Endpoint Administrator

## About ExamBible

### *Your Partner of IT Exam*

## Found in 1998

ExamBible is a company specialized on providing high quality IT exam practice study materials, especially Cisco CCNA, CCDA, CCNP, CCIE, Checkpoint CCSE, CompTIA A+, Network+ certification practice exams and so on. We guarantee that the candidates will not only pass any IT exam at the first attempt but also get profound understanding about the certificates they have got. There are so many alike companies in this industry, however, ExamBible has its unique advantages that other companies could not achieve.

## Our Advances

### \* 99.9% Uptime

All examinations will be up to date.

### \* 24/7 Quality Support

We will provide service round the clock.

### \* 100% Pass Rate

Our guarantee that you will pass the exam.

### \* Unique Gurantee

If you do not pass the exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

NEW QUESTION 1

- (Exam Topic 4)  
You have an Azure subscription.  
You have an on-premises Windows 11 device named Device 1. You plan to monitor Device1 by using Azure Monitor.  
You create a data collection rule (DCR) named DCR1 in the subscription. To what should you associate DCR1 ?

- A. Azure Network Watcher
- B. Device1
- C. a Log Analytics workspace
- D. a Monitored Object

Answer: B

Explanation:

To monitor Device1 by using Azure Monitor, you should associate DCR1 with Device1. A data collection rule (DCR) defines the data collection process in Azure Monitor, such as what data to collect, how to transform it, and where to send it. A DCR can be associated with multiple virtual machines and specify different data sources, such as Azure Monitor Agent, custom logs, or Azure Event Hubs1. To associate a DCR with a virtual machine, you need to install the Azure Monitor Agent on the machine and then select the DCR from the list of available rules2. You can also use Azure Policy to automatically install the agent and associate a DCR with any virtual machines or virtual machine scale sets as they are created in your subscription3. The other options are not correct for this scenario because:

- > Azure Network Watcher is a service that provides network performance monitoring and diagnostics for Azure resources. It is not related to data collection rules or Azure Monitor4.
- > A Log Analytics workspace is a destination where you can send the data collected by a data collection rule. It is not an entity that you can associate a DCR with5.
- > A Monitored Object is not a valid term in the context of Azure Monitor or data collection rules. References: Data collection rules in Azure Monitor, Configure data collection for Azure Monitor Agent, U Azure Policy to install Azure Monitor Agent and associate with a DCR, What is Azure Network Watcher?, Log Analytics workspaces in Azure Monitor

NEW QUESTION 2

- (Exam Topic 4)  
You have a Microsoft 365 subscription that uses Microsoft Intune Suite. You use Microsoft Intune to manage Windows 11 devices.  
You need to implement passwordless authentication that requires users to use number matching Which authentication method should you use?

- A. Microsoft Authenticator
- B. voice calls
- C. FIDO2 security keys
- D. text messages

Answer: A

NEW QUESTION 3

- (Exam Topic 4)  
You have a Microsoft Intune subscription that is configured to use a PFX certificate connector to an on-premises Enterprise certification authority (CA).  
You need to use Intune to configure autoenrollment for Android devices by using public key pair (PKCS) certificates.  
Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Obtain the root certificate.

From the Microsoft Endpoint Manager admin center, create a trusted certificate configuration profile.

From the Enterprise CA, configure certificate managers.

From the Microsoft Endpoint Manager admin center, configure enrollment restrictions.

From the Microsoft Endpoint Manager admin center, create a PKCS certificate configuration profile.

Answer Area

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, email Description automatically generated  
Reference:

<https://docs.microsoft.com/en-us/mem/intune/protect/certificates-pfx-configure>

**NEW QUESTION 4**

- (Exam Topic 4)

Your network contains an on-premises Active Directory Domain Services (AD DS) domain that syncs with an Azure AD tenant by using Azure AD Connect.

You use Microsoft Intune and Configuration Manager to manage devices.

You need to recommend a deployment plan for new Windows 11 devices. The solution must meet the following requirements:

- Devices for the marketing department must be joined to the AD DS domain only. The IT department will install complex applications on the devices at build time, before giving the devices to the marketing department users.
- Devices for The sales department must be Azure AD joined. The devices will be shipped directly from the manufacturer to The homes of the sales department users.
- Administrative effort must be minimized.

Which deployment method should you recommend for each department? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

**Answer Area**

Sales:

Marketing:

Marketing:

**NEW QUESTION 5**

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription that uses Microsoft Intune. You have the Windows 11 devices shown in the following table.

Name	Member of	BitLocker Drive Encryption (BitLocker)
Device1	Group1	Enabled
Device2	Group1, Group3	Disabled
Device3	Group1, Group2	Enabled

You deploy the device compliance policy shown in the exhibit. (Click the Exhibit tab.)

## Basics [Edit](#)

Name	Policy1
Description	--
Platform	Windows 10 and later
Profile type	Windows 10/11 compliance policy

## Compliance settings [Edit](#)

### Device Health

Require BitLocker	Require
-------------------	---------

## Actions for noncompliance [Edit](#)

Action	Schedule	Message template	Additional recipients (via email)
Mark device noncompliant	Immediately		

## Scope tags [Edit](#)

Default

## Assignments [Edit](#)

### Included groups

Group
Group1
Group3

### Excluded groups

Group
Group2

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

### Answer Area

Statements	Yes	No
Device1 will have Policy1 assigned and will be marked as compliant.	<input type="radio"/>	<input type="radio"/>
Device2 will have Policy1 assigned and will be marked as compliant.	<input type="radio"/>	<input type="radio"/>
Device3 will have Policy1 assigned and will be marked as compliant.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Answer Area

Statements	Yes	No
Device1 will have Policy1 assigned and will be marked as compliant.	<input checked="" type="radio"/>	<input type="radio"/>
Device2 will have Policy1 assigned and will be marked as compliant.	<input type="radio"/>	<input checked="" type="radio"/>
Device3 will have Policy1 assigned and will be marked as compliant.	<input type="radio"/>	<input checked="" type="radio"/>

NEW QUESTION 6

- (Exam Topic 4)  
You have a computer named Computer1 that runs Windows 11.  
A user named User1 plans to use Remote Desktop to connect to Computer1.  
You need to ensure that the device of User1 is authenticated before the Remote Desktop connection is established and the sign in page appears.  
What should you do on Computer1?

- A. Turn on Reputation-based protection.
- B. Enable Network Level Authentication (NLA).
- C. Turn on Network Discovery.
- D. Configure the Remote Desktop Configuration service.

Answer: B

NEW QUESTION 7

- (Exam Topic 4)  
You have a Microsoft 365 subscription that contains the devices shown in the following table.

Name	Platform
Device1	Windows 10
Device2	iOS

You plan to enroll the devices in Microsoft Intune.  
How often will the compliance policy check-ins run after each device is enrolled in Intune? To answer, select the appropriate options in the answer area.  
NOTE: Each correct selection is worth one point.

Device1:

Every 15 minutes for one hour, and then every eight hours

Every five minutes for 15 minutes, then every 15 minutes for two hours, and then every eight hours

Every three minutes for 15 minutes, then every 15 minutes for two hours, and then every eight hours

Device2:

Every 15 minutes for one hour, and then every eight hours

Every five minutes for 15 minutes, then every 15 minutes for two hours, and then every eight hours

Every three minutes for 15 minutes, then every 15 minutes for two hours, and then every eight hours

- A. Mastered
- B. Not Mastered

Answer: A

**Explanation:**  
Box 1: Every three minutes for 15 minutes, then every 15 minutes for two hours, and then around every eight hours  
If devices recently enroll, then the compliance, non-compliance, and configuration check-in runs more frequently. The check-ins are estimated at:  
Windows 10: Every 3 minutes for 15 minutes, then every 15 minutes for 2 hours, and then around every 8 hours  
Graphical user interface, text, application, email Description automatically generated

Platform	Frequency
iOS/iPadOS	Every 15 minutes for 1 hour, and then around every 8 hours
macOS	Every 15 minutes for 1 hour, and then around every 8 hours
Android	Every 3 minutes for 15 minutes, then every 15 minutes for 2 hours, and then around every 8 hours
Windows 10/11 PCs enrolled as devices	Every 3 minutes for 15 minutes, then every 15 minutes for 2 hours, and then around every 8 hours
Windows 8.1	Every 5 minutes for 15 minutes, then every 15 minutes for 2 hours, and then around every 8 hours

Box 2: Every 15 minutes for one hour, and then every eight hours  
iOS/iPadOS: Every 15 minutes for 1 hour, and then around every 8 hours  
Reference: <https://docs.microsoft.com/en-us/mem/intune/configuration/device-profile-troubleshoot>

#### NEW QUESTION 8

- (Exam Topic 4)

You have an Azure AD group named Group1. Group1 contains two Windows 10 Enterprise devices named Device1 and Device2. You create a device configuration profile named Profile1. You assign Profile1 to Group1. You need to ensure that Profile1 applies to Device1 only. What should you modify in Profile1?

- A. Assignments
- B. Settings
- C. Scope (Tags)
- D. Applicability Rules

**Answer: D**

#### Explanation:

To ensure that Profile1 applies to Device1 only, you need to modify the Applicability Rules in Profile1. You can use applicability rules to filter which devices receive a profile based on criteria such as device model, manufacturer, or operating system version. You can create an applicability rule that matches Device1's properties and excludes Device2's properties. References:

<https://docs.microsoft.com/en-us/mem/intune/configuration/device-profile-assign#applicability-rules>

#### NEW QUESTION 9

- (Exam Topic 4)

Your company has an Azure AD tenant named contoso.com that contains several Windows 10 devices. When you join new Windows 10 devices to contoso.com, users are prompted to set up a four-digit pin. You need to ensure that the users are prompted to set up a six-digit pin when they join the Windows 10 devices to contoso.com.

Solution: From the Microsoft Entra admin center, you configure automatic mobile device management (MDM) enrollment. From the Microsoft Intune admin center, you configure the Windows Hello for Business enrollment options.

Does this meet the goal?

- A. Yes
- B. No

**Answer: B**

#### NEW QUESTION 10

- (Exam Topic 4)

You have a Microsoft 365 subscription that contains 1,000 iOS devices. The devices are enrolled in Microsoft Intune as follows:

- Two hundred devices are enrolled by using the Intune Company Portal.
- Eight hundred devices are enrolled by using Apple Automated Device Enrollment (ADE).

You create an iOS/iPadOS software updates policy named Policy 1 that is configured to install iOS/iPadOS 15.5.

How many iOS devices will Policy1 update, and what should you configure to ensure that only iOS/iPadOS 15.5 is installed? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

### Answer Area

Number of devices:	<div><div></div><div>200</div><div>800</div><div>1000</div></div>
Configure a:	<div><div></div><div>Compliance policy</div><div>Conditional Access policy</div><div>Device restriction policy</div></div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Policy 1 will update 800 iOS devices that are enrolled by using Apple Automated Device Enrollment (ADE). This is because ADE devices are supervised devices that support software update policies in Intune1. Devices that are enrolled by using the Intune Company Portal are not supervised devices and do not support software update policies2. To ensure that only iOS/iPadOS 15.5 is installed, you should configure a device restriction policy that restrict visibility of software updates. This will prevent users from manually updating the OS to a newer version than the one you specified in Policy 11. You can use the Deployment Workbench to create and assign a device restriction profile to your ADE devices3.

NEW QUESTION 10

- (Exam Topic 4)

You have a computer that runs Windows 10 and contains two local users named User1 and User2. You need to ensure that the users can perform the following actions:

- User 1 must be able to adjust the date and time.
- User2 must be able to clear Windows logs.

The solution must use the principle of least privilege.

To which group should you add each user? To answer, drag the appropriate groups to the correct users. Each group may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 12

- (Exam Topic 4)

You have a Microsoft Deployment Toolkit (MDT) server named MDT1.

When computers start from the LiteTouchPE\_x64.iso image and connect to MDT1, the welcome screen appears as shown in the following exhibit.

You need to prevent the welcome screen from appearing when the computers connect to MDT1.

Which three actions should you perform in sequence? To answer move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Modify the CustomSettings.ini file.

Update the deployment share.

Modify the Bootstrap.ini file.

Replace the ISO image.

Modify the task sequence.

Answer Area

>

<

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Modify the Bootstrap.ini file.  
Add this to your bootstrap.ini file and then update the deployment share and use the new boot media created in that process:  
SkipBDDWelcome=YES  
Box 2: Modify the CustomSettings.ini file. SkipBDDWelcome  
Indicates whether the Welcome to Windows Deployment wizard page is skipped.  
For this property to function properly it must be configured in both CustomSettings.ini and BootStrap.ini. BootStrap.ini is processed before a deployment share (which contains CustomSettings.ini) has been selected.  
Box 3: Update the deployment share. Reference:  
<https://docs.microsoft.com/en-us/mem/configmgr/mdt/toolkit-reference#table-6-deployment-wizard-pages>

NEW QUESTION 13

- (Exam Topic 4)  
You have a Microsoft 365 subscription that contains 1,000 Windows 11 devices enrolled in Microsoft Intune. You plan to create and monitor the results of a compliance policy used to validate the BIOS version of the devices.  
Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Review the compliance dashboard for results.

Create and assign a compliance policy that has System Security settings configured.

Review the Conditional Access Insights and Reporting workbook for results.

Create a PowerShell discovery script and a JSON file.

Upload the PowerShell script to Intune.

Upload the JSON file to Azure AD.

Create and assign a custom compliance policy.

Answer Area

1

2

3

4

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Actions

Review the compliance dashboard for results.

Create and assign a compliance policy that has System Security settings configured.

Review the Conditional Access Insights and Reporting workbook for results.

Create a PowerShell discovery script and a JSON file.

Upload the PowerShell script to Intune.

Upload the JSON file to Azure AD.

Create and assign a custom compliance policy.

Answer Area

Create a PowerShell discovery script and a JSON file.

Upload the PowerShell script to Intune.

Upload the JSON file to Azure AD.

Create and assign a custom compliance policy.

NEW QUESTION 18

- (Exam Topic 4)  
You have a computer named Computer5 that has Windows 10 installed. You create a Windows PowerShell script named config.ps1. You need to ensure that config.ps1 runs after feature updates are installed on Computer5. Which file should you modify on Computer5?

- A. LiteTouch.wsf
- B. SetupConfig.ini
- C. Unattendb\*
- D. Unattend.xml

Answer: B

**Explanation:**

SetupConfig.ini is a file that can be used to customize the behavior of Windows Setup during feature updates. You can use this file to specify commands or scripts that run before or after the installation process. To run a PowerShell script after a feature update, you can use the PostOOBE parameter in SetupConfig.ini and specify the path to the script file. References: [SetupConfig.ini reference]

**NEW QUESTION 20**

- (Exam Topic 4)

You have the on-premises servers shown in the following table.

Name	Description
DC1	Domain controller that runs Windows Server 2022
Server1	Standalone server that runs Windows Server 2022
Server2	Member server that runs Windows Server 2022 and has the Remote Access role installed
Server3	Member server that runs Windows Server 2019
Server4	Red Hat Enterprise Linux (RHEL) 8.4 server

You have a Microsoft 365 E5 subscription that contains Android and iOS devices. All the devices are managed by using Microsoft Intune. You need to implement Microsoft Tunnel for Intune. The solution must minimize the number of open firewall ports. To which server can you deploy a Tunnel Gateway server, and which inbound ports should be allowed on the server to support Microsoft Tunnel connections? To answer, select the appropriate options in the answer area.  
NOTE: Each correct selection is worth one point.

