NEW QUESTION 3
- (Exam Topic 3)
Your network contains an Active Directory domain named contoso.com. The domain contains named Computer1 that runs Windows 10.
On Computer1, you create an NTFS folder and assign Full control permissions to Everyone. You share the folder as Share1 and assign the permissions shown in the following table.

Name	Permission
User1	Full control
User2	Change

When accessing Share1, which two actions can be performed by User1 but not by User2? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.

A. Delete a file created by another user.
B. Set the permissions for a file.
C. Rename a file created by another user.
D. Take ownership of file.
E. Copy a file created by another user to a subfolder.

Answer: BD

NEW QUESTION 5
- (Exam Topic 3)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer named Computer1 that runs Windows 10.
You test Windows updates on Computer1 before you make the updates available to other users at your company.
You install a quality update that conflicts with a customer device driver. You need to remove the update from Computer1.
Solution: From System Restore, you revert the system state to a restore point that was created before the update was installed.
Does this meet the goal?

A. Yes
B. No

Answer: B

Explanation:
 References:
https://support.microsoft.com/en-us/help/934307/description-of-the-windows-update-standalone-installer-in-win

NEW QUESTION 6
- (Exam Topic 3)
You have a computer named Computer1 that runs Windows 10.
On Computer1, you create the local users shown in the following table.

Name	Member of
User1	Users
User2	Users, Guests
User3	Power Users, Guest
User4	Guests, Users, Administrators
User5	Users, Distributed COM Users

Which three user profiles will persist after each user signs out? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.

A. User1
B. User2
C. User3
D. User4
E. User5

Answer: ADE

NEW QUESTION 7
- (Exam Topic 3)
Your network contains an Active Directory domain. The domain contains a user named Admin1. All computers run Windows 10.
You enable Windows PowerShell remoting on the computers.
You need to ensure that Admin1 can establish remote PowerShell connections to the computers. The solution must use the principle of least privilege.
To which group should you add Admin1?

A. Access Control Assistance Operators
B. Power Users
C. Remote Desktop Users
D. Remote Management Users

Answer: D

Explanation:

NEW QUESTION 8
- (Exam Topic 3)
You have 20 computers that run Windows 10.
You configure all the computers to forward all the events from all the logs to a computer named Computer1 that runs Windows 10.
When you sign in to Computer1, you cannot see any security events from other computers. You can see all the other forwarded events from the other computers.
You need to ensure that the security events are forwarded to Computer1. What should you do?

A. On each computer, run wecutil ac /q.
B. On each computer, add the NETWORK SERVICE account to the Event Log Readers group.
C. On each computer, run winrm qc –q.
D. On Computer1, add the account of Computer1 to the Event Log Readers group.

Answer: D

Explanation:

https://docs.microsoft.com/en-us/windows/security/threat-protection/use-windows-event-forwarding-to-assistin-

NEW QUESTION 9
- (Exam Topic 3)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You have a computer named Computer1 that runs Windows 10. The computer contains a folder. The folder contains sensitive data.
You need to log which user reads the contents of the folder and modifies and deletes files in the folder. Solution: From the properties of the folder, you configure the Auditing settings and from the Audit Policy in
the local Group Policy, you configure Audit directory service access.
Does this meet the goal?

A. Yes
B. No

Answer: B

Explanation:

NEW QUESTION 10
- (Exam Topic 3)
You have 100 computers that run Windows 10. You have no servers. All the computers are joined to Microsoft Azure Active Directory (Azure AD).
The computers have different update settings, and some computers are configured for manual updates. You need to configure Windows Update. The solution must meet the following requirements:

- The configuration must be managed from a central location.

- Internet traffic must be minimized.

- Costs must be minimized.

How should you configure Windows Update? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Windows Update technology to use:
- Windows Server Update Services (WSUS)
- Microsoft System Center Configuration Manager
- Windows Update for Business

Manage the configuration by using:
- A Group Policy object (GPO)
- Microsoft System Center Configuration Manager
- Microsoft Intune

Manage the traffic by using:
- Delivery Optimization
- BranchCache
- Peer cache

A. Mastered
B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 15
- (Exam Topic 3)
You are planning a recovery strategy for computers that run Windows 10.
You need to create recovery procedures to roll back feature updates and quality updates.
What should you include in the procedures? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

To roll back feature updates:

▼
Recovery from the Settings app
Windows Update from the Settings app
Programs and Features from the Control Panel
Troubleshoot from the Settings app

To roll back quality updates:

▼
Recovery from the Settings app
Windows Update from the Settings app
Programs and Features from the Control Panel
Troubleshoot from the Settings app

A. Mastered
B. Not Mastered

Answer: A

NEW QUESTION 16
- (Exam Topic 3)
Your network contains an Active Directory domain named contoso.com. The domain contains a server named Server1 that runs Windows Server 2016 and a computer named Computer1 that runs Windows 10.
Server1 contains a share named Backup. All users can read and write data in Backup.
On Monday at 13:00, you configure Backup and Restore (Windows 7) on Computer1 to use the following settings:

▶ Backup Destination:\\Server1\Backup

▶ What do you want to back up?:Local Disk (D:), Include a system image of drives: System Reserved, (C:)

▶ Schedule: Daily at 23:00
You need to identify how many backups will be available on Thursday at 17:00.
What should you identify? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Local Disk (D:) backups:

▼
One backup that uses ZIP files
One backup that uses a VHDX file
Three backups that use ZIP files
Three backups that use VHDX files

System image backups of drive C:

▼
One backup that uses ZIP files
One backup that uses a VHDX file
Three backups that use ZIP files
Three backups that use VHDX files

A. Mastered
B. Not Mastered

Answer: A
