## About ExamBible

### *Your Partner of IT Exam*

## Found in 1998

ExamBible is a company specialized on providing high quality IT exam practice study materials, especially Cisco CCNA, CCDA, CCNP, CCIE, Checkpoint CCSE, CompTIA A+, Network+ certification practice exams and so on. We guarantee that the candidates will not only pass any IT exam at the first attempt but also get profound understanding about the certificates they have got. There are so many alike companies in this industry, however, ExamBible has its unique advantages that other companies could not achieve.

## Our Advances

### \* 99.9% Uptime

All examinations will be up to date.

### \* 24/7 Quality Support

We will provide service round the clock.

### \* 100% Pass Rate

Our guarantee that you will pass the exam.

### \* Unique Gurantee

If you do not pass the exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

**NEW QUESTION 1**

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

Use the following login credentials as needed:

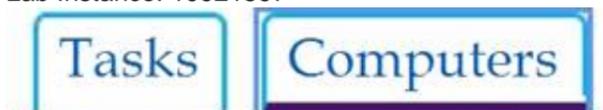

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

Password: PasswOrd!

The following information is for technical support purposes only:

Lab Instance: 10921597

You need to create a group named Group2 on Client2. The members of Group2 must be able to change the system time. The solution must use the principle of least privilege.

To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

See explanation below.

- On Client2, Press Windows+R
- Type lusrmgr.msc
- Right click Groups and click New Group.
- Type in the Group name and a description.
- Click Add to add members to this group. Specify the name of the user or group or computer to be added.
- Click Create and Close.
- Press the Win + R keys to open Run, type secpol.msc into Run, and click/tap on OK to open Local Security Policy.
- Expand open Local Policies in the left pane of Local Security Policy, click/tap on User Rights Assignment, and double click/tap on the Change the system time policy in the right pane.
- Click/tap on the Add User or Group button.
- Click/tap on the Object Types button.
- Check all the boxes for Object types, and click/tap on the OK.
- Click/tap on the Advanced button.
- Click/tap on the Find Now button, select the name of the user or group
- Click/tap on OK.
- Click/tap on OK.
- When finished, you can close Local Users and Groups.

## NEW QUESTION 2

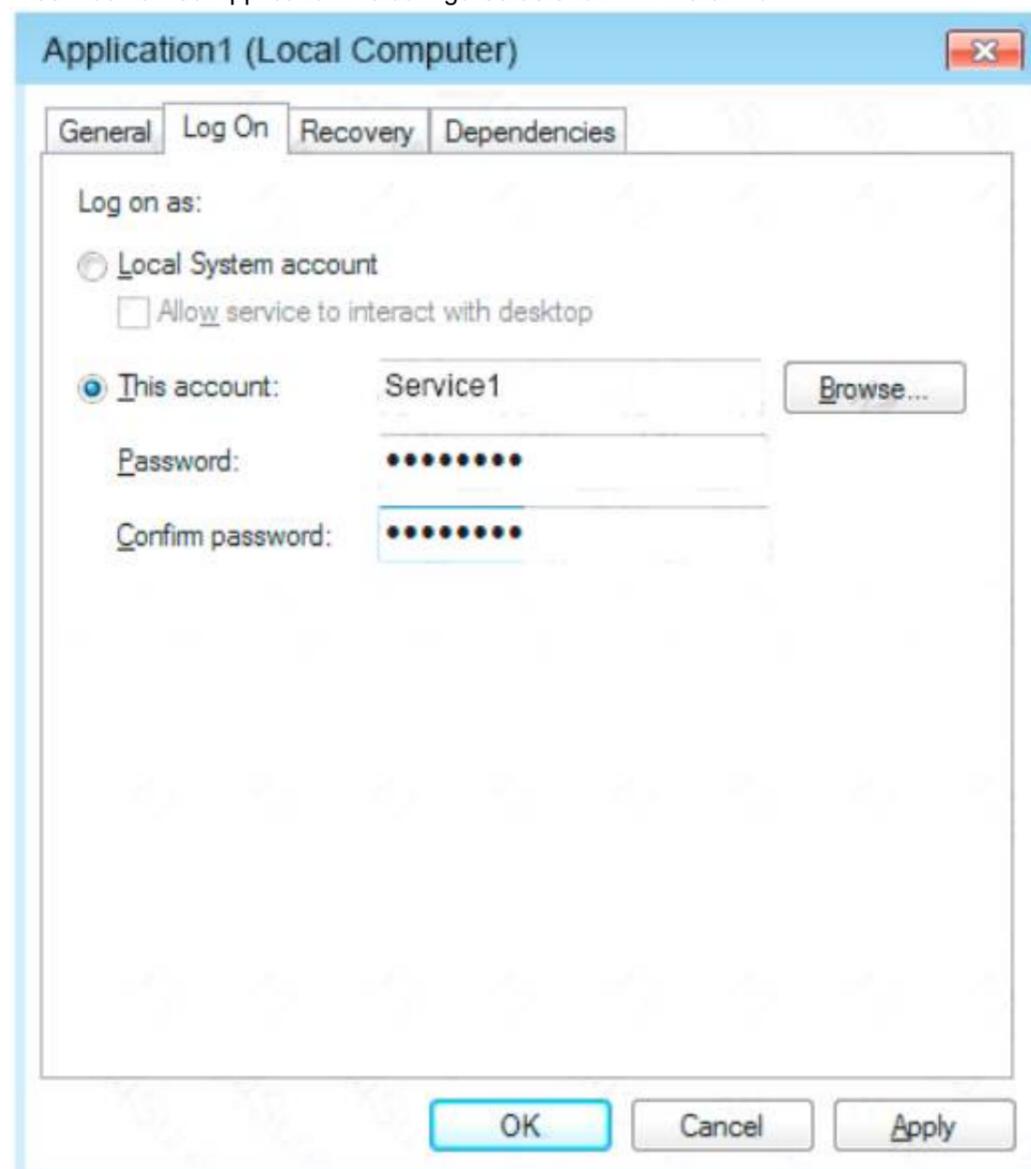

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer named Computer1 that runs Windows 10.

A service named Application1 is configured as shown in the exhibit.

You discover that a user used the Service1 account to sign in to Computer1 and deleted some files.

You need to ensure that the identity used by Application1 cannot be used by a user to sign in to the desktop on Computer1. The solution must use the principle of least privilege.

Solution: On Computer1, you assign Service1 the deny log on locally user right. Does this meet the goal?

- A. Yes
- B. No

**Answer: A**

**Explanation:**

References:

<https://docs.microsoft.com/en-us/windows/security/threat-protection/security-policy-settings/deny-log-on-locall>

**NEW QUESTION 3**

- (Exam Topic 4)

You have 20 computers that run Windows 10.

You configure all the computers to forward all the events from all the logs to a computer named Computer1 that runs Windows 10.

When you sign in to Computer1, you cannot see any security events from other computers. You can see all the other forwarded events from the other computers.

You need to ensure that the security events are forwarded to Computer1. What should you do?

- A. On each computer, run `wecutil ac /q`.
- B. On each computer, add the NETWORK SERVICE account to the Event Log Readers group.
- C. On each computer, run `winrm qc -q`.
- D. On Computer1, add the account of Computer1 to the Event Log Readers group.

**Answer:** D

**Explanation:**

References:

<https://docs.microsoft.com/en-us/windows/security/threat-protection/use-windows-event-forwarding-to-assistin>

**NEW QUESTION 4**

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. Computer1 connects to multiple wireless networks.

You need to view the wireless networks to which Computer1 connects. What should you use?

- A. the System log in Event Viewer
- B. Wi-Fi in the Settings app
- C. the properties of the wireless adapter in Network Connections in Control Panel
- D. the Details tab for the wireless adapter in Device Manager

**Answer:** B

**Explanation:**

Reference:

<https://www.windowcentral.com/how-connect-wi-fi-network-windows-10>

**NEW QUESTION 5**

- (Exam Topic 4)

Your company has a Remote Desktop Gateway (RD Gateway).

You have a server named Server1 that is accessible by using Remote Desktop Services (RDS) through the RD Gateway.

You need to configure a Remote Desktop connection to connect through the gateway.

Which setting should you configure?

- A. Connection settings
- B. Server authentication
- C. Local devices and resources
- D. Connect from anywhere

**Answer:** D

**NEW QUESTION 6**

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10 and has Windows Assessment and Deployment Kit (Windows ADK) installed.

Computer1 has the drives shown in the following table.

Letter	Description
C	Operating system
D	Data drive
E	DVD drive that contains the Windows 10 installation files

You need to create Windows 10 unattended answer file. What should you do first?

- A. From File Explorer, copy `Install.wim` from drive E to drive D.
- B. From Windows System Image Manager, select `Select Windows Image`, and then select `Install.wim` from drive E.
- C. From Windows System Image Manager, select `Select Windows Image`, and then select `Boot.wim` from drive E.
- D. From File Explorer, copy `Boot.wim` from drive E to drive D.

**Answer:** A

**Explanation:**

References:

<https://www.windowcentral.com/how-create-unattended-media-do-automated-installation-windows-10>

**NEW QUESTION 7**

- (Exam Topic 4)

You have a Microsoft Azure Active Directory (Azure AD) tenant named contoso.com that contain the users shown in the following table.

Name	Role
Admin1@contoso.com	Security administrator
Admin2@contoso.com	Cloud device administrator
User1@contoso.com	None

You have a computer named Computer1 that runs Windows 10.

Name	Member of
Admin1	Network Configuration Operators
Admin2	Power Users
User1	Administrator

User1 joins Computer1 to Azure AD by using user1@contoso.com.

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1@contoso.com is a member of the local Administrators group on Computer1.	<input type="radio"/>	<input type="radio"/>
Admin1@contoso.com can configure the firewall and Windows Defender on Computer1.	<input type="radio"/>	<input type="radio"/>
Admin2@contoso.com can install software on Computer1.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Statements	Yes	No
User1@contoso.com is a member of the local Administrators group on Computer1.	<input checked="" type="radio"/>	<input type="radio"/>
Admin1@contoso.com can configure the firewall and Windows Defender on Computer1.	<input type="radio"/>	<input checked="" type="radio"/>
Admin2@contoso.com can install software on Computer1.	<input checked="" type="radio"/>	<input type="radio"/>

**NEW QUESTION 8**

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10 and has an application named App1. You need to use Performance Monitor to collect data about the processor utilization of App1. Which performance object should you monitor?

- A. Process
- B. Processor Performance
- C. Processor Information
- D. Processor

**Answer:** A

**Explanation:**

References:  
[https://www.cse.wustl.edu/~jain/cse567-06/ftp/os\\_monitors/index.html](https://www.cse.wustl.edu/~jain/cse567-06/ftp/os_monitors/index.html)

**NEW QUESTION 9**

- (Exam Topic 4)

You have two workgroup computers named Computer1 and Computer2 that run Windows 10. The computers contain the local security principals shown in the following table.

Name	Type	Computer
User1	User	Computer1
GroupA	Group	Computer1
GroupB	Group	Computer1
User2	User	Computer2
GroupC	Group	Computer2

Which security principals can be members of GroupA and GroupC? To answer, select the appropriate options in the answer area.  
 NOTE: Each correct selection is worth one point.

GroupA: ▼

- User1 only
- User1 and User2 only
- User1 and GroupB only
- User1, User2, GroupB, and GroupC

GroupC: ▼

- User2 only
- User1 and User2 only
- User1, User2, GroupA, and GroupB

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Graphical user interface, text, application, chat or text message Description automatically generated

**NEW QUESTION 10**

- (Exam Topic 4)

You deploy Windows 10 to several computers. The computers will be used by users who frequently present their desktop to other users.

You need to prevent applications from generating toast notifications in the notification area. Which settings should you configure from the Settings app?

- A. Shared experiences
- B. Privacy
- C. Focus assist
- D. Tablet mode

**Answer:** C

**Explanation:**

Focus Assist will automatically hide incoming notifications, so they don't pop up and distract you while you're playing a game, giving a presentation, or using a full-screen application.

**NEW QUESTION 10**

- (Exam Topic 4)

You have a computer that runs Windows 10. You can start the computer but cannot sign in.

You need to start the computer into the Windows Recovery Environment (WinRE). What should you do?

- A. Turn off the compute
- B. Turn on the computer, and then press F8.
- C. Turn off the compute
- D. Turn on the computer, and then press F10.
- E. From the sign-in screen, hold the Shift key, and then click Restart.
- F. Hold Alt+Ctrl+Delete for 10 seconds.

**Answer:** C

**Explanation:**

References:

<https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/windows-recovery-environment--win>

**NEW QUESTION 11**

- (Exam Topic 4)

You plan to deploy Windows 10 Enterprise to company-owned devices. You capture a Windows 10 image file from a reference device.

You need to generate catalog files and answer files for the deployment.

What should you use for each file? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Catalog file:

- Deployment Image Servicing and Management (DISM)
- Windows Configuration Designer
- Windows Deployment Services (WDS)
- Windows System Image Manager (Windows SIM)

Answer file:

- Deployment Image Servicing and Management (DISM)
- Windows Configuration Designer
- Windows Deployment Services (WDS)
- Windows System Image Manager (Windows SIM)

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Graphical user interface, text, application Description automatically generated

References:

<https://docs.microsoft.com/en-us/windows-hardware/customize/desktop/wsim/open-a-windows-image-or-catalo>

**NEW QUESTION 15**

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10.

The relevant services on Computer1 are shown in the following table.

Name	Startup type	Status	Dependent on
Service1	Automatic	Stopped	Service2, Service3
Service2	Automatic	Stopped	Service6
Service3	Disabled	Running	None
Service4	Disabled	Stopped	Service5
Service5	Automatic	Running	None
Service6	Manual	Stopped	None

Which service will start after you restart Computer1?

- A. Service3 and Services only
- B. Service 1, Setvice2. and Services
- C. Service2, Services, and Service6
- D. Services only

**Answer:** C

**Explanation:**

Service1 cannot start because it is dependent on Service3 which is disabled.

Service2 will start because it is set to Automatic. Service2 starting will cause Service6 to start. Service3 will not start because it is disabled.

Service4 will not start because it is disabled.

Service5 will start because it is set to Automatic and is not dependent on any other services. Service6 will start because Service2 is dependent on Service6.

**NEW QUESTION 16**

- (Exam Topic 2)

You need to meet the technical requirement for Computer1.

What should you do? To answer, select the appropriate options in the answer area.

User who should configure assigned access:

User1
User2
User3
User11
User12

Configure assigned access for:

User4
User5
User12
User13

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

User who should configure assigned access:

User1
User2
User3
User11
User12

Configure assigned access for:

User4
User5
User12
User13

**NEW QUESTION 17**

- (Exam Topic 2)

You need to meet the technical requirements for the helpdesk users.

What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Add the help desk users to:

The local Administrators group on the Windows 10 computers
The Domain Computers group in the domain group
The Event Log Readers group in the domain group
The local Event Log Readers group on the Windows 10 computers
The Group Policy Creators Owners group in the domain group
The local Power Users group on the Windows 10 computers

Troubleshooting tool that the helpdesk users should use:

Get-GPOReport
GPRresult
GPUpdate
Group Policy Object Editor

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

References:

<https://www.itprotoday.com/compute-engines/what-group-policy-creator-owners-group>

**NEW QUESTION 18**

- (Exam Topic 2)

You need to meet the quality update requirement for ComputerA. For how long should you defer the updates?

- A. 14 days
- B. 10 years
- C. 5 years
- D. 180 days
- E. 30 days

**Answer:** E

**Explanation:**

References:  
<https://www.thewindowsclub.com/delay-defer-feature-updates-365-days-windows-10>

**NEW QUESTION 21**

- (Exam Topic 2)

You need to meet the technical requirements for EFS on ComputerA. What should you do?

- A. Run certutil.exe, and then add a certificate to the local computer certificate store.
- B. Run cipher.exe, and then add a certificate to the local computer certificate store.
- C. Run cipher.exe, and then add a certificate to the local Group Policy.
- D. Run certutil.exe, and then add a certificate to the local Group Policy.

**Answer:** D

**Explanation:**

References:  
<https://docs.microsoft.com/en-us/windows/security/information-protection/windows-information-protection/crea>

**NEW QUESTION 26**

- (Exam Topic 1)

You need to reduce the amount of time it takes to restart Application1 when the application crashes. What should you include in the solution? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Tool to use:  ▼

Event Viewer
Performance Monitor
Windows Memory Diagnostic
Windows Performance Analyzer

Task to perform:  ▼

Create a subscription
Attach a task to an event
Enable an event trace provider
Create an alert

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Reference:  
<https://www.howto-connect.com/how-to-attach-a-task-to-this-event-in-event-viewer-in-windows-10/>

**NEW QUESTION 31**

- (Exam Topic 1)

You need to take remote control of an employee's computer to troubleshoot an issue. What should you send to the employee to initiate a remote session?

- A. a numeric security code
- B. a connection file
- C. an Easy Connect request
- D. a password

**Answer:** A

**Explanation:**

References:  
<https://support.microsoft.com/en-us/help/4027243/windows-10-solve-pc-problems-with-quick-assist>

**NEW QUESTION 34**

- (Exam Topic 4)

You have a computer named Computer 1 that runs Windows 10.  
You turn on System Protection and create a restore point named Point1. You perform the following changes:

➤ Add four files named File1.txt, File2.dll, File3.sys, and File4.exe to the desktop.

Run a configuration script that adds the following four registry keys:

- Key1 to HKEY\_CURRENT\_USER
- Key2 to HKEY\_CLASSES\_ROOT
- Key3 to HKEY\_LOCAL\_MACHINE\SYSTEM
- Key4 to HKEY\_CURRENT\_CONFIG

You restore Point1.

Which files and registry keys are removed? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Removed files:

File2.dll only

File2.dll and File3.sys only

File2.dll, File3.sys, and File4.exe

File1.txt, File2.dll, File3.sys, and File4.exe

Removed keys:

Key1 only

Key1 and Key2 only

Key2, Key3, and Key4 only

Key1, Key2, Key3, and Key4

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

References:

<https://www.maketecheasier.com/what-system-restore-can-and-cannot-do-to-your-windows-system/> <https://superuser.com/questions/343112/what-does-windows-system-restore-exactly-back-up-and-restore>

**NEW QUESTION 38**

- (Exam Topic 4)

You are troubleshooting the network connectivity of a computer that runs Windows 10. The computer is connected physically to the network but rejects network traffic from an external source.

