

Which two statements are true about an Oracle Cloud Infrastructure Virtual Cloud Network (VCN)? (Choose two.)

- A. A VCN can reside in multiple Oracle Cloud Infrastructure regions and Availability Domains.
- B. A VCN covers a single contiguous IPv4 CIDR block of your choice.
- C. An allowable VCN size range is: /16 to /30.
- D. A VCN creates the dynamic routing gateway by default.

Answer: BC

NEW QUESTION 191

You have provisioned an Autonomous Transaction Processing (ATP) database and logged into the ATP service console. What are three abilities that can be performed from this service console? (Choose three.)

- A. scale up/down the CPUs
- B. create ATP database users
- C. reset the admin password
- D. set resource management rules
- E. monitor database activity and SQL queries

Answer: ADE

NEW QUESTION 195

What does Terraform use to create, manage, and manipulate infrastructure resources?

- A. resources
- B. provisioner
- C. instances
- D. provider

Answer: D

NEW QUESTION 199

A customer wants to do development on premise while leveraging services such as Java Cloud, Mobile Developer Cloud, and App Builder Services. The customer would also like to scale out the application, stretching from on-premises to the cloud by using a common API. Which two Infrastructure options can the customer leverage to do this? (Choose two.)

- A. Oracle Cloud at Customer
- B. Oracle Cloud Infrastructure Classic
- C. Oracle Cloud Ravello service
- D. Oracle Cloud Infrastructure

Answer: AD

NEW QUESTION 201

You had an outage in your application caused by the loss of a shared volume provisioned by File Storage Service (FSS). At this point, you need to restore the data from a snapshot you created of the FSS. What are the steps to restore the data?

- A. Access the directory where the shared volume is mounted, then cd into .snapshot folder, find the snapshot folder you want to recover and use cp or rsync tool to copy the files to the original location.
- B. Open OCI Console, select File Storage Service, find the shared storage, then click on snapshot and restore.
- C. Open OCI Console, select File Storage Service, find the snapshot you created and click restore.
- D. Access the directory, where you mounted the shared volume, then cd into .snapshot folder and find the snapshot folder you want to recover and rename that folder to the original folder name.

Answer: B

NEW QUESTION 204

You have five different company locations spread across the US. For a proof-of-concept (POC) you need to setup secure and encrypted connectivity to your workloads running in a single virtual cloud network (VCN) in the Oracle Cloud Infrastructure Ashburn region from all company locations. What would meet this requirement?

- A. Create five internet gateways in your VCN and have separate route table for each internet gateway.
- B. Create five virtual circuits using FastConnect for each company location and terminate those connections on a single dynamic routing gateway (DRG). Attach that DRG to your VCN.
- C. Create five IPsec connections with each company location and terminate those connections on a single DR
- D. Attach that DRG to your VCN.
- E. Create five IPsec VPN connections with each company location and terminate those connections on five separate DRG
- F. Attach those DRGs to your VCN.

Answer: C

NEW QUESTION 207

You are planning to deploy a multi-region web application in Oracle Cloud Infrastructure (OCI). You have customers in North America, Asia and Europe who will access the application. What service is available in OCI to help you choose the regions the lowest latency to these markets?

- A. Internet Intelligence
- B. FastConnect
- C. IPsec VPN
- D. DNS Zone Management

Answer: A

NEW QUESTION 211
