Windows 10

About ExamBible

Your Partner of IT Exam

Found in 1998

ExamBible is a company specialized on providing high quality IT exam practice study materials, especially Cisco CCNA, CCDA, CCNP, CCIE, Checkpoint CCSE, CompTIA A+, Network+ certification practice exams and so on. We guarantee that the candidates will not only pass any IT exam at the first attempt but also get profound understanding about the certificates they have got. There are so many alike companies in this industry, however, ExamBible has its unique advantages that other companies could not achieve.

Our Advances

* 99.9% Uptime

All examinations will be up to date.

* 24/7 Quality Support

We will provide service round the clock.

* 100% Pass Rate

Our guarantee that you will pass the exam.

* Unique Gurantee

If you do not pass the exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

NEW QUESTION 1

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10.

You need to configure User Account Control (UAC) to prompt administrators for their credentials. Which settings should you modify?

- A. Administrators Properties in Local Users and Groups
- B. User Account Control Settings in Control Panel
- C. Security Options in Local Group Policy Editor
- D. User Rights Assignment in Local Group Policy Editor

Answer: C

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/security/identity-protection/user-account-control/user-account-contro>

NEW QUESTION 2

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

Use the following login credentials as needed:

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only:

Lab Instance: 10921597

You need to create a group named Group2 on Client2. The members of Group2 must be able to change the system time. The solution must use the principle of least privilege.

To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

See explanation below.

On Client2, Press Windows+R

Type lusrmgr.msc

Right click Groups and click New Group.

Type in the Group name and a description.

Click Add to add members to this group. Specify the name of the user or group or computer to be added.

Click Create and Close.

Press the Win + R keys to open Run, type secpol.msc into Run, and click/tap on OK to open Local Security Policy.

Expand open Local Policies in the left pane of Local Security Policy, click/tap on User Rights Assignment, and double click/tap on the Change the system time policy in the right pane.

Click/tap on the Add User or Group button.

Click/tap on the Object Types button.

Check all the boxes for Object types, and click/tap on the OK.

Click/tap on the Advanced button.

Click/tap on the Find Now button, select the name of the user or group

Click/tap on OK.

Click/tap on OK.

When finished, you can close Local Users and Groups.

NEW QUESTION 3

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer named Computer1 that runs Windows 10.

A service named Application1 is configured as shown in the exhibit.

You discover that a user used the Service1 account to sign in to Computer1 and deleted some files.

You need to ensure that the identity used by Application1 cannot be used by a user to sign in to sign in to the desktop on Computer1. The solution must use the

principle of least privilege.

Solution: On Computer1, you assign Service1 the deny log on locally user right. Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/security/threat-protection/security-policy-settings/deny-log-on-locall>

NEW QUESTION 4

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains a user named Admin1. All computers run Windows 10.

You enable Windows PowerShell remoting on the computers.

You need to ensure that Admin1 can establish remote PowerShell connections to the computers. The solution must use the principle of least privilege.

To which group should you add Admin1?

- A. Access Control Assistance Operators
- B. Power Users
- C. Remote Desktop Users
- D. Remote Management Users

Answer: D

Explanation:

References:

<https://4sysops.com/wiki/enable-powershell-remoting/>

NEW QUESTION 5

- (Exam Topic 4)

Your network contains an Active Directory domain named adatum.com, a workgroup, and computers that run Windows 10. The computers are configured as shown in the following table.

The local Administrator accounts on Computer1, Computer2, and Computer3 have the same user name and password.

On Computer1, Windows Defender Firewall is configured as shown in the following exhibit.

The services on Computer1 have the following states.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: No

Because the firewall is blocking Remote Volume Management.

Box 2: No

Because the Remote Registry Service is stopped.

Box 3: No

Because the Remote Registry Service is stopped. Perfmon needs both the RPC service and the Remote Registry service to be running.

NEW QUESTION 6

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10 and has Windows Assessment and Deployment Kit (Windows ADK) installed. Computer1 has the drives shown in the following table.

You need to create Windows 10 unattended answer file. What should you do first?

- A. From File Explorer, copy Install.wim from drive E to drive D.
- B. From Windows System Image Manager, select Select Windows Image, and then select Install.wim from drive E.
- C. From Windows System Image Manager, select Select Windows Image, and then select Boot.wim from drive E.
- D. From File Explorer, copy Boot.wim from drive E to drive D.

Answer: A

Explanation:

References:

<https://www.windowscentral.com/how-create-unattended-media-do-automated-installation-windows-10>

NEW QUESTION 7

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

Use the following login credentials as needed:

To enter your password, place your cursor in the Enter password box and click on the password below.

Lab Instance: 10921597

You need to ensure that you can successfully ping DC1 from Client3 by using the IP4 address of DC1.

To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

See explanation below.

On Client3, press Windows+R to access Run.

Type cmd and click OK to access the command prompt.

Type ipconfig and press Enter to check that you have a valid IP address.

On Client3, press Windows+R to access Run.

Type cmd and click OK to access the command prompt.

Type "ping" and the IP address of the Domain Controller (e.g. "ping 172.16.1.43").

Reference:

http://www.turn-n-burn.com/DestinyNetworks/Downloads/WebHelp3-1-1/Ping_the_Domain_Controller.h

NEW QUESTION 8

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains a group named Group1.

All the computers in the domain run Windows 10. Each computer contains a folder named C:\Documents that has the default NTFS permissions set.

You add a folder named C:\Documents\Templates to each computer.

You need to configure the NTFS permissions to meet the following requirements: All domain users must be able to open the files in the Templates folder.

Only the members of Group1 must be allowed to edit the files in the Templates folder.

How should you configure the NTFS settings on the Templates folder? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 9

- (Exam Topic 4)

You have a workgroup computer named Computer1 that runs Windows 10 and has the users shown in the following table.

You have a file named File1.reg that contains the following content.

You need to identify what occurs when User1 and User2 double-click File1.reg.

What should you identify? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1:

User1 is a member of the Administrators group so has permission to add keys to both registry hives.

Box 2:

User2 is a standard user so does not have permission to add a key to the HKEY_LOCAL_MACHINE registry hive so Key2 will not be imported.

NEW QUESTION 10

- (Exam Topic 4)

You plan to deploy Windows 10 Enterprise to company-owned devices. You capture a Windows 10 image file from a reference device.

You need to generate catalog files and answer files for the deployment.

What should you use for each file? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated

References:

<https://docs.microsoft.com/en-us/windows-hardware/customize/desktop/wsim/open-a-windows-image-or-catalo>

NEW QUESTION 10

- (Exam Topic 2)

You need to meet the technical requirements for the helpdesk users.