Server: 

Server1

Server2

Server3

Server4

Ports: 

TCP 443 only

UDP 443 only

TCP 1723 only

TCP 443 and UDP 443 only

TCP 443, TCP 1723, and UDP 443

- A. Mastered
- B. Not Mastered

Answer: A

**Explanation:**

Box 1: Server4  
Microsoft Tunnel is a VPN gateway solution for Microsoft Intune that runs in a container on Linux and allows access to on-premises resources from iOS/iPadOS and Android Enterprise devices using modern authentication and Conditional Access.  
Box 2: TCP 443 and UDP 443 only  
Some traffic goes to your public facing IP address for the Tunnel. The VPN channel will use TCP, TLS, UDP, and DTLS over port 443. By default, port 443 is used for both TCP and UDP, but this can be customized via the Intune Saerver Configuration – Server port setting. If changing the default port (443) ensure your inbound firewall rules are adjusted to the custom port.  
Incorrect:  
TCP 1723 is not used.  
Reference: <https://docs.microsoft.com/en-us/mem/intune/protect/microsoft-tunnel-overview>

**NEW QUESTION 23**

- (Exam Topic 4)

You have an Azure AD tenant named contoso.com that contains the devices shown in the following table.

Name	Deployed by using Windows Autopilot	Azure AD status	Enrolled in Microsoft Intune
Device1	No	Joined	No
Device2	No	Joined	Yes
Device3	Yes	Joined	Yes

The tenant contains the Azure AD groups shown in the following table.

Name	Member
Group1	Device1, Device2, Device3
Group2	Device2

You add an Autopilot deployment profile as shown in the following exhibit.

## Create profile

Windows PC

☒ Basics
 ☒ Out-of-box experience (OOBE)
 ☒ Assignments
 ☒ Review

### Summary

#### Basics

Name: Profile1  
 Description: --  
 Convert all targeted devices to Autopilot: Yes  
 Device type: Windows PC

#### Out-of-box experience (OOBE)

Deployment mode: Self-Deploying (preview)  
 Join to Azure AD as: Azure AD joined  
 Skip AD connectivity check (preview): No

#### Language (Region)

Operating system default

Automatically configure keyboard: No  
 Microsoft Software License Terms: Hide  
 Privacy settings: Hide  
 Hide change account options: Hide  
 User account type: Standard  
 Allow pre-provisioned deployment: No  
 Apply device name template: No

#### Assignments

Included groups: Group1  
 Excluded groups: Group2

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

You have an Azure AD tenant named contoso.com that contains the devices shown in the following table.

Name	Deployed by using Windows Autopilot	Azure AD status	Enrolled in Microsoft Intune
Device1	No	Joined	No
Device2	No	Joined	Yes
Device3	Yes	Joined	Yes

The tenant contains the Azure AD groups shown in the following table.

### Answer Area

Statements	Yes	No
If you reset Device1, the device will be deployed by using Autopilot.	<input type="radio"/>	<input checked="" type="radio"/>
If you reset Device2, the device will be deployed by using Autopilot.	<input type="radio"/>	<input checked="" type="radio"/>
If you restart Device3, the device will be deployed by using Autopilot.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

**Answer Area**

Statements	Yes	No
If you reset Device1, the device will be deployed by using Autopilot	<input type="radio"/>	<input checked="" type="radio"/>
If you reset Device2, the device will be deployed by using Autopilot.	<input type="radio"/>	<input checked="" type="radio"/>
If you restart Device3, the device will be deployed by using Autopilot.	<input checked="" type="radio"/>	<input type="radio"/>

#### NEW QUESTION 26

- (Exam Topic 4)

You have following types of devices enrolled in Microsoft Intune:

- Windows 10
- Android
- iOS

For which types of devices can you create VPN profiles in Microsoft Intune admin center?

- A. Windows 10 only
- B. Windows 10 and Android only
- C. Windows 10 and iOS only
- D. Android and iOS only
- E. Windows 10, Android, and iOS

**Answer:** E

#### NEW QUESTION 29

- (Exam Topic 4)

Your company has a Remote Desktop Gateway (RD Gateway).

You have a server named Server1 that is accessible by using Remote Desktop Services (RDS) through the RD Gateway.

You need to configure a Remote Desktop connection to connect through the gateway. Which setting should you configure?

- A. Connect from anywhere
- B. Server authentication
- C. Connection settings
- D. Local devices and resources

**Answer:** A

**Explanation:**

To connect to a remote server through the RD Gateway, you need to configure the Connect from anywhere setting in the Remote Desktop Connection client. This setting allows you to specify the domain name and port of the RD Gateway server, as well as the authentication method. The other settings are not related to the RD Gateway connection. References: Configure Remote Desktop Connection Settings for Remote Desktop Gateway

#### NEW QUESTION 30

- (Exam Topic 4)

You are creating a device configuration profile in Microsoft Intune. You need to configure specific OMA-URI settings in the profile. Which profile type template should you use?

- A. Device restrictions (Windows 10 Team)
- B. Identity protection
- C. Custom
- D. Device restrictions

**Answer:** C

#### NEW QUESTION 32

- (Exam Topic 4)

You have a Microsoft Deployment Toolkit (MDT) deployment share named Share 1. You add Windows 10 images to Share1 as shown in the following table.

Name	In WIM file	Description
Image1	Install1.wim	Default Windows 10 Pro image from the Windows 10 installation media
Image2	Install1.wim	Default Windows 10 Enterprise image from the Windows 10 installation media
Image3	Install2.wim	Default Windows 10 Pro for Workstations image from the Windows 10 installation media
Image4	Custom1.wim	Custom Windows 10 Enterprise image without any additional applications
Image5	Custom2.wim	Custom Windows 10 Enterprise image that includes custom applications

Which images can be used in the Standard Client Task Sequence, and which images can be used in the Standard Client Upgrade Task Sequence?  
 NOTE: Each correct selection is worth one point.

### Answer Area

Standard Client Task Sequence:

Image3 only
Image3, Image4, and Image5 only
Image1, Image2, and Image3 only
Image1, Image2, Image3, and Image4 only
Image1, Image2, Image3, Image4, and Image5

Standard Client Upgrade Task Sequence:

Image3 only
Image3, Image4, and Image5 only
Image1, Image2, and Image3 only
Image1, Image2, Image3, and Image4 only
Image1, Image2, Image3, Image4, and Image5

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

### Answer Area

Standard Client Task Sequence:

Image3 only
Image3, Image4, and Image5 only
Image1, Image2, and Image3 only
Image1, Image2, Image3, and Image4 only
Image1, Image2, Image3, Image4, and Image5

Standard Client Upgrade Task Sequence:

Image3 only
Image3, Image4, and Image5 only
Image1, Image2, and Image3 only
Image1, Image2, Image3, and Image4 only
Image1, Image2, Image3, Image4, and Image5

NEW QUESTION 36

- (Exam Topic 4)

Your company has devices enrolled in Microsoft Intune as shown in the following table.

Name	Platform
Device1	Windows 10
Device2	Android device administrator
Device3	iOS

In Microsoft Endpoint Manager, you define the company's network as a location named Location1. Which devices can use network location-based compliance policies?

- A. Device2 and Device3 only
- B. Device2 only
- C. Device1 and Device2 only
- D. Device1 only
- E. Device1, Device2, and Device3

**Answer:** E

**Explanation:**

Intune supported operating systems

Intune supports devices running the following operating systems (OS): iOS

Android Windows macOS

Note: View the device compliance settings for the different device platforms: Android device administrator

Android Enterprise iOS

macOS

Windows Holographic for Business Windows 8.1 and later

Windows 10/11

### NEW QUESTION 41

- (Exam Topic 4)

Your network contains an on-premises Active Directory domain. The domain contains two computers named Computer1 and Computer2 that run Windows 10. You install Windows Admin Center on Computer1. You need to manage Computer2 from Computer1 by using Windows Admin Center. What should you do on Computer2?

- A. Update the TrustedHosts list  
B. Run the Enable-PSRemoting cmdlet  
C. Allow Windows Remote Management (WinRM) through the Microsoft Defender firewall.  
D. Add an inbound Microsoft Defender Firewall rule.

**Answer:** B

**Explanation:**

To manage a remote computer from Windows Admin Center, you need to enable PowerShell remoting on the remote computer. You can do this by running the Enable-PSRemoting cmdlet, which configures the WinRM service, creates a listener, and allows inbound firewall rules for PowerShell remoting. The other options are not sufficient or necessary for this task. References: Installation and configuration for Windows Remote Management

### NEW QUESTION 45

- (Exam Topic 4)

You have 200 computers that run Windows 10. The computers are joined to Microsoft Azure Active Directory (Azure AD) and enrolled in Microsoft Intune. You need to configure an Intune device configuration profile to meet the following requirements:

- Prevent Microsoft Office applications from launching child processes.
- Block users from transferring files over FTP.

Which two settings should you configure in Endpoint protection? To answer, select the appropriate settings in the answer area.

NOTE: Each correct selection is worth one point.

NEW QUESTION 49

- (Exam Topic 4)

You have a Microsoft 365 subscription that contains two security groups named Group1 and Group2. Microsoft 365 uses Microsoft Intune Suite.

You use Microsoft Intune to manage devices.

You need to assign roles in Intune to meet the following requirements:

- The members of Group1 must manage Intune roles and assignments.
- The members of Group2 must assign existing apps and policies to users and devices.

The solution must follow the principle of least privilege.

Which role should you assign to each group? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Group1:

Intune Service Administrator

Help Desk Operator

Intune Role Administrator

Intune Service Administrator

Policy and Profile Manager

Group2:

Policy and Profile Manager

Help Desk Operator

Intune Role Administrator

Intune Service Administrator

Policy and Profile Manager

- A. Mastered  
B. Not Mastered

Answer: A

**Explanation:**

To assign roles in Intune to meet the requirements, you should assign the following roles to each group: Group1: Intune Role Administrator Group2: Help Desk Operator

➤ The Intune Role Administrator role is the only Intune role that can manage custom Intune roles and add assignments for built-in Intune roles1. This role meets the requirement for Group1 to manage Intune roles and assignments.

➤ The Help Desk Operator role can perform remote tasks on users and devices, and can assign applications or policies to users or devices1. This role meets the requirement for Group2 to assign existing apps and policies to users and devices.

**NEW QUESTION 53**

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription and 25 Apple iPads.

You need to enroll the iPads in Microsoft Intune by using the Apple Configurator enrollment method. What should you do first?

- A. Upload a file that has the device identifiers for each iPad.
- B. Modify the enrollment restrictions.
- C. Configure an Apple MDM push certificate.
- D. Add your user account as a device enrollment manager (DEM).

**Answer: C**

**Explanation:**

Reference:

[https://www.manageengine.com/mobile-device-management/help/enrollment/mdm\\_creating\\_apns\\_certificate.ht](https://www.manageengine.com/mobile-device-management/help/enrollment/mdm_creating_apns_certificate.ht) Prerequisites for iOS enrollment Before you can enable iOS devices, complete the following steps: Make sure your device is eligible for Apple device enrollment. Set up Intune - These steps set up your Intune infrastructure. In particular, device enrollment requires that you set your MDM authority. Get an Apple MDM Push certificate - Apple requires a certificate to enable management of iOS and macOS devices.

<https://docs.microsoft.com/en-gb/intune/enrollment/apple-mdm-push-certificate-get>

**NEW QUESTION 55**

- (Exam Topic 4)

Your network contains an Active Directory domain.

You install the Microsoft Deployment Toolkit (MDT) on a server. You have a custom image of Windows 11.

You need to deploy the image to 100 devices by using MDT.

Which three actions should you perform in sequence? To answer, move answer area and arrange them in the correct order.

**Actions**

Enable multicast.

Install Windows Deployment Services (WDS).

Create a deployment share.

Add the Windows 11 image.

Create a task sequence.

**Answer Area**

➤

➤

- A. Mastered
- B. Not Mastered

**Answer: A**

**Explanation:**

To deploy the Windows 11 image to 100 devices by using MDT, you should perform the following three actions in sequence:

➤ Install Windows Deployment Services (WDS) on the server. WDS is a role that enables you to deploy Windows operating systems over the network by using PXE boot and multicast technologies. You need

to install WDS before you can enable multicast and configure the boot images for MDT. You can install WDS by using the Server Manager or PowerShell1.

➤ Create a deployment share on the server. A deployment share is a folder that contains the MDT files, scripts, applications, drivers, operating systems, and task sequences that you use to deploy Windows. You need to create a deployment share by using the MDT Deployment Workbench2.

➤ Add the Windows 11 image and create a task sequence in the deployment share. An image is a file that contains a snapshot of a Windows installation. A task sequence is a set of steps that MDT executes to install Windows and configure the settings. You need to add the Windows 11 image by importing it from a source folder or a WIM file, and create a task sequence by using a template or customizing your own3.

These are the basic steps to prepare for deploying Windows 11 with MDT. For more details and guidance, you can refer to the web search results I found for you by using search\_web("deploy Windows 11 image with MDT").

**NEW QUESTION 58**

- (Exam Topic 4)

You have a Microsoft 365 subscription that uses Microsoft Intune.

You need to ensure that you can deploy apps to Android Enterprise devices. What should you do first?

- A. Create a configuration profile.
- B. Add a certificate connector.
- C. Configure the Partner device management settings.
- D. Link your managed Google Play account to Intune.

**Answer: D**

## NEW QUESTION 62

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain. The domain contains a computer named Computer1 that runs Windows 8.1.

Computer1 has apps that are compatible with Windows 10.

You need to perform a Windows 10 in-place upgrade on Computer1.

Solution: You copy the Windows 10 installation media to a Microsoft Deployment Toolkit (MDT) deployment share. You create a task sequence, and then you run the MDT deployment wizard on Computer1. Does this meet the goal?

- A. Yes
- B. No

**Answer: B**

## NEW QUESTION 64

- (Exam Topic 4)

You have a Microsoft 365 subscription.

You plan to enable Microsoft Intune enrollment for the following types of devices:

- Existing Windows 11 devices managed by using Configuration Manager
- Personal iOS devices

The solution must minimize user disruption.

Which enrollment method should you use for each device type? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer Area**

Windows 11 devices managed by using Configuration Manager:

Personal iOS devices:

- A. Mastered
- B. Not Mastered

**Answer: A**

**Explanation:**

**Answer Area**

Windows 11 devices managed by using Configuration Manager:

Personal iOS devices:

## NEW QUESTION 65

- (Exam Topic 4)

You have a Microsoft Deployment Toolkit (MDT) solution that is used to manage Windows 11 deployment tasks.

MDT contains the operating system images shown in the following table.

Name	Description
Image1.wim	Custom-built Windows 10 image that has preinstalled custom apps
Image2.wim	Custom-built Windows 10 image without apps
Install.wim	Default Windows 10 image

You need to perform a Windows 11 in-place upgrade on several computers that run Windows 10. From the Deployment Workbench, you open the New Task Sequence Wizard.

You need to identify which task sequence template and which operating system image to use for the task sequence. The solution must minimize administrative effort.

