

JN0-1332 Dumps

Security Design. Specialist (JNCDS-SEC)

<https://www.certleader.com/JN0-1332-dumps.html>

NEW QUESTION 1

You are designing a high availability firewall solution. You select an off-path design instead of an inline design. What are two reasons for this decision? (Choose two.)

- A. The off-path design is less complex
- B. The off-path design is more flexible
- C. The off-path design uses fewer interfaces at the adjacency layer
- D. The off-path design requires a proper routing configuration for selecting traffic

Answer: B

NEW QUESTION 2

What are two considerations when performing a risk assessment for assets in a data center? (Choose two.)

- A. Insurance is a viable mitigation strategy when performing risk assessment calculations
- B. Exposure of assets could have larger economic impact than loss of assets
- C. Migration of a data center to a cloud provider increases economic impact of asset loss
- D. Migration of a data center to a cloud provider reduces the economic impact of asset exposure

Answer: C

NEW QUESTION 3

You are asked to provide a design proposal to secure a service provider's network against IP spoofing. As part of your design, you must ensure that only traffic sourced from the same subnet is followed on the customer-facing interfaces. Which solution will satisfy this requirement?

- A. BGP with source of origin community
- B. unicast RPF with strict mode
- C. unicast RPF with loose mode
- D. BGP labeled-unicast using the resolve-vpn option

Answer: B

NEW QUESTION 4

As part of your service provider WAN network design, you are asked to create a design that secures BGP communication. In this scenario, what are two reasons you would choose BGP Generated TTL Security Mechanism (GTSM)? (Choose two.)

- A. You have an automated method of rotating MD5 hashes on each router.
- B. All of your router BGP connections are point-to-multipoint.
- C. All of your router BGP connections are point-to-point
- D. You do not have an easy method of rotating MD5 hashes on each router

Answer: BD

NEW QUESTION 5

As part of a design requirement, you are asked to allow users in a specific department to authenticate only on their laptops and no other devices on the same network port. Which mode of 802.1X authentication will you use to satisfy this requirement?

- A. multiple
- B. single-secure
- C. single
- D. MAC RADIUS

Answer: A

NEW QUESTION 6

You are asked to segment the networks connected to an SRX Series device into distinct logical groups with different security requirements. How would you accomplish this task?

- A. Define different NAT policies for each network segment.
- B. Define different security policies for each network segment.
- C. Define different intrusion prevention policies for each network segment.
- D. Define different security zones for each network segment

Answer: B

NEW QUESTION 7

Your company just purchased another company that uses the same IP address space as your company. You are asked to design a solution that allows both companies to use each other's IT resources. Which two actions would you use to accomplish this task? (Choose two.)

- A. Implement double NAT
- B. Implement two non-overlapping equal-size address blocks
- C. Implement three non-overlapping equal-size address blocks.
- D. Implement persisted NAT

Answer: C

NEW QUESTION 8

You are designing a central management solution Your customer wants a logging solution that will support the collection of up to 10,000 events per second from many SRX Series devices that will be deployed in their network. In this scenario, which solution should you include in your design proposal?

- A. Log Collector
- B. Network Director
- C. Contrail Insights
- D. Contrail Server Orchestration

Answer: A

NEW QUESTION 9

Which three statements about Group VPNs are true? (Choose three.)

- A. The IP payload is encrypted
- B. Data can flow directly between sites without transiting a central hub
- C. Group VPNs use a client/server architecture
- D. All data transits through a central hub
- E. The IP headers are encrypted

Answer: ACD

NEW QUESTION 10

Which two features would provide protection from known malware? (Choose two.)

- A. ALGs
- B. screens
- C. Juniper ATP Cloud
- D. IPS

Answer: BC

NEW QUESTION 10

You are asked to provide a network design proposal for a service provider. As part of this design, you must provide a solution that allows the service provider to mitigate DDoS attacks on their customers. Which two features will satisfy this requirement? (Choose two.)

- A. 8GP traffic engineering
- B. 8GP FlowSpec
- C. remote triggered black hole (RTBH)
- D. Storm control

Answer: C

NEW QUESTION 12

Which two statements describe Juniper ATP Cloud? (Choose two.)

- A. Juniper ATP Cloud can use a sandbox to detect threats that use evasion techniques.
- B. Juniper ATP Cloud runs in parallel with network traffic to block all traffic before reaching endpoint.
- C. Juniper ATP Cloud provides protection against zero-day threats.
- D. Juniper ATP Cloud is an add-on app that must be installed with Security Director.

Answer: AD

NEW QUESTION 16

Which two statements are true about WAN security considerations? (Choose two.)

