

Cisco

Exam Questions 700-750

Cisco Small and Medium Business Engineer (SMBE)

NEW QUESTION 1

Meraki Dashboard is used for ease of management of Meraki devices. Which other devices are integrated with the Meraki dashboard?

- A. Smart Assistants
- B. HVAC Sensors
- C. Catalyst devices
- D. WebEx Boards

Answer: C

Explanation:

The Meraki Dashboard is designed to provide a centralized management platform for various Cisco devices, including Meraki and Catalyst devices. The integration of Catalyst devices with the Meraki Dashboard allows for simplified management and monitoring, offering a unified view of the network. This integration enables IT administrators to oversee their network infrastructure, including switches and wireless access points, through the Meraki Dashboard's intuitive interface¹².

NEW QUESTION 2

What are three features of Webex? (Choose three.)

- A. email threat defense
- B. meetings
- C. knowledge base
- D. shared file folders
- E. messaging
- F. calling

Answer: BEF

Explanation:

Webex is known for its comprehensive suite of features that facilitate collaboration and communication in a business environment. The three key features of Webex include:

* 1. Meetings: Webex Meetings allows users to host and participate in video conferences with reliable audio and video quality, content sharing, and screen sharing capabilities¹.

* 2. Messaging: Webex provides a messaging platform where team members can communicate through instant messages, share files, and collaborate in real-time¹.

* 3. Calling: With Webex, users can make and receive calls over the internet, providing a unified communication experience that integrates with other Webex features¹.

These features are designed to support a hybrid workforce, enabling seamless collaboration regardless of location.

NEW QUESTION 3

How is Cisco leveling the playing field between virtual and in-person workers?

- A. device cloud management
- B. inclusive collaboration suite
- C. cloud securityD smart cameras

Answer: B

Explanation:

Cisco is leveling the playing field between virtual and in-person workers by providing an inclusive collaboration suite. This suite includes technologies and tools that support work from anywhere, which is essential for a hybrid workforce. The suite enables employees to participate fully, regardless of their location, language preference, personality type, or familiarity with technology. By focusing on inclusivity and connectedness, Cisco ensures that all employees, whether remote or in-person, have equal opportunities to engage and contribute to their teams¹. NEW QUESTION 4

Which product helps enable secure authentication in a hybrid workforce?

- A. Webex Control Hub
- B. Cisco Business Dashboard
- C. Duo
- D. Moraki MY

Answer: C

Explanation:

Duo is the product designed to enable secure authentication in a hybrid workforce. It provides a zero-trust security model that verifies every user and device, ensuring trusted access across all environments. This is particularly important for hybrid work settings where employees are logging in from various locations, and the threat landscape is more diverse. Duo helps create a secure, consistent environment that extends from the office to remote workers by authenticating identities before granting access to corporate networks and apps¹².

NEW QUESTION 5

Which Cisco product enables video conferencing and communication?

- A. Webex

- B. Meraki
- C. Duo
- D. Umbrella

Answer: A

Explanation:

Cisco Webex is the product that enables video conferencing and communication. It is designed to provide a conferencing experience that rivals in-person collaboration, with features such as real-time translations, meeting recordings, and a secure platform for remote work. Webex offers an all-in-one app to call, meet, message, and get work done, supporting a hybrid work environment with enterprise-grade security.

NEW QUESTION 6

What must a hybrid SMB technology solution have?

- A. zero trust identity-based access
- B. specific desk for each employee when they visit the office
- C. single vendor collaboration infrastructure
- D. separate security policy for wired and wireless users

Answer: A

Explanation:

A hybrid SMB technology solution must prioritize security, especially in a landscape where remote work is prevalent. Zero trust identity-based access is a security model that requires all users, whether inside or outside the organization's network, to be authenticated, authorized, and continuously validated for security configuration and posture before being granted or keeping access to applications and data. This approach aligns with the modern needs of SMBs to provide secure access to their resources in a hybrid environment, where users are accessing systems both on-premises and remotely. It ensures that only authenticated and authorized users and devices can access applications and data, thereby reducing the attack surface and providing a more secure IT environment.

NEW QUESTION 7

Which percentage of consumers consider a company's purpose when making a purchase decision?

- A. 50%
- B. 66%
- C. 75%
- D. 80%

Answer: D

NEW QUESTION 8

Which global demo engineering platform provides customers, partners, and Cisco employees with demos around Experience Cisco Solutions?

- A. Product Pulse
- B. dCloud
- C. Cisco U
- D. NetAcad

Answer: B

Explanation:

Explanation

Cisco dCloud is a comprehensive demo engineering platform that provides customers, partners, and Cisco employees with the ability to experience Cisco solutions. It offers an extensive catalog of demos, training, and sandboxes for every Cisco architecture. Users can explore how Cisco products and technologies can support their business and technical needs through a variety of demo formats, including expert-led, zero-commitment demos. References :=

NEW QUESTION 9

Which Cisco product is part of the Secure SMB experience for enabling people?

- A. Umbrella
- B. Meraki MX
- C. Stealth watch
- D. Cisco Secure Email

Answer: A

Explanation:

Explanation

Cisco Umbrella is a crucial component of the Secure SMB experience, particularly in enabling people within an organization to work safely, regardless of their location. Umbrella provides a cloud-delivered security service that protects users from malicious internet destinations whether they are on or off the network. It operates by enforcing security at the DNS layer, which is the first step in internet connectivity. Umbrella's strength lies in its ability to block requests to malicious destinations before a connection is even established, offering proactive security that is both effective and easy to deploy. For SMBs, this means enhanced protection against threats like malware, phishing, and ransomware without the complexity of traditional security solutions. By securing internet access across all devices and locations, Umbrella plays a pivotal role in enabling secure and efficient remote work, making it an essential product for the Secure SMB experience.

NEW QUESTION 10

The average number of SaaS application categories used by an SMB is 13. What does this mean for business?

- A. more security vulnerabilities
- B. less data with more contextualization
- C. less system interactions
- D. less distributed applications

Answer: A

Explanation:

Explanation

The average use of 13 SaaS application categories by an SMB indicates a diverse range of software tools utilized in the business operations. This diversity can lead to more security vulnerabilities for several reasons:

- * 1. Increased Attack Surface: Each SaaS application represents a potential entry point for security threats, so more applications mean a larger attack surface.
- * 2. Complexity in Management: Managing security across multiple applications can be complex, increasing the chance of oversight or errors.
- * 3. Integration Challenges: Integrating different SaaS applications can create security gaps, especially if they are not designed to work together seamlessly.
- * 4. Varied Security Standards: Different SaaS providers may have different levels of security measures, and weaker security in one application can compromise the overall security posture.

Businesses must therefore be vigilant in implementing comprehensive security strategies that encompass all the SaaS applications they use.

NEW QUESTION 10

What is Cisco Networking Cloud?

- A. cloud storage for network configurations
- B. cloud storage for holding authentication keys
- C. integrated platform for on-premises and cloud operating models
- D. web-based platform for network engineers to store, track, and collaborate on network projects

Answer: C

Explanation:

Explanation

Cisco Networking Cloud is an integrated platform designed to provide connectivity to and between applications and workloads across various environments, including clouds, cloud services, on-premises data centers, and edge networks. It is crucial for the performance, security, and efficient management of hybrid cloud and multicloud environments. This platform facilitates the simplification of lifecycle management, assures user-experience, reduces time to market for service rollout, lowers operational costs, and minimizes risk for applications and data.