You need to reinstall the TCP/IP stack on the computer. What should you run?

- A. the netsh int ip reset command
- B. the Resec-NetAdapcerAdvancedPropercy cmdlet
- C. the netcf g -d command
- D. the Debug-NetworkController cmdlet

**Answer:** A

**Explanation:**

Reference: <https://howtofix.guide/reset-tcp-ip/>

**NEW QUESTION 42**

- (Exam Topic 4)

You have a computer that runs Windows 10 Pro. The computer contains the users shown in the following table.

Name	Description
User1	Member of the local Administrators group
User2	Standard user
User3	Standard user

You need to use a local Group Policy Object (GPO) to configure one group of settings for all the members of the local Administrators group and another group of settings for all non-administrators.

What should you do?

- A. Use the runas command to open Gpedit.msc as each user.
- B. Run mmc as Used and add the Group Policy Object Editor snap-in twice.
- C. Open Gpedit.msc as User1 and add two Administrative Templates.
- D. Run mmc as User1 and add the Security Templates snap-in twice.

**Answer:** B

**Explanation:**

Add the Group Policy Object Editor snap-in twice. Select Browse > Users > Administrators when you add the first snap-in and select Browse > Users > Non-Administrators when you add the second snap-in.

**NEW QUESTION 45**

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. On Computer1, you turn on File History. You need to protect a folder named D:\Folder1 by using File History. What should you do?

- A. From File Explorer, modify the General settings of D:\Folder1
- B. From File Settings app, configure the Backup settings
- C. From the Settings app, configure the Recovery settings
- D. From File History in Control Panel, configure the Select drive settings

**Answer: B**

**Explanation:**

To configure File History, click More options on the Backup screen. The Backup options screen allows you to set how often File History backs up your files and how long versions are saved.

References:

<https://www.groovypost.com/howto/configure-windows-10-file-history/>

**NEW QUESTION 50**

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains a computer named Computer1 that runs Windows 10. Computer1 contains a folder named Folder1.

You plan to share Folder1. Everyone will have Read share permissions, and administrators will have Full control share permission.

You need to prevent the share from appearing when users browse the network. What should you do?

- A. Enable access-based enumeration.
- B. Deny the List NTFS permissions on Folder1.
- C. Add Folder1 to a domain-based DFS namespace.
- D. Name the share Folder1\$.

**Answer: D**

**Explanation:**

Appending a dollar sign to share name prevents a share from appearing when users browse the network.

**NEW QUESTION 54**

- (Exam Topic 4)

You have a computer that runs Windows 10 and has File History enabled. File History is configured to save copies of files every 15 minutes.

At 07:55, you create a file named D:\Folder1\File1.docx.

You add D:\Folder1 to File History and manually run File History at 08:00. You modify File1.docx at the following times:

- > 08:05
- > 08:12
- > 08:20
- > 08:24
- > 08:50

At 08:55, you attempt to restore File1.docx.

How many previous versions of File1.docx will be available to restore?

- A. 2
- B. 3
- C. 4
- D. 5

**Answer: C**

**NEW QUESTION 57**

- (Exam Topic 4)

You have two workgroup computers named Computer1 and Computer2 that run Windows 10. The Guest account is enabled on both computers.

The computers contain the users shown in the following table.

Computer name	User name	User password
Computer1	User1	P@ssword1
Computer1	User2	P@ssword2
Computer2	User1	P@ssword1
Computer2	User2	P@ssword2
Computer2	User3	P@ssword3

The computers contain the shared folders shown in the following table.

Computer name	Shared folder name	Permission
Computer1	Share1	Everyone – Read
Computer2	Share2	Everyone – Read

Computer1 has password-protected sharing turned on. Computer2 has password-protected sharing turned off. For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
From Computer1, User1 can access Share2.	<input type="radio"/>	<input type="radio"/>
From Computer2, User2 can access Share1.	<input type="radio"/>	<input type="radio"/>
From Computer2, User3 can access Share1.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

When password protected sharing is turned on, only people who have a user account and password on your computer can access shared files.

Box 1: Yes

Password protected sharing is turned off on Computer2 so User1 can access Share2 from Computer1.

Box 2: Yes

Password protected sharing is turned on on Computer1. User2 has an account on Computer1 so User2 can access Share1 from Computer2.

Box 3: Yes

The answer to this question depends on which version of Windows 10 is running on the computers. This isn't specified in the question so it's likely that the question will be updated in future.

Password protected sharing is turned on on Computer1. User3 does not have an account on Computer1 so User3 cannot access Share1 from Computer2.

However, the Guest account is enabled which could provide access depending on which version of Windows 10 is running. If it is Windows 10 Home or Pro, then the

answer to this question is Yes. The Guest account does provide access. However, in later versions of Windows 10 Enterprise and Windows 10 Education (from build 1709 onwards), the Guest account does not enable access to the shared folder.

Reference:

<https://docs.microsoft.com/en-us/troubleshoot/windows-server/networking/guest-access-in-smb2-is-disabled-by>

**NEW QUESTION 61**

- (Exam Topic 4)

Your network contains an Active Directory domain. the domain contains a computer named Computer1 that runs Windows 10. The domain contains the users shown in the following table.

Name	Member of
User1	Group1
User2	Group1, Group2

Computer contains the shared folders shown in the following table.

Name	Path	Access-based enumeration
Share1\$	D:\Folder1	Disabled
Share2	D:\Folder2	Enabled

The shared folders have the permissions shown in the following table.

Name	Security permission	Sharing permission
Share1\$	Group1: Read Group2: Full control	Everyone: Read Group2: Full control
Share2	Group2: Full control	Everyone: Read Group2: Full control

For each of the following statements, select Yes if the statement is true. Otherwise select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
When User1 connects to \\Computer1, Share1\$ is visible.	<input type="radio"/>	<input type="radio"/>
When User2 connects to \\Computer1\Share1\$, the contents of D:\Folder1 are accessible.	<input type="radio"/>	<input type="radio"/>
When User1 connects to \\Computer1\Share2, the contents of D:\Folder2 are accessible.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: No

Share1\$ is a hidden share (dollar sign appended) so the share will never be visible.

Box 2: Yes

User2 is in Group1 and Group2. Both groups have access to Share1\$. Therefore, the contents of the shared folder will be visible.

Box 3: No

User1 is in Group1. Group1 does not have the necessary security permission to access Share2. You need both security permissions (NTFS permissions) AND share permissions to view the contents of a shared folder. User1 has the necessary share permissions (Everyone: Read), but not the security permission.

**NEW QUESTION 63**

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer named Computer1 that runs Windows 10.

You test Windows updates on Computer1 before you make the updates available to other computers. You install a quality update that conflicts with a customer device driver.

You need to remove the update from Computer1.

Solution: From an elevated command prompt, you run the vmic qfe delete command. Does this meet the goal?

- A. Yes
- B. No

**Answer: B**

**NEW QUESTION 68**

- (Exam Topic 4)

You need to enable BitLocker Drive Encryption (BitLocker) on a computer named Computer1 that runs Windows 10. Computer1 has the following configurations:

- > Contains only one 200-GB NTFS volume named C:\
- > Contains 50 GB of unallocated disk space
- > Is the member of a workgroup
- > Has TPM enabled

What should you do first?

- A. Create a VHD.
- B. Disable TPM.
- C. Create an additional volume.
- D. Join Computer1 to an Azure Active Directory (Azure AD) tenant.

**Answer: C**

**Explanation:**

Two partitions are required to run BitLocker because pre-startup authentication and system integrity verification must occur on a separate partition from the encrypted operating system drive. This configuration helps protect the operating system and the information in the encrypted drive.

Reference:

<https://docs.microsoft.com/en-us/windows/security/information-protection/bitlocker/bitlocker-overview-and-req>

**NEW QUESTION 72**

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10.

You need to modify the Security Settings of Computer1 to meet the following requirements:

- > A local group named Branch\_Admins must be able to view and clear the Security log.
- > Local users must be prompted to change their password three days before the password expires.

Which two nodes of the Local Group Policy Editor should you access to configure the settings? To answer, select the appropriate nodes in the answer area.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

**Answer: A**

**Explanation:**

Graphical user interface, text, application, chat or text message Description automatically generated

User Rights Assignment > Manage auditing and security log.  
 Security Options > Interactive Logon: Prompt user to change password before expiration: 3 days.

**NEW QUESTION 73**

- (Exam Topic 4)

You are a network administrator at your company.

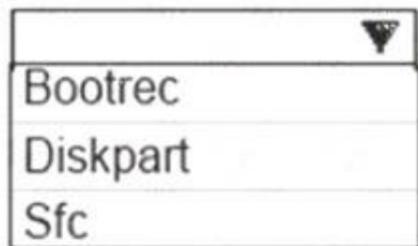

A user attempts to start a computer and receives the following error message: "Bootmgr is missing."

You need to resolve the issue.

You start the computer in recovery mode.

Which command should you run next? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

**Answer: A**

**Explanation:**

References: [https://neosmart.net/wiki/bootrec/#Bootrec\\_in\\_Windows10](https://neosmart.net/wiki/bootrec/#Bootrec_in_Windows10)

**NEW QUESTION 74**

- (Exam Topic 4)

Your network an Active Directory domain named adatum.com. The domain contains 50 computers that runs Windows 8.1. The computer has locally installed desktop application that are compatible with Windows 10.

You need to upgrade the computers to windows 10, The solution must preserver the locally installed desktop applications.

Solution: You use Microsoft Deployment Toolkit (MDT) and create a task sequence. One each compute, you run the task sequence.

Does the meet the goal?

- A. Yes
- B. No

**Answer: B**

**NEW QUESTION 75**

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have two computers named Computer1 and Computer2 that run Windows 10.

You have an Azure Active Directory (Azure AD) user account named admin@contoso.com that is in the local Administrators group on each computer.

You sign in to Computer1 by using admin@contoso.com.

You need to ensure that you can use Event Viewer on Computer1 to connect to the event logs on Computer2. Solution: On Computer2, you enable the Remote Event Log Management inbound rule from Windows Defender Firewall.

Does this meet the goal?

- A. Yes
- B. No

**Answer: A**

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/previous-versions/windows/it-pro/windows-server-2008-R2-and-2008/cc76643>

**NEW QUESTION 77**

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a laptop named Computer1 that runs Windows 10.

When in range, Computer1 connects automatically to a Wi-Fi network named Wireless1. You need to prevent Computer1 from automatically connecting to Wireless1.

Solution: From the properties of the Wi-Fi adapter, you disable Link-Layer Topology Discovery Responder. Does this meet the goal?

- A. Yes
- B. No

**Answer:** B

#### NEW QUESTION 78

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains two computers named Computer1 and Computer2 that run Windows 10.

You need to modify the registry of Computer1 by using Registry Editor from Computer2. Which two registry hives can you modify? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. HKEY\_CURRENT\_USER
- B. HKEY\_LOCAL\_MACHINE
- C. HKEY\_USERS
- D. HKEY\_CLASSES\_ROOT
- E. HKEY\_CURRENT\_CONFIG

**Answer:** BC

#### NEW QUESTION 80

- (Exam Topic 4)

##### SIMULATION

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

Use the following login credentials as needed:

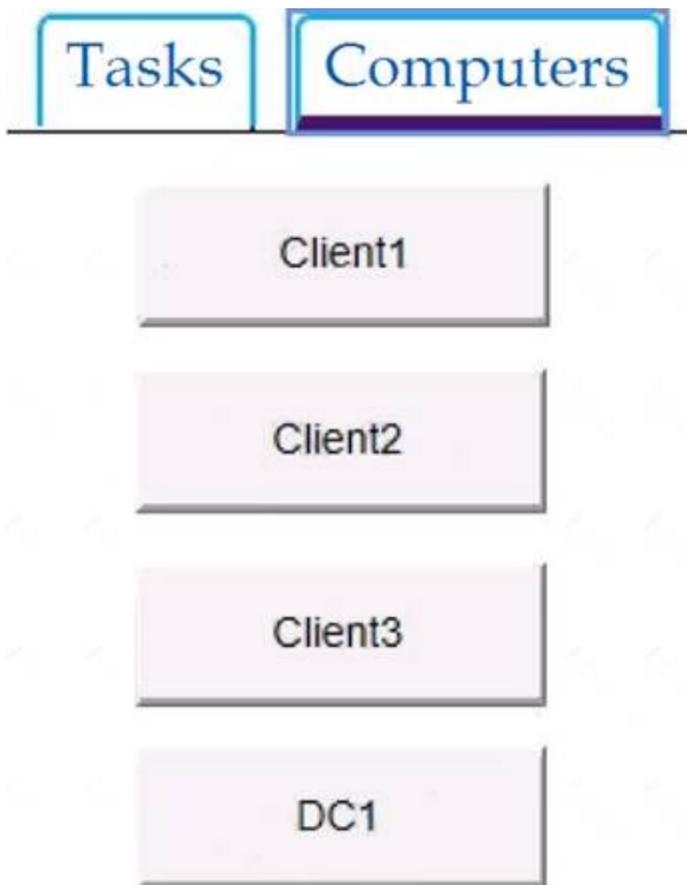

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only:

Lab Instance: 10921597

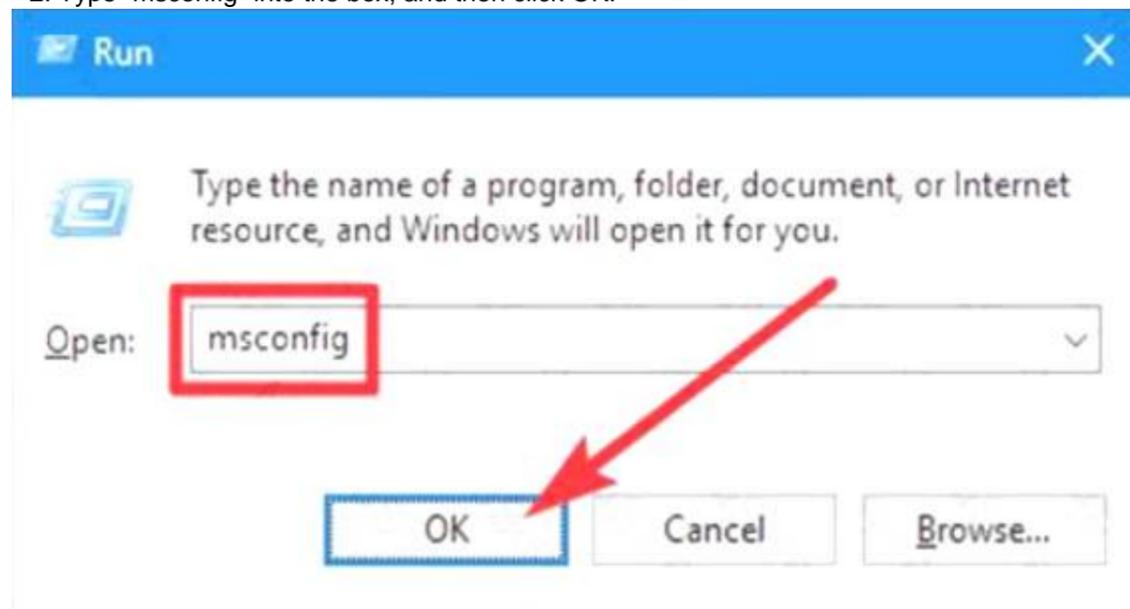

You need to ensure that Client3 starts in safe mode automatically the next time the computer restarts. After completing the task, you must NOT restart Client3. To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