What should you identify? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Task sequence template:

Standard Client Task Sequence  
Standard Client Replace Task Sequence  
Standard Client Upgrade Task Sequence

Operating system image:

Image1.wim  
Image2.wim  
Install.wim

- A. Mastered
- B. Not Mastered

Answer: A

**Explanation:**  
Box 1: Standard Client Upgrade Task Sequence  
Use Template: Standard Client Upgrade Task Sequence  
In-place upgrade is the preferred method to use when migrating from Windows 10 to a later release of Windows 10, and is also a preferred method for upgrading from Windows 7 or 8.1 if you do not plan to significantly change the device's configuration or applications. MDT includes an in-place upgrade task sequence template that makes the process really simple.  
Box 2: Install.wim  
In-place upgrade differs from computer refresh in that you cannot use a custom image to perform the in-place upgrade. I  
Reference:  
<https://docs.microsoft.com/en-us/windows/deployment/deploy-windows-mdt/upgrade-to-windows-10-with-the>

NEW QUESTION 70

- (Exam Topic 4)  
You have a Microsoft 365 subscription that contains the devices shown in the following table.

Name	Type
Device1	Windows 10
Device2	iOS
Device3	Android Enterprise

You need to ensure that only devices running trusted firmware or operating system build can access network resources.  
Which compliance policy setting should you configure for each device? To answer, drag the appropriate settings to the correct devices. Each setting may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.  
NOTE: Each correct selection is worth one point.

Settings

Require BitLocker.  
Prevent jailbroken devices from having corporate access.  
Prevent rooted devices from having corporate access.  
Require Secure Boot to be enabled on the device.

Answer Area

Device1:  
Device2:  
Device3:

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Settings

Require BitLocker.  
Prevent jailbroken devices from having corporate access.  
Prevent rooted devices from having corporate access.  
Require Secure Boot to be enabled on the device.

Answer Area

Device1: Require BitLocker.  
Device2: Prevent jailbroken devices from having corporate access.  
Device3: Prevent rooted devices from having corporate access.

**NEW QUESTION 75**

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains a computer named Computer1 that runs Windows 8.1.

Computer1 has apps that are compatible with Windows 10.

You need to perform a Windows 10 in-place upgrade on Computer1.

Solution: You copy the Windows 10 installation media to a network share. You start Computer1 from Windows PE (WinPE), and then you run setup.exe from the network share.

Does this meet the goal?

A. Yes

B. No

**Answer: B****NEW QUESTION 76**

- (Exam Topic 4)

You have a Microsoft 365 subscription that uses Microsoft Intune Suite. You use Microsoft Intune to manage devices.

You plan to deploy two apps named App1 and App2 to all Windows devices. App1 must be installed before App2.

From the Intune admin center, you create and deploy two Windows app (Win32) apps. You need to ensure that App1 is installed before App2 on every device.

What should you configure?

A. the App1 deployment configurations

B. a dynamic device group

C. a detection rule

D. the App2 deployment configurations

**Answer: C****Explanation:**

The correct answer is D because you can configure the dependencies for a Win32 app in the deployment configurations1. Dependencies are other Win32 apps that must be installed before your Win32 app can be installed1. You can add Win32 app dependencies only after your Win32 app has been added and uploaded to Intune2. In this case, you need to configure the App2 deployment configurations to add App1 as a dependency 2. References: 1: Microsoft Intune Win32 App Dependencies - MSEndpointMgr <https://msendpointmgr.com/2019/06/03/new-intune-feature-win32-app-dependencies/> 2: Add and assign Win32 apps to Microsoft Intune | Microsoft Learn

<https://learn.microsoft.com/en-us/mem/intune/apps/apps-win32-add>

**NEW QUESTION 78**

- (Exam Topic 4)

You have a Microsoft 365 subscription that uses Microsoft Intune and contains the users shown in the following table.

Name	Member of
User1	Group1
User2	None
User3	None

You create a policy set named Set1 as shown in the exhibit. (Click the Exhibit tab.)

## Device management [Edit](#)

Device configuration profiles (1)

Name	Platform	Profile Type

Excluded groups

All Users  
Group1

You enroll devices in Intune as shown in the following table.

Name	Operating system	User
Device1	Windows 10	User1
Device2	Windows 11	User2
Device3	Android	User3

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

## Answer Area

Statements	Yes	No
If User1 signs in to Device1, Device1 will have both ConfigurationProfile1 and CompliancePolicy1 assigned.	<input type="radio"/>	<input type="radio"/>
If User2 signs in to Device2, Device2 will have both ConfigurationProfile1 and CompliancePolicy1 assigned.	<input type="radio"/>	<input type="radio"/>
If User3 signs in to Device3, Device3 will have both ConfigurationProfile1 and CompliancePolicy1 assigned.	<input type="radio"/>	<input type="radio"/>

- A. Mastered  
B. Not Mastered

Answer: A

Explanation:

## Answer Area

Statements	Yes	No
If User1 signs in to Device1, Device1 will have both ConfigurationProfile1 and CompliancePolicy1 assigned.	<input type="radio"/>	<input checked="" type="radio"/>
If User2 signs in to Device2, Device2 will have both ConfigurationProfile1 and CompliancePolicy1 assigned.	<input type="radio"/>	<input checked="" type="radio"/>
If User3 signs in to Device3, Device3 will have both ConfigurationProfile1 and CompliancePolicy1 assigned.	<input type="radio"/>	<input checked="" type="radio"/>

### NEW QUESTION 80

- (Exam Topic 4)

You have a Microsoft 365 subscription.

You plan to use Windows Autopilot to provision 25 Windows 11 devices. You need to configure the Out-of-box experience (OOBE) settings.

What should you create in the Microsoft Intune admin center?

- A. an enrollment status page (ESP)
- B. a deployment profile
- C. a compliance policy
- D. a PowerShell script
- E. a configuration profile

**Answer:** B

### NEW QUESTION 81

- (Exam Topic 4)

You have a Microsoft Intune subscription.

You have devices enrolled in Intune as shown in the following table.

Name	Operating system
Device1	Android 8.1.0
Device2	Android 9
Device3	iOS 11.4.1
Device4	iOS 12.3.1
Device5	iOS 12.3.2

An app named App1 is installed on each device.

What is the minimum number of app configuration policies required to manage App1?

- A. 1
- B. 2
- C. 3
- D. 4
- E. 5

**Answer:** B

#### Explanation:

The correct answer is B because you need to create two app configuration policies for managed devices, one for iOS/iPadOS devices and one for Android devices1. App configuration policies let you customize the settings of apps for iOS/iPadOS or Android devices1. The settings are assigned to user groups and applied when the app runs1. The app developer or supplier provides the configuration settings (keys and values) that are exposed to Intune1. You can't use a single app configuration policy for both iOS/iPadOS and Android devices because they have different configuration settings2. References: 1: App configuration policies for Microsoft Intune | Microsoft Learn

<https://learn.microsoft.com/en-us/mem/intune/apps/app-configuration-policies-overview> 2: Add app configuration policies for managed iOS/iPadOS devices | Microsoft Learn <https://learn.microsoft.com/en-us/mem/intune/apps/app-configuration-policies-use-ios>

### NEW QUESTION 85

- (Exam Topic 4)

You have the Microsoft Deployment Toolkit (MDT) installed in three sites as shown in the following table.

MDT instance name	Site	Default gateway
MDT1	New York	10.1.1.0/24
MDT2	London	10.5.5.0/24
MDT3	Dallas	10.4.4.0/24

You use Distributed File System (DFS) Replication to replicate images in a share named Production. You configure the following settings in the Bootstrap.ini file.

[Settings]

Priority=DefaultGateway, Default

[DefaultGateway]

10.1.1.1=NewYork

10.5.5.1=London

[NewYork]

DeployRoot=\\MDT1\Production\$

[London]

DeployRoot=\\MDT2\Production\$

KeyboardLocale=en-gb -

[Default]

DeployRoot=\\MDT3\Production\$

KeyboardLocale=en-us -

You plan to deploy Windows 10 to the computers shown in the following table.

Name	IP address
LT1	10.1.1.240
DT1	10.5.5.115
TB1	10.2.2.193

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

### Statements

Yes

No

TB1 will download the image from MDT3.

☐
☐

DT1 will have a KeyboardLocale of en-gb.

☐
☐

LT1 will download the image from MDT1.

☐
☐

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

### Statements

Yes

No

TB1 will download the image from MDT3.

☐
☒

DT1 will have a KeyboardLocale of en-gb.

☒
☐

LT1 will download the image from MDT1.

☒
☐

### NEW QUESTION 89

- (Exam Topic 3)

You need to prepare for the deployment of the Phoenix office computers. What should you do first?

- A. Extract the hardware ID information of each computer to a CSV file and upload the file from the Devices settings in Microsoft Store for Business.
- B. Generalize the computers and configure the Mobility (MDM and MAM) settings from the Azure Active Directory blade in the Azure portal.

- C. Generalize the computers and configure the Device settings from the Azure Active Directory blade in the Azure portal.  
D. Extract the hardware ID information of each computer to an XLSX file and upload the file from the Devices settings in Microsoft Store for Business.

**Answer:** A

**Explanation:**

References:

<https://docs.microsoft.com/en-us/microsoft-store/add-profile-to-devices#manage-autopilot-deployment-profiles>

**NEW QUESTION 93**

- (Exam Topic 3)

You need to meet the requirements for the MKG department users. What should you do?

- A. Assign the MKG department users the Purchaser role in Microsoft Store for Business  
B. Download the APPX file for App1 from Microsoft Store for Business  
C. Add App1 to the private store  
D. Assign the MKG department users the Basic Purchaser role in Microsoft Store for Business  
E. Acquire App1 from Microsoft Store for Business

**Answer:** E

**Explanation:**

References:

<https://docs.microsoft.com/en-us/microsoft-store/distribute-apps-from-your-private-store> Enable the users in the MKG department to use App1.

The private store is a feature in Microsoft Store for Business and Education that organizations receive during the signup process. When admins add apps to the private store, all employees in the organization can view and download the apps. Your private store is available as a tab in Microsoft Store app, and is usually named for your company or organization. Only apps with online licenses can be added to the private store.

Reference:

<https://docs.microsoft.com/en-us/microsoft-store/distribute-apps-from-your-private-store>

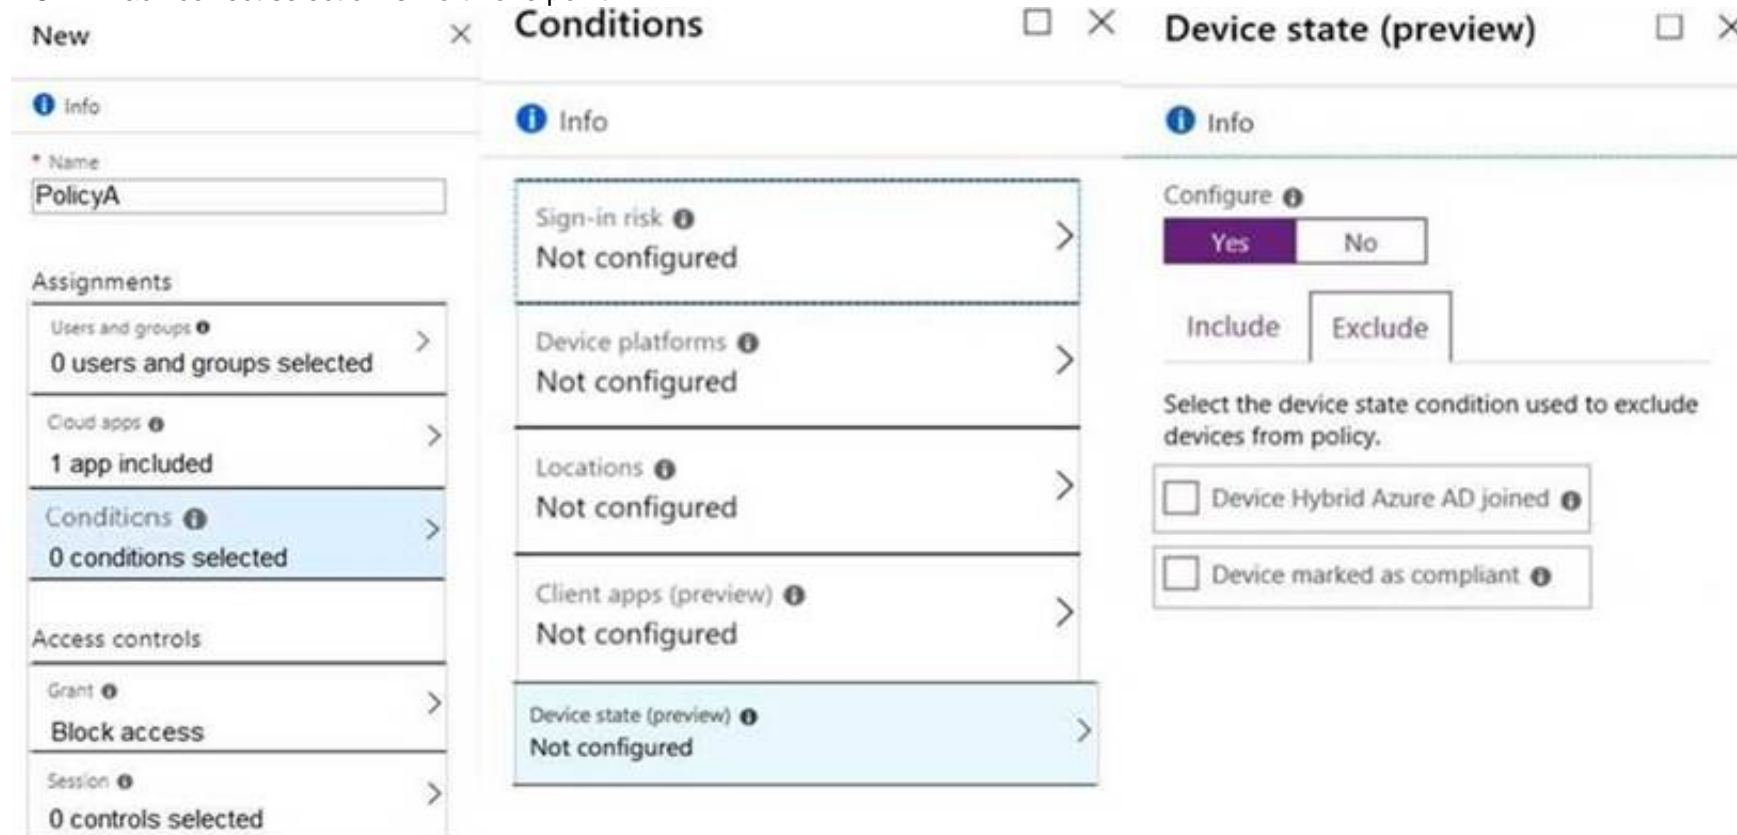

**NEW QUESTION 96**

- (Exam Topic 3)

You need a new conditional access policy that has an assignment for Office 365 Exchange Online. You need to configure the policy to meet the technical requirements for Group4.

Which two settings should you configure in the policy? To answer, select the appropriate settings in the answer area.

NOTE: Each correct selection is worth one point.

The screenshot shows the Azure AD Conditional Access policy configuration interface. The 'Conditions' pane on the left lists several conditions: 'Sign-in risk', 'Device platforms', 'Locations', 'Client apps (preview)', and 'Device state (preview)'. All of these are currently set to 'Not configured'. The 'Device state (preview)' pane on the right shows the 'Configure' option set to 'Yes' and the 'Include' option selected. Below this, there are two checkboxes for selecting the device state condition used to exclude devices from policy: 'Device Hybrid Azure AD joined' and 'Device marked as compliant'. The 'Access controls' pane at the bottom shows the 'Grant' option set to 'Block access'.