- A. MACsec increases protection on all WAN types
- B. Provider VPN circuit requires IPsec
- C. internal connections are susceptible to fragmentation
- D. IPsec increases protection on all WAN types

Answer: C

NEW QUESTION 21

Multiple customers use the shared infrastructure of your data center. These customers require isolation for compliance and security reasons. What would you do to satisfy this requirement?

- A. Isolate each customer by using different physical hardware
- B. Deploy multiple physical security control points
- C. Deploy a single logical security control point.
- D. Place each customer's VLANs on separate virtual router

Answer: C

NEW QUESTION 24

Refer to the exhibit.

You are designing a security solution using an SRX Series chassis cluster in two separate buildings. In this scenario, what are three considerations? (Choose three)

- A. The switches connecting to interface fab1 must support jumbo frames
- B. Latency on the fabric path must be under 1000 ms
- C. Latency on the control path must be under 100 ms
- D. The switches connecting to interface fxp: must support jumbo frames
- E. Both HA links must be on physically different switches.

Answer: ACD

NEW QUESTION 25

You are asked to implement Juniper AppSecure to increase application security. You want to analyze specific application usage. In this scenario, which AppSecure feature would accomplish this task?

- A. AppQoS
- B. AppTrack
- C. AppFW
- D. IDP/IP

Answer: D

NEW QUESTION 28

You are designing a security solution for an existing data center. All traffic must be secured using SRX Series devices, however, you are unable to change the existing IP addressing scheme. Which firewall deployment method satisfies this requirement?

- A. transparent deployment
- B. two-arm deployment
- C. one-arm deployment
- D. inline deployment

Answer: A

NEW QUESTION 33

What are two characteristics of an overlay network design? (Choose two.)

- A. The overlay network contains per-tenant state
- B. The overlay network uses tunnels to transfer traffic.
- C. The physical network contains per-tenant state.
- D. The physical network uses tunnels to transfer traffic

Answer: A

NEW QUESTION 37

A customer wants to understand why Poky Enforcer is included as a part of your network design proposal. In this situation, which statement is correct

- A. Policy Enforcer submits files to Juniper ATP Cloud for malware scanning
- B. Policy Enforcer can provide client security based on software installed on the client machine
- C. Policy Enforcer provides Zero trust security to all devices connecting to the network
- D. Policy Enforcer can collect events and news from a wide range of network devices

Answer: A

NEW QUESTION 41

A new virus is spreading across the Internet, with the potential to affect your customer's network

Which two statements describe how Policy Enforcer interacts with other devices to ensure that the network is protected in this scenario? (Choose two.)

- A. Policy Enforcer pulls security intelligence feeds from Juniper ATP Cloud to apply to SRX Series devices
- B. Policy Enforcer pulls security policies from Juniper ATP cloud and applies them to SRX Series devices
- C. Policy Enforcer automates the enrollment of SRX Series devices with Juniper ATP Cloud
- D. Security Director pulls security intelligence feeds from Juniper ATP Cloud and applies them to Policy Enforcer

Answer: B

NEW QUESTION 43

You are designing Enterprise WAN attachments and want to follow Juniper recommended security practices in 0's scenario. Which two statements are correct? (Choose two.)

- A. Authentication authorization and accounting should be implemented on network resources
- B. The branch CPE should be configured to all outbound ML:
- C. Printer traffic should be segmented from data traffic.
- D. Network management traffic should be segmented from data traffic

Answer: AD

NEW QUESTION 45

You must design a separate network within your trust network with added security and separation. What is the common name for this type of network?

- A. guest
- B. DMZ
- C. enclave
- D. trust

Answer: C

NEW QUESTION 46

You are asked to design an automated vulnerability scanner that can actively check to see which ports are open and report on the findings. Which Juniper Networks product would you use in this scenario?

- A. Security Director
- B. Log Director
- C. Policy Enforcer
- D. JSA

Answer: C

NEW QUESTION 49

Which two steps should be included in your security design process? (Choose two)

- A. Define an overall routing strategy
- B. Identify external attackers
- C. Identify permitted communications
- D. Identify security requirements for the customer's organization

Answer: BC

NEW QUESTION 53

.....

Thank You for Trying Our Product

* 100% Pass or Money Back

All our products come with a 90-day Money Back Guarantee.

* One year free update

You can enjoy free update one year. 24x7 online support.

* Trusted by Millions

We currently serve more than 30,000,000 customers.

* Shop Securely

All transactions are protected by VeriSign!

100% Pass Your JN0-1332 Exam with Our Prep Materials Via below:
