

1Z0-435 Dumps

Oracle Business Process Management Suite 12c Essentials

<https://www.certleader.com/1Z0-435-dumps.html>

NEW QUESTION 1

Which two features are provided on the Tasks page of Business Process Workspace?

- A. Display Status for Adaptive Case Management (ACM) cases.
- B. View human tasks based on the user's permissions and assigned groups and roles.
- C. Create personal to-do tasks that are unassociated with a process instance.
- D. View who is currently assigned to a task that the current user has completed.

Answer: BC

Explanation:

The Tasks page displays tasks for the user based on the user's permissions and assigned groups and roles. Perform authorized actions on tasks in the worklist, acquire and check out shared tasks, define personal to-do tasks, and define subtasks. Reference: http://docs.oracle.com/middleware/1213/bpm/bpm-user/bpmug_ws_gt_strt.htm#BPMUG121

NEW QUESTION 2

When automatically generating an ADF form from a human task, the difference between using the "Auto- Generate Task Form" and the "Launch Task Form Wizard" is that the .

- A. "Launch Task Form Wizard" option launches a six-step "BPM Custom Form Wizard" and the "Auto- Generate" option creates the ADF project, task flow, and ADF form with one key click
- B. "Launch Task Form Wizard" option does not create a new ADF project every time it is run
- C. "Auto-Generate" option gives you the choice to use an existing ADF page template as the form is being created.
- D. "Launch Task Form Wizard" option automatically creates an ADF page template and task flow template

Answer: D

NEW QUESTION 3

Which two statements are correct on the use of business objects in a BPM project? (Choose two.)

- A. A business object is defined by a complex data time.
- B. Business objects are often defined in WSDL documents.
- C. A business object can inherit data and behavior from a parent business object.
- D. You can create a business object at either the project level or the process level.

Answer: BC

NEW QUESTION 4

Human workflow is implemented as a .

- A. component within the BPEL service engine
- B. separate Java server running on WebLogic Server
- C. service engine within the SOA infrastructure
- D. component within the BPMN service engine

Answer: C

NEW QUESTION 5

Which two statements are accurate in describing features of Business Process Workspace? (Choose two.)

- A. To see tasks containing a particular word in the task title, you need to create a custom view.
- B. The definition and data for a new view can be shared with a colleague.
- C. A custom view needs to be created to enable the delegation of a task to another user.
- D. In a task view, the task list can be sorted based upon any visible column heading.

Answer: BC

NEW QUESTION 6

Which two statements are true about business architecture modeling in BPM Suite? (Choose two.)

- A. It fosters a top-down approach that allows for discovery of an organization's processes.
- B. It is required before BPMN modeling can begin for a specific process.
- C. It is supported by enterprise maps, value chain models, and strategy models created in BPM Studio.
- D. It allows you to define high-level processes that span an entire organization.
- E. It uses familiar BPMN notation to graphically describe high-level process areas.

Answer: AD

Explanation:

Business Architecture is a methodology for performing high-level analysis of the business processes within your organization. These processes can be high-level processes that span an entire organization or specific, low-level processes performed within a specific group. Business Architecture uses a top-down approach that allows for discovery of your organization's processes. You can define and evaluate high-level goals and map them to specific strategies for achieving them. You can also run reports on Business Architecture components to evaluate performance. Reference: http://docs.oracle.com/middleware/1213/bpm/bp-composer-user/ba_project_bpmcu.htm#BPMCU880

NEW QUESTION 7

You have a situation where a collection of rules might provide a flexible way of externalizing logic in an application. Which two are accurate considerations to access as you decide to use a decision table or if-then rules? (Choose two.)

- A. The decision table's spreadsheet metaphor is compact and familiar to end users.
- B. Decision tables can use globals while if-then rules cannot.
- C. The logic likely requires more rules if expressed as a decision table.
- D. Unlike with a decision table, an Expression Builder is provided for if-then rules to help you craft condition expressions.
- E. Built-in error prevention features for decision tables can help you build more complete and accurate rules.

Answer: BE

NEW QUESTION 8

Which event will be raised when a case is suspended?

- A. Lifecycle
- B. Activity
- C. Milestone
- D. User-defined

Answer: D

NEW QUESTION 9

Which two statements are true about using Process Player to test a process? (Choose two.)

- A. All activities must be implemented for a process before you can run it with Process Player.
- B. When you are running a process by using Process Player and it reaches a user task that has an associated form, you must display the form to select the task outcome.
- C. As a process runs in Process Player, the BPMN diagram is animated to show the flow through the model.
- D. Before running Process Player, you must map all roles in your process to at least one user or group in your organization.

Answer: BD

NEW QUESTION 10

Which statement is true for a BPMN subprocesses?

- A. It has access to the data variables of the main process.
- B. Data have to be explicitly passed back and forth between the main process and the subprocess.
- C. The subprocess can be reused and called from other processes.
- D. The sequence flow inside a subprocess can be diverted and joined to the main flow without going through an end event.

Answer: C

NEW QUESTION 10

Which two components in a BPM project can be promoted to become a case activity? (Choose two.)

- A. Mediator
- B. BPEL
- C. Human task
- D. Business rule
- E. BPMN
- F. Spring

Answer: CE

Explanation:

A case definition contains various case activities that represent the different work that the user can perform in the context of a case. Oracle BPM allows you to define case activities based on:

- a Human Task
- a BPMN process

Reference: http://docs.oracle.com/cd/E28280_01/doc.1111/e15176/case_mgmt_bpmpd.htm#BPMPD87410

NEW QUESTION 11

By default, which two tasks participant roles can change the outcome of a task? (Choose two.)

- A. Admin
- B. Approvers
- C. Assignees
- D. Creator
- E. Owner
- F. Reviewer

Answer: CE

Explanation:

The task owner can change both the outcome of the task and the assignments.

The assignee can raise questions about the work, by adding comments into the task to communicate to the owner or followers about their progress. For example, if

an assignee cannot complete the task, they can either change the assignee back to the owner, or add a comment into the task while changing the task status to "need assistance".

NEW QUESTION 14

Which statement is an unsupported scenario for virtualization through libOVD?

- A. Dynamic groups used to determine group membership.
- B. Users and groups used for task assignment are stored in a relational database.
- C. Users and groups used for task assignment are stored in an external LDAP server or the embedded LDAP server.
- D. Users and groups used for task assignment are stored in multiple external LDAP servers.

Answer: C

NEW QUESTION 15

Which two statements accurately describe how Oracle Web Services Manager works? (Choose two.)

- A. On the client side, the agent coordinates a pipeline of policy interceptors that apply policy assertions to the request in a standardized, predetermined order.
- B. On the service side, policy assertions are processed in reverse order of the client side before the request is delivered to the service.
- C. On the client side, the policy manager coordinates a pipeline of agents that apply policy assertions to the request in the order specified by the developer.
- D. On the service side, policy assertions are processed in the same order as on the client side before the request is delivered to the service.

Answer: AB

NEW QUESTION 16

Which two statements are true about running and analyzing simulation results? (Choose two.)

- A. You must wait until a simulation run finishes in order to see up-to-date results in charts.
- B. During a simulation run, in-flight instances are always allowed to finish before a simulation completes.
- C. During a simulation run, cost and time data are automatically collected for all activities, events, and gateways.
- D. You can use only Business Process Composer to create and run simulations.
- E. The number appearing above the left-most bar atop an activity represents the high water mark for the queue.

Answer: BD

Explanation:

<p>Let in-flight instances finish before simulation ends</p>	<p>If selected, simulation ends only when t specified number of instances complete unselected, simulation stops after the si duration is completed. At that point, all incomplete instances are shown in eithe process" or "queue" status.</p>
--	--

In Business Process Composer you can only run simulations based on test data you define using Business Process Composer.

NEW QUESTION 20

Which statement is accurate about verbal rules and business phrases?

- A. Verbal ruled can be created in Business Process Composer, but not in BPM Studio.
- B. For a particular verbal rule, conditions and actions can include derived business phrases or user- defined business phrases, but not both.
- C. Derived business phrases are automatically created by using facts and globals in the rules dictionary.
- D. Verbal rules must be created in a separate ruleset from general rules and decision tables.

Answer: BC

NEW QUESTION 23

Which statement is true about the architecture of the business rules component?

- A. Facts are vocabulary elements that are used to construct tests and actions for verbal rules.
- B. You can use globals to help users modify rules without having to rework the rule logic.
- C. Unlike decision tables, if-then rules provide conflict resolution and gap analysis.
- D. In the action of a rule, you typically use the Fire RL (Rule Language) verb to invoke inferencing.

Answer: A

NEW QUESTION 28

Which two statements accurately explain how the Call activity behaves in a BPMN model? (Choose two.)

- A. When using a Call activity to invoke a reusable process, the data object values of the calling process are automatically made available to the called process.
- B. The Call activity can invoke a reusable process from within the current process
- C. If the process is to be invoked by a Call activity, the called process must start with one None Start Event.
- D. At a Call activity, the calling process does not wait until the called process or subprocess returns.

Answer: BC

Explanation:

The call activity allows you to call a reusable process from within the current process.

Reference: https://docs.oracle.com/middleware/1213/bpm/bp-composer-user/app_bpmn_ref_bpmcu.htm#BPMCU87375

NEW QUESTION 33

During a simulation run, a simulation definition may be associated with .

- A. one what-if scenario for a single process
- B. multiple what-if scenarios for a single process
- C. multiple processes and one what-if scenario for each process
- D. multiple processes and multiple what-if scenarios for each process

Answer: C

NEW QUESTION 38

What feature would you use if you want to step through a business process just to validate the flow, rules, and forms?

- A. Process Player
- B. Process Simulation
- C. Process Workspace
- D. BPMN Debugger

Answer: A

NEW QUESTION 42

What does the case engine use as the content store if a content management system is not specifically configured for case management?

- A. Oracle WebCenter Content
- B. a CMIS content store
- C. a file system
- D. a database

Answer: D

Explanation:

Case Data: the data for the case stored in the BPM database.

Reference: https://docs.oracle.com/middleware/1213/bpm/bpm-develop/case_mgmt_bpmpd.htm#BPMPD87410

NEW QUESTION 44

Value chain models allow you to specify more details about a process area that may have been identified in an enterprise map. Which two statements are true about how the details are specified in a value chain model? (Choose two.)

- A. A value chain model is the starting point for process decomposition in business architecture modeling.
- B. A step can be broken down into a separate value chain model to create a hierarchical group of value chain models.
- C. It documents goals, objectives, and strategies for a business area.
- D. A step can be linked to a BPMN process model.
- E. There is typically just one value chain model for an entire organization.

Answer: B

Explanation:

Reference: http://docs.oracle.com/middleware/1213/bpm/bp-composer-user/ba_project_bpmcu.htm#BPMCU99994 (4.1.2)

NEW QUESTION 45

Which statement is accurate about providing process analytics in BPM Suite?

- A. BPM Suite supports KPI reporting for high-level business architecture models as well as for detailed BPMN process models.
- B. The primary focus of measurement and reporting of KPIs is to help operational personnel tune the BPM Suite runtime environment.
- C. End users use BPM Composer to review reports showing the results of KPI measurement.
- D. To see any populated business process performance dashboard charts, the project team needs to define KPIs in their models.

Answer: A

NEW QUESTION 48

Identify the gateway type that disallows an outgoing conditional path.

- A. Exclusive
- B. Inclusive
- C. Parallel
- D. Complex

Answer: C

Explanation:

A Parallel Gateway creates parallel paths without checking any conditions; each outgoing Sequence Flow receives a token upon execution of this Gateway

Reference: http://training-course-material.com/training/BPMN_2.0_Gateways#Parallel_Gateway (See Parallel Gateway, 2nd line).

NEW QUESTION 52

Which two statements are true for decision table rules? (Choose two.)

- A. They can have multiple conditions, but share only one action.
- B. They typically contain a set of rules that covers all combinations or where no two combinations conflict.
- C. Both gap detection and conflict resolution cannot be turned off at the same time.
- D. A priority can be set for an entire decision table.

Answer: BD

Explanation:

A Decision Table is an alternative business rule format that is more compact and intuitive when many rules are required to analyze many combinations of property values. You can use a Decision Table to create a set of rules that covers all combinations or where no two combinations conflict.

Reference: http://docs.oracle.com/middleware/1213/bpm/bp-composer-user/business_rules_bpmcu.htm#BPMCU495

NEW QUESTION 57

Which two statements accurately identify capabilities available for rules testing? (Choose two.)

- A. You can create a test suite or a test template without first creating a design function.
- B. You can test rulesets by creating a business rules function that calls the decision function.
- C. You can use Enterprise Manager to test rules via a decision function.
- D. You can mark individual test suites as "draft" to turn them off for test validation.

Answer: BD

Explanation:

You can test rulesets by creating a decision function and calling the decision function from Rules Designer with an Oracle Business Rules function. Draft Test check box to turn off the test validation.

Reference: <http://docs.oracle.com/middleware/1213/bpm/rules-user/testing.htm#ASRUG982>

NEW QUESTION 59

Which option is constraint on promoting a BPMN process to be a case activity?

- A. The BPMN process has to be modeled as an asynchronous process.
- B. The BPMN process cannot contain human tasks.
- C. The BPMN process must be in the same project as the case.
- D. The BPMN process requires that the reply from the process contains at least one parameter.

Answer: A

Explanation:

The BPMN process must already exist. You can use synchronous and asynchronous BPMN processes. The case activity only supports message start and end points

Reference: http://docs.oracle.com/cd/E28280_01/doc.1111/e15176/case_mgmt_bpmpd.htm#BPMPD87432

NEW QUESTION 63

Which action enables support for virtualization through libOVD?

- A. Update the order of the WebLogic authentication providers to put the LDAP providers first.
- B. Use Enterprise Manager or WLST to add the virtualize=true property to the SOA Common Properties MBean.
- C. Use Enterprise Manager or WLST to add the virtualize=true property to the domain level Identity Store Configuration.
- D. Update the domain directory to include a valid libOVD adapter configuration file under the config/ fmwconfig folder.

Answer: C

NEW QUESTION 66

Which two statements are true about configuring service tasks? (Choose two.)

- A. A service task can be configured to invoke a process or service asynchronously.
- B. Although you call a file adapter as a service from your BPMN diagram, no linkage between your BPMN process and the external reference appears in the SOA Composite Editor.
- C. You can invoke a BPEL process by using a service task.
- D. The implementation of a service task can be either a process call or a service call.

Answer: BC

NEW QUESTION 67

Which two statements are true about business indicators used for process analytics?(Choose two.)

- A. A counter must be associated with a counter mark in order for the counter to be incremented.
- B. Measures specify how process analytics data can be filtered or grouped.
- C. If you do not define any businessindicators, no data is captured at a sampling point.
- D. Measurement marks are defined on sequence flows and are visible on the model.
- E. The dimensions you have defined are visible on the process model.

Answer: AD

NEW QUESTION 70

Which two statements are accurate about how ADF Business Components can be used in a task flow for a human task? (Choose two.)

- A. They can create and insert a new row in a database table.
- B. They can invoke wildcard control flow rules in the task flow.
- C. They can initialize the information displayed on a form when given an ID from the process payload.
- D. They can declaratively map database information back into the process payload.
- E. They can invoke task flow call activities.

Answer: BE

NEW QUESTION 75

You have a requirement to dynamically assign tasks at run time based on the employee's title. Which three could be used to accomplish this assignment? (Choose three.)

- A. Use parametric roles to map the individual parametric role assignments and then map individual users to specific titles in the workspace using extended user properties
- B. Use parametric roles to map the individual parametric role assignments and then map LDAP groups to specific titles in the workspace using extended user properties
- C. In LDAP, ensure that individual users have been given titles and, in the workspace, associate the LDAP title attribute to a parametric role
- D. Use a business rule in the human task to dynamically assign work items to specific users or an LDAP group based on employee title
- E. In the process, edit the properties of the swimlane and assign a "title" string data object in the process payload to define a parametric role.

Answer: ABD

NEW QUESTION 77

You are analyzing the different methods available to manage the life cycle of the OWSM policies in your SOA/BPM environment. Identify two statements that correctly describe OWSM policy attachments. (Choose two.)

- A. Although you can attach and detach security policies in JDeveloper, you can detach them only in Enterprise Manager.
- B. An application developer typically uses JDeveloper to create new security policies rather than select them from a prebuilt list.
- C. When you use JDeveloper to associate a security policy with a web service, the policy is not really attached until application development.
- D. OWSM policies can be attached and detached with WLST.

Answer: CD

NEW QUESTION 80

Which two statements are true about the defined Oracle JMS Adapter outbound connection?

- A. It supports connections to JMS distributed queues.
- B. It uses default credentials when connecting to the remote JMS provider.
- C. It supports zero message loss via distributed transactions.
- D. It requires the JMS consumer to explicitly commit transactions.

Answer: AB

Explanation:

Reference: http://docs.oracle.com/cd/E23943_01/web.1111/e15493/prog_details.htm

NEW QUESTION 83

Which statement is true about the skip condition in a BPEL activity?

- A. The activity gets executed when the skip condition expression evaluates to True.
- B. The skip condition expression is evaluated before the activity instance is created.
- C. The activity gets executed when the skip condition expression evaluates to False.
- D. The activity gets executed when the skip condition expression throws a fault.

Answer: C

Explanation:

Reference: https://docs.oracle.com/cd/E14571_01/dev.1111/e10224/bp_conditn.htm

NEW QUESTION 85

Which three design considerations apply to an if-then rule?

- A. A rule function can be called.
- B. Aggregations such as count, max, and average can be used.
- C. A while loop can be employed.
- D. Fact object structures can be changed.
- E. A BPEL scope variable can be defined.

Answer: ABC

NEW QUESTION 88

Which statement accurately describes event-driven architecture?

- A. It is a design approach that fosters creation of distinct pieces of software where each piece is a self-contained unit of functionality.
- B. It is a programming paradigm that views processing as evaluation of functions without regard for application state.
- C. it is a style of building software that specifies logic without describing its control flow.
- D. It is an approach focusing on the production, detection, and consumption of potentially significant state changes.

Answer: C

NEW QUESTION 90

.....

Thank You for Trying Our Product

* 100% Pass or Money Back

All our products come with a 90-day Money Back Guarantee.

* One year free update

You can enjoy free update one year. 24x7 online support.

* Trusted by Millions

We currently serve more than 30,000,000 customers.

* Shop Securely

All transactions are protected by VeriSign!