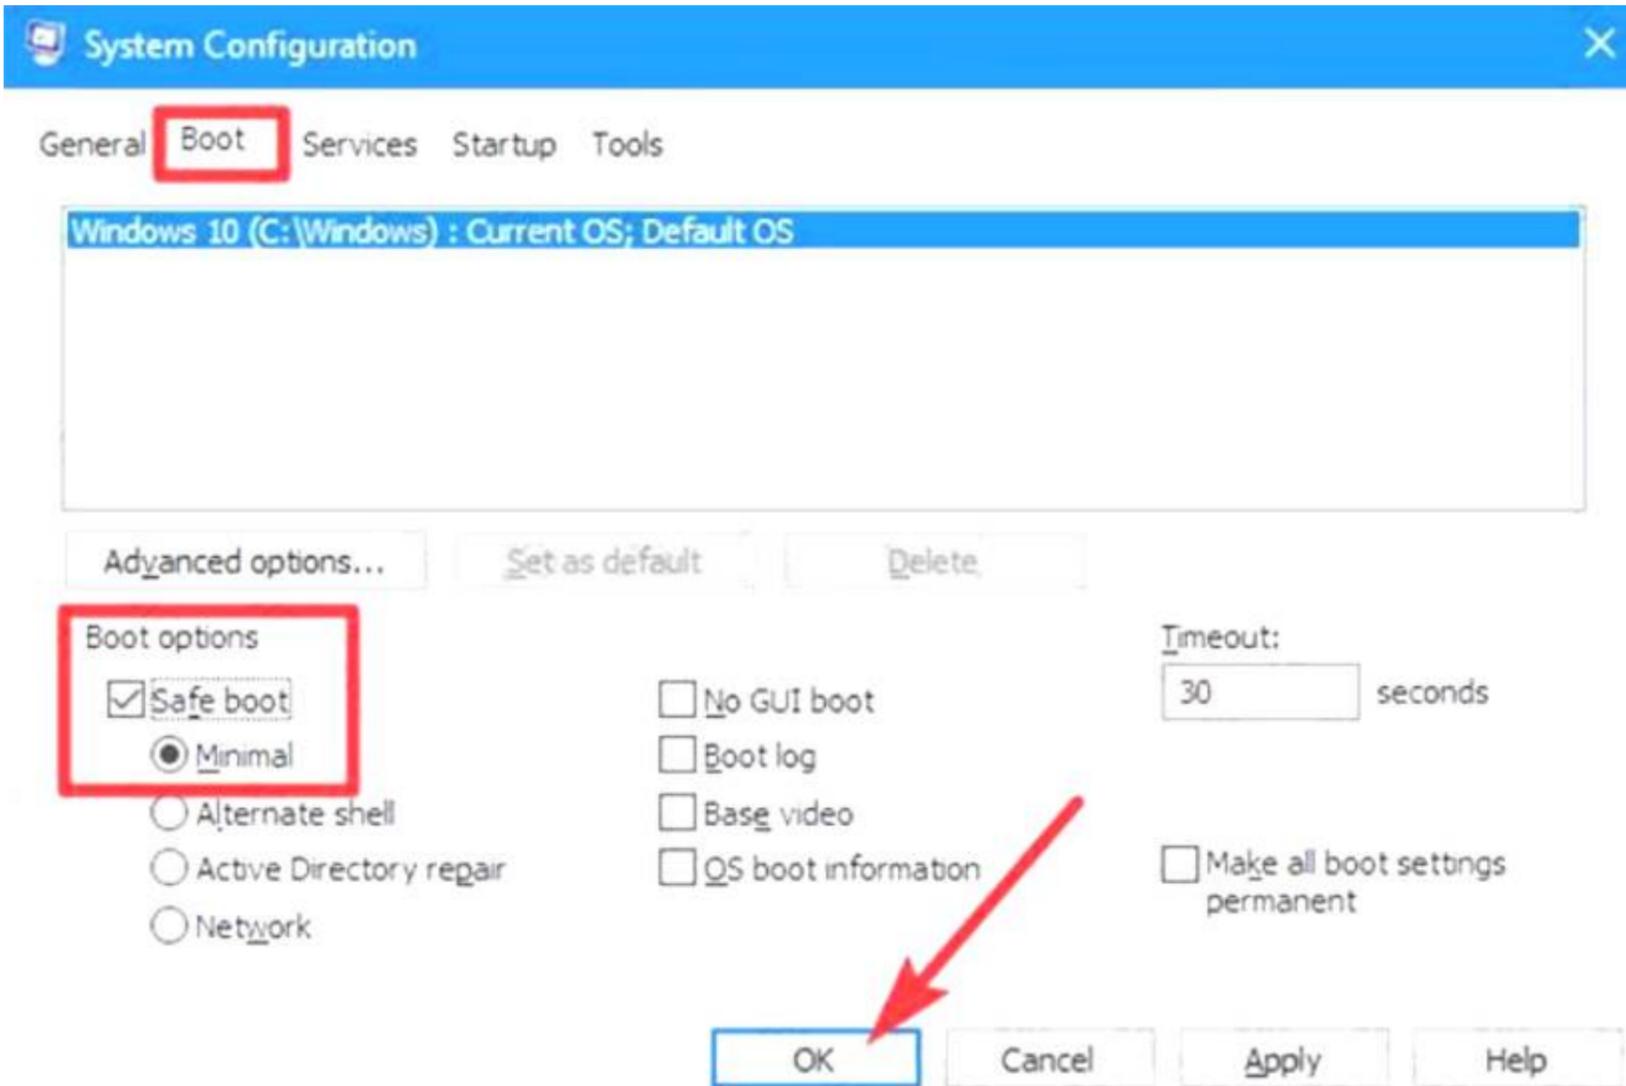

**Answer:** A

**Explanation:**

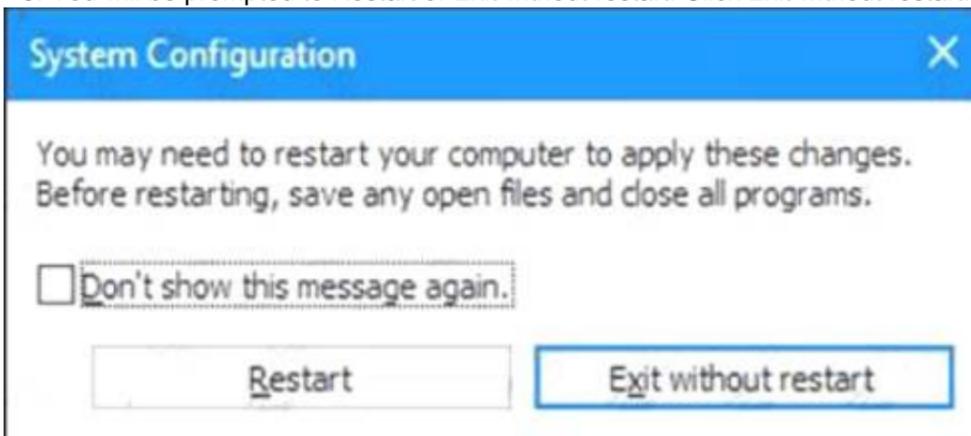

- \* 1. From Client3, open the System Configuration utility by pressing the Windows & R keys simultaneously to display the Run box .
- \* 2. Type "msconfig" into the box, and then click OK.

- \* 3. In the "System Configuration" window, switch to the "Boot" tab.
- \* 4. Enable the "Safe Boot" check box, and then make sure the "Minimal" option below that is selected. Click the "OK" button when you're done.

\* 5. You will be prompted to Restart or Exit without restart. Click Exit without restart.

 The following information is for technical support purposes only:  
 Lab Instance: 10921597

You need to identify the total number of events that have Event ID 63 in the Application event log. You must type the number of identified events into C:\Folder1\FileA.txt.  
 To complete this task, sign in to the required computer or computers and perform the required action.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

See explanation below.

- > Open Event Viewer.
- > Click the log that you want to filter, then click Filter Current Log from the Action pane or right-click menu. This will open the Filter Current Log dialog box.
- > You can specify a time period if you know approximately when the relevant events occurred. You can specify the event level, choosing between Critical, Warning, Verbose, Error and Information. If you select none of these, all event levels will be returned. You can't modify which event log is being checked as filters apply only to a single log.

➤ You can choose the event sources which have generated the log entries, and search for key words, users, or computers. You can also search using specific event IDs.

Reference:

<https://www.manageengine.com/products/active-directory-audit/kb/how-to/how-to-search-the-event-viewer.htm>

#### NEW QUESTION 89

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

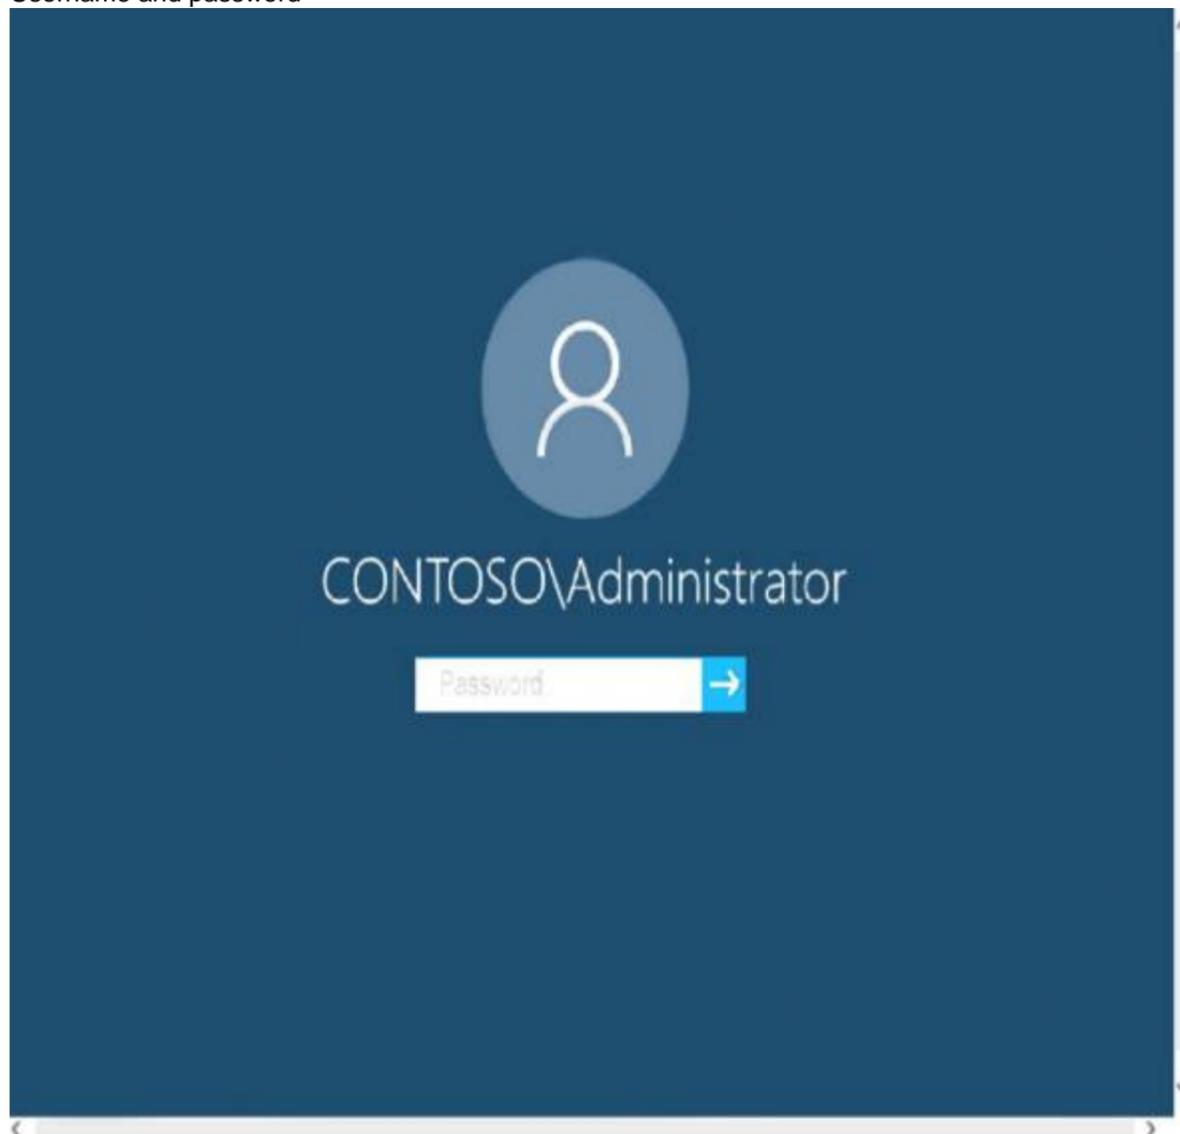

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

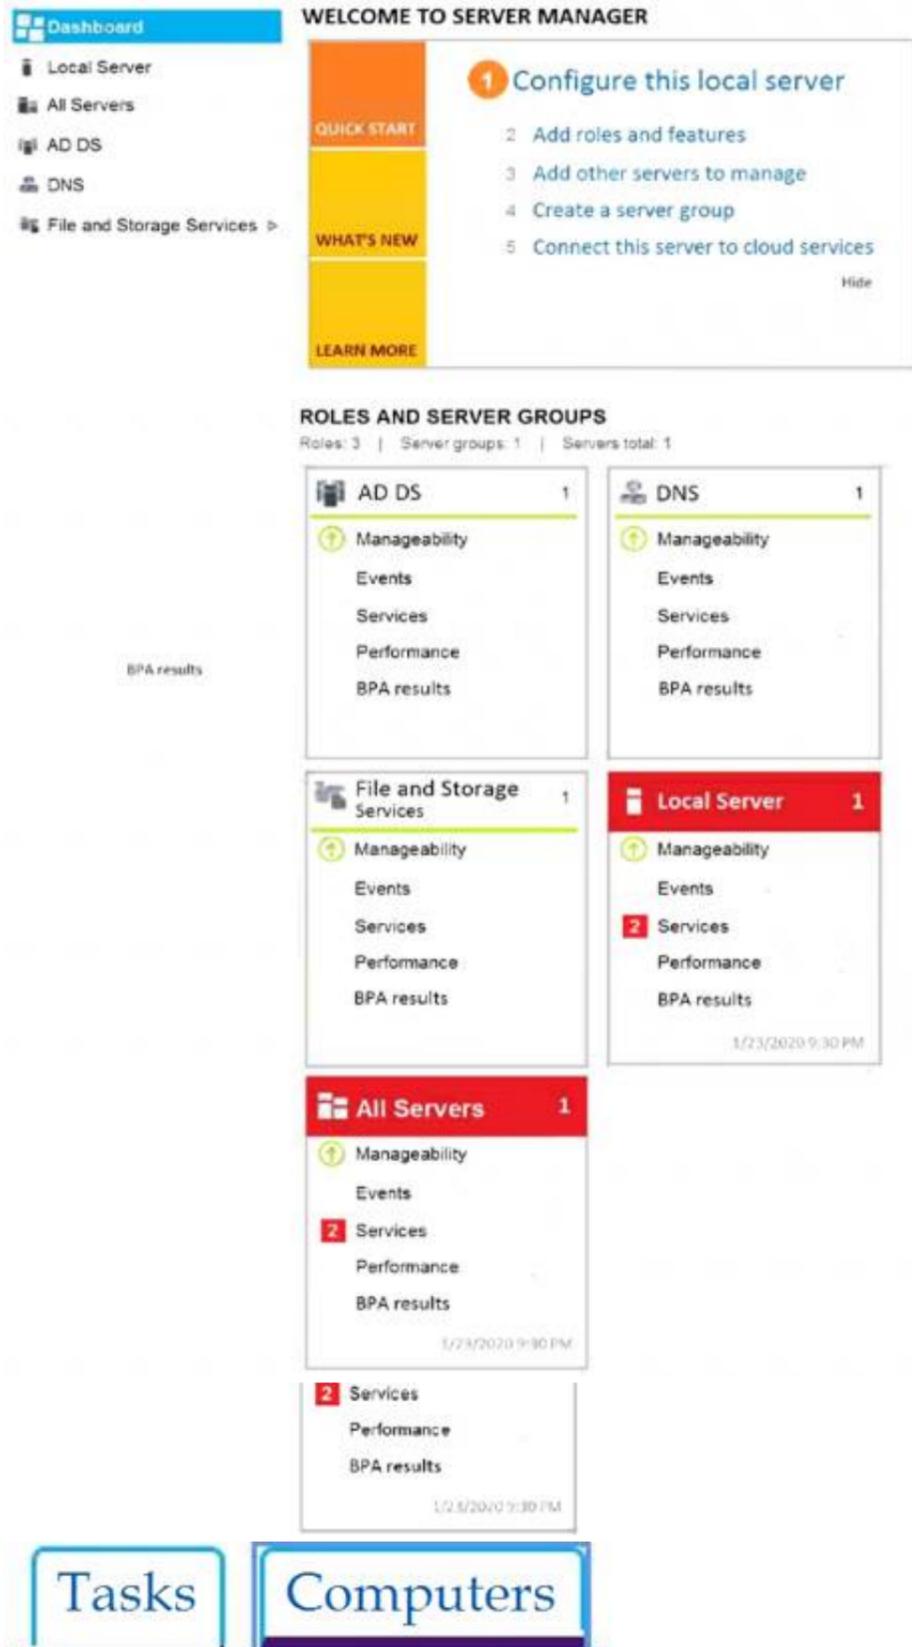

Use the following login credentials as needed:

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only: Lab Instance: 11145882

The screenshot shows the Windows Server Manager interface. On the left is a navigation pane with 'Dashboard' selected. The main area is titled 'WELCOME TO SERVER MANAGER' and contains a 'QUICK START' section with a numbered list: 1. Configure this local server, 2. Add roles and features, 3. Add other servers to manage, 4. Create a server group, 5. Connect this server to cloud services. Below this is the 'ROLES AND SERVER GROUPS' section, which displays a grid of role cards for 'AD DS', 'DNS', 'File and Storage Services', 'Local Server', and 'All Servers'. Each card lists sub-features like 'Manageability', 'Events', 'Services', 'Performance', and 'BPA results'. At the bottom of the interface are two buttons labeled 'Tasks' and 'Computers'.

You need to ensure that all the current and future users in the Active Directory domain can establish Remote Desktop connections to Client1. The solution must use the principle of least privilege.

To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Step 1. Add Remote Desktop Users to the Remote Desktop Users Group.

- Open Server Manager.
- From Tools menu, select Active Directory Users and Computers
- Double click at your domain on the left and then select Builtin.
- Open Remote Desktop Users on the right pane.
- At Members tab, click Add.
- Type the AD users that you want to give Remote access to the RDS Server and click OK.
- After selecting the remote desktop users, click OK again to close the window.

Step 2. Allow the log on through remote desktop Services.

\* 1. Open Group Policy Editor. To do that:

\* a. Simultaneously press the Windows + R keys to open run command box. 

\* b. Type gpedit.msc and press Enter.

\* 2. In Group Policy Editor navigate to: Computer Configuration > Windows Settings > Security Settings > Local Policies > User Rights Assignment.

\* 3. At the right Pane: double click at Allow log on through Remote Desktop Services.

\* 4. Click Add User or Group.

\* 5. Type remote and then click Check Names.

\* 6. Select the Remote Desktop Users and click OK.

\* 7. Click OK at 'Select users, computers...' window.

\* 8. Finally click OK again and close Group Policy Editor.

### NEW QUESTION 93

- (Exam Topic 4)

Your network contains an Active Directory domain named adatum.com that uses Key Management Service (KMS) for activation.

You deploy a computer that runs Windows 10 to the domain. The computer fails to activate.

You suspect that the activation server has an issue. You need to identify which server hosts KMS.

How should you complete the command? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

You have already prepared Client1 for remote management.  
 You need to forward all events from the Application event log on Client1 to DC1.  
 To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Configuring the event source computer

\* 1. Run the following command from an elevated privilege command prompt on the Windows Server domain controller to configure Windows Remote Management:

`winrm qc -q`

\* 2. Start group policy by running the following command:

`%SYSTEMROOT%\System32\gpedit.msc`

\* 3. Under the Computer Configuration node, expand the Administrative Templates node, then expand the Windows Components node, then select the Event Forwarding node.

\* 4. Right-click the SubscriptionManager setting, and select Properties. Enable the SubscriptionManager setting, and click the Show button to add a server address to the setting. Add at least one setting that specifies the event collector computer. The SubscriptionManager Properties window contains an Explain tab that describes the syntax for the setting.

\* 5. After the SubscriptionManager setting has been added, run the following command to ensure the policy is applied: `gpupdate /force`

Configuring the event collector computer

\* 1. Run the following command from an elevated privilege command prompt on the Windows Server domain controller to configure Windows Remote Management:

`winrm qc -q`

\* 2. Run the following command to configure the Event Collector service:

`wecutil qc /q`

\* 3. Create a source initiated subscription. This can either be done programmatically, by using the Event Viewer, or by using Wecutil.exe. If you use Wecutil.exe, you must create an event subscription XML file and use the following command:

`wecutil cs configurationFile.xml`

Reference:

<https://docs.microsoft.com/en-us/windows/win32/wec/setting-up-a-source-initiated-subscription#forwarding-the>

**NEW QUESTION 99**

- (Exam Topic 4)

You install Windows 10 Pro on a computer named CLIENT1.

You need to ensure that all per-user services are disabled on CLIENT1. The solution must minimize administrative effort.

What should you use?

- A. a Group Policy administrative template
- B. Device Manager
- C. Task Manager
- D. Group Policy preferences

**Answer:** D

**Explanation:**

References:

<https://docs.microsoft.com/en-us/windows/application-management/per-user-services-in-windows>

**NEW QUESTION 104**

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. Computer1 is in a workgroup. Computer1 contains the local users shown in the following table.

Name	Member of
User1	Group1, Group2
User2	Group1

You create a folder named Folder1 that has the permissions shown in the following table.

Principal	Access	Inherited from	Applies to
Group2	Deny Write	None	This folder, subfolders, and files
Group1	Allow Full control	None	This folder, subfolders, and files
Administrators	Allow Full control	None	This folder, subfolders, and files

You create a file named File1.txt in Folder1 and allow Group2 Full control permissions to File1.txt. For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can create a new file in Folder1	<input type="radio"/>	<input type="radio"/>
User1 can save changes to File1.txt	<input type="radio"/>	<input type="radio"/>
User2 can view the content of File1.txt	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

References:

<https://www.dell.com/support/article/za/en/zadhs1/sln156352/understanding-file-and-folder-permissions-in-win>

**NEW QUESTION 105**

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. Computer1 has the local users shown in the following table.

Name	Member of
User1	Administrators
User2	Event Log readers
User3	Device Owners
User4	Power Users
User5	Users

Which users can analyze the event logs on Computer1? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Users who can analyze security event logs:

▼
User1 only
User1 and User2 only
User1 and User2, and User3 only
User1, User2, User3, and User4 only
User1, User2, User3, User4, and User5

Users who can analyze system event logs:

▼
User1 only
User1 and User2 only
User1 and User2, and User3 only
User1, User2, User3, and User4 only
User1, User2, User3, User4, and User5

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

References:

<https://docs.microsoft.com/en-us/windows/security/identity-protection/access-control/local-accounts#sec-localsy>

**NEW QUESTION 106**

- (Exam Topic 4)

You plan to deploy Windows 10 to 100 secure computers.

You need to select a version of Windows 10 that meets the following requirements:

- Uses Microsoft Edge as the default browser
- Minimizes the attack surface on the computer
- Supports joining Microsoft Azure Active Directory (Azure AD)
- Only allows the installation of applications from the Microsoft Store

What is the best version to achieve the goal? More than one answer choice may achieve the goal. Select the BEST answer.

- A. Windows 10 Pro in S mode
- B. Windows 10 Home in S mode
- C. Windows 10 Pro
- D. Windows 10 Enterprise

**Answer:** A

**Explanation:**

References:

Uses Microsoft Edge as the default browser Minimizes the attack surface on the computer Supports joining Microsoft Azure Active Directory (Azure AD) Only allows the installation of applications from the Microsoft Store <https://docs.microsoft.com/es-es/windows/deployment/s-mode>

**NEW QUESTION 107**

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. Computer1 is in a workgroup. Computer1 contains the local users shown in the following table.

Name	Member of
Administrator	Administrators, Users
User1	Backup Operators, Users
User2	Device Owners, Users
User3	Users

The Users group has Modify permissions to a folder named D:\Folder1. User3 creates a file named File1.docx in Folder1. Which users can take ownership of File1.docx?

- A. Administrator and User1 only
- B. Administrator only
- C. Administrator, User1, and User2
- D. Administrator and User2 only

**Answer:** B

**Explanation:**

Only a member of the Administrator's group can take ownership of a file or folder.

**NEW QUESTION 112**

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains three computers named Computer1, Computer2, and Computer3 that run Windows 10. The computers are on the same network and have network connectivity.

Windows Defender Firewall on Computer1 has the server-to-server connection security rule shown in the following table.

Name	Endpoint 1	Endpoint 2	Authentication mode
Rule1	Any	Any	Require inbound and request outbound

Windows Defender Firewall on Computer2 has the server-to-server connection security rule shown in the following table.

Name	Endpoint 1	Endpoint 2	Authentication mode
Rule1	Any	Any	Do not authenticate

Windows Defender Firewall on Computer3 has the server-to-server connection security rule shown in the following table.

Name	Endpoint 1	Endpoint 2	Authentication mode
Rule1	Any	Any	Require inbound and request outbound

All the connection security rules are enabled and configured to use only the Computer (Kerberos VS) authentication method.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

**Statements**

**Yes No**

If Computer1 initiates communication to Computer2, network traffic will be encrypted.

Computer2 can establish communications to Computer3.

If Computer3 initiates communication to Computer1, network traffic will be encrypted.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Graphical user interface, text, application Description automatically generated

References:

<https://docs.microsoft.com/en-us/windows/security/threat-protection/windows-firewall/create-an-authentication>

**NEW QUESTION 114**

- (Exam Topic 4)

You have a workgroup computer that runs Windows 10.

You need to set the minimum password length to 12 characters. What should you use?

- A. Local Group Policy Editor
- B. User Accounts in Control Panel
- C. System Protection in System Properties
- D. Sign-in options in the Settings app

**Answer:** A

**NEW QUESTION 119**

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You manage devices that run Windows 10.

Ten sales users will travel to a location that has limited bandwidth that is expensive. The sales users will be at the location for three weeks.

You need to prevent all Windows updates from downloading for the duration of the trip. The solution must not prevent access to email and the Internet.

Solution: From Update & Security in the Settings app, you turn on Pause Updates. Does this meet the goal?

- A. Yes

B. No

**Answer:** A

**Explanation:**

References:

<https://www.makeuseof.com/tag/5-ways-temporarily-turn-off-windows-update-windows-10/>

**NEW QUESTION 124**

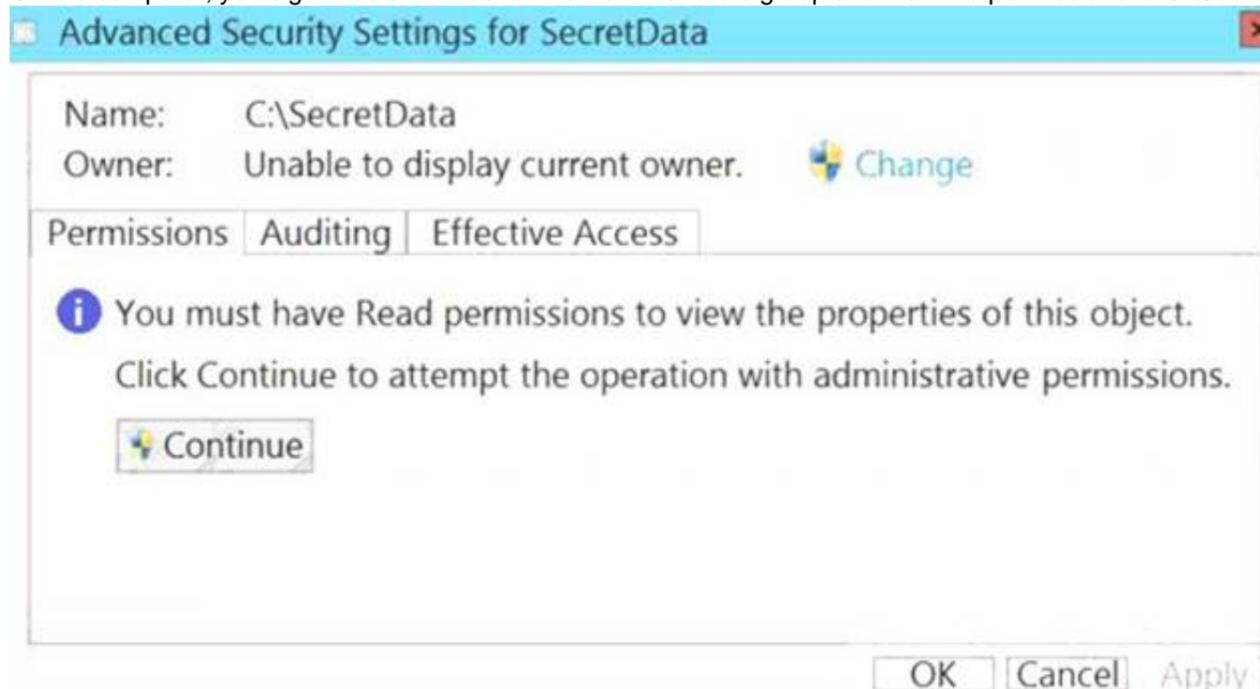

- (Exam Topic 4)

User1 is a member of the Administrators group on a computer that runs Windows 10.

When User1 attempts to view the security settings of a folder named C:\SecretData, the user receives the message in the Security exhibit.

On the computer, you sign in as a member of the Administrators group and view the permissions to C:\SecretData as shown in the Permissions exhibit.

You need to restore Use1's access to C:\SecretData. What should you do first?

- A. From the Permissions tab of Advanced Security Settings for SecretData, select Change to take ownership of the folder.
- B. From the Permissions tab of Advanced Security Settings for SecretData, select Continue to attempt the operation by using administrative privileges.
- C. Assign User1 Full control permissions to the C folder and set the inheritance to This folder, subfolders and files.
- D. From an elevated command prompt, run cacls.exe c:\secretdata /g user1:F.

**Answer:** B

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/troubleshoot/windows-server/windows-security/dont-have-permission-access-f>

**NEW QUESTION 127**

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain. The domain contains a computer named Computer1 that runs Windows 8.1.

Computer1 has apps that are compatible with Windows 10.

You need to perform a Windows 10 in-place upgrade on Computer1.

Solution: You copy the Windows 10 installation media to a Microsoft Deployment Toolkit (MDT) deployment share. You create a task sequence, and then you run the MDT deployment wizard on Computer1.

Does this meet the goal?

- A. Yes
- B. No

**Answer:** A

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/deploy-windows-mdt/upgrade-to-windows-10-with-the>

**NEW QUESTION 132**

- (Exam Topic 4)

You have 200 computers that run Windows 10 and are joined to an Active Directory domain.

You need to enable Windows Remote Management (WinRM) on all the computers by using Group Policy.

Which three actions should you perform? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. Set the Startup Type of the Windows Remote Management (WS-Management) service to Automatic.
- B. Enable the Windows Firewall: Allow inbound remote administration exception setting.
- C. Enable the Allow remote server management through WinRM setting.
- D. Enable the Windows Firewall: Allow inbound Remote Desktop exceptions setting.
- E. Enable the Allow Remote Shell access setting.
- F. Set the Startup Type of the Remote Registry service to Automatic.

**Answer:** ABC

**Explanation:**

References:

<https://support.auvik.com/hc/en-us/articles/204424994-How-to-enable-WinRM-with-domain-controller-Group-P>

**NEW QUESTION 137**

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10.

You need to prevent standard users from changing the wireless network settings on Computer1. The solution must allow administrators to modify the wireless network settings.

What should you use?

- A. Windows Configuration Designer
- B. MSConfig
- C. Local Group Policy Editor
- D. an MMC console that has the Group Policy Object Editor snap-in

**Answer:** C

**NEW QUESTION 142**

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain. The domain contains a computer named Computer1 that runs Windows 8.1.

Computer1 has apps that are compatible with Windows 10.

You need to perform a Windows 10 in-place upgrade on Computer1.

Solution: You add Windows 10 startup and install images to a Windows Deployment Services (WDS) server. You start Computer1 by using WDS and PXE, and then you initiate the Windows 10 installation.

Does this meet the goal?

- A. Yes
- B. No

**Answer:** B

**Explanation:**

Use Microsoft Deployment Toolkit (MDT) instead.

**NEW QUESTION 144**

- (Exam Topic 4)

You have a workgroup computer named Computer1 that runs Windows 10 and has the users shown in the following table.

Name	Member of
User1	Administrators
User2	Power Users, Users
User3	Backup Operators, Users
User4	Users

You plan to add a key named Key1 to the following three registry branches:

- > HKEY\_CURRENT\_CONFIG\Software
- > HKEY\_LOCAL\_MACHINES\Software
- > HKEY\_CURRENT\_USER\Software

You need to identify which users can add Key1.

What user or users should you identify for each branch? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

HKEY\_CURRENT\_CONFIG\Software:

User1 only  
 User1 and User2 only  
 User1 and User3 only  
 User1, User2, User3, and User4

HKEY\_LOCAL\_MACHINE\Software:

User1 only  
 User1 and User2 only  
 User1 and User3 only  
 User1, User2, User3, and User4

HKEY\_CURRENT\_USER\Software:

User1 only  
 User1 and User2 only  
 User1 and User3 only  
 User1, User2, User3, and User4

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1 and Box 2.

These are system-wide registry keys so only Administrators can modify them. Box 3.

This key affects only the logged in user. Therefore, any user can modify this key.

**NEW QUESTION 148**

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain named contoso.com. The domain contains the users shown in the following table.

Name	Member of
User2	Domain Users
User3	Domain Admins
User4	Server Operators

You have a computer named Computer1 that runs Windows 10 and is in a workgroup.

A local standard user on Computer1 named User1 joins the computer to the domain and uses the credentials of User2 when prompted.

You need to ensure that you can rename Computer1 as Computer33. Solution: You use the credentials of User2 on Computer1.

Does this meet the goal?

- A. Yes
- B. No

**Answer:** B

**Explanation:**

Renaming a domain-joined computer will also rename the computer account in the domain. To do this, you need domain administrator privileges.

User2 is a domain user, not an administrator. Use User3's credentials instead. References:

<https://docs.microsoft.com/en-us/windows/security/identity-protection/access-control/active-directory-security-g>

**NEW QUESTION 152**

- (Exam Topic 4)

You are a network administrator at your company.

A user attempts to start a computer and receives the following error message: "Bootmgr is missing." You need to resolve the issue.

You start the computer in the recovery mode.

Which command should you run next? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

▼	▼
Bootrec	/FixMbr
Diskpart	/RebuildBcd
Sfc	/ScanNow
	/offbootdir

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

References: <https://neosmart.net/wiki/bootmgr-is-missing/>

**NEW QUESTION 153**

- (Exam Topic 4)

You enable Windows PowerShell remoting on a computer that runs Windows 10. You need to limit which PowerShell cmdlets can be used in a remote session.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

**Actions**

**Answer Area**

Run the <code>New-PSSession</code> cmdlet.
Create a PS1 file that contains a list of the cmdlets.
Run the <code>New-PSSessionConfigurationFile</code> cmdlet.
Create a PSSC file that contains a list of the cmdlets.
Run the <code>Register-PSSessionConfiguration</code> cmdlets.
Run the <code>Enter-PSSession</code> cmdlet.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

- \* 1. New
- \* 2. Register
- \* 3. Enter

<https://devblogs.microsoft.com/scripting/build-constrained-powershell-endpoint-using-configuration-file/>

**NEW QUESTION 156**

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A user named User1 has a computer named Computer1 that runs Windows 10. Computer1 is joined to an Azure Active Directory (Azure AD) tenant named contoso.com. User1 joins Computer1 to contoso.com by using user1@contoso.com.

Computer1 contains a folder named Folder1. Folder1 is in drive C and is shared as Share1. Share1 has the permission shown in the following table.

Group	Share permission
Everyone	Full control
AzureAD\user1@contoso.com	Owner

A user named User2 has a computer named Computer2 that runs Windows 10. User2 joins Computer2 to contoso.com by using user2@contoso.com. User2 attempts to access Share1 and receives the following error message: "The username or password is incorrect."

You need to ensure that User2 can connect to Share1.

Solution: In Azure AD, you create a group named Group1 that contains User1 and User2. You grant Group1 Modify access to Folder1. Does this meet the goal?

- A. Yes
- B. No

**Answer:** A

**Explanation:**

References:

<https://docs.microsoft.com/en-us/previous-versions/windows/it-pro/windows-server-2008-R2-and-2008/cc75417>

**NEW QUESTION 161**

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. Computer1 has an IP address of 10.10.1.200 and a subnet mask of 255.255.255.0. You configure the proxy settings on Computer1 as shown in the following exhibit.

## Manual proxy setup

Use a proxy server for Ethernet or Wi-Fi connections. These settings don't apply to VPN connections.

Use a proxy server

Address	Port
http://proxy.contoso.com	8080

Use the proxy server except for addresses that start with the following entries. Use semicolons (;) to separate entries.

\*.contoso.com;  
\*.microsoft.com;192.168.1.25;\*.azure.com

Don't use the proxy server for local (intranet) addresses

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic. NOTE: Each correct selection is worth one point.

Connection attempts to www.contoso.com will [answer choice].

bypass the proxy only when using Microsoft Edge  
use the proxy only when using Microsoft Edge  
bypass the proxy for all applications  
use the proxy for all applications

If Computer1 attempts to connect to [answer choice] from Microsoft Edge, the proxy will be bypassed.

https://10.10.0.100  
https://store.microsoft.com  
ftp://192.168.1.10

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

References:

<https://www.howtogeek.com/tips/how-to-set-your-proxy-settings-in-windows-8.1/>

**NEW QUESTION 164**

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen. You have a workgroup computer that runs Windows 10. The computer contains the local user accounts shown in the following table.

Name	Member of
Administrator	Administrators
User1	Administrators
User2	Users
User3	Users

You need to configure the desktop background for User1 and User2 only.

Solution: You create two new local Group Policy Objects (GPOs) and apply one GPO to User1 and the other GPO to User2. You configure the Desktop Wallpaper setting in each GPO.

Does this meet the goal?