What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References:

<https://www.itprotoday.com/compute-engines/what-group-policy-creator-owners-group>

NEW QUESTION 15

- (Exam Topic 2)

You need to meet the technical requirements for the San Diego office computers. Which Windows 10 deployment method should you use?

- A. wipe and load refresh
- B. Windows Autopilot
- C. provisioning Packages
- D. in-place upgrade

Answer: B

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/windows-autopilot>

NEW QUESTION 19

- (Exam Topic 2)

You need to meet the quality update requirement for ComputerA. For how long should you defer the updates?

- A. 14 days
- B. 10 years
- C. 5 years
- D. 180 days
- E. 30 days

Answer: E

Explanation:

References:

<https://www.thewindowsclub.com/delay-defer-feature-updates-365-days-windows-10>

NEW QUESTION 23

- (Exam Topic 2)

You need to meet the technical requirement for User6. What should you do?

- A. Add User6 to the Remote Desktop Users group in the domain.
- B. Remove User6 from Group2 in the domain.
- C. Add User6 to the Remote Desktop Users group on Computer2.
- D. Add User6 to the Administrators group on Computer2.

Answer: B

NEW QUESTION 26

- (Exam Topic 2)

You need to meet the technical requirement for the IT department users. What should you do first?

- A. Issue computer certificates
- B. Distribute USB keys to the IT department users.
- C. Enable screen saver and configure a timeout.
- D. Turn on Bluetooth.

Answer: D

Explanation:

References:

<https://support.microsoft.com/en-za/help/4028111/windows-lock-your-windows-10-pc-automatically-when-you>

NEW QUESTION 31

- (Exam Topic 2)

You need to meet the technical requirements for the HR department users.

Which permissions should you assign to the HR department users for the D:\Reports folder? To answer, select the appropriate permissions in the answer area.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References:

<https://www.online-tech-tips.com/computer-tips/set-file-folder-permissions-windows/>

NEW QUESTION 32

- (Exam Topic 1)

You need to reduce the amount of time it takes to restart Application1 when the application crashes. What should you include in the solution? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:

<https://www.howto-connect.com/how-to-attach-a-task-to-this-event-in-event-viewer-in-windows-10/>

NEW QUESTION 34

- (Exam Topic 1)

You need to ensure that User10 can activate Computer10. What should you do?

- A. Request that a Windows 10 Enterprise license be assigned to User10, and then activate Computer10.
- B. From the Microsoft Deployment Toolkit (MDT), add a Volume License Key to a task sequence, and then redeploy Computer10.
- C. From System Properties on Computer10, enter a Volume License Key, and then activate Computer10.
- D. Request that User10 perform a local AutoPilot Reset on Computer10, and then activate Computer10.

Answer: D

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/windows-autopilot-requirements-lice>

NEW QUESTION 35

- (Exam Topic 4)

You customize the Start menu on a computer that runs Windows 10 as shown in the following exhibit.

You need to add Remote Desktop Connection to Group1 and remove Group3 from the Start menu.

Which two actions should you perform from the Start menu customizations? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Unlock Group!
- B. Remove Command Prompt from Group1.
- C. Delete Group3.
- D. Add Remote Desktop Connection to Group1.
- E. Rename Group3 as Group1.

Answer: AD

NEW QUESTION 37

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. On Computer1, you turn on File History. You need to protect a folder named D:\Folder1 by using File History. What should you do?

- A. From File Explorer, modify the General settings of D:\Folder1
- B. From File Settings app, configure the Backup settings
- C. From the Settings app, configure the Recovery settings
- D. From File History in Control Panel, configure the Select drive settings

Answer: B

Explanation:

To configure File History, click More options on the Backup screen. The Backup options screen allows you to set how often File History backs up your files and how long versions are saved.

References:

<https://www.groovypost.com/howto/configure-windows-10-file-history/>

NEW QUESTION 42

- (Exam Topic 4)

Use the drop-down menus to select the answer choice that completes each statement based on the information presented on the graphic.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 45

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. The following information is for technical support purposes only: Lab Instance: 11145882

You need to ensure that Windows feature updates on Client1 are deferred for 15 days when the updates become generally available.

To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

See explanation below.

Select the Start button, then select Settings > Update & Security > Windows Update.

Under Update settings, select Advanced options.

From the boxes under Choose when updates are installed, select the number of days you would like to defer a feature update or a quality update. Reference:

<https://support.microsoft.com/en-us/help/4026834/windows-10-defer-feature-updates>

NEW QUESTION 48

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains a computer named Computer1 that runs Windows 10. Computer1 contains a folder named Folder1.

You plan to share Folder1. Everyone will have Read share permissions, and administrators will have Full control share permission.

You need to prevent the share from appearing when users browse the network. What should you do?

- A. Enable access-based enumeration.
- B. Deny the List NTFS permissions on Folder1.
- C. Add Folder1 to a domain-based DFS namespace.
- D. Name the share Folder1\$.

Answer: D

Explanation:

Appending a dollar sign to share name prevents a share from appearing when users browse the network.

NEW QUESTION 49

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains a computer named Computer1 that runs Windows 10.

You need to view the settings to Computer1 by Group Policy objects (GPOs) in the domain and local Group Policies.

Which command should you run?

- A. gpresult
- B. secedit
- C. gpupdate
- D. gpfixup

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/windows-server/administration/windows-commands/gpresult>

NEW QUESTION 52

- (Exam Topic 4)

You have a Microsoft 365 Enterprise E3 license.

You have a computer named Computer1 that runs Windows 10.

You need to ensure that you can access the files on Computer1 by using a web browser on another computer. What should you configure?

- A. Sync your settings in the Settings app
- B. the File Explorer desktop app

- C. the Microsoft OneDrive desktop app
- D. Default apps in the Settings app

Answer: C

NEW QUESTION 54

- (Exam Topic 4)

You have a workgroup computer named Computer1 that runs Windows 10.

You need to configure Windows Hello for sign-in to Computer1 by using a physical security key. What should you use?

- A. a USB 3.0 device that supports BitLocker Drive Encryption (BitLocker)
- B. a USB device that supports FIDO2
- C. a USB 3.0 device that has a certificate from a trusted certification authority (CA)
- D. a USB device that supports RSA SecurID

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/user-help/security-info-setup-security-key>

NEW QUESTION 58

- (Exam Topic 4)

You need to enable BitLocker Drive Encryption (BitLocker) on a computer named Computer1 that runs Windows 10. Computer1 has the following configurations:

Contains only one 200-GB NTFS volume named C:\

Contains 50 GB of unallocated disk space

Is the member of a workgroup

Has TPM enabled

What should you do first?

- A. Create a VHD.
- B. Disable TPM.
- C. Create an additional volume.
- D. Join Computer1 to an Azure Active Directory (Azure AD) tenant.

