

BCABA Dumps

Board Certified Assistant Behavior Analyst

<https://www.certleader.com/BCABA-dumps.html>

NEW QUESTION 1

When presenting extinction as a possible treatment option to a client and his or her family, it is MOST important for a behavior analyst to

- A. assure them that extinction is supported in the literature as an effective procedur
- B. present it along with other interventions, including reinforcement based alternative
- C. discuss the risks and benefits of using extinction and assure them that it is the best optio
- D. explain his or her experience using extinction with similar case

Answer: B

NEW QUESTION 2

Fara has identified two procedures that have an equal probability of being effective. In order to select the better procedure, she should

- A. choose the procedure that falls within the staff's level of competenc
- B. determine which procedure is most clinically popular based on the rate of use by professional
- C. select the procedure that best utilizes the existing funding strea
- D. use a random number table to rule out bia

Answer: A

NEW QUESTION 3

From an ethical standpoint, target behaviors and program goals should be selected

- A. by service providers and staff members who are knowledgeable of the consumer's need
- B. by the consumer or their representative in consultation with an interdisciplinary tea
- C. so that they ultimately facilitate transition to independent livin
- D. that most closely adhere to the standards of the communit

Answer: B

NEW QUESTION 4

A behavior analyst develops a program that decreases a baby's crying when her diaper is soiled. This is an example of

- A. development of a procedure to decrease maladaptive behavior
- B. differential reinforcement of alternative response
- C. extinctio
- D. misuse of a practitioner's ability to control behavio

Answer: D

NEW QUESTION 5

Which statement is an example of "philosophic doubt"?

- A. Attention is the most powerful reinforcer for most clients so it will probably work with Freddi
- B. I have many reservations about using the principles of behavior in designing treatment program
- C. I really do not think that food functions as a reinforcer for Linda since she often misses meal
- D. Past research has shown that verbal behavior training is effective but this could change when new research is conducte

Answer: D

NEW QUESTION 6

One of the properties of behavior is

- A. siz
- B. effectiveness
- C. repeatabilit
- D. universalit

Answer: C

NEW QUESTION 7

Larry engages in self-injurious behavior which is maintained by automatic reinforcement. This behavior results in abrasions on both of his arms as a result of intense scratching. The behavior analyst decides to have Larry only wear long sleeved shirts as an initial effort to reduce the behavior. This is an example of which type of procedure?

- A. extinction
- B. deprivation
- C. punishment
- D. differential reinforcement

Answer: A

NEW QUESTION 8

Terry notices that his heart rate increases and he begins to sweat when he enters the dentist's office because the office is associated with painful, unpleasant dental work. He also is reluctant to make appointments and seems to want to do anything else but go to the dentist. His physical symptoms are an example of.

- A. operant behavior
- B. respondent behavior
- C. escape conditionin
- D. aversive conditionin

Answer: B

NEW QUESTION 9

A behavior analyst is conducting a communication training session with a child. The behavior analyst says to the child, "Say your name." The child says, "Sarah." and the behavior analyst delivers a reinforcer. What type of verbal operant was the behavior analyst's statement?

- A. echoic
- B. mand
- C. prompt
- D. tact

Answer: B

NEW QUESTION 10

Tact behavior is controlled by a stimulus. The reinforcer for tact behavior is .

- A. non-verbal; non-specific
- B. non-verbal; specific
- C. verbal; non-specific
- D. verbal; specific

Answer: A

NEW QUESTION 10

When Katie was learning how to stir-fry vegetables, her hand brushed the side of the very hot pan and she now refuses to make stir-fried vegetables. Her refusal is a result of.

- A. negative punishmen
- B. negative reinforcemen
- C. conditioned punishmen
- D. unconditioned punishmen

Answer: D

NEW QUESTION 13

Narrative recording is used to compile.