- A. Yes
- B. No

**Answer:** A

**Explanation:**

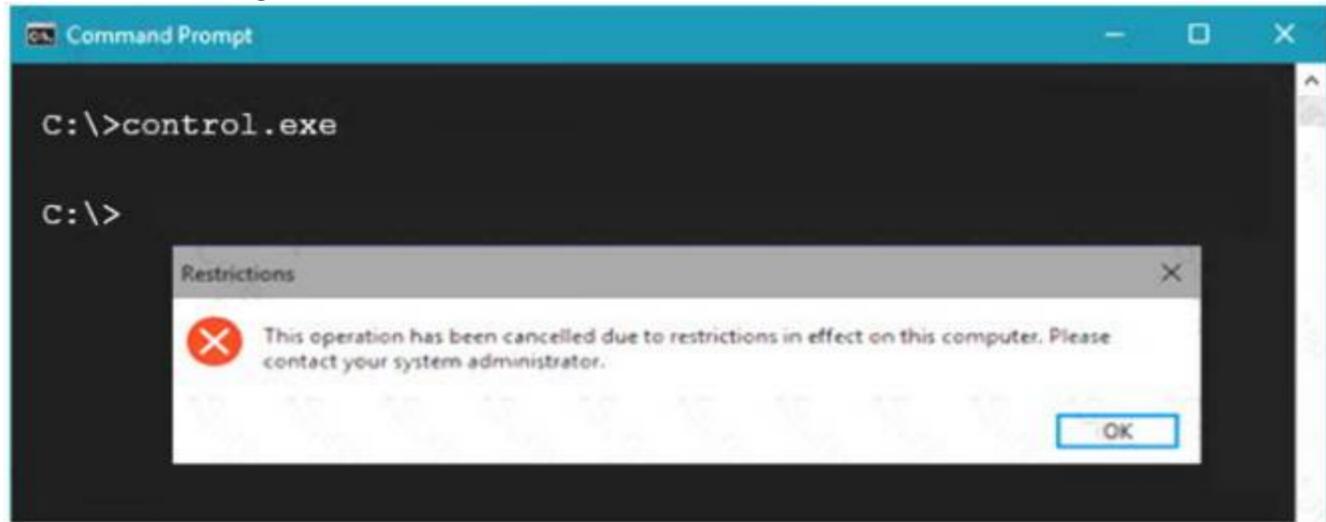

Reference:

<https://www.windowscentral.com/how-apply-local-group-policy-settings-specific-users-windows-10>

### NEW QUESTION 169

- (Exam Topic 4)

You have a computer that runs Windows 10 and is joined to Azure Active Directory (Azure AD). You attempt to open Control Panel and receive the error message shown on the following exhibit.

You need to be able to access Control Panel. What should you modify?

- A. the PowerShell execution policy
- B. the Local Group Policy
- C. the Settings app
- D. a Group policy preference

**Answer:** B

**Explanation:**

References:

<https://windows10skill.com/this-operation-has-been-cancelled-due-to-restrictions-in-effect-on-this-pc/>

### NEW QUESTION 174

- (Exam Topic 4)

You have a workgroup computer named Computer1 that runs Windows 10. Computer1 has the user accounts shown in the following table.

Name	Member of
User1	Users
User2	Guests
User3	Users, Administrators
User4	Users, Guests
Administrator	Administrators

User3, User4, and Administrator sign in and sign out on Computer1. User1 and User2 have never signed in to Computer1.

You are troubleshooting policy issues on Computer1. You sign in to Computer1 as Administrator. You add the Resultant Set of Policy (RsoP) snap-in to an MMC console.

Which users will be able to sign in on Computer1?

- A. User1, User3, and User4 only
- B. Administrator only
- C. User1, User2, User3, User4, and Administrator
- D. User3, User4, and Administrator only

**Answer:** D

**Explanation:**

The Interactive logon: Number of previous logons to cache (in case domain controller is not available) policy setting determines whether a user can log on to a Windows domain by using cached account information. Logon information for domain accounts can be cached locally so that, if a domain controller cannot be contacted on subsequent logons, a user can still log on.

References:

<https://docs.microsoft.com/en-us/windows/security/threat-protection/security-policy-settings/interactive-logon-n>

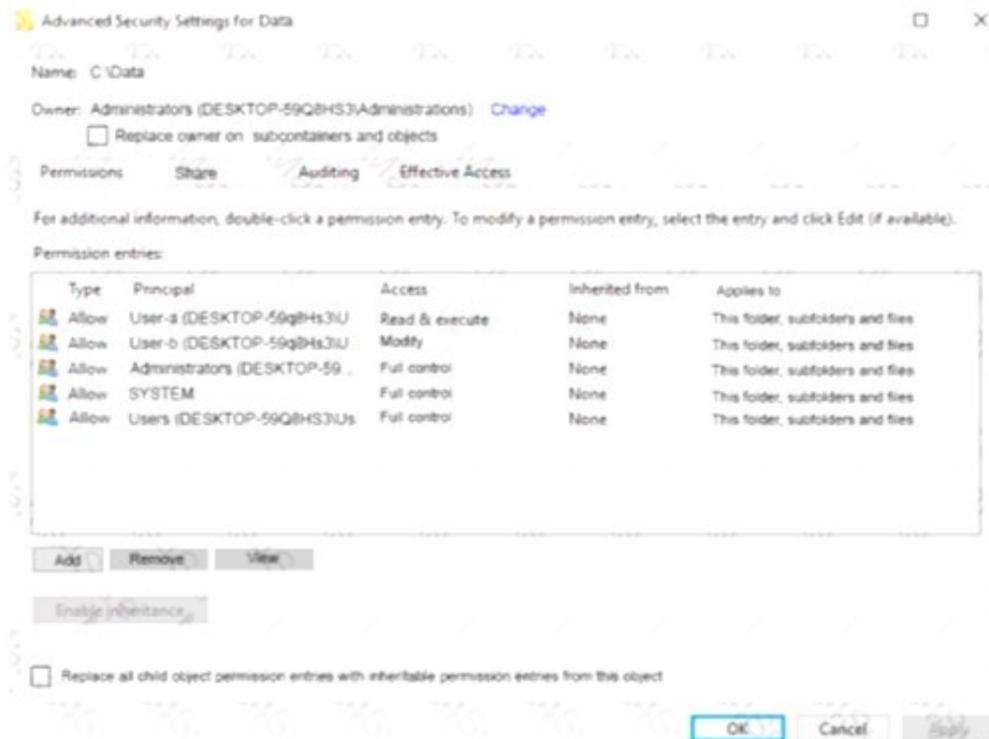

**NEW QUESTION 178**

- (Exam Topic 4)

You have a computer named Computer5 that runs Windows 10 that is used to share documents in a workgroup.

You create three users named User-a, User-b, User-c. The users plan to access Computer5 from the network only.

You have a folder named Data. The Advanced Security Settings for the Data folder are shown in the Security exhibit. (Click the Security Exhibit tab.)

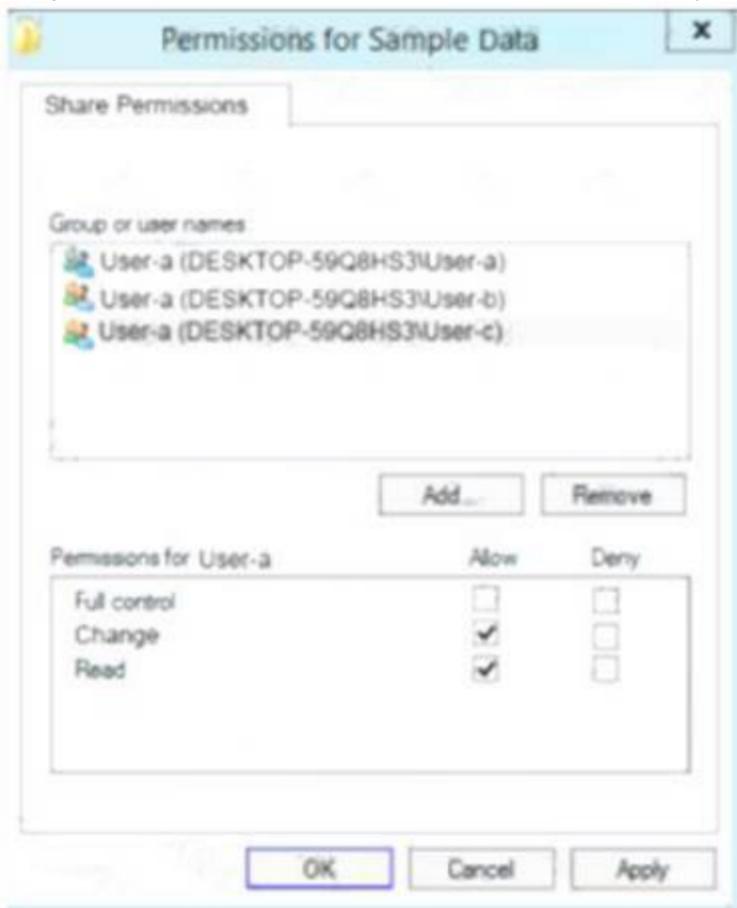

You share the Data folder. The permission for User-a are shown in the User-a exhibit (Click the User-a tab.)

The permissions for user-b are shown in the User-b exhibit. (Click the User-b tab.)

The permissions for user-c are shown in the User-c exhibit. (Click the User-c tab.)

For each of the following statements, select Yes if the statements is true. Otherwise, select No.  
 NOTE: Reach correct selection is worth one point.

**Statements**

**Yes**

**No**

User-a can modify files in the Data share.

User-b can delete files in the Data share.

User-c can read files in the Data share.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**  
 No No Yes

**NEW QUESTION 181**

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10 and has the users shown in the following table.

Name	Member of
User1	Users, Group1
User2	Administrators

Computer1 contains the folders shown in the following table.

Name	Path	Permission	Share permission
Folder1	D:\Folder1	Administrators: Full control Group1: Read	Group1: Full control
Folder2	E:\Folder2	Administrators: Full control	None

You move Folder1 into Folder2.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can connect to Folder1 by using a path of \\Computer1\Folder1 UNC.	<input type="radio"/>	<input type="radio"/>
User1 can read the content in E:\Folder2\Folder1 when the user signs in to Computer1.	<input type="radio"/>	<input type="radio"/>
User2 can connect to Folder1 by using a path of \\Computer1\E\$\Folder2\Folder1 UNC.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: No

If you move a shared folder, the share will no longer work.

Box 2: No

Folder1 will inherit the permissions of Folder2. User1 does not have permission to access Folder2.

Box 3: Yes

User2 is a member of the Administrators group so he can access the administrative share \\Computer1\E\$. User2 has Full Control permission to Folder2 so he can access \\Computer1\E\$\Folder2.

Folder1 will inherit the permissions of Folder2 so User2 can access \\Computer1\E\$\Folder2\Folder1.

**NEW QUESTION 186**

- (Exam Topic 4)

You have several computers that run Windows 10.

All users have Microsoft OneDrive for Business installed. Users frequently save files to their desktop.

You need to ensure that all the users can recover the files on their desktop from OneDrive for Business. Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Copy ADMX and ADML files to C:\Users\Public\Desktop\
- B. From Backup in the Settings app, add a drive
- C. Configure the Silently move Windows known folders to OneDrive settings
- D. Copy ADMX and ADML files to C:\Windows\PolicyDefinitions
- E. Configure the Save documents to OneDrive by default setting

**Answer:** CD

**Explanation:**

References:

<https://docs.microsoft.com/en-us/onedrive/plan-onedrive-enterprise> <https://docs.microsoft.com/en-us/onedrive/use-group-policy#KFMOptInNoWizard>

**NEW QUESTION 188**

- (Exam Topic 4)

You have an Azure Active Directory (Azure AD) tenant that contains a user named user1@contoso.com. You have a computer named Computer1 that runs Windows 10.

You join Computer1 to Azure AD. You enable Remote Desktop on Computer1.

User1@contoso.com attempts to connect to Computer1 by using Remote Desktop and receives the following error message: "The logon attempt failed."

You need to ensure that the user can connect to Computer1 by using Remote Desktop. What should you do first?

- A. In Azure AD, assign user1@contoso.com the Cloud device administrator role.
- B. From the local Group Policy, modify the Allow log on through Remote Desktop Services user right.
- C. In Azure AD, assign user1@contoso.com the Security administrator role.

D. On Computer1, create a local user and add the new user to the Remote Desktop Users group.

**Answer:** D

**Explanation:**

References:  
<https://docs.microsoft.com/en-us/windows/client-management/connect-to-remote-aadj-pc>

**NEW QUESTION 189**

- (Exam Topic 4)

You have 15 computers that run Windows 10. Each computer has two network interfaces named Interface1 and Interface2. You need to ensure that network traffic uses Interface1, unless Interface1 is unavailable. What should you do?

- A. Run the Set-NetIPInterface –InterfaceAlias Interface1 –InterfaceMetric 1 command.
- B. Run the Set-NetAdapterBinding –Name Interface2 –Enabled \$true –ComponentID ms\_tcpip – ThrottleLimit 0 command.
- C. Set a static IP address on Interface 1.
- D. From Network Connections in Control Pane, modify the Provider Order.

**Answer:** A

**Explanation:**

References:  
<https://tradingtechnologies.atlassian.net/wiki/spaces/KB/pages/27439127/How+to+Change+Network+Adapter+> <https://docs.microsoft.com/en-us/powershell/module/nettcpip/set-netipinterface?view=win10-ps>

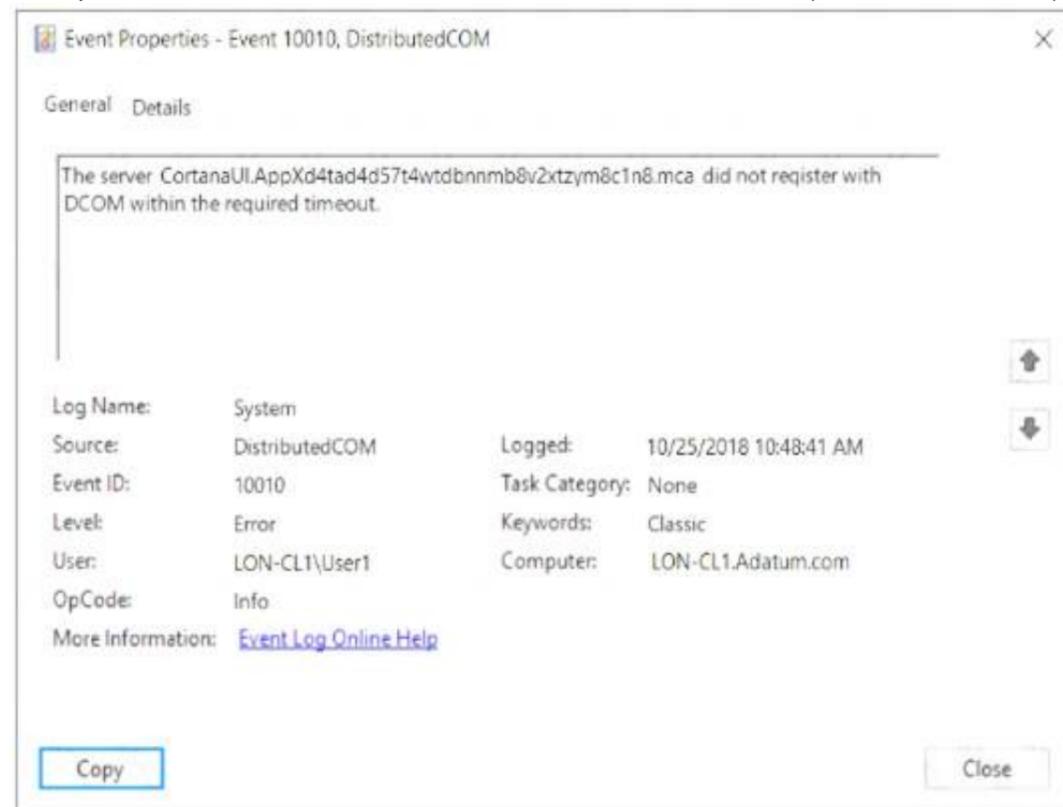

**NEW QUESTION 193**

- (Exam Topic 4)

You have a computer named LON-CL1.Adatum.com that runs Windows 10. From Event Viewer, you create a custom view named View1 that has the following filter:

- > User: User1
- > Logged: Any time
- > Event logs: System
- > Computer: LON-CL1
- > Event IDs: 10000 – 11000
- > Event level: Error, Verbose

You open Event Viewer and discover the event shown in the exhibit. (Click the Exhibit tab.)

The event does not appear in View1. You need to ensure that the event appears in View1. What should you do?

- A. Add a Task Category setting to the filter.
- B. Add the computer account to the Event Log Readers group.
- C. Create an event subscription.
- D. Modify the Computer setting in the filter.

**Answer:** D

**Explanation:**

References:  
<https://www.techrepublic.com/article/how-to-use-custom-views-in-windows-10s-event-viewer/>

**NEW QUESTION 194**

- (Exam Topic 4)

Your network contains an Active Directory domain named adatum.com. The domain contains two computers named Computer1 and Computer2 that run Windows 10.

The domain contains the user accounts shown in the following table.

Name	Member of
User1	Domain Admins
User2	Domain Users
User3	Domain Users

Computer2 contains the local groups shown in the following table.

Name	Members
Group1	ADATUM\User2 ADATUM\User3
Group2	ADATUM\User2
Group3	ADATUM\User3
Administrators	ADATUM\Domain Admins ADATUM\User3
Remote Desktop Users	Group1

The relevant user rights assignments for Computer2 are shown in the following table.

Policy	Security Setting
Allow log on through Remote Desktop Services	Administrators, Remote Desktop Users
Deny log on through Remote Desktop Services	Group2
Deny log on locally	Group3

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can establish a Remote Desktop session to Computer2.	<input type="radio"/>	<input type="radio"/>
User2 can establish a Remote Desktop session to Computer2.	<input type="radio"/>	<input type="radio"/>
User3 can establish a Remote Desktop session to Computer2.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: Yes

User1 is an administrator and has the Allow log on through Remote Desktop Services.

Box 2: No

User2 is a member of Group2 which has the Deny log on through Remote Desktop Services.

Box 3: Yes

User3 is a member of the administrators group and has the Allow log on through Remote Desktop Services.

Note: Deny permissions take precedence over Allow permissions. If a user belongs to two groups, and one of them has a specific permission set to Deny, that user is not able to perform tasks that require that permission even if they belong to a group that has that permission set to Allow.

References:

<https://docs.microsoft.com/en-us/azure/devops/organizations/security/about-permissions?view=azure-devops&ta>

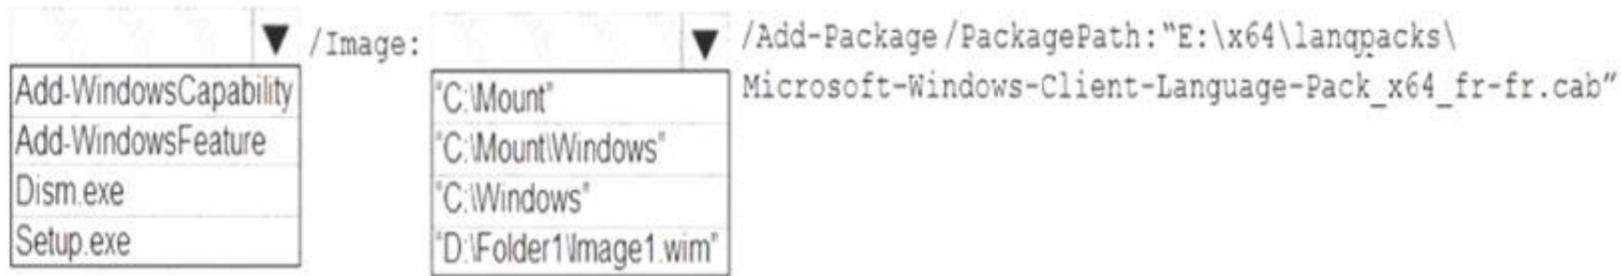

**NEW QUESTION 197**

- (Exam Topic 4)

You have the source files shown in the following table.