Answer: C

Explanation:

Two partitions are required to run BitLocker because pre-startup authentication and system integrity verification must occur on a separate partition from the encrypted operating system drive. This configuration helps protect the operating system and the information in the encrypted drive.

Reference:

<https://docs.microsoft.com/en-us/windows/security/information-protection/bitlocker/bitlocker-overview-and-req>

NEW QUESTION 63

- (Exam Topic 4)

Your network an Active Directory domain named adatum.com. The domain contains 50 computers that runs Windows 8.1. The computer has locally installed desktop application that are compatible with Windows 10.

You need to upgrade the computers to windows 10, The solution must preserve the locally installed desktop applications.

Solution: You use Windows Autopilot and create a deployment profile. You generalize each computer, and the you restart the computers.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 66

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

Use the following login credentials as needed:

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only: Lab Instance: 11145882

You need to ensure that all the current and future users in the Active Directory domain can establish Remote Desktop connections to Client1. The solution must

use the principle of least privilege.
To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Step 1. Add Remote Desktop Users to the Remote Desktop Users Group.

Open Server Manager.
From Tools menu, select Active Directory Users and Computers
Double click at your domain on the left and then select Builtin.
Open Remote Desktop Users on the right pane.
At Members tab, click Add.
Type the AD users that you want to give Remote access to the RDS Server and click OK.
After selecting the remote desktop users, click OK again to close the window.
Step 2. Allow the log on through remote desktop Services.

* 1. Open Group Policy Editor. To do that:

* b. Type gpedit.msc and press Enter.

* 2. In Group Policy Editor navigate to: Computer Configuration > Windows Settings > Security Settings > Local Policies > User Rights Assignment.

* 3. At the right Pane: double click at Allow log on through Remote Desktop Services.

* 4. Click Add User or Group.

* 5. Type remote and then click Check Names.

* 6. Select the Remote Desktop Users and click OK.

* 7. Click OK at 'Select users, computers...' window.

* 8. Finally click OK again in the Windows Group Policy Editor.

NEW QUESTION 69

- (Exam Topic 4)

Your network an Active Directory domain named adatum.com. The domain contains 50 computers that runs Windows 8.1. The computer has locally installed desktop application that are compatible with Windows 10.

You need to upgrade the computers to windows 10, The solution must preserver the locally installed desktop applications.

Solution. You use System image manager (Windows SIM) to create an answer file. You use Windows Deployment Service (WDS) to add an install image. You start each computer by using PXE, and then install the image.

Does this meet the goal?

- A. Yes
- B. No

Answer: A

NEW QUESTION 72

- (Exam Topic 4)

Your network contains an Active Directory domain named adatum.com that uses Key Management Service (KMS) for activation.

You deploy a computer that runs Windows 10 to the domain. The computer fails to activate.

You suspect that the activation server has an issue. You need to identify which server hosts KMS.

How should you complete the command? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References:

<https://blogs.technet.microsoft.com/odsupport/2011/11/14/how-to-discover-office-and-windows-kms-hosts-via-d>

NEW QUESTION 77

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer named Computer1 that runs Windows 10.

A service named Application1 is configured as shown in the exhibit.

You discover that a user used the Service1 account to sign in to Computer1 and deleted some files.

You need to ensure that the identity used by Application1 cannot be used by a user to sign in to sign in to the desktop on Computer1. The solution must use the principle of least privilege.

Solution: On Computer1, you assign Service1 the deny log on as a service user right. Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/security/threat-protection/security-policy-settings/deny-log-on-as-a-s>

NEW QUESTION 78

- (Exam Topic 4)

You install Windows 10 Pro on a computer named CLIENT1.

You need to ensure that all per-user services are disabled on CLIENT1. The solution must minimize administrative effort.

What should you use?

- A. a Group Policy administrative template
- B. Device Manager
- C. Task Manager
- D. Group Policy preferences

Answer: D

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/application-management/per-user-services-in-windows>

NEW QUESTION 81

- (Exam Topic 4)

You have an Azure Active Directory (Azure AD) tenant named contoso.com that contains a user named UserA.

You have two computers named Computer1 and Computer2 that run Windows 10 and are joined to contoso.com.

You need to ensure that UserA can connect to Computer2 from Computer1 by using Remote Desktop. Which three actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. On Computer1, modify the registry.
- B. On Computer2, modify the registry.
- C. On Computer1, modify the properties of UserA.
- D. On Computer1, enable Remote Desktop.
- E. On Computer2, modify the properties of UserA.
- F. On Computer 2, enable Remote Desktop.
- G. On Computer2, add the Everyone group to the Remote Desktop Users group.
- H. On Computer1, add the Everyone group to the Remote Desktop Users group.

Answer: EFG

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/client-management/connect-to-remote-aadj-pc>

NEW QUESTION 85

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. Computer1 is in a workgroup. Computer1 contains the local users shown in the following table.

You create a folder named Folder1 that has the permissions shown in the following table.

You create a file named File1.txt in Folder1 and allow Group2 Full control permissions to File1.txt. For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References:

<https://www.dell.com/support/article/za/en/zadhs1/sln156352/understanding-file-and-folder-permissions-in-win>

NEW QUESTION 86

- (Exam Topic 4)

You plan to deploy Windows 10 to 100 secure computers.

You need to select a version of Windows 10 that meets the following requirements:

- Uses Microsoft Edge as the default browser
- Minimizes the attack surface on the computer
- Supports joining Microsoft Azure Active Directory (Azure AD)
- Only allows the installation of applications from the Microsoft Store

What is the best version to achieve the goal? More than one answer choice may achieve the goal. Select the BEST answer.

- A. Windows 10 Pro in S mode
- B. Windows 10 Home in S mode
- C. Windows 10 Pro
- D. Windows 10 Enterprise

Answer: A

Explanation:

References:

Uses Microsoft Edge as the default browser Minimizes the attack surface on the computer Supports joining Microsoft Azure Active Directory (Azure AD) Only allows the installation of applications from the Microsoft Store <https://docs.microsoft.com/es-es/windows/deployment/s-mode>

NEW QUESTION 91

- (Exam Topic 4)

Your network contains the segments shown in the following table.

You have computers that run Windows 10 and are configured as shown in the following table.

Windows Defender Firewall has the File and Printer Sharing allowed apps rule shown in the following table.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 94

- (Exam Topic 4)

You have a workgroup computer that runs Windows 10.

You need to set the minimum password length to 12 characters. What should you use?

- A. Local Group Policy Editor
- B. User Accounts in Control Panel
- C. System Protection in System Properties
- D. Sign-in options in the Settings app

Answer: A

NEW QUESTION 95

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You manage devices that run Windows 10.

Ten sales users will travel to a location that has limited bandwidth that is expensive. The sales users will be at the location for three weeks.