- A. data on various tasks the person can perform, such as putting on a shirt or tying shoe laces, to further identify skills training goal
- B. demographic data such as age, marital status, sex, and educational experience and to identify appropriate intervention
- C. information, which can be used to set inclusion goals, concerning proximity and social contacts with non-disabled peers in segregated setting
- D. a running account of the behaviors and environmental circumstances to identify further behaviors and related variables worthy of analysis

Answer: D

NEW QUESTION 14

The most appropriate tool for performing a behavior pattern analysis is a (n):

- A. ABC for
- B. daily schedul
- C. narrative recordin
- D. scatterplo

Answer: D

NEW QUESTION 15

Which method is the BEST to use when presenting categorical data from a functional analysis?

- A. a bar graph
- B. anecdotal report
- C. scatter plot
- D. standard celeration chart

Answer: A

NEW QUESTION 19

Jim's teacher has taught him to say, "Hello, how are you?" and when he does this, she delivers praise. Now Jim says this whenever he meets anyone, and some people say,

"Fine, how are you?" What is the natural consequence for Jim's behavior?

- A. increased number of friends
- B. continuous reinforcement
- C. improved social repertoire for Jim
- D. the responses of the people he meets

Answer: D

NEW QUESTION 20

When shopping with her dad, Sally knocks items off the shelf, especially canned goods. The cans make a loud noise when they hit the floor. Her dad decides to teach her an alternative behavior.

What alternative behavior is the BEST choice to teach?

- A. Sally pushes the shopping cart with both hand
- B. Sally drops items into the cart when her dad gives them to he
- C. Sally keeps her hands in her pockets while in the stor
- D. Sally holds dad's hand while shopping and gets to let go when quie

Answer: B

NEW QUESTION 25

When setting criteria for behavior change, behavior analysts attempt to implement the simplest mode of intervention necessary to elicit the desired outcome. As such, the identified outcome criteria should be

- A. applied to ecological assessments to generalize skill
- B. developed prior to the identified interventio
- C. initially broad in focus with subsequent reduction to a target respons
- D. measured independent of practice effects or reactivit

Answer: B

NEW QUESTION 28

When using an alternating treatments design it is important to randomly:

- A. assign participants to treatment condition
- B. select participants from the population of interes
- C. order treatment conditions presented during each phas
- D. change each criterion leve

Answer: C

NEW QUESTION 31

Jamie frequently falls to the floor and screams at school. Preliminary behavioral assessment data indicate that his tantrums are maintained by attention and escape from demand situations. Jamie's behavior analyst wants to examine precisely how attention and escape conditions affect these behaviors. The behavior analyst does not want to conduct the analysis in Jamie's classroom because she would not be able to control for potentially important factors. Relating to this scenario, which statement is TRUE?

- A. Analyses that involve experimental conditions are almost always conducted in the person's natural environmen
- B. The behavior analyst could conduct the analysis in a vacant classroom, but the generality of the findings is an issue to be considere
- C. The behavior analyst should conduct detailed interviews with the teacher and school staff to determine functional relation
- D. Only if the analysis is conducted in Jamie's classroom can a reasonable hypothesis be generate

Answer: B

NEW QUESTION 32

Susan recorded data on a student's fidgeting behavior in the following way: She divided a 10- minute recording period into 10-second intervals and recorded in each interval a "+" if the target behavior occurred at least once. The percentage of intervals of target behavior occurrence was about 45%. The data resulting are most likely to be an

- A. accurate measure of inter-response time
- B. inaccurate measure of inter-response time
- C. overestimate of the occurrence of the behavio
- D. underestimate of the occurrence of the behavio

Answer: C

NEW QUESTION 35

A major benefit of product recording is that:

- A. it is the easiest recording metho
- B. it is used when a behavior results in a certain tangible outcom
- C. the observer does not have to be present when the behavior occur
- D. one can always determine who engaged in the behavior that led to the product that was recorde

Answer: C

NEW QUESTION 36

Observation sessions should be scheduled so that the representativeness of the data can be maximized. Considering behaviors occurring in a school setting, which of the following options is consistent with this recommendation?

- A. Behaviors are given letter-codes that represent the complete topographical definition of the behaviors, e.g., “on-task academic behavior” is represented by “O” on the recording sheet
- B. Observations should be made only when the behavior is likely to occur most frequently during a day, for instance, during a particular academic class
- C. Recordings of behavior during the whole school day may be needed initially to assess the representativeness of samples within the day
- D. Representativeness can be assured by scheduling observations in sessions of 60 minutes or more in the morning and afternoon school schedule

Answer: C

NEW QUESTION 39

What is the MOST important measure of behavior when the goal is to decrease the number of cigarettes smoked per day?

- A. duration per cigarette
- B. inter-response time
- C. percentage
- D. rate

Answer: D

NEW QUESTION 40

For which of the following would it be appropriate to measure duration?

- A. Amy responds very slowly to instructions during her discrete trials teaching session
- B. Ethan leaves his work station and wanders around the building
- C. Sarah takes so long to begin her math assignments in class that she is never able to finish on time
- D. Ryan is trying to increase the speed of his typing at the computer keyboard

Answer: B

NEW QUESTION 43

Trials to criterion refers to a measure of

- A. fluency
- B. performance
- C. rate of correct responding
- D. interobserver agreement

Answer: B

NEW QUESTION 47

A teacher is tracking the performance of both math and spelling assignments for each of her 25 students. For feedback purposes, she wishes to display each student's percent correct for both areas using a line graph. What would be the MOST effective and efficient way to accomplish this?

- A. Prepare a large graph for spelling and a similar one for math and place on the graphs the average data for the entire class in the two content areas
- B. Prepare a separate graph for each student and, using a unique symbol for each content area, record the data and connect the similar symbols to create data path lines
- C. Prepare a single large graph and display each student's data for the spelling and math areas using unique symbols for each student and for each content area
- D. Prepare two graphs for each student, one for spelling and one for math, because there is no appropriate method for reporting these two content areas together on the same graph

Answer: B

NEW QUESTION 48

An experimental design that starts with a baseline phase, followed by a treatment phase, then another baseline phase, and ends in the same type of treatment phase is called a (n):

- A. ABA design
- B. reversal design
- C. multi-element design
- D. multiple baseline design

Answer: B

NEW QUESTION 50

Wilma argues with her coworker, who shares the same workstation. Even though Wilma and her coworker can articulate the workplace rules, repeated instructions to cease this behavior have gone unheeded and they are becoming enemies. What would be the MOST appropriate antecedent-based solution?

- A. Instruct the coworker to stay away from Wilma
- B. Give Wilma breaks away from her coworker whenever arguments begin
- C. Assign Wilma to a different workstation
- D. Place signs in the workstations identifying appropriate workplace behavior

Answer: C

NEW QUESTION 53

The reinforcement schedule that produces a high steady rate of responding is:

- A. F
- B. F
- C. V
- D. V

Answer: D

NEW QUESTION 54

A punishment contingency is LEAST likely to produce which effect?

- A. Undesirable emotions may resul
- B. Aggressive or violent behavior may be evoke
- C. A more appropriate replacement behavior may develo
- D. The person delivering the punisher may become an aversive stimulu

Answer: C

NEW QUESTION 59

An extinction procedure involves:

- A. withholding all reinforcemen
- B. withholding the maintaining reinforcer after the occurrence of the target behavio
- C. removing all attention from the client when the target behavior occur
- D. removing the SD for the target behavior

Answer: B

NEW QUESTION 60

Teaching a student a self-talk strategy consisting of, "After I use the toilet, I must flush." is an example oF.

- A. contingency shaped behavio
- B. direct instructio
- C. imitative instructio
- D. rule-governed behavio

Answer: D

NEW QUESTION 62

A teacher gives a student a piece of paper and asks him to draw a picture. To request a crayon, the student looks at the teacher and says, "Crayon." In response to this, the teacher replies, "Say, 'Crayon please'." The student complies with the request and the teacher gives them a crayon. This exchange is an example oF.