Source	Location
Custom Windows 10 image	D:\Folder1\Image1.wim
Windows 10 language pack DVD	E:\

You mount an image from Image1.wim to a folder named C:\Mount. You need to add the French language pack to the mounted image. How should you complete the command? To answer, select the appropriate options in the answer area.  
 NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Note: The referenced document has the mount directory as C:\Mount\Windows. In this question, the mount directory is C:\Mount.

Reference:

<https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/add-language-packs-to-windows>

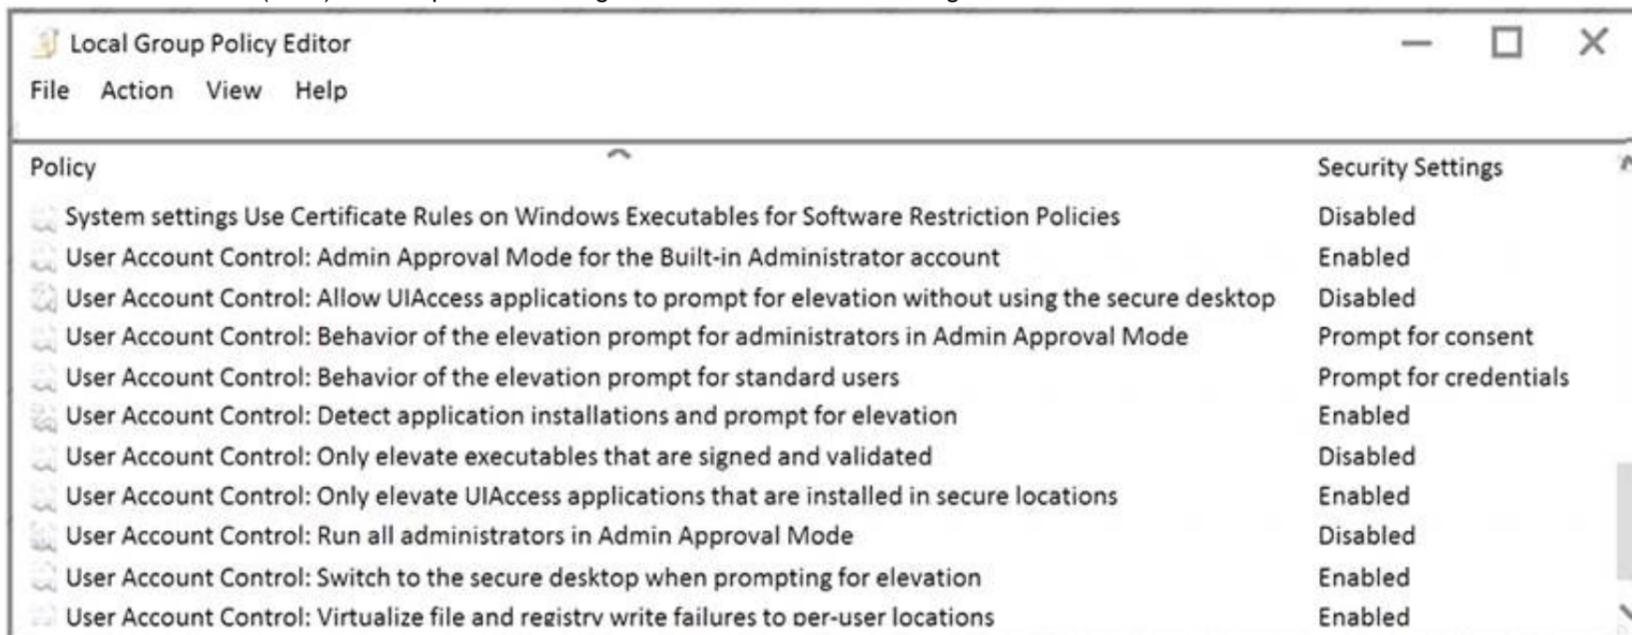

**NEW QUESTION 198**

- (Exam Topic 4)

You have a workgroup computer named Computer1 that runs Windows 10 and has the users shown in the following table.

Name	Member of
Administrator	Administrators
User1	Administrators
User2	Users

User Account Control (UAC) on Computer1 is configured as shown in the following exhibit.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
When Administrator opens a command prompt by using the Run as administrator option, the user will be prompted for consent.	<input type="radio"/>	<input type="radio"/>
When User1 opens a command prompt by using the Run as administrator option, the user will be prompted for consent.	<input type="radio"/>	<input type="radio"/>
When User2 opens a command prompt by using the Run as administrator option, the user will be prompted for credentials.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: Yes

User Account Control: Behavior of the elevation prompt for administrators in Admin Approval Mode is set to Prompt for consent. When an operation requires elevation of privilege, the user is prompted to select either Permit or Deny. If the user selects Permit, the operation continues with the user's highest available privilege.

Box 2: Yes

User1 is a member of Administrators group.

User Account Control: Behavior of the elevation prompt for administrators in Admin Approval Mode is set to Prompt for consent. When an operation requires elevation of privilege, the user is prompted to select either Permit or Deny. If the user selects Permit, the operation continues with the user's highest available privilege.

Box 3: Yes

User Account Control: Behavior of the elevation prompt for standard users is set to Prompt for credentials (Default). When an operation requires elevation of privilege, the user is prompted to enter an administrative user name and password. If the user enters valid credentials, the operation continues with the applicable privilege.

References:

<https://docs.microsoft.com/en-us/windows/security/identity-protection/user-account-control/user-account-control>

**NEW QUESTION 202**

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have two computers named Computer1 and Computer2 that run Windows 10.

You have an Azure Active Directory (Azure AD) user account named admin@contoso.com that is in the local Administrators group on each computer.

You sign in to Computer1 by using admin@contoso.com.

You need to ensure that you can use Event Viewer on Computer1 to connect to the event logs on Computer2. Solution: On Computer2, you run the Enable-PSRemoting cmdlet.

Does this meet the goal?

A. Yes

B. No

**Answer:** A

**Explanation:**

The Enable-PSRemoting cmdlet configures the computer to receive PowerShell remote commands that are sent by using the WS-Management technology.

References:

<https://docs.microsoft.com/en-us/powershell/module/microsoft.powershell.core/enable-psremoting?view=powershell-7>

**NEW QUESTION 205**

- (Exam Topic 4)

You install Windows 10 Enterprise on a new computer. You need to force activation on the computer.

Which command should you run?

A. slmgr /upk

B. Sec-RDLicenseConfiguration -Force

C. Sec-MsolLicense -AddLicense

D. slmgr /ato

**Answer:** D

**Explanation:**

References:

<https://docs.microsoft.com/en-us/windows/deployment/volume-activation/activate-using-key-management-services>

**NEW QUESTION 210**

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

Use the following login credentials as needed:

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only:

Lab Instance: 10921597

You need to connect to your company's network and create a VPN connection on Client2 named VPN1 that meets the following requirements: VPN1 must connect to a server named vpn.contoso.com.

Only traffic to your company's network must be routed through VPN1. To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

See explanation below.

- > On Client2, click on the Start button and go to settings.
- > Select Network & Internet.
- > Select VPN on the left-hand side
- > Click on the Add a VPN connection button.
- > Next, select the VPN provider—This will almost always be Windows (built-in).
- > Name your connection and enter the server name as provided by your IT technician. (VPN1 and vpn.contoso.com).

- > Add in your username and password as provided by your IT technician.
- > Click Save when done.
- > Closeout the PC settings windows.

Reference:

<https://www.themillergroup.com/vpn-windows-10/>

#### NEW QUESTION 215

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. On Computer1, you turn on File History. You need to protect a folder named D:\Folder1 by using File History. What should you do?

- A. From File Explorer, modify the Security settings of D:\Folder1
- B. From File Explorer, add D:\Folder1 to the Documents library
- C. From the Settings app, configure the Recovery settings
- D. From File History in Control Panel, configure the Select drive settings

**Answer: B**

#### NEW QUESTION 219

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

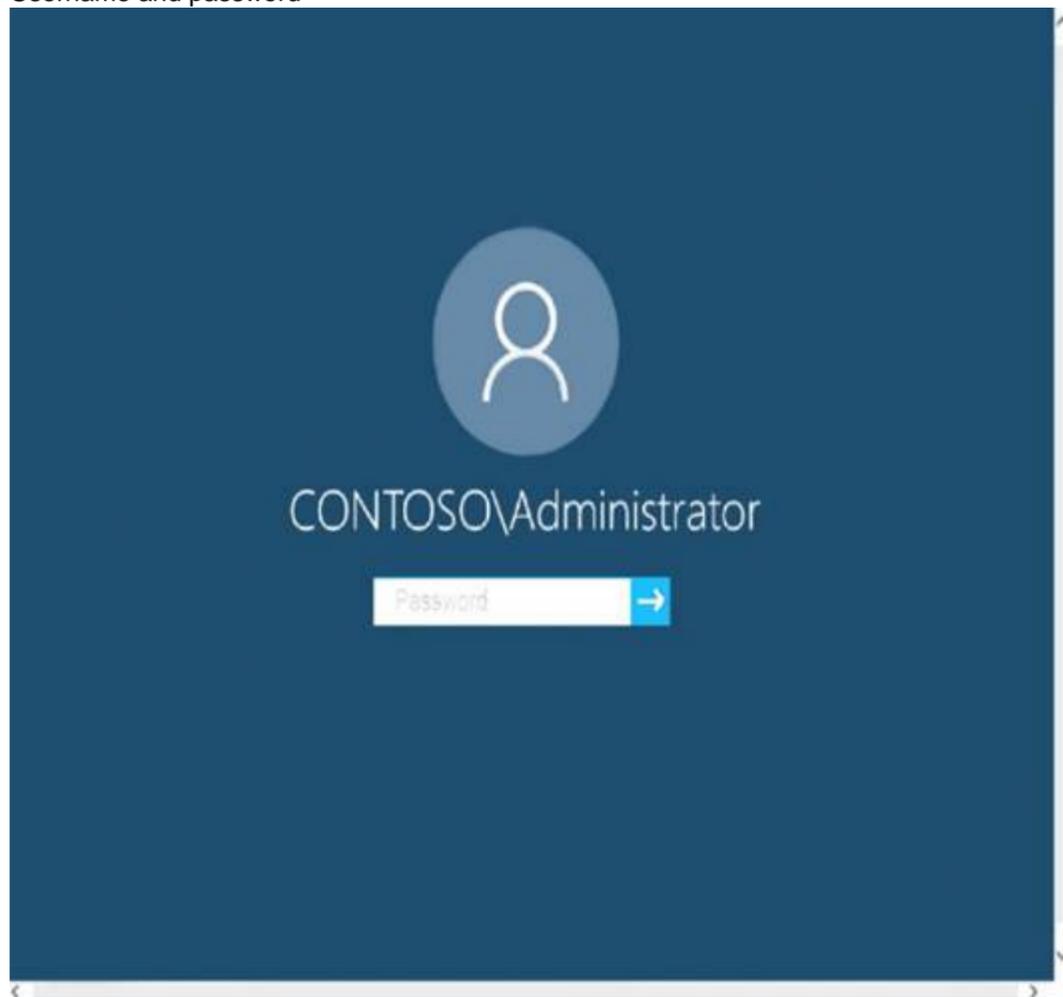

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

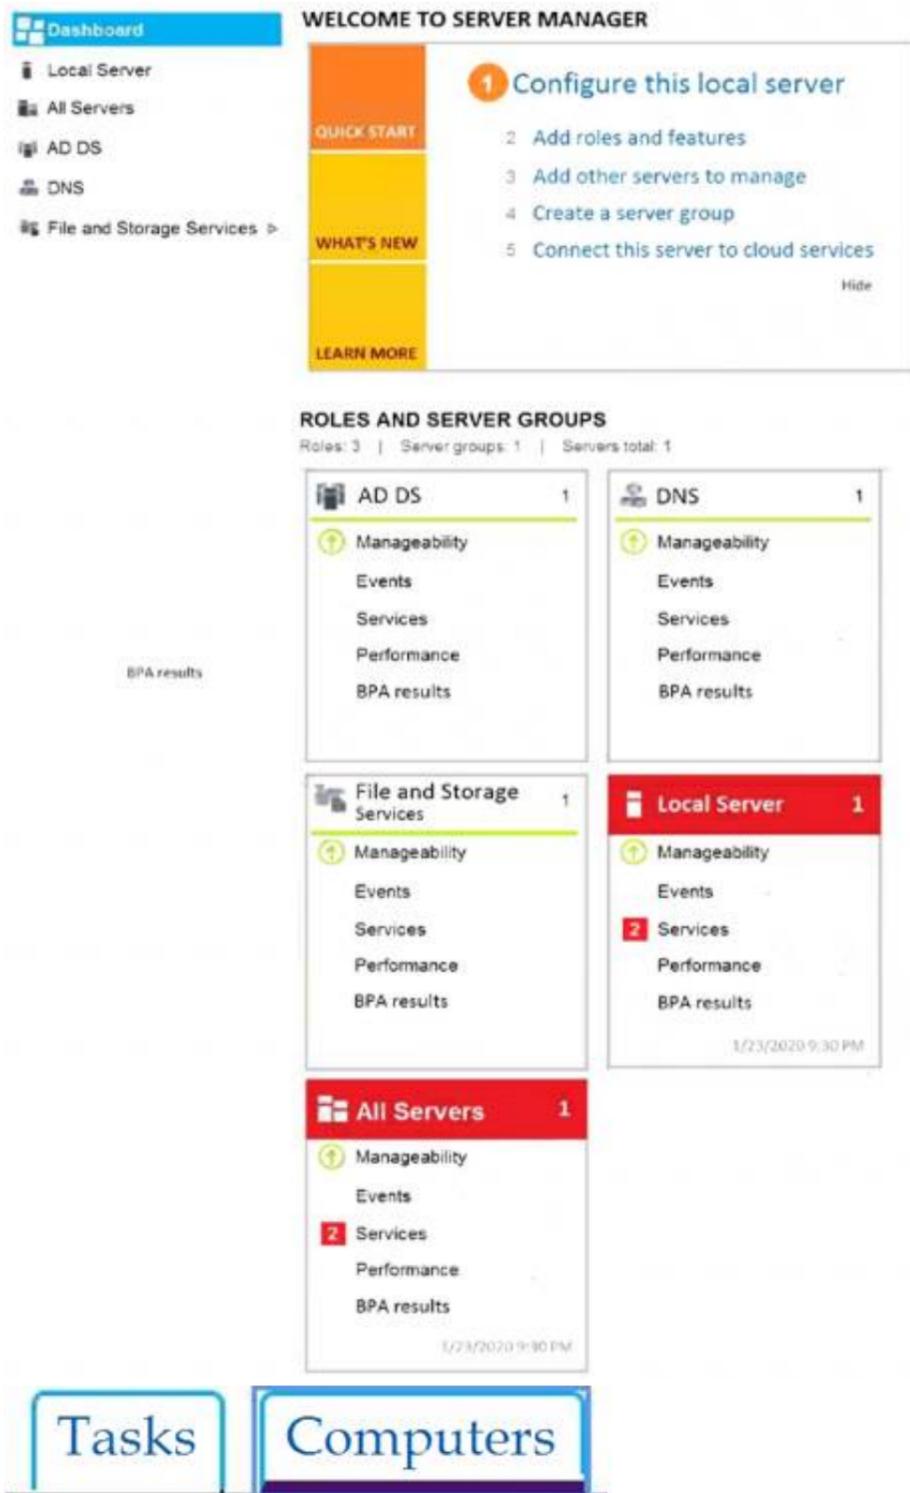

Use the following login credentials as needed:

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only: Lab Instance: 11145882

You need to create an HTML report that shows which policies and policy settings are applied to CONTOSO\User1 on Client1. You must save the output to a file named Report.html in a folder named Folder1 on the C drive of Client1. To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

On Client1, log in as administrator. Open command prompt and type:  
 gresult /h CONTOSO\User1\C:\Folder1\Report.html

**NEW QUESTION 221**

- (Exam Topic 4)

You have a computer that is configured as shown in the following exhibit.

```
C:\Users\user-a>ipconfig /all

Windows IP Configuration

Host Name . . . . . : DESKTOP-8FF1SK7
Primary Dns Suffix . . . . . :
Node Type . . . . . : Hybrid
IP Routing Enabled . . . . . : No
WINS Proxy Enabled . . . . . : No

Ethernet adapter Ethernet:

Connection-specific DNS Suffix . . . . . :
Description . . . . . : Microsoft Hyper-V Network Adapter
Physical Address . . . . . : 00-15-5D-00-04-56
DHCP Enabled . . . . . : Yes
Autoconfiguration Enabled . . . . . : Yes
Link-local IPv6 Address . . . . . : fe80::5c1c:443f:c050:1e14%4(Preferred)
Autoconfiguration IPv4 Address . . . . . : 169.254.30.20(Preferred)
Subnet Mask . . . . . : 255.255.0.0
Default Gateway . . . . . :

DNS Servers . . . . . : fec0:0:0:ffff::1%1
                       : fec0:0:0:ffff::2%1
                       : fec0:0:0:ffff::3%1
NetBIOS over Tcpip . . . . . : Enabled
```

What can the computer connect to?

- A. all the local computers and the remote computers within your corporate network only
- B. all the local computers and the remote computers, including Internet hosts
- C. only other computers on the same network segment that have automatic private IP addressing (APIPA)
- D. only other computers on the same network segment that have an address from a class A network ID

**Answer: B**

**NEW QUESTION 223**

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain. The domain contains a computer named Computer1 that runs Windows 8.1.

Computer1 has apps that are compatible with Windows 10.

You need to perform a Windows 10 in-place upgrade on Computer1.

Solution: You copy the Windows 10 installation media to a network share. From Windows 8.1 on Computer1, you run setup.exe from the network share.

Does this meet the goal?

- A. Yes
- B. No

**Answer: B**

**NEW QUESTION 226**

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a laptop named Computer1 that runs Windows 10.