You need to prevent all Windows updates from downloading for the duration of the trip. The solution must not prevent access to email and the Internet.

Solution: From Update & Security in the Settings app, you turn on Pause Updates. Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

References:

<https://www.makeuseof.com/tag/5-ways-temporarily-turn-off-windows-update-windows-10/>

NEW QUESTION 96

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain. The domain contains a computer named Computer1 that runs Windows 8.1.

Computer1 has apps that are compatible with Windows 10.

You need to perform a Windows 10 in-place upgrade on Computer1.

Solution: You copy the Windows 10 installation media to a Microsoft Deployment Toolkit (MDT) deployment share. You create a task sequence, and then you run the MDT deployment wizard on Computer1.

Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/deploy-windows-mdt/upgrade-to-windows-10-with-the>

NEW QUESTION 97

- (Exam Topic 4)

You have 200 computers that run Windows 10 and are joined to an Active Directory domain.

You need to enable Windows Remote Management (WinRM) on all the computers by using Group Policy.

Which three actions should you perform? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. Set the Startup Type of the Windows Remote Management (WS-Management) service to Automatic.
- B. Enable the Windows Firewall: Allow inbound remote administration exception setting.
- C. Enable the Allow remote server management through WinRM setting.
- D. Enable the Windows Firewall: Allow inbound Remote Desktop exceptions setting.

- E. Enable the Allow Remote Shell access setting.
- F. Set the Startup Type of the Remote Registry service to Automatic.

Answer: ABC

Explanation:

References:

<https://support.auvik.com/hc/en-us/articles/204424994-How-to-enable-WinRM-with-domain-controller-Group-P>

NEW QUESTION 99

- (Exam Topic 4)

You have a Microsoft 365 tenant that contains 70 remote users. The remote users work from various locations.

Recently, each remote user purchased a personal computer that runs Windows 10 Home.

You need to configure the VPN settings on the computers automatically by using the least amount of administrative effort.

What should you use?

- A. an unattend answer file
- B. a Group Policy Object (GPO)
- C. Windows Autopilot
- D. a provisioning package

Answer: D

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/configuration/provisioning-packages/provisioning-packages>

NEW QUESTION 102

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain. The domain contains a computer named Computer1 that runs Windows 8.1.

Computer1 has apps that are compatible with Windows 10.

You need to perform a Windows 10 in-place upgrade on Computer1.

Solution: You add Windows 10 startup and install images to a Windows Deployment Services (WDS) server. You start Computer1 by using WDS and PXE, and then you initiate the Windows 10 installation.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Use Microsoft Deployment Toolkit (MDT) instead.

NEW QUESTION 107

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10 and is joined to an Active Directory domain named adatum.com.

A user named Admin1 signs in to Computer1 and runs the whoami command as shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 108

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain named contoso.com. The domain contains the users shown in the following table.

You have a computer named Computer1 that runs Windows 10 and is in a workgroup.

A local standard user on Computer1 named User1 joins the computer to the domain and uses the credentials of User2 when prompted.

You need to ensure that you can rename Computer1 as Computer33. Solution: You use the credentials of User2 on Computer1.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Renaming a domain-joined computer will also rename the computer account in the domain. To do this, you need domain administrator privileges.

User2 is a domain user, not an administrator. Use User3's credentials instead. References:

<https://docs.microsoft.com/en-us/windows/security/identity-protection/access-control/active-directory-security-g>

NEW QUESTION 113

- (Exam Topic 4)

You are a network administrator at your company.

A user attempts to start a computer and receives the following error message: "Bootmgr is missing." You need to resolve the issue.

You start the computer in the recovery mode.

Which command should you run next? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References: <https://neosmart.net/wiki/bootmgr-is-missing/>

NEW QUESTION 116

- (Exam Topic 4)

Your network contains an Active Directory domain named contoso.com. The domain contains named Computer1 that runs Windows 10. On Computer1, you create an NTFS folder and assign Full control permissions to Everyone. You share the folder as Share1 and assign the permissions shown in the following table.

When accessing Share1, which two actions can be performed by User1 but not by User2? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Delete a file created by another user.
- B. Set the permissions for a file.
- C. Rename a file created by another user.
- D. Take ownership of file.
- E. Copy a file created by another user to a subfolder.

Answer: BD

Explanation:

References:

<https://www.varonis.com/blog/ntfs-permissions-vs-share/>

NEW QUESTION 119

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains the users shown in the following table.

The Authenticated Users group has the Add workstations to domain user right in the Default Domain Controllers Policy.

The Device Managers and Help Desk groups are granted the Create Computer objects permission for the Computers container of the domain.

You have 15 workgroup computers that run Windows 10. Each computer contains a local user account named LocalAdmin1 that is a member of the following groups:

- Administrators
- Device Owners
- Authenticated Users

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: No

User1 is a member of the Authenticated Users group which has the Add workstations to domain user right. However, with the Add workstations to domain user right, you are restricted to joining a maximum of 10 computers to the domain.

Box 2: No

User2 is a member of the Authenticated Users group which has the Add workstations to domain user right. User2 is also a member of the Device Managers group which is granted the Create Computer objects permission for the Computers container of the domain. The Create Computer objects permission overrides the 10-computer limit imposed by the Add workstations to domain user right so User2 can join more than 10 computers to the domain.

Box 3: Yes

User3 is a member of the Authenticated Users group which has the Add workstations to domain user right. User3 is also a member of the Help Desk group which is granted the Create Computer objects permission for the Computers container of the domain. The Create Computer objects permission overrides the 10-computer limit imposed by the Add workstations to domain user right so User3 can join all the computers to the domain.

NEW QUESTION 120

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10 and contains the following files:

C:\Folder1\File1.bat

C:\Folder1\File1.exe

C:\Folder1\File1.cmd

A user named User1 is assigned Read & execute to all the files. Computer1 is configured as shown in the exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References:

<https://stackoverflow.com/questions/148968/windows-batch-files-bat-vs-cmd>

NEW QUESTION 123

- (Exam Topic 4)

You have a computer that runs Windows 8.1.

When you attempt to perform an in-place upgrade to Windows 10, the computer fails to start after the first restart.

You need to view the setup logs on the computer. Which folder contains the logs?

- A. %Windows.~BT\Sources\Panther\
- B. %Windows%\Logs
- C. %Windows%\Temp
- D. %Windows.~BT\Inf

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/windows-setup-log-files-and-eventlo>

NEW QUESTION 127

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. Computer1 has an IP address of 10.10.1.200 and a subnet mask of 255.255.255.0.

You configure the proxy settings on Computer1 as shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References:

<https://www.howtogeek.com/tips/how-to-set-your-proxy-settings-in-windows-8.1/>

NEW QUESTION 129

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a workgroup computer that runs Windows 10. The computer contains the local user accounts shown in the following table.

You need to configure the desktop background for User1 and User2 only.

Solution: You create two new local Group Policy Objects (GPOs) and apply one GPO to User1 and the other GPO to User2. You configure the Desktop Wallpaper setting in each GPO.

Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

Reference:

<https://www.windowscentral.com/how-apply-local-group-policy-settings-specific-users-windows-10>

NEW QUESTION 130

- (Exam Topic 4)

You have a workgroup computer named Computer1 that runs Windows 10. Computer1 has the user accounts shown in the following table.

User3, User4, and Administrator sign in and sign out on Computer1. User1 and User2 have never signed in to Computer1.

You are troubleshooting policy issues on Computer1. You sign in to Computer1 as Administrator. You add the Resultant Set of Policy (RsoP) snap-in to an MMC console.

Which users will be able to sign in on Computer1?

- A. User1, User3, and User4 only
- B. Administrator only
- C. User1, User2, User3, User4, and Administrator
- D. User3, User4, and Administrator only

Answer: D

Explanation:

The Interactive logon: Number of previous logons to cache (in case domain controller is not available) policy setting determines whether a user can log on to a Windows domain by using cached account information. Logon information for domain accounts can be cached locally so that, if a domain controller cannot be contacted on subsequent logons, a user can still log on.

References:

<https://docs.microsoft.com/en-us/windows/security/threat-protection/security-policy-settings/interactive-logon-n>

NEW QUESTION 134

- (Exam Topic 4)

A user purchases a new computer that has Windows 10 Home preinstalled. The computer has a biometric fingerprint reader.

You need to ensure that the user can use the fingerprint reader to sign in to the computer by using an Azure Active Directory (Azure AD) account.

What should you do first?

- A. Register the computer to Azure AD.
- B. Install the latest feature updates on the computer.
- C. Upgrade the computer to Windows 10 Enterprise.
- D. Upgrade the computer to Windows 10 Pro.

Answer: B

NEW QUESTION 138

- (Exam Topic 4)

You have a VPN server that accepts PPTP and L2TP connections and is configured as shown in the following exhibit.

A user named User1 has a computer that runs Windows 10 and has a VPN connection configured as shown in the following exhibit.

User1 fails to establish a VPN connection when connected to a home network. You need to identify which VPN client setting must be modified. What should you identify?

- A. ServerAddress
- B. TunnelType
- C. AuthenticationMethod
- D. L2tpIPsecAuth

E. EncryptionLevel

Answer: A

Explanation:

The server address is a private IP address. This needs to be the public IP address of the VPN server.

NEW QUESTION 142

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10 and has the users shown in the following table.

Computer1 contains the folders shown in the following table.

You move Folder1 into Folder2.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: No

If you move a shared folder, the share will no longer work.

Box 2: No

Folder1 will inherit the permissions of Folder2. User1 does not have permission to access Folder2.

Box 3: Yes

User2 is a member of the Administrators group so he can access the administrative share \\Computer1\E\$. User2 has Full Control permission to Folder2 so he can access \\Computer1\E\$\Folder2.

Folder1 will inherit the permissions of Folder2 so User2 can access \\Computer1\E\$\Folder2\Folder1.

NEW QUESTION 145

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer that runs Windows 10. The computer contains a folder named D:\Scripts. D:\Scripts contains several PowerShell scripts.

You need to ensure that you can run the PowerShell scripts without specifying the full path to the scripts. The solution must persist between PowerShell sessions.

Solution: From a command prompt, you run set.exe PATHEXT=d:\scripts. Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 147

- (Exam Topic 4)

You have 15 computers that run Windows 10. Each computer has two network interfaces named Interface1 and Interface2.

You need to ensure that network traffic uses Interface1, unless Interface1 is unavailable. What should you do?

- A. Run the Set-NetIPInterface -InterfaceAlias Interface1 -InterfaceMetric 1 command.
- B. Run the Set-NetAdapterBinding -Name Interface2 -Enabled \$true -ComponentID ms_tcpip - ThrottleLimit 0 command.
- C. Set a static IP address on Interface 1.
- D. From Network Connections in Control Pane, modify the Provider Order.

Answer: A

Explanation:

References:

<https://tradingtechnologies.atlassian.net/wiki/spaces/KB/pages/27439127/How+to+Change+Network+Adapter+> <https://docs.microsoft.com/en-us/powershell/module/nettcpip/set-netipinterface?view=win10-ps>

NEW QUESTION 149

- (Exam Topic 4)

Your network contains an Active Directory domain named adatum.com. The domain contains two computers named Computer1 and Computer2 that run Windows 10.

The domain contains the user accounts shown in the following table.

Computer2 contains the local groups shown in the following table.

The relevant user rights assignments for Computer2 are shown in the following table.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Yes

User1 is an administrator and has the Allow log on through Remote Desktop Services.

Box 2: No

User2 is a member of Group2 which has the Deny log on through Remote Desktop Services.

Box 3: Yes

User3 is a member of the administrators group and has the Allow log on through Remote Desktop Services.

Note: Deny permissions take precedence over Allow permissions. If a user belongs to two groups, and one of them has a specific permission set to Deny, that user is not able to perform tasks that require that permission even if they belong to a group that has that permission set to Allow.

References:

<https://docs.microsoft.com/en-us/azure/devops/organizations/security/about-permissions?view=azure-devops&ta>

NEW QUESTION 150

- (Exam Topic 4)

You have a workgroup computer named Computer1 that runs Windows 10 and has the users shown in the following table.

User Account Control (UAC) on Computer1 is configured as shown in the following exhibit.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Yes

User Account Control: Behavior of the elevation prompt for administrators in Admin Approval Mode is set to Prompt for consent. When an operation requires elevation of privilege, the user is prompted to select either Permit or Deny. If the user selects Permit, the operation continues with the user's highest available privilege.

Box 2: Yes

User1 is a member of Administrators group.

User Account Control: Behavior of the elevation prompt for administrators in Admin Approval Mode is set to Prompt for consent. When an operation requires elevation of privilege, the user is prompted to select either Permit or Deny. If the user selects Permit, the operation continues with the user's highest available privilege.

Box 3: Yes

User Account Control: Behavior of the elevation prompt for standard users is set to Prompt for credentials (Default). When an operation requires elevation of privilege, the user is prompted to enter an administrative user name and password. If the user enters valid credentials, the operation continues with the applicable privilege.

References:

<https://docs.microsoft.com/en-us/windows/security/identity-protection/user-account-control/user-account-control>

NEW QUESTION 153

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have two computers named Computer1 and Computer2 that run Windows 10.

You have an Azure Active Directory (Azure AD) user account named admin@contoso.com that is in the local Administrators group on each computer.