- A. Mastered  
B. Not Mastered

**Answer:** A

**Explanation:**

The policy needs to be applied to Group4 so we need to configure Users and Groups. The Access controls are set to Block access

A screenshot of a computer Description automatically generated

We therefore need to exclude compliant devices. From the scenario:

➤ Ensure that the users in a group named Group4 can only access Microsoft Exchange Online from devices that are enrolled in Intune.

Note: When a device enrolls in Intune, the device information is updated in Azure AD to include the device compliance status. This compliance status is used by conditional access policies to block or allow access to e-mail and other organization resources.

References:

<https://docs.microsoft.com/en-us/azure/active-directory/conditional-access/overview> <https://docs.microsoft.com/en-us/azure/active-directory/conditional-access/conditions> <https://docs.microsoft.com/en-us/intune/device-compliance-get-started>

**NEW QUESTION 100**

- (Exam Topic 3)  
What is the maximum number of devices that User1 and User2 can enroll in Intune? To answer, select the appropriate options in the answer area.  
NOTE: Each correct selection is worth one point.

User1 can enroll a maximum of:

	✕
5 devices	
10 devices	
15 devices	
1,000 devices	
An unlimited number of devices	

User2 can enroll a maximum of:

	✕
5 devices	
10 devices	
15 devices	
1,000 devices	
An unlimited number of devices	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

User1 can enroll a maximum of:

	✕
5 devices	
10 devices	
15 devices	
1,000 devices	
An unlimited number of devices	

User2 can enroll a maximum of:

	✕
5 devices	
10 devices	
15 devices	
1,000 devices	
An unlimited number of devices	

NEW QUESTION 102

- (Exam Topic 3)  
You are evaluating which devices are compliant.  
For each of the following statements, select Yes if the statement is true. Otherwise, select No.  
NOTE: Each correct selection is worth one point.

Statements	Yes	No
Device1 is compliant	<input type="radio"/>	<input type="radio"/>
Device3 is compliant	<input type="radio"/>	<input type="radio"/>
Device4 is compliant	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Statements	Yes	No
Device1 is compliant	<input type="radio"/>	<input checked="" type="radio"/>
Device3 is compliant	<input checked="" type="radio"/>	<input type="radio"/>
Device4 is compliant	<input checked="" type="radio"/>	<input type="radio"/>

#### NEW QUESTION 107

- (Exam Topic 3)

You need to meet the technical requirements for the IT department. What should you do first?

- A. From the Azure Active Directory blade in the Azure portal, enable Seamless single sign-on.
- B. From the Configuration Manager console, add an Intune subscription.
- C. From the Azure Active Directory blade in the Azure portal, configure the Mobility (MDM and MAM) settings.
- D. From the Microsoft Intune blade in the Azure portal, configure the Windows enrollment settings.

**Answer:** C

#### Explanation:

Reference:

<https://docs.microsoft.com/en-us/sccm/comanage/tutorial-co-manage-clients>

#### NEW QUESTION 110

- (Exam Topic 3)

You need to meet the technical requirements for the new HR department computers.

How should you configure the provisioning package? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

<b>Specify ComputerName as:</b>	<div><input checked="" type="checkbox"/></div> <div><input type="checkbox"/></div> <div><input checked="" type="checkbox"/></div> <div><input type="checkbox"/></div> <div><input type="checkbox"/></div> <div><input type="checkbox"/></div>
<b>Specify AccountOU as:</b>	<div><input checked="" type="checkbox"/></div> <div><input type="checkbox"/></div> <div><input type="checkbox"/></div> <div><input type="checkbox"/></div> <div><input type="checkbox"/></div>

- A. Mastered
- B. Not Mastered

**Answer:** A

#### Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/configuration/wcd/wcd-accounts>

#### NEW QUESTION 114

- (Exam Topic 2)

What should you configure to meet the technical requirements for the Azure AD-joined computers?

- A. Windows Hello for Business from the Microsoft Intune blade in the Azure portal.
- B. The Accounts options in an endpoint protection profile.
- C. The Password Policy settings in a Group Policy object (GPO).
- D. A password policy from the Microsoft Office 365 portal.

**Answer:** A

#### Explanation:

References:

<https://docs.microsoft.com/en-us/windows/security/identity-protection/hello-for-business/hello-manage-inorgani>

#### NEW QUESTION 116

- (Exam Topic 2)

What should you upgrade before you can configure the environment to support co-management?

- A. the domain functional level
- B. Configuration Manager
- C. the domain controllers
- D. Windows Server Update Services (WSUS)

**Answer:** B

#### Explanation:

References:

<https://docs.microsoft.com/en-us/sccm/comanage/tutorial-co-manage-clients>

#### NEW QUESTION 119

- (Exam Topic 2)

You need to recommend a solution to meet the device management requirements.

What should you include in the recommendation? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

**For the Research department employees:**

<input type="checkbox"/>	An app configuration policy
<input type="checkbox"/>	An app protection policy
<input type="checkbox"/>	Azure information Protection
<input type="checkbox"/>	iOS app provisioning profiles

**For the Sales department employees:**

<input type="checkbox"/>	An app configuration policy
<input type="checkbox"/>	An app protection policy
<input type="checkbox"/>	Azure information Protection
<input type="checkbox"/>	iOS app provisioning profiles

- A. Mastered
- B. Not Mastered

**Answer:** A

#### Explanation:

Reference:

<https://github.com/MicrosoftDocs/IntuneDocs/blob/master/intune/app-protection-policy.md>

<https://docs.microsoft.com/en-us/azure/information-protection/configure-usage-rights#do-not-forward-option-fo>

#### NEW QUESTION 122

- (Exam Topic 2)

You need to capture the required information for the sales department computers to meet the technical requirements.

Which Windows PowerShell command should you run first?

- A. Install-Module WindowsAutoPilotIntune
- B. Install-Script Get-WindowsAutoPilotInfo
- C. Import-AutoPilotCSV
- D. Get-WindowsAutoPilotInfo

**Answer:** B

#### Explanation:

References:

<https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/existing-devices>

"This topic describes how to convert Windows 7 or Windows 8.1 domain-joined computers to Windows 10 devices joined to either Azure Active Directory or Active Directory (Hybrid Azure AD Join) by using Windows Autopilot"

#### NEW QUESTION 124

- (Exam Topic 2)

What should you use to meet the technical requirements for Azure DevOps?

- A. An app protection policy
- B. Windows Information Protection (WIP)
- C. Conditional access
- D. A device configuration profile

**Answer:** C

#### Explanation:

References:

<https://docs.microsoft.com/en-us/azure/devops/organizations/accounts/manage-conditional-access?view=azure-devops>

#### NEW QUESTION 128

- (Exam Topic 2)

You need to resolve the performance issues in the Los Angeles office.

How should you configure the update settings? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

#### Answer Area

Change Delivery Optimization  
download mode to:

<input type="checkbox"/>
<input checked="" type="checkbox"/> Bypass mode
<input type="checkbox"/> HTTP blended with internet peering
<input type="checkbox"/> HTTP blended with peering behind same NAT
<input type="checkbox"/> Simple download mode with no peering

Update Active Hours Start to:

<input type="checkbox"/>
<input checked="" type="checkbox"/> 10 AM
<input type="checkbox"/> 11 AM
<input type="checkbox"/> 10 PM
<input type="checkbox"/> 11 PM

Update Active Hours End to:

<input type="checkbox"/>
<input checked="" type="checkbox"/> 10 AM
<input type="checkbox"/> 11 AM
<input type="checkbox"/> 10 PM
<input type="checkbox"/> 11 PM

- A. Mastered
- B. Not Mastered

**Answer:** A

#### Explanation:

A screenshot of a computer Description automatically generated with low confidence

#### NEW QUESTION 131

- (Exam Topic 2)

You need to meet the device management requirements for the developers. What should you implement?

- A. folder redirection
- B. Enterprise State Roaming
- C. home folders
- D. known folder redirection in Microsoft OneDrive

**Answer:** B

#### Explanation:

Litware identifies the following device management requirements:

➤ Ensure that Microsoft Edge Favorites are accessible from all computers to which the developers sign in. Enterprise State Roaming allows for the synchronization of Microsoft Edge browser setting, including favorites and reading list, across devices.

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/devices/enterprise-state-roaming-windows-settings-refer>

#### NEW QUESTION 133

- (Exam Topic 1)

User1 and User2 plan to use Sync your settings.

On which devices can the users use Sync your settings? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

User1:
No devices
Device4 and Device5 only
Device1, Device2 and Device3 only
Device1, Device2, Device3, Device4, and Device5

User2:
No devices
Device4 and Device5 only
Device1, Device2 and Device3 only
Device1, Device2, Device3, Device4, and Device5

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, email Description automatically generated

Reference:

<https://www.jeffgilb.com/managing-local-administrators-with-azure-ad-and-intune/>

NEW QUESTION 135

- (Exam Topic 1)

You implement Boundary1 based on the planned changes.

Which devices have a network boundary of 192.168.1.0/24 applied?

- A. Device2 only
- B. Device3 only
- C. Device 1, Device2, and Device5 only
- D. Device 1, Device2, Device3, and Device4 only

Answer: D

Explanation:

Reference:

<https://docs.microsoft.com/en-us/mem/intune/configuration/network-boundary-windows>

NEW QUESTION 137

- (Exam Topic 1)

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
Device1 is marked as compliant.	<input type="radio"/>	<input type="radio"/>
Device4 is marked as compliant.	<input type="radio"/>	<input type="radio"/>
Device5 is marked as compliant.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Text Description automatically generated

NEW QUESTION 139

- (Exam Topic 1)

Which users can purchase and assign App1?

- A. User3 only
- B. User1 and User3 only
- C. User1, User2, User3, and User4
- D. User1, User3, and User4 only
- E. User3 and User4 only

Answer: B

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/microsoft-store/acquire-apps-microsoft-store-for-business> <https://docs.microsoft.com/en-us/microsoft-store/assign-apps-to-employees>

**NEW QUESTION 143**

- (Exam Topic 1)

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

**Answer Area**

Statements	Yes	No
If User1 adds a shortcut to the desktop of Device1, when User1 signs in to Device3, the same shortcut will appear on the desktop.	<input type="radio"/>	<input type="radio"/>
If User1 sets the desktop background to blue on Device2, when User1 signs in to Device4, the desktop background will be blue.	<input type="radio"/>	<input type="radio"/>
If User2 increases the size of the font in the command prompt of Device2, when User2 signs in to Device3, the command prompt will show the increased font size.	<input type="radio"/>	<input type="radio"/>

- A. Mastered  
B. Not Mastered

**Answer:** A

**Explanation:**

Text, letter Description automatically generated

**NEW QUESTION 146**

- (Exam Topic 1)

You need to ensure that computer objects can be created as part of the Windows Autopilot deployment. The solution must meet the technical requirements. To what should you grant the right to create the computer objects?

- A. Server2  
B. Server1  
C. GroupA  
D. DC1

**Answer:** C

**Explanation:**

Reference:

<https://blog.matrixpost.net/set-up-windows-autopilot-production-environment-part-2/>

**NEW QUESTION 149**

- (Exam Topic 4)

Your company has an Azure AD tenant named contoso.com that contains several Windows 10 devices. When you join new Windows 10 devices to contoso.com, users are prompted to set up a four-digit pin. You need to ensure that the users are prompted to set up a six-digit pin when they join the Windows 10 devices to contoso.com.

Solution: From the Microsoft Entra admin center, you configure automatic mobile device management (MDM) enrollment. From the Microsoft Intune admin center, you create and assign a device restrictions profile.

Does this meet the goal?

- A. Yes  
B. No

**Answer:** B

**NEW QUESTION 151**

- (Exam Topic 4)

You have computer that run Windows 10 and connect to an Azure Log Analytics workspace. The workspace is configured to collect all available events from Windows event logs. The computers have the logged events shown in the following table.

Event ID	Log	Type	Computer
1	Application	Success	Computer1
2	System	Information	Computer1
3	Security	Audit Success	Computer2
4	System	Error	Computer2

Which events are collected in the Log Analytics workspace?

- A. 1 only

- B. 2 and 3 only
- C. 1 and 3 only
- D. 1, 2, and 4 on
- E. 1, 2, 3, and 4

**Answer:** E

**Explanation:**

All events from Windows event logs are collected in the Log Analytics workspace, regardless of the event level or source. Therefore, events 1, 2, 3, and 4 are all collected in the workspace. References: <https://docs.microsoft.com/en-us/azure/azure-monitor/agents/data-sources-windows-events>

**NEW QUESTION 155**

- (Exam Topic 4)

You have an Azure Active Directory (Azure AD) tenant named contoso.com that contains a user named User1. User1 has a user principal name (UPN) of user1@contoso.com.

You join a Windows 10 device named Client1 to contoso.com.

You need to add User1 to the local Administrators group of Client1.

How should you complete the command? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer Area**

<div><div></div><div>net accounts</div><div>net localgroup</div><div>net user</div></div>	Administrators /add "	<div><div></div><div>AzureAD</div><div>CONTOSO</div><div>UPN</div></div> <div>\user1@contoso.com"</div>
---	-----------------------	---

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

**Answer Area**

<div><div></div><div>net accounts</div><div>net localgroup</div><div>net user</div></div>	Administrators /add "	<div><div></div><div>AzureAD</div><div>CONTOSO</div><div>UPN</div></div> <div>\user1@contoso.com"</div>
---	-----------------------	---

**NEW QUESTION 158**

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription that contains 10 Android Enterprise devices. Each device has a corporate-owned work profile and is enrolled in Microsoft Intune.

You need to configure the devices to run a single app in kiosk mode.

Which Configuration settings should you modify in the device restrictions profile?

- A. General
- B. Users and Accounts
- C. System security
- D. Device experience

**Answer:** D

**Explanation:**

To configure the devices to run a single app in kiosk mode, you need to modify the Device experience settings in the device restrictions profile. You can specify the app package name and activity name for the app that you want to run in kiosk mode. References:

<https://docs.microsoft.com/en-us/mem/intune/configuration/device-restrictions-android-for-work#device-experie>

**NEW QUESTION 161**

- (Exam Topic 4)

You have a Microsoft 365 subscription that uses Microsoft Intune Suite. You use Microsoft Intune to manage devices.

You have a Windows 11 device named Device1 that is enrolled in Intune. Device1 has been offline for 30 days.

You need to remove Device1 from Intune immediately. The solution must ensure that if the device checks in again, any apps and data provisioned by Intune are removed. User-installed apps, personal data, and

OEM-installed apps must be retained.  
What should you use?

- A. a Delete action
- B. a Retire action
- C. a Fresh Start action
- D. an Autopilot Reset action

Answer: B

Explanation:

A retire action removes a device from Intune management and removes any apps and data provisioned by Intune. User-installed apps, personal data, and OEM-installed apps are retained. A retire action can be performed on devices that are offline for more than 30 days. References:  
<https://docs.microsoft.com/en-us/mem/intune/remote-actions/devices-wipe>

NEW QUESTION 162

- (Exam Topic 4)

You have two computers named Computer1 and Computer2 that run Windows 10. Computer2 has Remote Desktop enabled. From Computer1, you connect to Computer2 by using Remote Desktop Connection. You need to ensure that you can access the local drives on Computer1 from within the Remote Desktop session. What should you do?