- A. coincidental teachin
- B. incidental teachin
- C. precision teachin
- D. vicarious teachin

Answer: B

NEW QUESTION 67

Behavioral contracts must includE.

- A. a summary of the functional assessment; the target behavior; and the consequences for its occurrence and non-occurrenc
- B. vocal descriptions of how the behavior is to be measured; the consequences for its occurrence and non-occurrence; the contract manager; and the target behavio
- C. written descriptions of how the behavior is to be measured; when behavior must occur; the consequences for its occurrence and non-occurrence; the contract manager; and the target behavior
- D. a summary of the functional assessment; written descriptions of how the behavior is to be measured; when behavior must occur; the contract manager; and the target behavior

Answer: C

NEW QUESTION 69

What is a likely benefit of having trained a client to say both "truck" and "vehicle" in response to your saying "fire engine"? The client will now likely:

- A. point to pictures of trucks or vehicle
- B. say "fire engine" when you present a picture of i
- C. say "truck" when you say "vehicle."
- D. point to a truck when you say "vehicle."

Answer: C

NEW QUESTION 70

A client with a history of escape maintained problem behavior begins to throw the puzzle pieces a few minutes after starting to work on the task. What is the BEST programmatic change for the behavior analyst to make?

- A. Remove the puzzle and implement a time-out procedure
- B. Teach the client to request escape using an adaptive behavior
- C. Implement an overcorrection procedure to reduce puzzle piece throwing
- D. Increase the amount of social praise delivered for successful task completion

Answer: B

NEW QUESTION 72

As part of evaluating procedural integrity on a school based program, it is important for the behavior analyst to assess the quality of data collected by a teacher. The BEST method is for the behavior analyst to?

- A. take data on student performance simultaneously with the teacher
- B. compare student's self-graphed data to data collected by the teacher
- C. compare data collected at the same time by the teacher and another teacher
- D. compare her/his observation of a student's performance with data collected by the teacher from an earlier training session with the student

Answer: A

NEW QUESTION 74

A married couple wants a behavior analyst to assist them in creating a happier home life for their family. The behavior analyst should

- A. provide counseling to the couple related to the problems that they identify as most important
- B. refer the family to another professional, since this type of issue is not amenable to applied behavior analysis
- C. set up contracts between the parents and children that require the parents to reinforce appropriate behavior using things that the children identify as important to them
- D. explain how behavior analysis could be used to assist the family so that they can make an informed decision about proceeding

Answer: D

NEW QUESTION 75

Adherence to "procedural integrity" promotes generalization by facilitating

- A. normalization
- B. ethical treatment of consumers
- C. consistency of instruction
- D. spontaneous changes in intervention procedure

Answer: C

NEW QUESTION 79

Having obtained appropriate consent, a behavior analyst wishes to communicate data to non-behavior analyst colleagues and family of the client. The most appropriate presentation strategy is:

- A. standard celeration chart
- B. short video clips of client performance and line graph
- C. bar graphs comparing client performance to performance of peers
- D. short video clips with a written anecdotal report

Answer: B

NEW QUESTION 83

Jack, a behavior analyst, is consulting about a student who engages in face slapping. A recent functional analysis clearly determined that the behavior is maintained by automatic reinforcement. In the past, reinforcement procedures alone were found to be ineffective. The current intervention consists of a punishment procedure. pulling the student's hands away from his face contingent on any attempts to slap and saying, "No!" Jack should

- A. move ahead and collect data on the plan and revise as indicated regularly
- B. refer to another behavior analyst who works with punishment only cases
- C. re-do the assessment, add a reinforcement procedure, and plan to eliminate all punishment procedures
- D. add a reinforcement procedure that focuses on replacement and/or incompatible behaviors and move forward with the plan

Answer: D

NEW QUESTION 86

A reliable measure is one that is:

- A. socially valid as indicated by caregiver report
- B. effective as evidenced by peer-reviewed journal article
- C. trusted to be practical and to produce accurate data
- D. consistent across observers and measurement occasions

Answer: D

NEW QUESTION 91

A behavior analyst is working with an adult client, who is deemed competent. There are multiple potential behavior targets that need to be addressed including smoking cigarettes, nail biting, and compulsive hand washing. As a first goal, the behavior analyst wants the client to focus on eliminating smoking but the client would prefer to focus on nail biting. The behavior analyst should

- A. develop a self-management plan for eliminating nail biting as this is the preference of the client
- B. develop a self-management plan for eliminating smoking as this behavior poses a serious health risk for the client
- C. convince the client to change their first goal to elimination of smoking
- D. refer the client to another behavior analyst as there is a discrepancy in goal setting priorities

Answer: A

NEW QUESTION 93

The behavior analyst reviews Sandra's data and concludes that her behavior is spontaneous; that is, it occurs randomly, and not as a result of any other event(s). Which of the assumptions underlying behavior analysis has been violated in this interpretation?

- A. determinism
- B. empiricism
- C. philosophic doubt
- D. parsimony

Answer: A

NEW QUESTION 96

A behavior analyst decides to replicate a published research project but finds that the information provided does not allow them to complete the project without more information from the author. The article violates which dimension of applied behavior analysis?

- A. effective
- B. ethical
- C. conceptually systematic
- D. technological

Answer: D

NEW QUESTION 101

A functional relationship exists only if

- A. changes in a response class produce a functional consequence
- B. changes in a stimulus class consistently alter a property of a response class
- C. reinforcement is contingent upon responding
- D. a stimulus elicits a response without previous conditioning

Answer: B

NEW QUESTION 104

Which situation is the BEST example of contingency-shaped behavior?

- A. A task analysis is used to teach Lilly how to clean her room
- B. Dean is able to change the scale on a computerized graph after reading "how to" instruction
- C. Billy's mother tells him not to touch the stove because he could burn himself
- D. Billy does not touch the stove
- E. Jennifer sees a candy bar and she demands for it
- F. Jennifer's sister gives her the candy bar and she eats it

Answer: D

NEW QUESTION 105

Experimental control is demonstrated in a changing criterion design by a change in behavior:

- A. across settings
- B. across individuals
- C. when returning to baseline
- D. to meet predetermined level

Answer: D

NEW QUESTION 106

John's instructional program has successfully increased the number of words he reads correctly per minute. The procedures used include special worksheets, contingent reinforcement for number of words read correctly, and peer tutoring. The behavior analyst wants to determine which part or parts of the treatment have been effective, so he systematically dismantles the treatment and withdraws elements until the reading no longer improves. The behavior analyst is completing A.

- A. component analysis
- B. multi-element design
- C. parametric examination
- D. reversal design

Answer: A

NEW QUESTION 109

During three 30-minute observations, Linda gouged her eye 8, 17, and 12 times, respectively. Each incident lasted between 1 and 3 seconds, with an average duration of 1.3 seconds. Which is the BEST dimension to continue to measure?

- A. duration
- B. inter-response time
- C. latency
- D. rate

Answer: D

NEW QUESTION 111

A parent reports that her 2-year-old daughter uses a number of stalling techniques to avoid bedtime once she is told to go to bed. What would be a good progress measure for going to bed when told?

- A. frequency
- B. inter-response time
- C. latency
- D. compliance

Answer: C

NEW QUESTION 114

In this graph, what is plotted on number 1?

- A. dependent variable
- B. independent variable
- C. session
- D. setting

Answer: A

NEW QUESTION 115

When given free access to playing with blocks, crayons, and trucks, Jeff plays with blocks about 50% of the time, plays with crayons about 30% of the time, and plays with trucks the remaining 20% of the time. According to the Premack principle, which of the following is true?

- A. Playing with trucks will serve as a reinforcer for playing with crayon
- B. Playing with trucks will serve as a reinforcer for playing with block
- C. Playing with crayons will serve as a reinforcer for playing with block
- D. Playing with crayons will serve as a reinforcer for playing with truck

Answer: D

NEW QUESTION 118

An approach to reducing problem behavior called involves providing reinforcers on a (n) schedule regardless of the occurrence of the problem behavior.

- A. noncontingent reinforcement; interval
- B. differential reinforcement; interval
- C. noncontingent reinforcement; ratio
- D. differential reinforcement; ratio

Answer: A

NEW QUESTION 123

Which procedure is used in fading physical prompts?

- A. forward chaining
- B. backward chaining
- C. graduated guidance
- D. least-to-most prompting

Answer: C

NEW QUESTION 126

Two responses (such as putting on a sweater and lighting a fire) that produce the same result describE.

- A. the matching la
- B. functional equivalenc
- C. stimulus generalizatio
- D. response generalizatio

Answer: B

NEW QUESTION 127

The teachers have identified bullying as a problem behavior for a particular student. What should the behavior analyst do next?

- A. Raise awareness of the impact of bullying by holding a school-wide discussio
- B. Collect information about the frequency and duration of the behavio
- C. Develop an operational definition of the behavio
- D. Conduct a functional analysis of bullyin

Answer: C

NEW QUESTION 128

Robert has been referred because he is losing significant amounts of weight due to refusal of most foods. What should the behavior analyst consider first?

- A. possible medical conditions
- B. meal content/texture of food
- C. caloric content of preferred foods
- D. ecological variables during mealtimes

Answer: A

NEW QUESTION 131

The employees at a group home have not been meeting their supervisor's expectations concerning on-time arrival to work. To address this issue, their supervisor implemented an intervention that allows for each staff member who arrives on time for all scheduled shifts in a given week to obtain an extended lunch break on Fridays. What type of intervention was implemented?

- A. Contingency contract
- B. Dependent group contingency
- C. Independent group contingency
- D. Interdependent group contingency

Answer: C

NEW QUESTION 132

The MOST critical consideration when selecting a behavior change intervention is:

- A. availability of competent staf
- B. ease of implementatio
- C. increasing a person's independenc
- D. compliance with guardian request

Answer: C

NEW QUESTION 135

Abigale is in her preschool classroom where she sees a toy named Elmo on a shelf and then says, "Elmo." No one drew her attention to Elmo. This is an example of a (n):

- A. autocliti
- B. intraverba
- C. man
- D. tac

Answer: D

NEW QUESTION 136

A behavior analyst is developing a generalization procedure for a newly mastered response. What strategy should be included in the procedure?

- A. positive practice
- B. reinforcement
- C. limited exemplars
- D. self-mediation

Answer: B

NEW QUESTION 137

What must happen for an alternating-treatments design to be optimally effective?

- A. An additional return to baseline is undertake
- B. Criterion changes are gradual to ensure complianc
- C. Participants discriminate easily between treatment condition
- D. Participants engage in multiple problem behavior

Answer: C

NEW QUESTION 142

A child diagnosed with autism engages in hand flapping almost continuously at home, day care and school. An intervention is devised to alleviate this challenging

behavior. Which type of experimental design would be BEST?

- A. reversal
- B. multi-element
- C. withdrawal
- D. multiple baseline

Answer: D

NEW QUESTION 144

Disruptive behavior occurs at a moderate rate and consistent intensity level throughout the school day. How should the teacher collect data on the behavior?

- A. Keep a running tally of the occurrences on the chalk board
- B. Record each occurrence using a portable counter
- C. Use a timer and record the number of minutes for each occurrence
- D. Document whether or not the behavior occurred every hour

Answer: B

NEW QUESTION 149

Trials to criterion is an appropriate measure of which dimension of behavior?

- A. duration of on task behavior
- B. latency of task initiation
- C. accuracy during a shaping procedure
- D. quality of a student's essay writing

Answer: C

NEW QUESTION 154

Which is the BEST description of the results obtained during the second session of the baseline condition?

- A. The behavior had an increasing trend
- B. The frequency was 7.
- C. The level was low
- D. The behavior was stable

Answer: B

NEW QUESTION 159

The best method for identifying potential reinforcers is to use:

- A. peer identified reinforcer preference
- B. reinforcer inventories or checklist
- C. paired choice procedure
- D. in vivo observation

Answer: C

NEW QUESTION 163

Reinforcing "picking up shoes" in a shoe-tying program would be an example of a step in which type of training procedure?

- A. chaining
- B. discrete trial
- C. naturalistic
- D. shaping

Answer: A

NEW QUESTION 165

A DRO was implemented for a young child with developmental delays to address reduction in the behavior of hair pulling. The child also has excessive levels of nose picking, and skin picking. Data collection needs to include rates of these behaviors as well due to the possible effects of behavioral:

- A. conduct
- B. contrast
- C. rehearsal
- D. repercussion

Answer: B

NEW QUESTION 166

Self-management strategies are:

- A. applying behavior analysis principles to change one's own behavior
- B. a method for capitalizing on an individual's will power

- C. primarily used for extinguishing one's own undesirable behavior
- D. based on personalized systems of instructio

Answer: A

NEW QUESTION 169

A young child who has learned to say "Daddy" to her father now says "Daddy" to other men. This is a type of.

- A. stimulus fadin
- B. stimulus generalizatio
- C. response generalizatio
- D. response inductio

Answer: B

NEW QUESTION 171

Which action would MOST likely increase the effectiveness of a punishment procedure?

- A. Clearly explain the punishment consequences to the person whose behavior is targeted for reductio
- B. Eliminate the reinforcement contingency maintaining the target behavio
- C. Ensure that the punisher fits the target behavio
- D. Progressively increase the intensity of the punishe

Answer: B

NEW QUESTION 175

Which verbal operants are most crucial in the development of vocal speech?

- A. intraverbals and tacts
- B. echoics and mands
- C. mandsand intraverbals
- D. tacts and echoics

Answer: B

NEW QUESTION 179

Elizabeth engages in skin scratching that never occurs when others are present. Additionally, no one has commented on this behavior, and it has occurred undetected by others for quite a long while. Elizabeth hides the scratch marks under clothing. The scratching behavior is MOST likely to be maintained by:

- A. adventitious reinforcemen
- B. social reinforcemen
- C. tangible reinforcemen
- D. automatic reinforcemen

Answer: D

NEW QUESTION 183

According to the BACB Guidelines for Responsible Conduct, documenting professional and scientific work is necessary to:

- A. prevent litigatio
- B. ensure accountabilit
- C. bill for third-party insurance payment
- D. maintain ongoing contractual relationship

Answer: B

NEW QUESTION 186

Which of the following is an example of a listener response?

- A. At dinner time, the client says "fork, please."
- B. The client labels "fork" when not instructed to do s
- C. The client repeats the word "fork" throughout the da
- D. Staff says, "pick up your fork," and the client picks up his or her for

Answer: D

NEW QUESTION 190

Why should extinction be used in combination with reinforcement-based procedures?

- A. to ensure effectiveness of the extinction procedure
- B. to eliminate the need for a punishment procedure
- C. to reduce the response effort and resistance to extinction
- D. to reduce undesirable effects such as extinction bursts and aggression

Answer: D

NEW QUESTION 192

After saying, "ball," Kelly presents five objects to her student, Bryan. When Bryan selects the ball, Kelly delivers a high-preference item. Bryan is learning to:

- A. tact object
- B. match to sampl
- C. make a simple discriminatio
- D. respond to multiple exemplar

Answer: B

NEW QUESTION 197