You sign in to Computer1 by using admin@contoso.com.

You need to ensure that you can use Event Viewer on Computer1 to connect to the event logs on Computer2. Solution: On Computer2, you run the Enable-PSRemoting cmdlet.

Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

The Enable-PSRemoting cmdlet configures the computer to receive PowerShell remote commands that are sent by using the WS-Management technology.

References:

<https://docs.microsoft.com/en-us/powershell/module/microsoft.powershell.core/enable-psremoting?view=powershell-7>

NEW QUESTION 154

- (Exam Topic 4)

You install Windows 10 Enterprise on a new computer. You need to force activation on the computer.

Which command should you run?

- A. slmgr /upk
- B. Sec-RDLICENSEConfiguration -Force
- C. Sec-MsolLicense -AddLicense
- D. slmgr /ato

Answer: D

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/deployment/volume-activation/activate-using-key-management-services>

NEW QUESTION 156

- (Exam Topic 4)

You plan to install Windows 10 Pro by using an answer file. You open Windows System Image Manager.

You need to create an answer file. What should you do first?

- A. Open the Install.wim file from the Windows 10 installation media.
- B. Open the Boot.wim file from the Windows 10 installation media.
- C. Install the WinPE add-on for the Windows Assessment and Deployment Kit (Windows ADK).
- D. Install the Windows Assessment and Deployment Kit (Windows ADK).

Answer: C

NEW QUESTION 157

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. On Computer1, you turn on File History.

You need to protect a folder named D:\Folder1 by using File History. What should you do?

- A. From File Explorer, modify the Security settings of D:\Folder1
- B. From File Explorer, add D:\Folder1 to the Documents library

- C. From the Settings app, configure the Recovery settings
- D. From File History in Control Panel, configure the Select drive settings

Answer: B

NEW QUESTION 161

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a laptop named Computer1 that runs Windows 10.

When in range, Computer1 connects automatically to a Wi-Fi network named Wireless1. You need to prevent Computer1 from automatically connecting to Wireless1.

Solution: From the Settings app, you modify the properties of the Wireless1 known Wi-Fi network. Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

Removing Wireless1 as a known Wi-Fi network on Computer1 will prevent it from automatically connecting. Note: You can also type netsh wlan show profiles in the Command Prompt to manage and delete wireless network profiles.

References:

<https://kb.netgear.com/29889/How-to-delete-a-wireless-network-profile-in-Windows-10>

NEW QUESTION 163

- (Exam Topic 4)

You are troubleshooting Windows 10 updates that fail to install on a computer that runs Windows 10. You delete the contents of the SoftwareDistribution folder. You need to delete the signatures of the Windows Update packages. Which folder should you delete?

- A. %systemdrive%\recovery
- B. %systemroot%\WinSxS
- C. %systemdrive%\System Volume Information

Answer: A

Explanation:

References:

<https://tipsmake.com/how-to-delete-pending-updates-on-windows-10>

NEW QUESTION 164

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains a user named User1. User1 creates a Microsoft account.

User1 needs to sign in to cloud resources by using the Microsoft account without being prompted for credentials.

Which settings should User1 configure?

- A. User Accounts in Control Panel
- B. Email & app accounts in the Settings app
- C. Users in Computer Management
- D. Users in Active Directory Users and Computers

Answer: B

Explanation:

References:

<https://support.microsoft.com/en-za/help/4028195/microsoft-account-how-to-sign-in>

NEW QUESTION 165

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. Computer1 contains the folders shown in the following table.

You include Folder1, Folder2, and Folder3 in the Documents library.

You configure File History to run every 15 minutes, and then turn on File History.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 169

- (Exam Topic 4)

You have a file named Reg1.reg that contains the following content.

What is the effect of importing the file?

- A. A key named command will be renamed as notepad.exe.
- B. In a key named Notepad, the command value will be set to @="notepad.exe".
- C. In a key named command, the default value will be set to notepad.exe.

Answer: C

NEW QUESTION 171

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains the users shown in the following table.

The domain contains a computer named Computer1 that runs Windows 10. Computer1 contains a folder named Folder1 that has the following permissions:

User2: Deny Write

Group1: Allow Read

Group2: Allow Modify

Folder1 is shared as Share1\$. Share1\$ has the following configurations:

Everyone: Allow Full control

Access-based enumeration: Enabled

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

YES, YES, NO

References:

<https://www.varonis.com/blog/ntfs-permissions-vs-share/>
<http://www.ntfs.com/ntfs-permissions-file-advanced.htm>
<https://docs.microsoft.com/en-us/windows-server/storage/dfs-namespaces/enable-access-based-enumeration-on>

NEW QUESTION 174

- (Exam Topic 4)

Your network contains an Active Directory domain named contoso.com. The domain contains a server named Server1 that runs Windows Server 2016 and a computer named Computer1 that runs Windows 10.

Server1 contains a share named Backup. All users can read and write data in Backup.

On Monday at 13:00, you configure Backup and Restore (Windows 7) on Computer1 to use the following settings:

Backup Destination: \\Server1\Backup

What do you want to back up?: Local Disk (D:), Include a system image of drives: System Reserved, (C:)

Schedule: Daily at 23:00

You need to identify how many backups will be available on Thursday at 17:00.

What should you identify? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 178

- (Exam Topic 4)

You have several computers that run Windows 10. The computers are in a workgroup and have BitLocker Drive Encryption (BitLocker) enabled.

You join the computers to Microsoft Azure Active Directory (Azure AD).

You need to ensure that you can recover the BitLocker recovery key for the computers from Azure AD. What should you do first?

- A. Disable BitLocker.
- B. Add a BitLocker key protector.
- C. Suspend BitLocker.
- D. Disable the TPM chip.

Answer: B

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/security/information-protection/bitlocker/prepare-your-organization-f>

NEW QUESTION 183

- (Exam Topic 4)

You have a computer that runs Windows 10.

You discover that Windows updates are failing to install on the computer.

You need to generate a log file that contains detailed information about the failures. Which cmdlet should you run?

- A. Get-LogProperties
- B. Get-WindowsErrorReporting
- C. Get-WindowsUpdateLog
- D. Get-WinEvent

Answer: C

Explanation:

References:

<https://docs.microsoft.com/en-us/powershell/module/windowsupdate/get-windowsupdate-log?view=win10-ps>

NEW QUESTION 188

- (Exam Topic 4)

You have four computers that run Windows 10. The computers are configured as shown in the following table.

On Computer1, you create a user named User1. In the domain, you create a user named User2. You create the groups shown in the following table.

You need to identify to which computers User1 can sign in, and to which groups you can add User2. What should you identify? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Computer 1 only.

User1's account was created on Computer1. The account is a local account on Computer1. Therefore, User1 can only sign in to Computer1.