- A. From Computer 2, configure the Remote Desktop settings.
- B. From Windows Defender Firewall on Computer 1, allow Remote Desktop.
- C. From Windows Defender Firewall on Computer 2, allow File and Printer Sharing.
- D. From Computer1, configure the Remote Desktop Connection settings.

Answer: D

NEW QUESTION 163

- (Exam Topic 4)

Your network contains an Active Directory domain. Active Directory is synced with Microsoft Azure Active Directory (Azure AD). There are 500 Active Directory domain-joined computers that run Windows 10 and are enrolled in Microsoft Intune. You plan to implement Microsoft Defender Exploit Guard. You need to create a custom Microsoft Defender Exploit Guard policy, and then distribute the policy to all the computers. What should you do? To answer, select the appropriate options in the answer area.  
NOTE: Each correct selection is worth one point.

Answer Area

Tool to use to configure the settings:

Security & Compliance in Microsoft 365  
Windows Security app  
Microsoft Endpoint Manager admin center

Distribution method:

An Azure policy  
An Endpoint Protection configuration profile  
An Intune device compliance policy  
A device restrictions configuration profile

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

A screenshot of a computer Description automatically generated  
Reference:  
<https://docs.microsoft.com/en-us/windows/security/threat-protection/microsoft-defender-atp/import-export-expl> <https://docs.microsoft.com/en-us/intune/endpoint-protection-windows-10>  
<https://docs.microsoft.com/en-us/windows/security/threat-protection/microsoft-defender-atp/enable-exploit-prot>

NEW QUESTION 166

- (Exam Topic 4)

You have a Microsoft 365 tenant that uses Microsoft Intune to manage personal and corporate devices. The tenant contains three Windows 10 devices as shown in the following exhibit.

Name	Enabled	OS	Version	Join Type	Owner	MDM	Compliant
 LON-CL2	✔ Yes	Windows	10.0.17763.615	Azure AD registered	User2	Microsoft Intune	✔ Yes
 LON-CL4	✔ Yes	Windows	10.0.17763.107	Azure AD joined	User1	Microsoft Intune	✔ Yes

How will Intune classify each device after the devices are enrolled in Intune automatically? To answer, select the appropriate options in the answer area.  
NOTE: Each correct selection is worth one point.

### Answer Area

Identified by Intune as a personal device:

LON-CL2 only

LON-CL4 only

Both LON-CL2 and LON-CL4

Neither LON-CL2 or LON-CL4

Identified by Intune as a corporate device:

LON-CL2 only

LON-CL4 only

Both LON-CL2 and LON-CL4

Neither LON-CL2 or LON-CL4

- A. Mastered  
B. Not Mastered

**Answer:** A

#### Explanation:

Table Description automatically generated

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/devices/concept-azure-ad-join> <https://docs.microsoft.com/en-us/azure/active-directory/devices/concept-azure-ad-register>

#### NEW QUESTION 171

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription.

You create an app protection policy for Android devices named Policy1 as shown in the following exhibit.

[Home](#) > [Apps](#) >

## Create policy ...

-  Basics
-  **Apps**
-  Data protection
-  Access requirements
- ...

Choose how you want to apply this policy to apps on different devices. Then add at least one app.

Target to apps on all device types ⓘ

Yes

No

Device types \* ⓘ

Unmanaged

Target policy to

All Apps

 We'll continue to add managed apps to your policy as they become available in Intune. [View a list of apps that will be targeted](#)

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.  
NOTE: Each correct selection is worth one point.

To apply Policy1 to an Android device, you must [answer choice].

install the Company Portal app on the device
install the Microsoft Authenticator app on the device
onboard the device to Microsoft Defender for Endpoint
onboard the device to the Microsoft 365 compliance center

When Policy1 is assigned, the policy will apply to [answer choice].

users only
devices only
users and devices

- A. Mastered  
 B. Not Mastered

**Answer: A**

**Explanation:**

Box 1: Install the Intune Company Portal app on the device

On Android, Android devices will prompt to install the Intune Company Portal app regardless of which Device type is chosen.

Box 2: Devices only

For Android devices, unmanaged devices are devices where Intune MDM management has not been detected. This includes devices managed by third-party MDM vendors.

Reference:

<https://docs.microsoft.com/en-us/mem/intune/apps/app-protection-policies#app-protection-policies-for-iosipado>

**NEW QUESTION 176**

- (Exam Topic 4)

You have a Microsoft 365 subscription.

You have 10 computers that run Windows 10 and are enrolled in mobile device management (MDM). You need to deploy the Microsoft 36S Apps for enterprise suite to all the computers.

What should you do?

- A. From the Microsoft Intune admin center, create a Windows 10 device profile.  
 B. From Azure AD, add an app registration.  
 C. From Azure A  
 D. add an enterprise application.  
 E. From the Microsoft Intune admin center, add an app.

**Answer: D**

**Explanation:**

To deploy Microsoft 365 Apps for enterprise to Windows 10 devices that are enrolled in Intune, you need to add an app of type "Windows 10 app (Win32)" in the Microsoft Intune admin center and configure the app settings. You can then assign the app to groups of users or devices. References:

<https://docs.microsoft.com/en-us/mem/intune/apps/apps-win32-app-management>

**NEW QUESTION 179**

- (Exam Topic 4)

You have a Microsoft 365 subscription that uses Microsoft Intune Suite. You use Microsoft Intune to manage devices. Azure AD joined Windows devices enroll automatically in Intune. You have the devices shown in the following table.

Name	Operating system	Azure AD joined	Line-of-business (LOB) apps installed
Device1	64-bit version of Windows 10 Pro	Yes	No
Device2	32-bit version of Windows 10 Pro	No	Yes
Device3	64-bit version of Windows 10 Pro	No	Yes

You are preparing to upgrade the devices to Windows 11. All the devices are compatible with Windows 11. You need to evaluate Windows Autopilot and in-place upgrade as deployment methods to implement

Windows 11 Pro on the devices, while retaining all user settings and applications.

Which devices can be upgraded by using each method? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Windows Autopilot: Device1 and Device3 only  
None of the devices  
Device1 only  
Device1 and Device3 only  
Device1, Device2, and Device3

In-place upgrade: Device1 and Device3 only  
None of the devices  
Device1 only  
Device1 and Device3 only  
Device1, Device2, and Device3

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Windows Autopilot: Device1 and Device3 only  
None of the devices  
Device1 only  
Device1 and Device3 only  
Device1, Device2, and Device3

In-place upgrade: Device1 and Device3 only  
None of the devices  
Device1 only  
Device1 and Device3 only  
Device1, Device2, and Device3

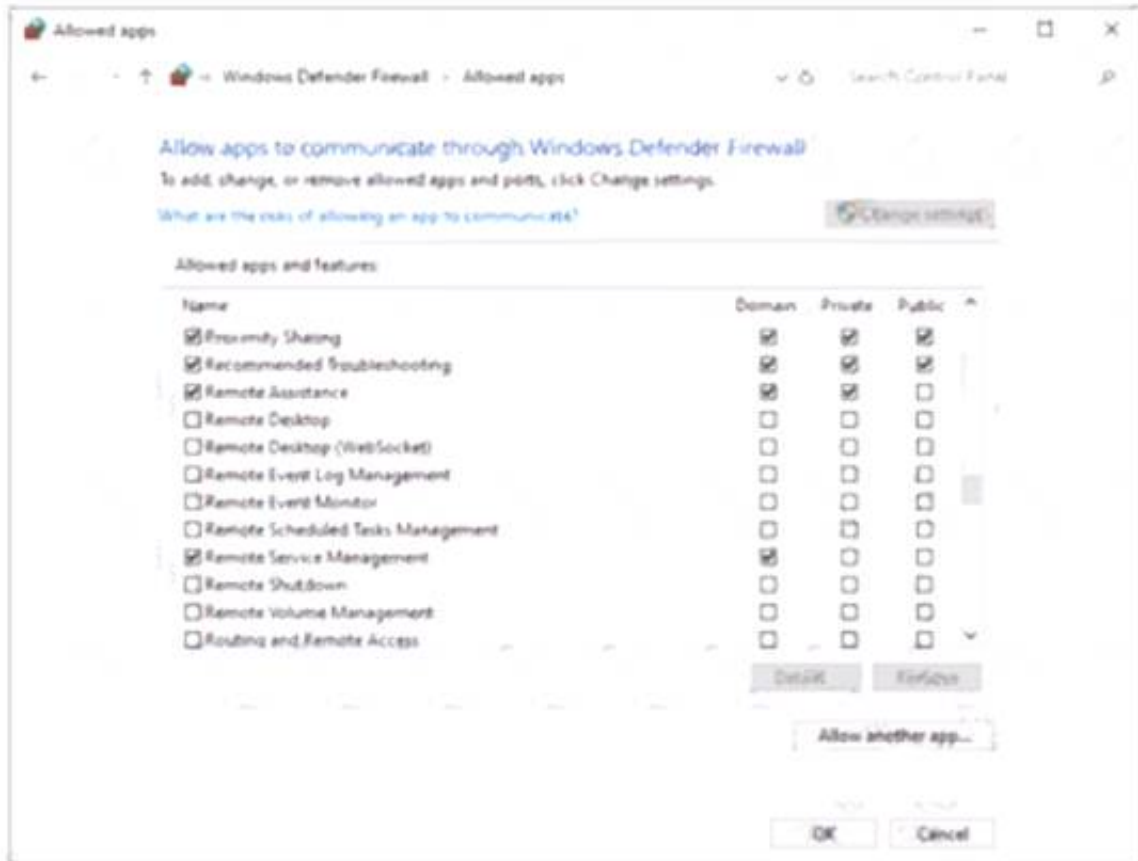

NEW QUESTION 183

- (Exam Topic 4)

Your network contains an Active Directory domain named adatum.com, a workgroup, and computers that run Windows 10. The computers are configured as shown in the following table.

Name	Member of	Active Windows Defender Firewall profile
Computer1	Adatum.com	Domain
Computer2	Adatum.com	Domain
Computer3	Workgroup	Public

The local Administrator accounts on Computer1, Computer2, and Computer3 have the same user name and password. On Computer1, Windows Defender Firewall is configured as shown in the following exhibit.

Status	Name	DisplayName
-----	----	-----
Stopped	RasAuto	Remote Access Auto Connection Manager
Running	RasMan	Remote Access Connection Manager
Stopped	RemoteAccess	Routing and Remote Access
Stopped	RemoteRegistry	Remote Registry
Stopped	RetailDemo	Retail Demo Service
Running	RmSvc	Radio Management Service
Running	RpcEptMapper	RPC Endpoint Mapper
Stopped	RpcLocator	Remote Procedure Call (RPC) Locator
Running	RpcSs	Remote Procedure Call (RPC)

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

**NOTE:** Each correct selection is worth one point.

#### Answer Area

Statements	Yes	No
From Computer2, you can use Disk Management to manage Computer1 remotely.	<input type="radio"/>	<input checked="" type="radio"/>
From Computer2, you can use Registry Editor to edit the registry of Computer1 remotely.	<input type="radio"/>	<input checked="" type="radio"/>
From Computer3, you can use Performance Monitor to monitor the performance of Computer1.	<input type="radio"/>	<input checked="" type="radio"/>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

#### Answer Area

Statements	Yes	No
From Computer2, you can use Disk Management to manage Computer1 remotely.	<input checked="" type="checkbox"/>	<input type="checkbox"/>
From Computer2, you can use Registry Editor to edit the registry of Computer1 remotely.	<input checked="" type="checkbox"/>	<input type="checkbox"/>
From Computer3, you can use Performance Monitor to monitor the performance of Computer1.	<input type="checkbox"/>	<input checked="" type="checkbox"/>

**NEW QUESTION 185**

- (Exam Topic 4)

You have an Azure AD tenant named contoso.com that contains the users shown in the following table.

Name	Role
Admin1@contoso.com	Security Administrator
Admin2@contoso.com	Cloud Device Administrator
User1@contoso.com	None

You have a computer named Computer1 that runs Windows 10. Computer1 is in a workgroup and has the local users shown in the following table.

Name	Member of
Administrator1	Network Configuration Operators
Administrator2	Power Users
UserA	Administrators

UserA joins Computer1 to Azure AD by using user1@contoso.com.

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
User1@contoso.com is a member of the local Administrators group on Computer1.	<input type="radio"/>	<input type="radio"/>
Admin1@contoso.com can configure the firewall and Microsoft Defender on Computer1.	<input type="radio"/>	<input type="radio"/>
Admin2@contoso.com can install software on Computer1.	<input type="radio"/>	<input type="radio"/>

- A. Mastered  
B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
User1@contoso.com is a member of the local Administrators group on Computer1.	<input type="radio"/>	<input checked="" type="radio"/>
Admin1@contoso.com can configure the firewall and Microsoft Defender on Computer1.	<input type="radio"/>	<input checked="" type="radio"/>
Admin2@contoso.com can install software on Computer1.	<input type="radio"/>	<input checked="" type="radio"/>

**NEW QUESTION 190**

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription that contains 150 hybrid Azure AD joined Windows devices. All the devices are enrolled in Microsoft Intune. You need to configure Delivery Optimization on the devices to meet the following requirements:

- Allow downloads from the internet and from other computers on the local network.
- Limit the percentage of used bandwidth to 50. What should you use?

- A. a configuration profile  
B. a Windows Update for Business Group Policy setting  
C. a Microsoft Peer-to-Peer Networking Services Group Policy setting  
D. an Update ring for Windows 10 and later profile

Answer: A

Explanation:

A configuration profile is the correct answer because it allows you to configure Delivery Optimization settings for Windows devices in Intune. You can specify the download mode, bandwidth limit, caching options, and more. A configuration profile is a template that contains one or more settings that you can apply to groups of devices. References:

- [Windows 10 Delivery Optimization settings for Intune - Microsoft Intune | Microsoft Learn](#)
- [Delivery Optimization settings in Microsoft Intune](#)

**NEW QUESTION 193**

- (Exam Topic 4)

You have two computers that run Windows 10. The computers are enrolled in Microsoft Intune as shown in the following table.

Name	Member of
Computer1	Group1
Computer2	Group1, Group2

Windows 10 update rings are defined in Intune as shown in the following table.

Name	Quality deferral (days)	Assigned
Ring1	3	Yes
Ring2	10	Yes

You assign the update rings as shown in the following table.

Name	Include	Exclude
Ring1	Group1	Group2
Ring2	Group2	Group1

What is the effect of the configurations on Computer1 and Computer2? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Quality deferral on Computer1:

▼

3 days  
7 days  
10 days  
13 days  
No effect

Quality deferral on Computer2:

▼

3 days  
7 days  
10 days  
13 days  
No effect

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

A screenshot of a computer Description automatically generated

Computer1 and Computer2 are members of Group1. Ring1 is applied to Group1.

Note: The term "Exclude" is misleading. It means that the ring is not applied to that group, rather than that group being blocked.

References:

<https://docs.microsoft.com/en-us/windows/deployment/update/waas-wufb-intune> <https://allthingscloud.blog/configure-windows-update-business-using-microsoft-intune/>

**NEW QUESTION 198**

- (Exam Topic 4)

You have a Microsoft 365 subscription that contains a user named User1. The subscription contains devices enrolled in Microsoft intune as shown in the following table.