When in range, Computer1 connects automatically to a Wi-Fi network named Wireless1. You need to prevent Computer1 from automatically connecting to Wireless1.

Solution: From the Settings app, you modify the properties of the Wireless1 known Wi-Fi network. Does this meet the goal?

- A. Yes
- B. No

**Answer: A**

**Explanation:**

Removing Wireless1 as a known Wi-Fi network on Computer1 will prevent it from automatically connecting. Note: You can also type netsh wlan show profiles in the Command Prompt to manage and delete wireless network profiles.

References:

<https://kb.netgear.com/29889/How-to-delete-a-wireless-network-profile-in-Windows-10>

**NEW QUESTION 229**

- (Exam Topic 4)

You have a public computer named Computer1 that runs Windows 10/ Computer1 contains a folder named Folder1. You need to provide a user named User1 with the ability to modify the permissions of Folder1. The solution must use the principle of least privilege. Which NTFS permission should you assign to User1?

- A. Full control
- B. Modify
- C. Write
- D. Read & execute

**Answer:** A

**Explanation:**

References:  
<https://docs.microsoft.com/en-us/previous-versions/windows/it-pro/windows-server-2008-R2-and-2008/cc73288>  
<http://www.mdmarra.com/2013/11/full-control-v-modify-why-you-should-be.html>

**NEW QUESTION 231**

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains a user named User1. User1 creates a Microsoft account. User1 needs to sign in to cloud resources by using the Microsoft account without being prompted for credentials. Which settings should User1 configure?

- A. User Accounts in Control Panel
- B. Email & app accounts in the Settings app
- C. Users in Computer Management
- D. Users in Active Directory Users and Computers

**Answer:** B

**Explanation:**

References:  
<https://support.microsoft.com/en-za/help/4028195/microsoft-account-how-to-sign-in>

**NEW QUESTION 233**

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. Computer1 contains the folders shown in the following table.

Name	File system	BitLocker Drive Encryption (BitLocker)
C:\Folder1	NTFS	Disabled
D:\Folder2	NTFS	Enabled
E:\Folder3	FAT32	Disabled

You include Folder1, Folder2, and Folder3 in the Documents library. You configure File History to run every 15 minutes, and then turn on File History. For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Statements	Yes	No
Folder1 is protected by File History.	<input type="radio"/>	<input type="radio"/>
Folder2 is protected by File History.	<input type="radio"/>	<input type="radio"/>
Folder3 is protected by File History.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Statements	Yes	No
Folder1 is protected by File History.	<input checked="" type="radio"/>	<input type="radio"/>
Folder2 is protected by File History.	<input checked="" type="radio"/>	<input type="radio"/>
Folder3 is protected by File History.	<input type="radio"/>	<input checked="" type="radio"/>

**NEW QUESTION 237**

- (Exam Topic 4)

You have a file named Reg1.reg that contains the following content.

```
Windows Registry Editor Version 5.00
```

```
[HKEY_CLASSES_ROOT\Directory\Background\shell\Notepad]
```

```
[HKEY_CLASSES_ROOT\Directory\Background\shell\Notepad\command]
```

```
@="notepad.exe"
```

What is the effect of importing the file?

- A. A key named command will be renamed as notepad.exe.
- B. In a key named Notepad, the command value will be set to @="notepad.exe".
- C. In a key named command, the default value will be set to notepad.exe.

**Answer: C**

**NEW QUESTION 241**

- (Exam Topic 4)

You sign in to a computer that runs Windows 10 Pro.

You need to ensure that after a restart, the computer starts automatically in Safe Mode with Networking. What should you use to configure the restart options?

- A. bootcfg
- B. BCDEdit
- C. Windows System Image Manager (Windows SIM)
- D. bootrec

**Answer: B**

**Explanation:**

Reference:

<https://www.lifewire.com/how-to-force-windows-to-restart-in-safe-mode-2625163>

**NEW QUESTION 242**

- (Exam Topic 4)

You have a workgroup computer named Computer1 that runs Windows 10. Computer1 has the users accounts shown in the following table:

Name	Member of
User1	Administrators
User2	Users, Administrators
User3	Users

Computer1 has the local Group Policy shown in the following table.

Setting	Value
Startup script	ScriptA1
Shutdown script	ScriptA2
Logon script	ScriptA3
Logoff script	ScriptA4

You create the Local Computer\Administrators policy shown in the following table.

Setting	Value
Logon script	ScriptB1
Logoff script	ScriptB2

You create the Local Computer\Non-Administrators policy shown in the following table.

Setting	Value
Logon script	ScriptC1
Logoff script	ScriptC2

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

Statements	Yes	No
If User1 shuts down Computer1, script ScriptA2 will run.	<input type="radio"/>	<input type="radio"/>
If User2 signs in to Computer1, scripts ScriptA3, ScriptB1, and ScriptC1 will run.	<input type="radio"/>	<input type="radio"/>
If User3 signs out of Computer1, scripts ScriptC2 and ScriptA4 will run.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Reference:

[https://docs.microsoft.com/en-us/previous-versions/windows/it-pro/windows-vista/cc766291\(v=ws.10\)](https://docs.microsoft.com/en-us/previous-versions/windows/it-pro/windows-vista/cc766291(v=ws.10))

**NEW QUESTION 244**

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You manage devices that run Windows 10.

Ten sales users will travel to a location that has limited bandwidth that is expensive. The sales users will be at the location for three weeks.

You need to prevent all Windows updates from downloading for the duration of the trip. The solution must not prevent access to email and the Internet.

Solution: From Network & Internet in the Settings app, you set the network connections as metered connections.

Does this meet the goal?

- A. Yes
- B. No

**Answer:** B

**Explanation:**

References:

<https://www.makeuseof.com/tag/5-ways-temporarily-turn-off-windows-update-windows-10/>

**NEW QUESTION 249**

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10.

From Event Viewer on Computer1, you have a task named Action1 that is attached to the following event: > Log: System

> Source: Kernel-General

> Event ID: 16

You need to modify the settings of Action1. What should you use?

- A. the Settings app
- B. Task Scheduler
- C. Event Viewer
- D. System Configuration

**Answer:** C

**Explanation:**

An Event Viewer task is created and modified in Event Viewer. References:

<https://www.techrepublic.com/article/how-to-use-custom-views-in-windows-10s-event-viewer/>

**NEW QUESTION 253**

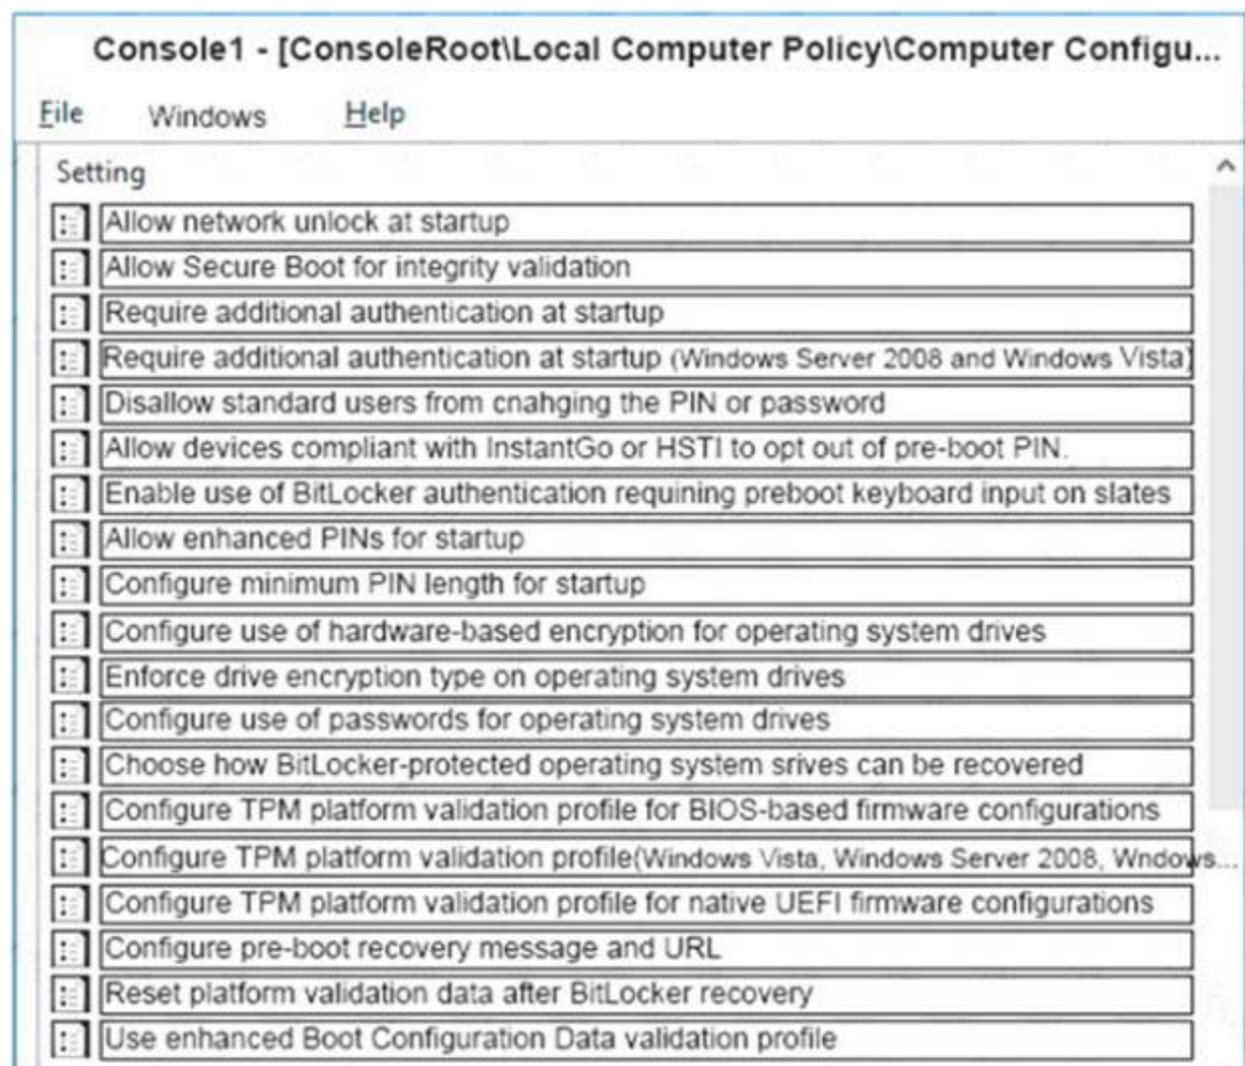

- (Exam Topic 4)

Your domain contains named Computer named Computer1 that runs Windows 10. Computer1 does not have a TPM.

You need to be able to encrypt the C drive by using Bitlocker Drive Encryption (BitLocker). The solution must ensure that the recovery key is stored in Active Directory.

Which two Group Policy settings should you configure? To answer, select the appropriate settings in the answer area.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

References:

<https://docs.microsoft.com/en-us/windows/security/information-protection/bitlocker/bitlocker-group-policy-setti>

**NEW QUESTION 258**

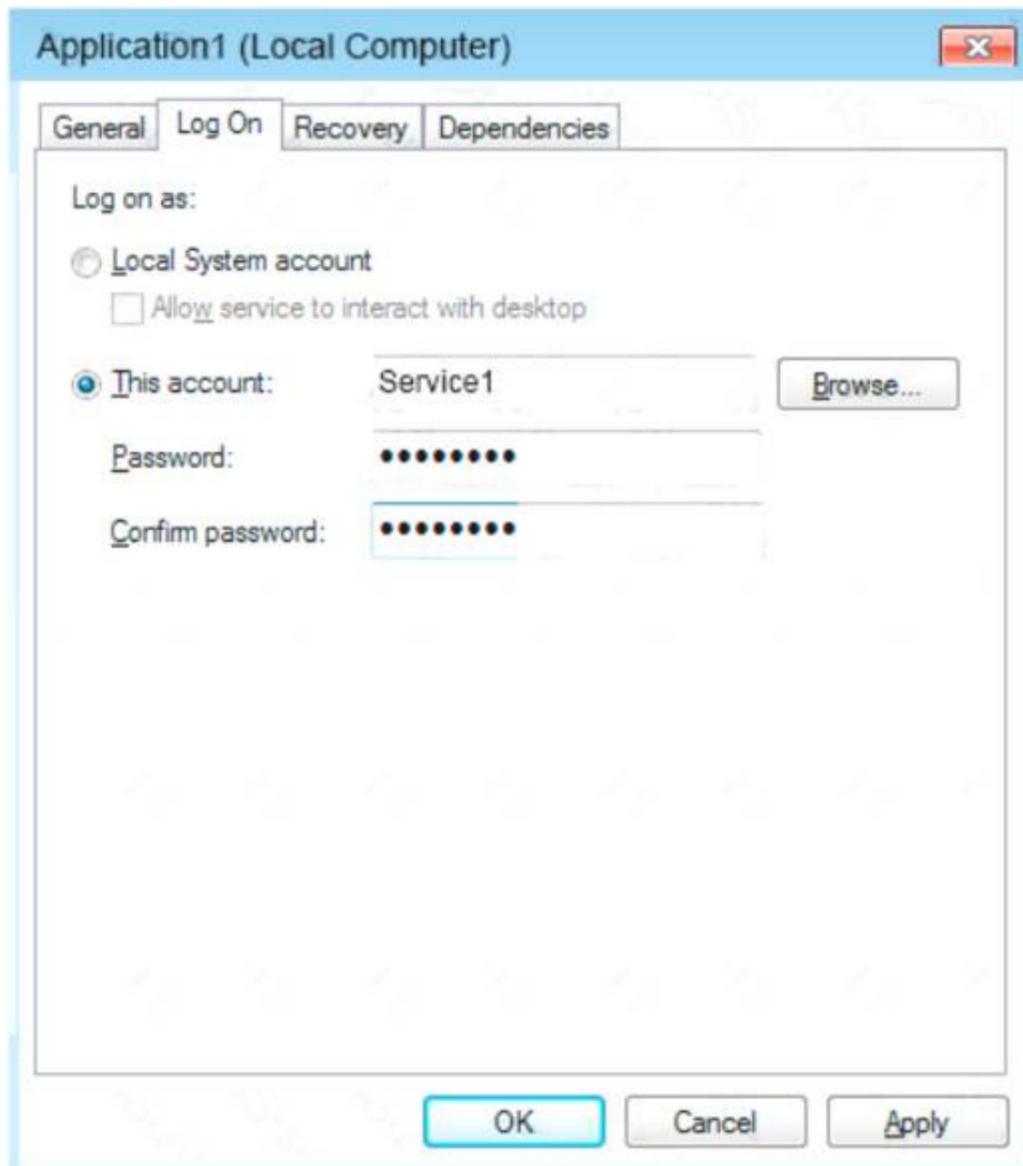

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer named Computer1 that runs Windows10.

A service named Application1 is configured as shown in the exhibit.

You discover that a user used the Service1 account to sign in to Computer1 and deleted some files.

You need to ensure that the identity used by Application1 cannot be used by a user to sign in to the desktop on Computer1. The solution must use the principle of least privilege.

Solution: On Computer1, you configure Application1 to sign in as the LocalSystem account and select the Allow service to interact with desktop check box. You delete the Service1 account.

Does this meet the goal?

- A. Yes
- B. No

**Answer: B**

**Explanation:**

<https://docs.microsoft.com/en-us/windows/win32/services/localsystem-account>

**NEW QUESTION 262**

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

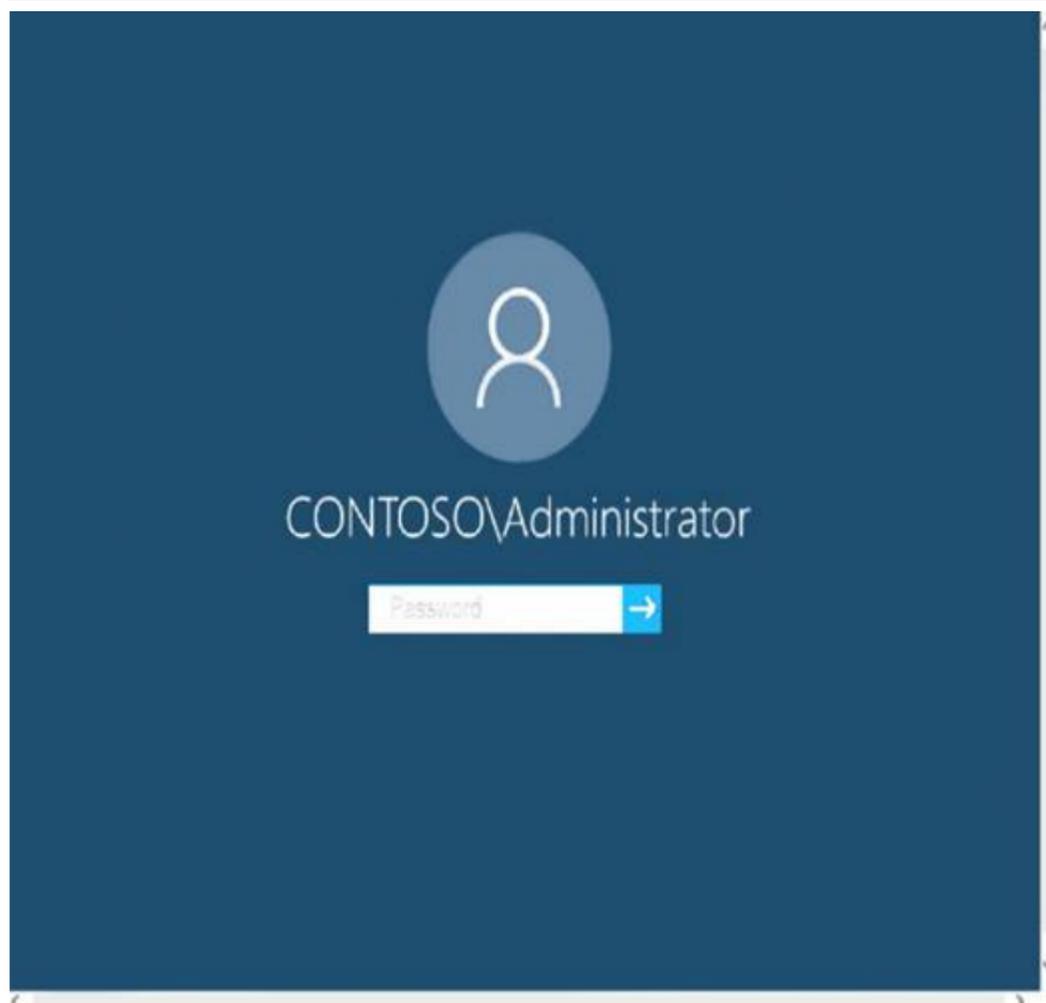

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

Use the following login credentials as needed:

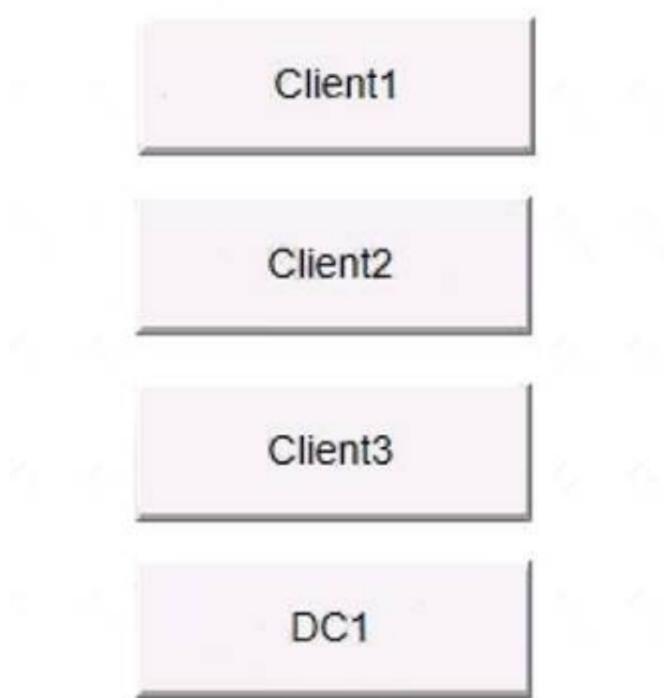

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only:

Lab Instance: 10921597

You need to create a user account named User5 on Client2. The solution must meet the following requirements:

- Prevent User5 from changing the password of the account.
  - Ensure that User5 can perform backups.
  - Use the principle of least privilege.
- To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

See explanation below.

- On Client2, press the Win + X keys on your keyboard. Then, click or tap the Computer Management option from the menu.
- Expand the Local Users and Groups from the left side of the window, and select Users.
- Right-click somewhere on the blank space found in the middle section of the window, and click or tap on New User. This opens the New User window, where you can enter all the details about the new user account.

- Type the user name and, optionally, its full name and description.
- Type the password to be used for that user and confirm it.
- Select the User cannot change password check box.
- Click Create and Windows immediately creates the user account. When you are done creating user accounts, click Close in the New User window.
- Press the Win + R keys to open Run, type secpol.msc into Run, and click/tap on OK to open Local Security Policy.
- Expand open Local Policies in the left pane of Local Security Policy, click/tap on User Rights Assignment, and double click/tap on the Back up files and directories policy in the right pane.
- Click/tap on the Add User or Group button.
- Click/tap on the Object Types button.
- Check all the boxes for Object types, and click/tap on the OK.
- Click/tap on the Advanced button.
- Click/tap on the Find Now button, select the name of the user or group
- Click/tap on OK.
- Click/tap on OK.
- When finished, you can close Local Users and Groups.

Reference:

<https://www.digitalcitizen.life/geeks-way-creating-user-accounts-and-groups>

<https://docs.microsoft.com/en-us/windows/security/threat-protection/security-policy-settings/user-rights-assignm>

### NEW QUESTION 267

- (Exam Topic 4)

Your company has a main office and a branch office. The offices connect to each other by using a WAN link. Access to the Internet is provided through the main office.

The branch office contains 25 computers that run Windows 10. The computers contain small hard drives that have very little free disk space.

You need to prevent the computers in the branch office from downloading updates from peers on the network. What should you do?

- A. From the Settings app, modify the Delivery Optimizations settings.
- B. Configure the network connections as metered connections.
- C. Configure the computers to use BranchCache in hosted cache mode.
- D. Configure the updates to use the Semi-Annual Channel (Targeted) channel.

**Answer: C**

#### Explanation:

References:

<https://docs.microsoft.com/en-us/windows/deployment/update/waas-branchcache>

### NEW QUESTION 270

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains a computer named Computer1 that runs Windows 10.

The domain contains the users shown in the following table.

Name	Member of
User1	Domain Users
User2	Domain Users, Guests
User3	Domain Users, Administrators

Computer1 has the local users shown in the following table.

Name	Member of
User4	Users
User5	Administrators

All users have Microsoft accounts.

Which two users can be configured to sign in by using their Microsoft account? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. User1
- B. User2
- C. User3
- D. User4
- E. User5

**Answer: DE**

### NEW QUESTION 273

- (Exam Topic 4)

You have computers that run Windows 10 Enterprise as shown in the following table.

Name	Servicing channel
Computer1	Semi-Annual Channel (SAC)
Computer2	Long-Term Servicing Channel (LTSC) 2016

Both computers have applications installed and contain user data.

You plan to configure both computers to run Windows 10 Enterprise LTSC 2019 and to retain all the existing applications and data.

You need to recommend a method to deploy Windows 10 Enterprise LTSC 2019 to the computers. The solution must minimize effort to install and configure the applications.

What should you include in the recommendation for each computer? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Computer1:

- Perform a clean installation.
- Perform an in-place upgrade.
- Update the product key.

Computer2:

- Perform a clean installation.
- Perform an in-place upgrade.
- Update the product key.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Graphical user interface, text, application, chat or text message Description automatically generated

References:

<https://docs.microsoft.com/en-us/windows/deployment/upgrade/windows-10-upgrade-paths>

**NEW QUESTION 274**

- (Exam Topic 4)

You have the computers shown in the following table.

Name	Windows 10 edition
Computer1	Windows 10 Pro
Computer2	Windows 10 Pro Workstations
Computer3	Windows 10 Enterprise

You need to identify which computers support the features.

- > BitLocker Drive Encryption (BitLocker)
- > Microsoft Application Virtualization (App-V)

Which computers support the features? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

BitLocker:

- Computer1 only
- Computer2 only
- Computer3 only
- Computer1 and Computer3 only
- Computer2 and Computer3 only
- Computer1, Computer2, and Computer3

App-V:

- Computer1 only
- Computer2 only
- Computer3 only
- Computer1 and Computer3 only
- Computer2 and Computer3 only
- Computer1, Computer2, and Computer3

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Graphical user interface, text, application Description automatically generated

References:

<https://www.microsoft.com/en-us/windowsforbusiness/compare>

**NEW QUESTION 278**

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain named contoso.com. The domain contains the users shown in the following table.

Name	Member of
User2	Domain Users
User3	Domain Admins
User4	Server Operators

You have a computer named Computer1 that runs Windows 10 and is in a workgroup.

A local standard user on Computer1 named User1 joins the computer to the domain and uses the credentials of User2 when prompted.

You need to ensure that you can rename Computer1 as Computer33. Solution: You use the credentials of User4 on Computer1.

Does this meet the goal?

A. Yes

B. No

**Answer: B**

**Explanation:**

Renaming a domain-joined computer will also rename the computer account in the domain. To do this, you need domain administrator privileges.

User4 is a server operator, not an administrator. Members of the Server Operators group can sign in to a server interactively, create and delete network shared resources, start and stop services, back up and restore files, format the hard disk drive of the computer, and shut down the computer.

Use User3's credentials instead.

References:

<https://docs.microsoft.com/en-us/windows/security/identity-protection/access-control/active-directory-security-g>

**NEW QUESTION 280**

- (Exam Topic 4)

You have a computer that runs Windows 10. The computer contains a folder. The folder contains sensitive data.

You need to log which user reads the contents of the folder and modifies and deletes files in the folder. You need to log which user reads the contents of the folder and modifies and deletes files in the folder.

Solution: from the properties of the folder, you configure the Auditing settings and from the Audit Policy in the local Group Policy, you configure Audit system events.

Does this meet the goal?

A. Yes

B. No

**Answer: B**

**Explanation:**

Files and folders are objects and are audited through object access, not through system events. References:

[https://www.netwrix.com/how\\_to\\_detect\\_who\\_changed\\_file\\_or\\_folder\\_owner.html](https://www.netwrix.com/how_to_detect_who_changed_file_or_folder_owner.html)

**NEW QUESTION 283**

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. Computer1 is in a workgroup. Computer1 contains the local users shown in the following table.

Name	Member of
Administrator	Administrators, Users
User1	Users
User2	Users

Computer1 contains the folders shown in the following table.

Name	Path
Folder1	D:\Folder1
Folder2	D:\Folder2
Folder3	E:\Folder3

The Users group has Full control permissions to Folder1, Folder2, and Folder3. User1 encrypts two files named File1.docx and File2.docx in Folder1 by using EFS.

Which users can move each file? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Users who can move File1.docx to Folder2:

User1 only

User1 and Administrator only

User1, User2, and Administrator

Users who can move File2.docx to Folder3:

User1 only

User1 and Administrator only

User1, User2, and Administrator

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

EFS works by encrypting a file with a bulk symmetric key. The symmetric key that is used to encrypt the file is then encrypted with a public key that is associated with the user who encrypted the file. Because the encryption & decryption operations are performed at a layer below NTFS, it is transparent to the user and all their applications.

Box 1: User1, User2, and Administrator Box 2: User1, User2, and Administrator

All three are members of the Users group that has Full control permissions to Folder1, Folder2, and Folder3.

**NEW QUESTION 286**

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains 10 computers that run Windows 10. Users in the finance department use the computers. You have a computer named Computer1 that runs Windows 10.

From Computer1, you plan to run a script that executes Windows PowerShell commands on the finance department computers.

You need to ensure that you can run the PowerShell commands on the finance department from Computer1. What should you do on the finance department computers?

- A. From the local Group Policy, enable the Allow Remote Shell Access setting.
- B. From the local Group Policy, enable the Turn on Script Execution setting.
- C. From the Windows PowerShell, run the Enable-MMAgent cmdlet.
- D. From the Windows PowerShell, run the Enable-PSRemoting cmdlet.

**Answer:** D

**Explanation:**

References:

<https://docs.microsoft.com/en-us/powershell/module/microsoft.powershell.core/enable-psremoting?view=powershell-6>

**NEW QUESTION 289**

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10.

Computer1 was off for one year. During that time, two feature updates and 12 quality updates were released. From the Microsoft Update Catalog website, you download the missing updates and save the updates to Computer1.

You need to ensure that Computer1 runs the latest version of Windows 10 and is fully updated. The solution must minimize the amount of time required to update the computer.

What should you do?

- A. Install the last feature update, and then install the last quality update.
- B. Install the last quality update, and then install both feature updates.
- C. Install the last quality update, and then install the last feature update.
- D. Install the last feature update, and then install all the quality updates released after the feature update.
- E. Install all the quality and feature updates in the order in which they were released.

**Answer:** A

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/update/get-started-updates-channels-tools>

**NEW QUESTION 292**

- (Exam Topic 4)

You have a Microsoft Azure Active Directory (Azure AD) tenant.

Some users sign in to their computer by using Windows Hello for Business.

A user named User1 purchases a new computer and joins the computer to Azure AD.

User1 attempts to configure the sign-in options and receives the error message shown in the exhibit.

## Sign-in options

\*Some settings are hidden or managed by your organization.

### Windows Hello

Sign in to Windows, apps and services by teaching Windows to recognize you.

Windows Hello isn't available on this device.

[See how it works and find compatible devices.](#)

You open Device Manager and confirm that all the hardware works correctly. You need to ensure that User1 can use Windows Hello for Business facial recognition to sign in to the computer. What should you do first?

- A. Purchase an infrared (IR) camera.
- B. Upgrade the computer to Windows 10 Enterprise.
- C. Enable UEFI Secure Boot.
- D. Install a virtual TPM driver.

**Answer:** B

**Explanation:**

References:  
<https://docs.microsoft.com/en-us/windows/security/identity-protection/hello-for-business/hello-planning-guide>

**NEW QUESTION 296**

- (Exam Topic 4)

Your office has a dedicated wireless network for guests. You plan to provide access cards that will have a QR code for guests. The QR code will link to a network configuration file stored on a publicly accessible website and provide the wireless network settings for Windows 10 devices. Which tool should you use to create the configuration file and which file type should you use for the configuration file? To answer, select the appropriate options in the answer area.  
 NOTE: Each correct selection is worth one point.

Tool:

- Connection Manager Administration Kit (CMAK)
- Local Group Policy Editor Microsoft Deployment
- Microsoft Deployment Toolkit (MDT)
- Windows Autopilot
- Windows Configuration Designer

File type:

- ADMX
- CAB
- PPKG
- WIM
- XML

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Reference:  
<https://docs.microsoft.com/en-us/windows/configuration/provisioning-packages/provisioning-packages>

**NEW QUESTION 297**

- (Exam Topic 4)

You are planning a recovery strategy for computers that run Windows 10. You need to create recovery procedures to roll back feature updates and quality updates. What should you include in the procedures? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

To roll back feature updates:

▼
Recovery from the Settings app
Windows Update from the Settings app
Programs and Features from the Control Panel
Troubleshoot from the Settings app

To roll back quality updates:

▼
Recovery from the Settings app
Windows Update from the Settings app
Programs and Features from the Control Panel
Troubleshoot from the Settings app

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

References:

<https://www.thewindowsclub.com/rollback-uninstall-windows-10-creators-update> <https://www.dummies.com/computers/pcs/undo-windows-update/>

**NEW QUESTION 298**

- (Exam Topic 4)

Your company uses Microsoft Deployment Toolkit (MDT) to deploy Windows 10 to new computers. The company purchases 1,000 new computers. You need to ensure that the Hyper-V feature is enabled on the computers during the deployment. What are two possible ways to achieve the goal? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. Add a task sequence step that adds a provisioning package.
- B. In a Group Policy object (GPO), from Computer Configuration, configure Application Control Policies.
- C. Add a custom command to the Unattend.xml file.
- D. Add a configuration setting to Windows Deployment Services (WDS).
- E. Add a task sequence step that runs dism.exe.

**Answer:** AE

**Explanation:**

References:

Provisioning package works with Windows Configuration Designer to provision win10 features and runtime settings. WCD (provisioning Package) is GUI based while DISM is command line based and dose same function. Unattend.xml / answer files are used with installation media. It contains settings, definitions and values to use during Windows Setup. In an answer file, you specify various setup options. These options include how to partition disks, where to find the Windows image that will be installed, and which product key to apply.

<https://docs.microsoft.com/en-us/windows/deployment/deploy-windows-mdt/create-a-windows-10-reference-im>

**NEW QUESTION 302**

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

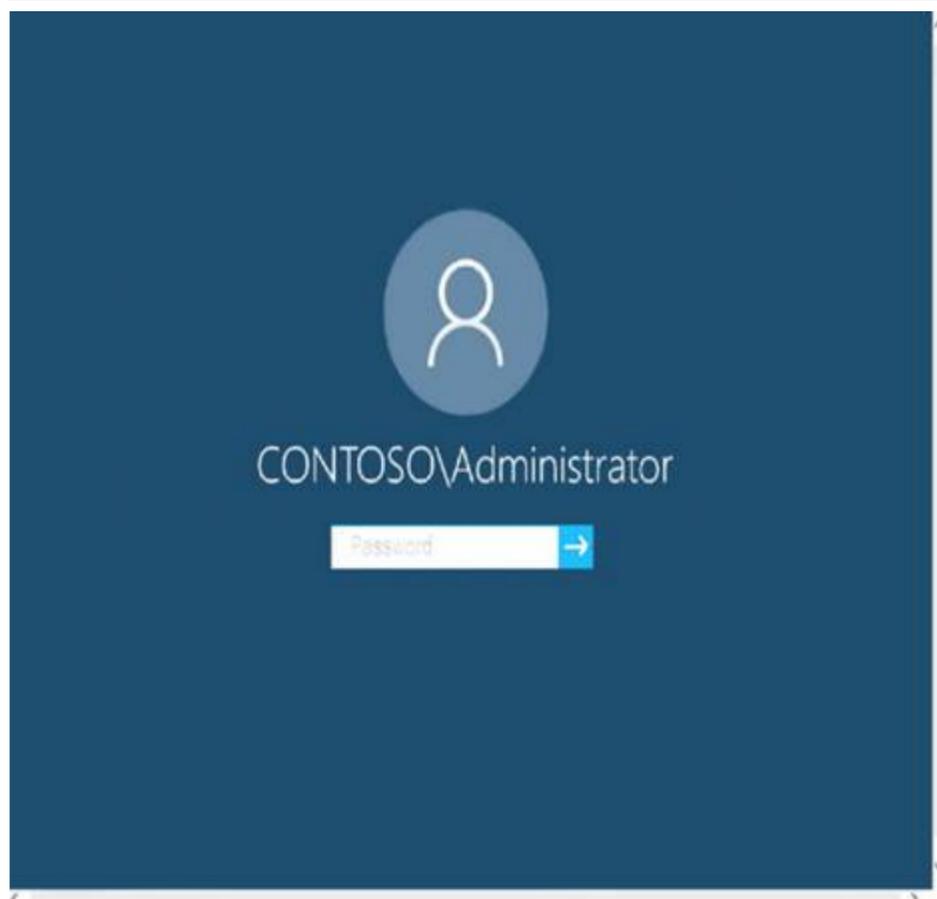

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

Use the following login credentials as needed:

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only:

Lab Instance: 10921597

You need to create a file named Private.txt in a folder named Folder1 on the C drive of Client2.

You need to encrypt Private.txt and ensure that a user named User1 can view the contents of Private.txt.

To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

See explanation below.

- > After creating Private.txt and saving it Folder1, right-click on the Private.txt, and select Properties from the context menu.
- > On the General tab, click Advanced. Next, check the box "Encrypt contents to secure data" and click OK.
- > A window will pop up asking you whether or not you want to encrypt the file and its parent folder. Select the "Encrypt the file only" and click OK.
- > Private.txt will now show its file name in green color.
- > Right-click Private.txt and then select Properties.
- > Click Advanced on the General tab.
- > Click Details on the Advanced Attributes tab to open the User Access dialog box.
- > Click Add to open the Encrypting File System dialog box and then select User1.
- > Click OK to add User1 to the list of users who have access to the file.
- > Click OK until you've exited out of the dialog boxes.