Box 2: Group5 only.

User2's account was created in the domain. A domain is a security boundary. Therefore, you can only add User2 to groups in the domain.

NEW QUESTION 190

- (Exam Topic 4)

You have a workgroup computer named Computer1 that runs Windows 10. Computer1 has the users accounts shown in the following table:

Computer1 has the local Group Policy shown in the following table.

You create the Local Computer\Administrators policy shown in the following table.

You create the Local Computer\Non-Administrators policy shown in the following table.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:

[https://docs.microsoft.com/en-us/previous-versions/windows/it-pro/windows-vista/cc766291\(v=ws.10\)](https://docs.microsoft.com/en-us/previous-versions/windows/it-pro/windows-vista/cc766291(v=ws.10))

NEW QUESTION 194

- (Exam Topic 4)

A user has a computer that runs Windows 10. The user has access to the following storage locations:

A USB flash drive

Microsoft OneDrive

OneDrive for Business

A drive mapped to network share

A secondary partition on the system drive

You need to configure Back up using File History from the Settings app.

Which two storage locations can you select by using File History? Each correct answer presents complete solution.

NOTE: Each correct selection is worth one point.

- A. OneDrive for Business
- B. OneDrive
- C. the USB flash drive
- D. the secondary partition on the system drive
- E. the drive mapped to a network share

Answer: CE

NEW QUESTION 198

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains a computer named Computer1 that runs Windows 10.

The domain contains the users shown in the following table.

Computer has the local users shown in the following table.

All users have Microsoft accounts.

Which two user can be configured to sign in by using their Microsoft account? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. User 1
- B. User 2
- C. User 3
- D. User 4
- E. User 5

Answer: CE

NEW QUESTION 200

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10.

On Computer1, you create the local users shown in the following table.

Which three user profiles will persist after each user signs out? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. User1
- B. User2
- C. User3
- D. User4
- E. User5

Answer: ADE

NEW QUESTION 205

- (Exam Topic 4)

Your company has a main office and a branch office. The offices connect to each other by using a WAN link. Access to the Internet is provided through the main office.

The branch office contains 25 computers that run Windows 10. The computers contain small hard drives that have very little free disk space.

You need to prevent the computers in the branch office from downloading updates from peers on the network. What should you do?

- A. From the Settings app, modify the Delivery Optimizations settings.
- B. Configure the network connections as metered connections.
- C. Configure the computers to use BranchCache in hosted cache mode.
- D. Configure the updates to use the Semi-Annual Channel (Targeted) channel.

Answer: C

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/deployment/update/waas-branchcache>

NEW QUESTION 207

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer named Computer1 that runs Windows 10.

You test Windows updates on Computer1 before you make the updates available to other users at your company.

You install a quality update that conflicts with a customer device driver. You need to remove the update from Computer1.

Solution: From System Restore, you revert the system state to a restore point that was created before the update was installed.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

References:

<https://support.microsoft.com/en-us/help/934307/description-of-the-windows-update-standalone-installer-in-win>

NEW QUESTION 208

- (Exam Topic 4)

You have a computer that runs Windows 10 and has BitLocker Drive Encryption (BitLocker) enabled on all volumes.

You start the computer from Windows Recovery Environment (WinRE). You need to read the data on the system drive.

What should you do?

- A. Run cipher.exe and specify the /rekey parameter
- B. Run cipher.exe and specify the /adduser parameter
- C. Run manage-bde.exe and specify the -off parameter
- D. Run manage-bde.exe and specify the -unlock parameter

Answer: D

Explanation:

<https://www.repairwin.com/how-to-disable-bitlocker-in-windows-recovery-environment-winre/>

NEW QUESTION 213

- (Exam Topic 4)

You deploy 100 computers that run Windows 10. Each computer has a cellular connection and a Wi-Fi connection. You need to prevent the computers from using the cellular connection unless a user manually connects to the cellular network. What should you do?

- A. Set the Use cellular instead of Wi-Fi setting for the cellular connection to Never
- B. Run the netsh wlan set hostednetwork mode=disallow command
- C. Clear the Let Windows manage this connection check box for the cellular connection
- D. Select the Let Windows manage this connection check box for the Wi-Fi connection

Answer: C

Explanation:

References:

<https://support.microsoft.com/en-za/help/10739/windows-10-cellular-settings>

NEW QUESTION 214

- (Exam Topic 4)

You have computers that run Windows 10 Enterprise as shown in the following table.

Both computers have applications installed and contain user data.

You plan to configure both computers to run Windows 10 Enterprise LTSC 2019 and to retain all the existing applications and data.

You need to recommend a method to deploy Windows 10 Enterprise LTSC 2019 to the computers. The solution must minimize effort to install and configure the applications.

What should you include in the recommendation for each computer? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, chat or text message Description automatically generated

References:

<https://docs.microsoft.com/en-us/windows/deployment/upgrade/windows-10-upgrade-paths>

NEW QUESTION 217

- (Exam Topic 4)

You have the computers shown in the following table.

You need to identify which computers support the features.

BitLocker Drive Encryption (BitLocker)

Microsoft Application Virtualization (App-V)

Which computers support the features? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated

References:

<https://www.microsoft.com/en-us/windowsforbusiness/compare>

NEW QUESTION 219

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. You need to enable boot logging on Computer1.

What should you do?

- A. At a command prompt, run the bcdboot.exe command and specify the /v parameter.
- B. From the Settings app, configure the Start settings.
- C. From System Properties in Control Panel, configure the Startup and Recovery settings.
- D. From System Configuration configure the Boot settings.

Answer: D

Explanation:

Reference:

<https://www.windowscentral.com/how-enable-boot-log-windows-10>

NEW QUESTION 221

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

Use the following login credentials as needed:

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only: Lab Instance: 11145882

Users who attempt to sign in to the domain from Client3 report that the sign-ins fail. You need to resolve the issue.

To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

See explanation below.

Use a local administrator account to log on to the computer.

Select Start, press and hold (or right-click) Computer > Properties.

Select Change settings next to the computer name.

On the Computer Name tab, select Change.

Under the Member of heading, select Workgroup, type a workgroup name, and then select OK.

When you are prompted to restart the computer, select OK.

On the Computer Name tab, select Change again.

Under the Member of heading, select Domain, and then type the domain name.

Select OK, and then type the credentials of the user who has permissions in the domain.

When you are prompted to restart the computer, select OK.

Restart the computer.

NEW QUESTION 224

- (Exam Topic 4)

You have the computer shown in the following table.

You plan to configure deployment rings for Windows 10 quality and feature updates.

What is the maximum number of days you can defer installing quality updates, and which computers support installing feature updates from Windows Update? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, email Description automatically generated

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/update/waas-configure-wufb>

NEW QUESTION 227

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10.