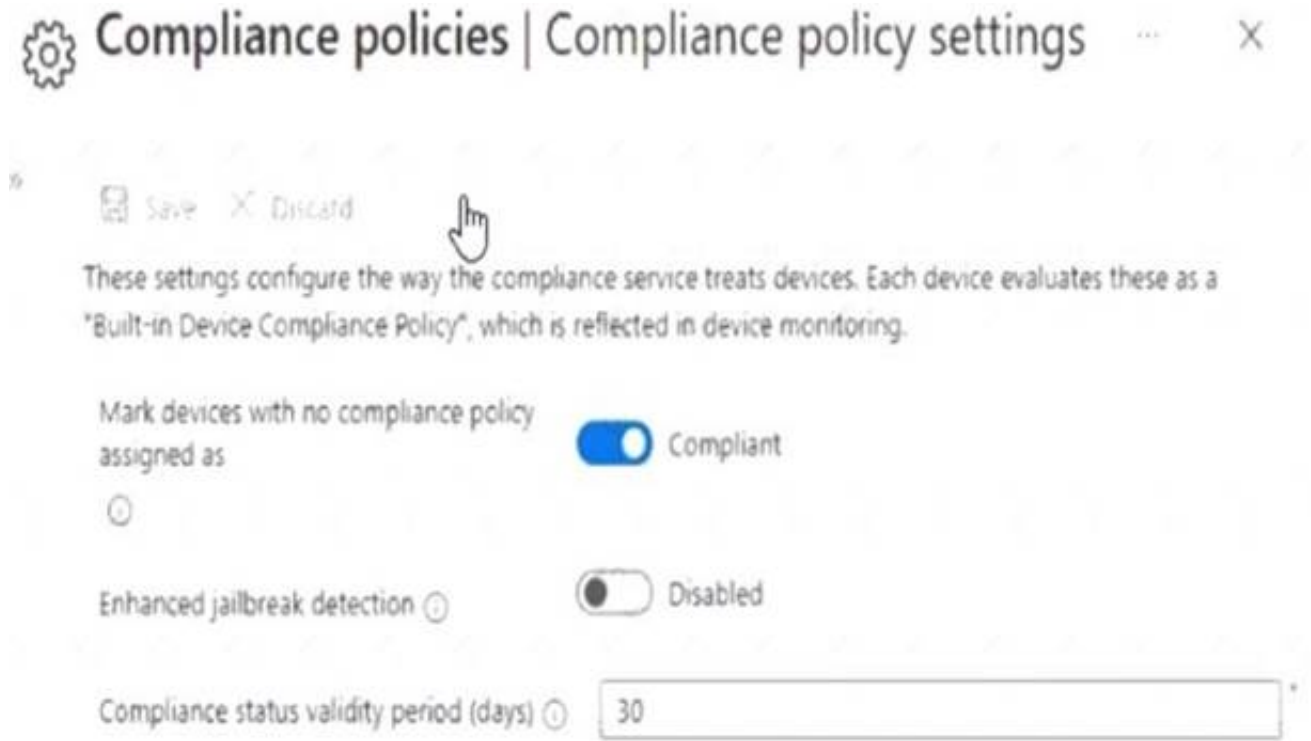

Name	Platform	Member of	Description
Device1	Windows 11	Group1	Disk encryption is not configured.
Device2	Windows 10	Group2	Disk encryption is configured.
Device3	Android	Group3	Device local storage is not encrypted.

Microsoft Edge is available on all the devices.

Intune has the device compliance policies shown in the following table.

Name	Platform	Setting	Applied to
Compliance1	Windows 10 and later	Require encryption of data storage on device	Group2
Compliance2	Android Enterprise	Require encryption of data storage on device	Group3

The Compliance policy settings are configured as shown in the exhibit. (Click the Exhibit tab.) You create the following Conditional Access policy:

- Name: Policy1
- Assignments
  - o Users and groups: User1
  - o Cloud apps or actions: Office 365 SharePoint Online
- Access controls
  - o Grant Require device to be marked as compliant
- Enable policy: On

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
User1 can access Microsoft SharePoint Online from Device1 by using Microsoft Edge.	<input type="radio"/>	<input type="radio"/>
User1 can access Microsoft SharePoint Online from Device2 by using Microsoft Edge.	<input type="radio"/>	<input type="radio"/>
User1 can access Microsoft SharePoint Online from Device3 by using Microsoft Edge.	<input type="radio"/>	<input type="radio"/>

- A. Mastered  
B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
User1 can access Microsoft SharePoint Online from Device1 by using Microsoft Edge.	<input type="radio"/>	<input checked="" type="radio"/>
User1 can access Microsoft SharePoint Online from Device2 by using Microsoft Edge.	<input checked="" type="radio"/>	<input type="radio"/>
User1 can access Microsoft SharePoint Online from Device3 by using Microsoft Edge.	<input type="radio"/>	<input checked="" type="radio"/>

NEW QUESTION 203

- (Exam Topic 4)

You have a Microsoft 365 subscription that uses Microsoft Intune and contains the users shown in the following table.

Name	Member of	License
User1	Group1	None
User2	Group1	Microsoft 365 E3
User3	Group2	Microsoft 365 E5

Group2 has been assigned in the Enrollment Status Page. You have the devices shown in the following table.

Name	Operating system	Department
Device1	Windows 10 Pro	Marketing
Device2	Windows 11 Home	Research
Device3	Windows 10 Pro	Marketing

You capture and upload the hardware IDs of the devices in the marketing department. You configure Windows Autopilot. For each of the following statements, select Yes if the statement is true. Otherwise select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
User1 can complete the Autopilot process on Device1.	<input type="checkbox"/>	<input type="checkbox"/>
User2 can complete the Autopilot process on Device1.	<input type="checkbox"/>	<input type="checkbox"/>
User3 can view device setup information during the enrollment phase of Device1.	<input type="checkbox"/>	<input type="checkbox"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
User1 can complete the Autopilot process on Device1.	<input type="checkbox"/>	<input checked="" type="checkbox"/>
User2 can complete the Autopilot process on Device1.	<input checked="" type="checkbox"/>	<input type="checkbox"/>
User3 can view device setup information during the enrollment phase of Device1.	<input type="checkbox"/>	<input checked="" type="checkbox"/>

#### NEW QUESTION 208

- (Exam Topic 4)

You have groups that use the Dynamic Device membership type as shown in the following table.

Name	Syntax
Group1	(device.deviceOwnership -eq "Company")
Group2	(device.deviceOwnership -eq "Personal")

You are deploying Microsoft 365 apps.

You have devices enrolled in Microsoft Intune as shown in the following table.

Name	Ownership	Platform
LT1	Company	Windows 10 Enterprise x64
LT2	Personal	Windows 10 Enterprise x64
LT3	Company	MacOS Big Sur

In the Microsoft Endpoint Manager admin center, you create a Microsoft 365 Apps app as shown in the exhibit. (Click the Exhibit tab.)

Reference:  
<https://docs.microsoft.com/en-us/mem/intune/apps/apps-add-office365>  
<https://docs.microsoft.com/en-us/mem/intune/apps/apps-deploy> <https://docs.microsoft.com/en-us/mem/intune/apps/apps-add>

NEW QUESTION 211

- (Exam Topic 4)  
You have the Microsoft Deployment Toolkit (MDT) installed. You install and customize Windows 11 on a reference computer  
You need to capture an image of the reference computer and ensure that the image can be deployed to multiple computers.  
Which command should you run before you capture the image?

- A. dism  
B. wpeinit  
C. sysprep  
D. bcdedit

Answer: C

**Explanation:**

To capture an image of a reference computer and make it ready for deployment to multiple computers, you need to run the sysprep command with the /generalize option. This option removes all unique system information from the Windows installation, such as the computer name, security identifier (SID), and driver cache. The other commands are not used for this purpose. References: Sysprep (Generalize) a Windows installation

**NEW QUESTION 214**

- (Exam Topic 4)

Your company uses Microsoft Intune.

More than 500 Android and iOS devices are enrolled in the Intune tenant.

You plan to deploy new Intune policies. Different policies will apply depending on the version of Android or iOS installed on the device.

You need to ensure that the policies can target the devices based on their version of Android or iOS. What should you configure first?

- A. groups that have dynamic membership rules in Azure AD
- B. Device categories in Intune
- C. Corporate device identifiers in Intune
- D. Device settings in Azure AD

**Answer:** B

**NEW QUESTION 215**

- (Exam Topic 4)

You have an Azure AD tenant named contoso.com.

You plan to use Windows Autopilot to configure the Windows 10 devices shown in the following table.

Name	Memory	TPM
Device1	16 GB	None
Device2	8 GB	Version 1.2
Device3	4 GB	Version 2.0

Which devices can be configured by using Windows Autopilot self-deploying mode?

- A. Device2 only
- B. Device3 only
- C. Device2 and Devnce3 only
- D. Device 1, Device2, and Device3

**Answer:** C

**Explanation:**

Windows Autopilot self-deploying mode requires devices that have a firmware-embedded activation key for Windows 10 Pro or Windows 11 Pro. This feature allows devices to automatically activate Windows Enterprise edition using the subscription license assigned to the user. Device1 does not have a firmware-embedded activation key, so it cannot use self-deploying mode. Device2 and Device3 have firmware-embedded activation keys for Windows 10 Pro, so they can use self-deploying

mode. References: Windows Autopilot self-deploying mode (Public Preview), Deploy Windows Enterpris licenses

**NEW QUESTION 218**

- (Exam Topic 4)

You have a Microsoft 365 subscription that uses Microsoft Intune Suite. You use Microsoft Intune to deploy and manage Windows devices.

You have 100 devices from users that left your company.

You need to repurpose the devices for new users by removing all the data and applications installed by the previous users. The solution must minimize administrative effort.

What should you do?

- A. Deploy a new configuration profile to the devices.
- B. Perform a Windows Autopilot reset on the devices.
- C. Perform an in-place upgrade on the devices.
- D. Perform a clean installation of Windows 11 on the devices.

**Answer:** B

**NEW QUESTION 222**

- (Exam Topic 4)

You have a Microsoft 365 subscription that uses Microsoft Intune Suite.

You use Microsoft Intune to manage devices.

You need to ensure that the startup performance of managed Windows 11 devices is captured and available for review in the Intune admin center.

What should you configure?

- A. the Azure Monitor agent
- B. a device compliance policy
- C. a Conditional Access policy
- D. an Intune data collection policy

**Answer:** D

**NEW QUESTION 227**

- (Exam Topic 4)

You have an Azure AD tenant and 100 Windows 10 devices that are Azure AD joined and managed by using Microsoft Intune. You need to configure Microsoft Defender Firewall and Microsoft Defender Antivirus on the devices. The solution must minimize administrative effort. Which two actions should you perform? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. To configure Microsoft Defender Antivirus, create a Group Policy Object (GPO) and configure the Windows Defender Antivirus settings.
- B. To configure Microsoft Defender Firewall, create a device configuration profile and configure the Device restrictions settings.
- C. To configure Microsoft Defender Antivirus, create a device configuration profile and configure the Endpoint protection settings.
- D. To configure Microsoft Defender Antivirus, create a device configuration profile and configure the Device restrictions settings.
- E. To configure Microsoft Defender Firewall, create a device configuration profile and configure the Endpoint protection settings.
- F. To configure Microsoft Defender Firewall, create a Group Policy Object (GPO) and configure Windows Defender Firewall with Advanced Security.

**Answer:** CE

**Explanation:**

To configure Microsoft Defender Firewall and Microsoft Defender Antivirus on Azure AD joined devices that are managed by Intune, you need to create a device configuration profile and configure the Endpoint protection settings. You can use this profile to configure various settings for firewall and antivirus protection on the devices. References:  
<https://docs.microsoft.com/en-us/mem/intune/protect/endpoint-protection-windows-10>

**NEW QUESTION 232**

- (Exam Topic 4)

In Microsoft Intune, you have the device compliance policies shown in the following table.

Name	Type	Encryption	Windows Defender antimalware	Mark device as not compliant	Assigned to
Policy1	Windows 8.1 and later	Require	<i>Not applicable</i>	5 days	Group1
Policy2	Windows 10 and later	Not configured	Require	7 days	Group2
Policy3	Windows 10 and later	Require	Require	10 days	Group2

The Intune compliance policy settings are configured as shown in the following exhibit.

 Save
  Discard

These settings configure the way the compliance service treats devices. Each device evaluates these as a "Built-in Device Compliance Policy", which is reflected in device monitoring.

Mark devices with no compliance policy assigned as: 

Compliant
 

Not Compliant

Enhanced jailbreak detection: 

Enabled
 

Disabled

Compliance status validity period (days): 

30
 

On June 1, you enroll Windows 10 devices in Intune as shown in the following table.

Name	Use BitLocker Drive Encryption (BitLocker)	Windows Defender	Member of
Device1	No	Enabled	Group1
Device2	No	Enabled	Group2

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

**Answer Area**

Statements	Yes	No
On June 4, Device1 is marked as compliant.	<input type="radio"/>	<input type="radio"/>
On June 6, Device1 is marked as compliant.	<input type="radio"/>	<input type="radio"/>
On June 9, Device2 is marked as compliant.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Device 1 is Windows 10 - and policy 1 is for Windows 8. Default compliance for devices without a policy is not compliant so first 2 questions are NO. Then the third device has 2 policies, the first one is compliant and the second policy is not compliant but the device is not marked as non-compliant due to the fact that mark device as non-compliant is set to 10 days. This means that the machine will be compliant until June 10th.

Source:  
Mark device non-compliant: By default, this action is set for each compliance policy and has a schedule of zero (0) days, marking devices as noncompliant immediately.  
When you change the default schedule, you provide a grace period in which a user can remediate issues or become compliant without being marked as non-compliant.  
This action is supported on all platforms supported by Intune. <https://docs.microsoft.com/en-us/mem/intune/protect/actions-for-noncompliance>

**NEW QUESTION 237**

- (Exam Topic 4)  
You have a Microsoft 365 subscription that uses Microsoft Intune. You plan to manage Windows updates by using Intune.  
You create an update ring for Windows 10 and later and configure the User experience settings for the ring as shown in the following exhibit.

User experience settings

Automatic update behavior ⓘ

Auto install and restart at maintenance time

Active hours start \* ⓘ

8 AM

Active hours end \* ⓘ

**NEW QUESTION 238**

- (Exam Topic 4)  
Your network contains an Active Directory domain named adatum.com. The domain contains two computers named Computer1 and Computer2 that run Windows 10. Remote Desktop is enabled on Computer2.  
The domain contains the user accounts shown in the following table.

Name	Member of
User1	Domain Admins
User2	Domain Users
User3	Domain Users

Computer2 contains the local groups shown in the following table.

Name	Members
Group1	ADATUM\User2 ADATUM\User3
Group2	ADATUM\User2
Group3	ADATUM\User3
Administrators	ADATUM\Domain Admins ADATUM\User3
Remote Desktop Users	Group1

The relevant user rights assignments for Computer2 are shown in the following table.

Policy	Security Setting
Allow log on through Remote Desktop Services	Administrators, Remote Desktop Users
Deny log on through Remote Desktop Services	Group2
Deny log on locally	Group3

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

## Answer Area

Statements	Yes	No
User1 can establish a Remote Desktop session to Computer2.	<input type="radio"/>	<input type="radio"/>
User2 can establish a Remote Desktop session to Computer2.	<input type="radio"/>	<input type="radio"/>
User3 can establish a Remote Desktop session to Computer2.	<input type="radio"/>	<input type="radio"/>

- A. Mastered  
 B. Not Mastered

Answer: A

Explanation:

## Answer Area

Statements	Yes	No
User1 can establish a Remote Desktop session to Computer2.	<input checked="" type="radio"/>	<input type="radio"/>
User2 can establish a Remote Desktop session to Computer2.	<input type="radio"/>	<input checked="" type="radio"/>
User3 can establish a Remote Desktop session to Computer2.	<input type="radio"/>	<input checked="" type="radio"/>

### NEW QUESTION 239

- (Exam Topic 4)

You have an Azure AD tenant named contoso.com.

You have a workgroup computer named Computer1 that runs Windows 11. You need to add Computer1 to contoso.com.

What should you use?

- A. dsreecmd.exe  
 B. Computer Management  
 C. netdom.exe  
 D. the Settings app

Answer: A

#### NEW QUESTION 241

- (Exam Topic 4)

You have a Microsoft 365 subscription that uses Microsoft Intune and contains 100 Windows 10 devices. You need to create Intune configuration profiles to perform the following actions on the devices:

- Deploy a custom Start layout.
- Rename the local Administrator account.

Which profile type template should you use for each action? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

#### Answer Area

Deploy a custom Start layout:

Rename the local Administrator account:

- A. Mastered  
B. Not Mastered

**Answer:** A

**Explanation:**

#### Answer Area

Deploy a custom Start layout:

Rename the local Administrator account:

#### NEW QUESTION 243

- (Exam Topic 4)

You have a Microsoft 365 subscription that uses Microsoft Intune Suite. You use Microsoft Intune to manage devices.

Auto-enrollment in Intune is configured.

You have 100 Windows 11 devices in a workgroup.

You need to connect the devices to the corporate wireless network and enroll 100 new Windows devices in Intune.

What should you use?

- A. a provisioning package  
B. a Group Policy Object (GPO)  
C. mobile device management (MDM) automatic enrollment  
D. a device configuration policy

**Answer:** C

#### NEW QUESTION 245

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription that contains 500 macOS devices enrolled in Microsoft Intune. You need to ensure that you can apply Microsoft

Defender for Endpoint antivirus policies to the macOS

devices. The solution must minimize administrative effort.

What should you do?

- A. Onboard the macOS devices to the Microsoft Purview compliance portal.  
B. From the Microsoft Intune admin center, create a security baseline.  
C. Install Defender for Endpoint on the macOS devices.  
D. From the Microsoft Intune admin center, create a configuration profile.

**Answer:** C

**Explanation:**

To apply Microsoft Defender for Endpoint antivirus policies to the macOS devices, you need to install Defender for Endpoint on the devices. You can use Intune to deploy a script that installs Defender for Endpoint on macOS devices. After installation, you can use Intune to create and assign antivirus policies to the devices.

References:

<https://docs.microsoft.com/en-us/windows/security/threat-protection/microsoft-defender-atp/mac-install-with-int>

**NEW QUESTION 248**

- (Exam Topic 4)

You have 100 computers that run Windows 10 and connect to an Azure Log Analytics workspace.

Which three types of data can you collect from the computers by using Log Analytics? Each correct answer a complete solution.

NOTE: Each correct selection is worth one point.

- A. error events from the System log
- B. failure events from the Security log
- C. third-party application logs stored as text files
- D. the list of processes and their execution times
- E. the average processor utilization

**Answer:** ACE

**Explanation:**

You can collect error events from the System log, third-party application logs stored as text files, and the average processor utilization from the computers by using Log Analytics. These are some of the types of data that you can collect by using data sources such as Windows event logs, custom logs, and performance counters. You cannot collect failure events from the Security log or the list of processes and their execution times by using Log Analytics. References:

<https://docs.microsoft.com/en-us/azure/azure-monitor/agents/data-sources-overview>

**NEW QUESTION 251**

- (Exam Topic 4)

Your company implements Azure AD, Microsoft 365, Microsoft Intune, and Azure Information Protection. The company's security policy states the following:

- Personal devices do not need to be enrolled in Intune.
- Users must authenticate by using a PIN before they can access corporate email data.
- Users can use their personal iOS and Android devices to access corporate cloud services.
- Users must be prevented from copying corporate email data to a cloud storage service other than Microsoft OneDrive for Business.

You need to configure a solution to enforce the security policy. What should you create?

- A. a device configuration profile from the Microsoft Intune admin center
- B. a data loss prevention (DIP) policy from the Microsoft Purview compliance portal
- C. an insider risk management policy from the Microsoft Purview compliance portal
- D. an app protection policy from the Microsoft Intune admin center

**Answer:** B

**NEW QUESTION 254**

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription that uses Microsoft Intune. The subscription contains the users shown in the following table.

Name	Member of
User1	Group1, Group2
User2	Group2
User3	Group3

Group2 and Group3 are members of Group1. All the users use Microsoft Excel.

From the Microsoft Endpoint Manager admin center, you create the policies shown in the following table.

Name	Type	Priority	Assigned to	Default file format for Excel
Policy1	Policies for Office apps	0	Group1	OpenDocument Spreadsheet (*.ods)
Policy2	Policies for Office apps	1	Group2	Excel Binary Workbook (*.xlsb)

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

### Answer Area

Statements	Yes	No
When User1 saves a new spreadsheet, the .ods format is used.	<input type="radio"/>	<input type="radio"/>
When User2 saves a new spreadsheet, the .xlsb format is used.	<input type="radio"/>	<input type="radio"/>
When User3 saves a new spreadsheet, the .xlsx format is used.	<input type="radio"/>	<input type="radio"/>

- A. Mastered  
B. Not Mastered

**Answer:** A

#### Explanation:

Box 1: No

User1 is member of Group1 and Group2.

Policy1 with priority 0 is assigned to Group1: default file format for Excel is.ods. Policy2 with priority 1 is assigned to Group2: default file format for Excel is.xlsb.

Note: Key points to remember about policy order

Policies are assigned an order of priority. Devices receive the first applied policy only.

You can change the order of priority for policies. Default policies are given the lowest order of priority. Box 2: Yes

User2 is member of Group2.

Group2 and Group3 are members of Group1. Box 3: No

User3 is member of Group3.

Group2 and Group3 are members of Group1.

### NEW QUESTION 259

- (Exam Topic 4)

You have computers that run Windows 10 and are configured by using Windows AutoPilot. A user performs the following tasks on a computer named Computer1:

- Creates a VPN connection to the corporate network
- Installs a Microsoft Store app named App1
- Connects to a Wi-Fi network

You perform a Windows AutoPilot Reset on Computer1.

What will be the state of the computer when the user signs in? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

The Wi-Fi connection will be:

☐

Removed

Retained and the passphrase will be retained

Retained but the passphrase will be reset

App1 will be:

☐

Reinstalled at sign-in

Removed

Retained

The VPN connection will be:

☐

Removed

Retained and the credentials will be cached

Retained but the credentials will be reset

- A. Mastered  
B. Not Mastered

**Answer:** A

#### Explanation:

<https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/windows-autopilot-reset>

**NEW QUESTION 262**

- (Exam Topic 4)

You have a Microsoft 365 subscription that contains 1,000 Android devices enrolled in Microsoft Intune. You create an app configuration policy that contains the following settings:

- Device enrollment type: Managed devices
- Profile Type: All Profile Types
- Platform: Android Enterprise

Which two types of apps can be associated with the policy? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. Built-in Android app
- B. Managed Google Play store app
- C. Web link
- D. Android Enterprise system app
- E. Android store app

**Answer:** BD

**NEW QUESTION 267**

- (Exam Topic 4)

You use the Microsoft Deployment Toolkit (MDT) to deploy Windows 11.

You create a new task sequence by using the Standard Client Task Sequence template to deploy Windows 11 Enterprise to new computers. The computers have a single hard disk.

You need to modify the task sequence to create a system volume and a data volume.

Which phase should you modify in the task sequence?

- A. Initialization
- B. State Restore
- C. Preinstall
- D. Postinstall

**Answer:** C

**NEW QUESTION 271**

- (Exam Topic 4)

You have a Microsoft 365 ES subscription that uses Microsoft Intune. You have the apps shown in the following exhibit.

Apps | All apps

NEW QUESTION 275

- (Exam Topic 4)

You have a Hyper-V host that contains the virtual machines shown in the following table.

Name	Generation	Virtual processors	Memory
VM1	1	4	16 GB
VM2	2	1	8 GB
VM3	2	2	4 GB

On which virtual machines can you install Windows 11?

- A. VM1 only
- B. VM3only
- C. VM1 and VM2 only
- D. VM2 and VM3 only
- E. VM1, VM2, and VM3

Answer: E

NEW QUESTION 276

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription that uses Microsoft Intune.

You add apps to Intune as shown in the following table.

Name	App type
App1	Android store app
App2	Android line-of-business app
App3	Managed Google Play app

You need to create an app configuration policy named Policy1 for the Android Enterprise platform. Which apps can you manage by using Policy1?

- A. App2 only
- B. App3 only
- C. App1 and App3 only
- D. App2 and App3 only
- E. App1, App2, and App3

Answer: D

NEW QUESTION 281

- (Exam Topic 4)

You have 200 computers that run Windows 10 and are joined to an Active Directory domain.

You need to enable Windows Remote Management (WinRM) on all the computers by using Group Policy. Which three actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Enable the Allow Remote Shell access setting.
- B. Enable the Allow remote server management through WinRM setting.
- C. Set the Startup Type of the Windows Remote Management (WS-Management) service to Automatic.
- D. Enable the Windows Defender Firewall: Allow inbound Remote Desktop exceptions setting.
- E. Set the Startup Type of the Remote Registry service to Automatic
- F. Enable the Windows Defender Firewall: Allow inbound remote administration exception setting.

**Answer:** BCF

**Explanation:**

To enable WinRM on domain computers using Group Policy, you need to perform the following actions:

- Enable the Allow remote server management through WinRM setting under Computer Configuration > Policies > Administrative Templates > Windows Components > Windows Remote Management (WinRM) > WinRM Service. This setting allows you to specify the IP address ranges that can connect to the WinRM service.
- Set the Startup Type of the Windows Remote Management (WS-Management) service to Automatic under Computer Configuration > Preferences > Control Panel Settings > Services. This setting ensures that the WinRM service starts automatically on the computers.
- Enable the Windows Defender Firewall: Allow inbound remote administration exception setting under Computer Configuration > Policies > Security Settings > Windows Firewall and Advanced Security > Windows Firewall and Advanced Security > Inbound Rules. This setting creates a firewall rule that allows incoming TCP connections on port 5985 for WinRM. References: How to Enable WinRM via Group Policy, Installation and configuration for Windows Remote Management

**NEW QUESTION 283**

- (Exam Topic 4)

Your network contains an on-premises Active Directory domain named contoso.com that syncs to Azure AD. A user named User1 uses the domain-joined devices shown in the following table.

Name	Operating system
Device1	Windows 10 Pro
Device2	Windows 11 Pro

In the Microsoft Entra admin center, you assign a Windows 11 Enterprise E5 license to User1. You need to identify what will occur when User1 next signs in to the devices.

What should you identify for each device? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

**Answer Area**

Device1:

Will activate as Windows 11 Enterprise

Will activate as Windows 11 Enterprise

Will not upgrade to Windows 11 Enterprise

Will perform a clean installation of Windows 11 Enterprise

Will perform an in-place upgrade to Windows 11 Enterprise

Device2:

Will not upgrade to Windows 11 Enterprise

Will activate as Windows 11 Enterprise

Will not upgrade to Windows 11 Enterprise

Will perform a clean installation of Windows 11 Enterprise

Will perform an in-place upgrade to Windows 11 Enterprise

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Device 1:

- Will activate as Windows 11 Enterprise. According to Deploy Windows Enterprise licenses, Windo 11 Enterprise E5 license is a subscription license that can be assigned to users who have a supported and licensed version of Windows 10 Pro or Windows 11 Pro. Device 1 has Windows 11 Pro, so it meets the requirement. When User1 signs in to Device 1 with their Azure AD account, the device will automatically activate as Windows 11 Enterprise without changing the edition.
- Will not activate as Windows 11 Enterprise. According to Deploy Windows Enterprise licenses, Windows 11 Enterprise E5 license is a subscription license that can be assigned to users who have a supported and licensed version of Windows 10 Pro or Windows 11 Pro. Device 2 has Windows 10 Home, so it does not meet the requirement. When User1 signs in to Device 2 with their Azure AD account, the device will not activate as Windows 11 Enterprise by subscription.

**NEW QUESTION 284**

- (Exam Topic 4)

You have a Microsoft 365 subscription.  
You use Microsoft Intune Suite to manage devices.  
You have the iOS app protection policy shown in the following exhibit.

### Access requirements

PIN for access	Require
PIN type	Numeric
Simple PIN	Allow
Select minimum PIN length	6
Touch ID instead of PIN for access (iOS 8+/iPadOS)	Allow
Override biometrics with PIN after timeout	Require
Timeout (minutes of inactivity)	30
Face ID instead of PIN for access (iOS 11+/iPadOS)	Block
PIN reset after number of days	No
Number of days	0
App PIN when device PIN is set	Require
Work or school account credentials for access	Require
Recheck the access requirements after (minutes of inactivity)	30

### Conditional launch

Setting	Value	Action
Max PIN attempts	5	Reset PIN
Offline grace period	720	Block access (minutes)
Offline grace period	90	Wipe data (days)
Jailbroken/rooted devices		Block access

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic. NOTE: Each correct selection is worth one point,

Answer Area

After 30 minutes of inactivity, a user will be prompted for their [answer choice].

PIN only

account credentials only

PIN only

PIN and account credentials

Entering the wrong PIN five times will [answer choice].

block access

block access

reset the app PIN

reset the device PIN

wipe company data

- A. Mastered
- B. Not Mastered

Answer: A

#### Explanation:

Box 1 = PIN only

Box 2 = reset the PIN app

iOS/iPadOS app protection policy settings - Microsoft Intune | Microsoft Learn <https://learn.microsoft.com/en-us/mem/intune/apps/app-protection-policy-settings-ios>

#### NEW QUESTION 286

- (Exam Topic 4)

You have an Azure Active Directory Premium Plan 2 subscription that contains the users shown in the following table.

Name	Member of	Assigned license
User1	Group1	Enterprise Mobility + Security E5
User2	Group2	Enterprise Mobility + Security E5

You purchase the devices shown in the following table.

Name	Type
Device1	Windows 10
Device2	Android

You configure automatic mobile device management (MDM) and mobile application management (MAM) enrollment by using the following settings:

- MDM user scope: Group1
- MAM user scope: Group2

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
If User1 registers Device1 in contoso.com, Device1 is enrolled automatically in Microsoft Intune.	<input type="radio"/>	<input type="radio"/>
If User1 joins Device1 to contoso.com, Device2 is enrolled automatically in Microsoft Intune.	<input type="radio"/>	<input type="radio"/>
If User2 registers Device3 in contoso.com, Device3 is enrolled automatically in Microsoft Intune.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Reference: <https://docs.microsoft.com/en-us/mem/intune/enrollment/android-enroll> <https://powerautomate.microsoft.com/fr-fr/blog/mam-flow-mobile/>

#### NEW QUESTION 290

- (Exam Topic 4)

You have devices that are not rooted enrolled in Microsoft Intune as shown in the following table.

Name	Platform	IP address
Device1	Windows	192.168.10.35
Device2	Android	10.10.10.40
Device3	Android	192.168.10.10

The devices are members of a group named Group1.

In Intune, you create a device compliance location that has the following configurations:

- Name: Network1
- IPv4 range: 192.168.0.0/16

In Intune, you create a device compliance policy for the Android platform. The policy has the following configurations:

- Name: Policy1
- Device health: Rooted devices: Block
- Locations: Location: Network1
- Mark device noncompliant: Immediately
- Assigned: Group1

The Intune device compliance policy has the following configurations:

- Mark devices with no compliance policy assigned as: Compliant
- Enhanced jailbreak detection: Enabled
- Compliance status validity period (days): 20

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Statements	Yes	No
Device1 is marked as compliant.	<input type="radio"/>	<input type="radio"/>
Device2 is marked as compliant.	<input type="radio"/>	<input type="radio"/>
Device3 is marked as compliant.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Device1 is marked as compliant. = No Device2 is marked as compliant. = Yes Device3 is marked as compliant. = No

- Device1 is marked as noncompliant because it is rooted and the device compliance policy Policy1 blocks rooted devices under the Device health setting1.
- Device2 is marked as compliant because it is not rooted and it is within the network location Network1 that is specified in the device compliance policy Policy11.
- Device3 is marked as noncompliant because it is outside the network location Network1 that is specified in the device compliance policy Policy11. The device compliance location setting requires devices to be in a specific network range to be compliant2.

**NEW QUESTION 293**

- (Exam Topic 4)

You use the Microsoft Deployment Toolkit (MDT) to manage Windows 11 deployments. From Deployment Workbench, you modify the WinPE settings and add PowerShell support. You need to generate a new set of WinPE boot image files that contain the updated settings. What should you do?

- A. From the Deployment Shares node, update the deployment share.
- B. From the Advanced Configuration node, create new media.
- C. From the Packages node, import a new operating system package
- D. From the Operating Systems node, import a new operating system.

**Answer:** A

**NEW QUESTION 296**

- (Exam Topic 4)

Your network contains an on-premises Active Directory domain and an Azure AD tenant.

The Default Domain Policy Group Policy Object (GPO) contains the settings shown in the following table.

Name	GPO value
LockoutBadCount	0
MaximumPasswordAge	42
MinimumPasswordAge	1
MinimumPasswordLength	7
PasswordComplexity	True
PasswordHistorySize	24

Which device configuration profile type template should you use?

- A. Administrative Templates
- B. Endpoint protection
- C. Device restrictions
- D. Custom

**Answer:** A

**Explanation:**

To configure the settings shown in the table, you need to use the Administrative Templates device configuration profile type template. This template allows you to configure hundreds of settings that are also available in Group Policy. You can use this template to configure settings such as password policies, account lockout policies, and audit policies. References:

<https://docs.microsoft.com/en-us/mem/intune/configuration/administrative-templates-windows>

**NEW QUESTION 299**

- (Exam Topic 4)

You have 200 computers that run Windows 10. The computers are joined to Azure AD and enrolled in Microsoft Intune. You need to set a custom image as the wallpaper and sign-in screen.

Which two settings should you configure in the Device restrictions configuration profile? To answer, select the appropriate settings in the answer area.

NOTE: Each correct selection is worth one point.

## Answer Area

### Device restrictions

Windows 10 and later

✓ Basics   **2 Configuration settings**   3 Assignments   4 Applicability Rules   5 Review + create

- App Store
- Cellular and connectivity
- Cloud and Storage
- Cloud Printer
- Control Panel and Settings
- Display

### NEW QUESTION 304

- (Exam Topic 4)

You have an Azure AD tenant named contoso.com. You have the devices shown in the following table.

Name	Platform
Device1	Windows 11
Device2	Windows 10
Device3	iOS
Device4	Ubuntu Linux

Which devices can be Azure AD joined, and which devices can be registered in contoso.com? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Azure AD joined:

Registered in contoso.com:

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

## Answer Area

### NEW QUESTION 305

- (Exam Topic 4)

You have a Microsoft Intune subscription that has the following device compliance policy settings: Mark devices with no compliance policy assigned as: Compliant  
Compliance status validity period (days): 14

On January 1, you enroll Windows 10 devices in Intune as shown in the following table.

Name	BitLocker Drive Encryption (BitLocker)	Firewall	Scope (Tags)	Member of
Device1	Enabled	Off	Tag1	Group1
Device2	Disabled	On	Tag2	Group2

On January 4, you create the following two device compliance policies:

- > Name: Policy1
- > Platform: Windows 10 and later
- > Require BitLocker: Require
- > Mark device noncompliant: 5 days after noncompliance
- > Scope (Tags): Tag1
- > Name: Policy2
- > Platform: Windows 10 and later
- > Firewall: Require
- > Mark device noncompliant: Immediately
- > Scope (Tags): Tag2

On January 5, you assign Policy1 and Policy2 to Group1.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
On January 7, Device1 is marked as compliant.	<input type="radio"/>	<input type="radio"/>
On January 8, Device1 is marked as compliant.	<input type="radio"/>	<input type="radio"/>
On January 8, Device2 is marked as compliant.	<input type="radio"/>	<input type="radio"/>

- A. Mastered  
B. Not Mastered

**Answer:** A

#### Explanation:

Box 1: No.

Policy1 and Policy2 apply to Group1 which Device1 is a member of. Device1 does not meet the firewall requirement in Policy2 so the device will immediately be marked as non-compliant.

Box 2: No

For the same reason as Box1. Box 3: Yes

Policy1 and Policy2 apply to Group1. Device2 is not a member of Group1 so the policies don't apply.

The Scope (tags) have nothing to do with whether the policy is applied or not. The tags are used in RBAC.

### NEW QUESTION 310

- (Exam Topic 4)

You have 100 computers that run Windows 10.

You plan to deploy Windows 11 to the computers by performing a wipe and load installation. You need to recommend a method to retain the user settings and the user data.

Which three actions should you recommend be performed in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Configure known folder redirection in Microsoft OneDrive.

Run scanstate.exe.

Run loadstate.exe.

Enable Enterprise State Roaming.

Create a system image backup.

Deploy Windows 11.

Restore a system image backup.

>

<

NEW QUESTION 314

- (Exam Topic 4)  
You have the device configuration profile shown in the following exhibit.

Kiosk

Windows 10 and later

✓ Basics

**2 Configuration settings**

③ Assignments

Configure your devices to run in kiosk mode. Before you select a kiosk mode, review your app assignments in the Mobile Apps blade. Apps that you want to run in kiosk mode should be assigned to a Windows device. [Learn more about Windows kiosk mode.](#)

Select a kiosk mode \*

Single app, full-screen kiosk

User login type \*

Auto login (Windows 10, version 1803+)

Application type \*

Add Microsoft Edge browser

This kiosk profile requires Microsoft Edge version 87 and later with Windows 10 version 1909 and later. [Learn more about Microsoft Edge kiosk mode.](#)

Edge Kiosk URL \*

https://contoso.com

Microsoft Edge kiosk mode type

Public Browsing (InPrivate)

Refresh browser after idle time

5

Specify Maintenance Window for App Restarts \*

Require

**Not configured**

Maintenance Window Start Time

MM/DD/YYYY

h:mm:ss A

Maintenance Window Recurrence

Daily (recommended)

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic. NOTE: Each correct selection is worth one point.

Answer Area

Users

can access any URL.

cannot view the address bar in Microsoft Edge.

can only access URLs that include contoso.com.

can only access URLs that start with https://contoso.com/ .

Windows 10 devices can have

a single Microsoft Edge instance that has a single tab.

a single Microsoft Edge instance that has multiple tabs.

multiple Microsoft Edge instances that have multiple tabs.

multiple Microsoft Edge instances that each has a single tab.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Users can only access URLs that start with https://contoso.com/ Windows 10 and later devices can have multiple Microsoft Edge instances that each has a single tab

he device configuration profile shown in the exhibit is a kiosk browser profile that configures Microsoft Edge to run in kiosk mode. The profile has the following settings:

- Kiosk mode: Enabled

Your Partner of IT Exam

visit - <https://www.exambible.com>

- Kiosk type: Multi-app
- Allowed URLs: <https://contoso.com/>\*
- Address bar: Disabled

These settings mean that users can only access URLs that start with <https://contoso.com/> and cannot view the address bar in Microsoft Edge. The kiosk type of Multi-app allows users to open multiple instances of Microsoft Edge, but each instance can only have a single tab. Therefore, users cannot access any URL, cannot view the address bar in Microsoft Edge, and can have multiple Microsoft Edge instances that each has a single tab. References: <https://docs.microsoft.com/en-us/mem/intune/configuration/kiosk-settings#kiosk-browser-settings>

#### NEW QUESTION 317

- (Exam Topic 4)

You have computers that run Windows 10 and are managed by using Microsoft Intune. Users store their files in a folder named D:\Folder1.

You need to ensure that only a trusted list of applications is granted write access to D:\Folder1. What should you configure in the device configuration profile?

- A. Microsoft Defender Exploit Guard
- B. Microsoft Defender Application Guard
- C. Microsoft Defender SmartScreen
- D. Microsoft Defender Application Control

**Answer: A**

#### NEW QUESTION 318

- (Exam Topic 4)

You have a Microsoft Deployment Toolkit (MDT) deployment share named DS1. You import a Windows 11 image to DS1.

You have an executable installer for an application named App1.

You need to ensure that App1 will be installed for all the task sequences that deploy the image.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

**Actions**

- Modify a Windows 11 operating system setting.
- Modify a selection profile.
- Add App1 to DS1.
- Identify the GUID of App1.
- Modify CustomSettings.ini.

➤

➤

**Answer Area**

- 1 Add App1 to DS1.
- 2 Identify the GUID of App1.
- 3 Modify CustomSettings.ini.

⬆

⬇

- A. Mastered
- B. Not Mastered

**Answer: A**

#### Explanation:

MDT is a tool that allows you to automate the deployment of Windows operating systems and applications. To install an application for all the task sequences that deploy a Windows 11 image, you need to perform the following three actions in sequence:

- Add App1 to DS1. You can use the Deployment Workbench to import the executable installer of App1 to a folder in your deployment share. This will create an application entry with a unique GUID that identifies App1.
- Identify the GUID of App1. You can find the GUID of App1 by opening the application properties in the Deployment Workbench and looking at the Application GUID field<sup>1</sup>. You can copy the GUID to use it later.
- Modify CustomSettings.ini. You can edit the CustomSettings.ini file in your deployment share to specify which applications to install for each task sequence.

You can use the Applications property to list the GUIDs of the applications you want to install, separated by commas<sup>1</sup>. For example, if you want to install App1 and another application with GUID {1234-5678-90AB-CDEF}, you can use this line:

Applications={GUID of App1},{1234-5678-90AB-CDEF}

These are the three actions you need to perform to ensure that App1 will be installed for all the task sequences that deploy the Windows 11 image from DS1. I hope this helps you.

If you want to learn more about MDT and how to deploy applications with it, you can check out these resources:

- [How to deploy applications with the Microsoft Deployment Toolkit](#)

#### NEW QUESTION 323

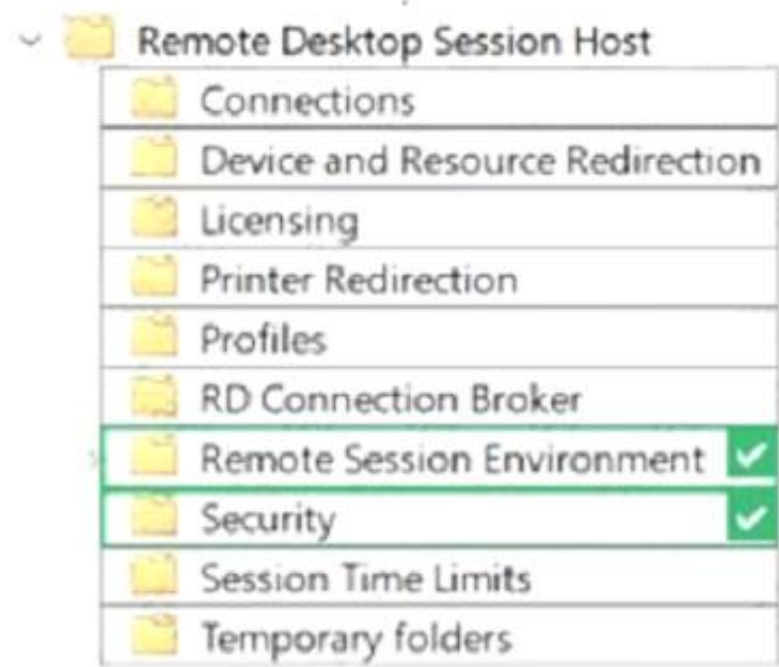

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains 1.000 computers that run Windows 11.

You need to configure the Remote Desktop settings of all the computers. The solution must meet the following requirements:

- Prevent the sharing of clipboard contents.
- Ensure that users authenticate by using Network Level Authentication (NLA).

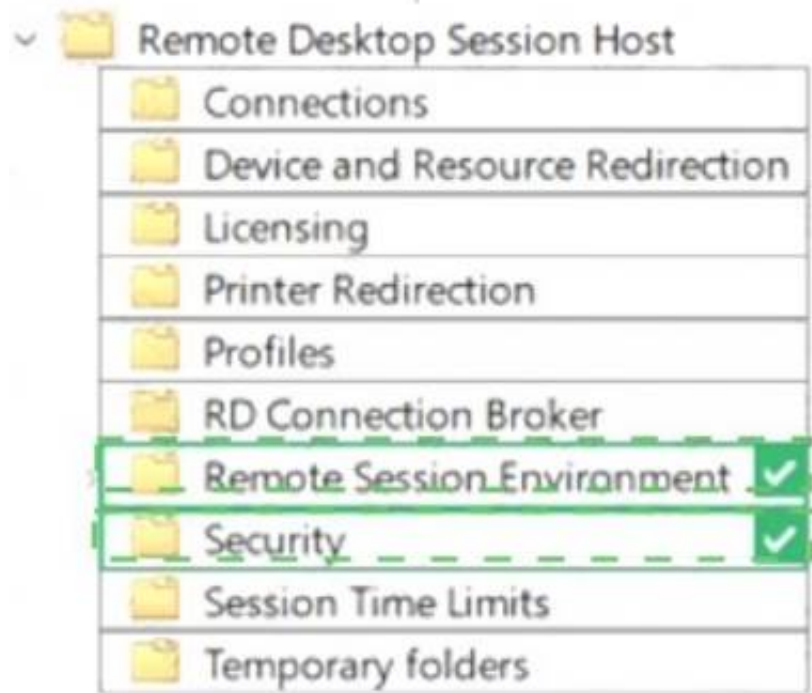

Which two nodes of the Group Policy Management Editor should you use? To answer, select the appropriate nodes in the answer area. NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 326

- (Exam Topic 4)

Your network contains an Active Directory domain named contoso.com. The domain contains a computer named Computer1 that runs Windows 10. You have the groups shown in the following table.

Name	Type	Location
Group1	Universal distribution group	Contoso.com
Group2	Global security group	Contoso.com
Group3	Group	Computer1
Group4	Group	Computer1

Which groups can you add to Group4?

- A. Group2only
- B. Group1 and Group2 only
- C. Group2 and Group3 only
- D. Group1, Group2, and Group3

Answer: C