On Computer1, you create a VPN connection as shown in the following exhibit.

The corporate network contains a single IP subnet.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 232

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10.

Computer1 was off for one year. During that time, two feature updates and 12 quality updates were released. From the Microsoft Update Catalog website, you download the missing updates and save the updates to Computer1.

You need to ensure that Computer1 runs the latest version of Windows 10 and is fully updated. The solution must minimize the amount of time required to update the computer.

What should you do?

- A. Install the last feature update, and then install the last quality update.
- B. Install the last quality update, and then install both feature updates.
- C. Install the last quality update, and then install the last feature update.
- D. Install the last feature update, and then install all the quality updates released after the feature update.
- E. Install all the quality and feature updates in the order in which they were released.

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/update/get-started-updates-channels-tools>

NEW QUESTION 234

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains 1,000 computers that run Windows 10.

You configure Microsoft Edge settings by using domain and local Group Policy Objects (GPOs).

You need to generate a report that contains all the Microsoft Edge policy settings applied to a computer. What should you do?

- A. From PowerShell
- B. run the Gec-GPO cmdlet.
- C. From PowerShell
- D. run the Gec-GPOReporc cmdlet.

- E. From Microsoft Edge, open edge://policy.
- F. From Microsoft Edge, open edge://settings.

Answer: C

Explanation:

The Get-GPOReport cmdlet would generate a report for all domain group policy objects. However, this would not display the settings that are applied by local group policy objects.

To display the settings applied by both domain and local GPOs, you would have to open Microsoft Edge and enter edge://policy in the address bar.

NEW QUESTION 237

- (Exam Topic 4)

Your office has a dedicated wireless network for guests.

You plan to provide access cards that will have a QR code for guests. The QR code will link to a network configuration file stored on a publicly accessible website and provide the wireless network settings for Windows 10 devices.

Which tool should you use to create the configuration file and which file type should you use for the configuration file? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/configuration/provisioning-packages/provisioning-packages>

NEW QUESTION 240

- (Exam Topic 4)

You are planning a recovery strategy for computers that run Windows 10.

You need to create recovery procedures to roll back feature updates and quality updates.

What should you include in the procedures? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References:

<https://www.thewindowsclub.com/rollback-uninstall-windows-10-creators-update> <https://www.dummies.com/computers/pcs/undo-windows-update/>

NEW QUESTION 245

- (Exam Topic 4)

Your company uses Microsoft Deployment Toolkit (MDT) to deploy Windows 10 to new computers. The company purchases 1,000 new computers.

You need to ensure that the Hyper-V feature is enabled on the computers during the deployment. What are two possible ways to achieve the goal? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. Add a task sequence step that adds a provisioning package.
- B. In a Group Policy object (GPO), from Computer Configuration, configure Application Control Policies.
- C. Add a custom command to the Unattend.xml file.
- D. Add a configuration setting to Windows Deployment Services (WDS).
- E. Add a task sequence step that runs dism.exe.

Answer: AE

Explanation:

References:

Provisioning package works with Windows Configuration Designer to provision win10 features and runtime settings. WCD (provisioning Package) is GUI based while DISM is command line based and dose same function. Unattend.xml / answer files are used with installation media. It contains settings, definitions and values to use during Windows Setup. In an answer file, you specify various setup options. These options include how to partition disks, where to find the Windows image that will be installed, and which product key to apply.

<https://docs.microsoft.com/en-us/windows/deployment/deploy-windows-mdt/create-a-windows-10-reference-im>

NEW QUESTION 249

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer named Computer1 that runs Windows 10. The computer contains a folder. The folder contains sensitive data.

You need to log which user reads the contents of the folder and modifies and deletes files in the folder. Solution: From the properties of the folder, you configure the Auditing settings and from the Audit Policy in

the local Group Policy, you configure Audit directory service access.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

References:

https://www.netwrix.com/how_to_detect_who_changed_file_or_folder_owner.html

NEW QUESTION 250

- (Exam Topic 4)

You have 20 computers that run Windows 10. The computers are in a workgroup.

You need to create a local user named Admin1 on all the computers. Admin1 must be a member of the Remote Management Users group.

What should you do?

- A. From Windows Configuration Designer, create a provisioning package, and then run the provisioning package on each computer.
- B. Create a script that runs the New-ADUser cmdlet and the Set-AdGroup cmdlet.
- C. Create a Group Policy object (GPO) that contains the Local User Group Policy preference.
- D. Create a script that runs the New-MSolUser cmdlet and the Add-ADComputerServiceAccount cmdlet.

Answer: A

Explanation:

References:

<https://blogs.technet.microsoft.com/askpfeplat/2017/11/06/use-group-policy-preferences-to-manage-the-local-ad>

NEW QUESTION 252

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. Computer1 belongs to a workgroup. You run the following commands on Computer1.

New-LocalUser -Name User1 -NoPassword Add-LocalGroupMember User -Member User1 What is the effect of the configurations?

- A. User1 is prevented from signing in until the user is assigned additional user rights.
- B. User1 appears on the sign-in screen and can sign in without a password.
- C. User1 is prevented from signing in until an administrator manually sets a password for the user.
- D. User1 appears on the sign-in screen and must set a new password on the first sign-in attempts.

Answer: D

Explanation:

References:

<https://docs.microsoft.com/en-us/powershell/module/microsoft.powershell.localaccounts/new-localuser? view=powershell-5.1>

NEW QUESTION 253

- (Exam Topic 4)

Your network contains an Active Directory domain that is synced to a Microsoft Azure Active Directory (Azure AD) tenant.

Your company purchases a Microsoft 365 subscription.

You need to migrate the Documents folder of users to Microsoft OneDrive for Business.

What should you configure?

- A. One Drive Group Policy settings
- B. roaming user profiles
- C. Enterprise State Roaming

D. Folder Redirection Group Policy settings

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/onedrive/redirect-known-folders?redirectSourcePath=%252fen-us%252farticle%252fredirect-windows-known-folders-to-onedrive-e1b3963c-7c6c-4694-9f2f-fb8005d9ef12>

NEW QUESTION 258

- (Exam Topic 4)

You have a workgroup computer named Computer1 that runs Windows 10. From File Explorer, you open OneDrive as shown in the following exhibit.

Use the drop-down menus to select the answer choice that answers each question based on the information presented on the graphic.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 261

- (Exam Topic 4)

You have a computer that runs Windows 10. You use the computer to test new Windows features. You need to configure the computer to receive preview builds of Windows 10 as soon as possible. What should you configure from Update & Security in the Settings app?

- A. Windows Insider Program
- B. Windows Update
- C. Delivery Optimization
- D. For developer

Answer: A

Explanation:

Reference:
