CompTIA Server+ Certification Exam

<https://www.certleader.com/SK0-005-dumps.html>

NEW QUESTION 1

A technician is unable to access a server's package repository internally or externally. Which of the following are the MOST likely reasons? (Choose two.)

- A. The server has an architecture mismatch
- B. The system time is not synchronized
- C. The technician does not have sufficient privileges
- D. The external firewall is blocking access
- E. The default gateway is incorrect
- F. The local system log file is full

Answer: AB

NEW QUESTION 2

A server administrator is testing a disaster recovery plan. The test involves creating a downtime scenario and taking the necessary steps. Which of the following testing methods is the administrator MOST likely performing?

- A. Backup recovery
- B. Simulated
- C. Tabletop
- D. Live failover

Answer: C

NEW QUESTION 3

A systems administrator needs to configure a new server and external storage for a new production application environment. Based on end-user specifications, the new solution needs to adhere to the following basic requirements:

- * 1. The OS must be installed in a separate disk partition. In case of hard drive failure, it cannot be affected.
- * 2. Application data IOPS performance is a must.
- * 3. Data availability is a high priority, even in the case of multiple hard drive failures.

Which of the following are the BEST options to comply with the user requirements? (Choose three.)

- A. Install the OS on a RAID 0 array.
- B. Install the OS on a RAID 1 array.
- C. Configure RAID 1 for the application data.
- D. Configure RAID 5 for the application data.
- E. Use SSD hard drives for the data application array.
- F. Use SATA hard drives for the data application array.
- G. Use a single JBOD for OS and application data.

Answer: BDE

NEW QUESTION 4

An administrator is configuring a host-based firewall for a server. The server needs to allow SSH, FTP, and LDAP traffic. Which of the following ports must be configured so this traffic will be allowed? (Select THREE).

- A. 21
- B. 22
- C. 53
- D. 67
- E. 69
- F. 110
- G. 123
- H. 389

Answer: D

NEW QUESTION 5

A technician needs to install a Type 1 hypervisor on a server. The server has SD card slots, a SAS controller, and a SATA controller, and it is attached to a NAS. On which of the following drive types should the technician install the hypervisor?

- A. SD card
- B. NAS drive
- C. SATA drive
- D. SAS drive

Answer: C

NEW QUESTION 6

A technician wants to limit disk usage on a server. Which of the following should the technician implement?

- A. Formatting
- B. Compression
- C. Disk quotas
- D. Partitioning

Answer: C

NEW QUESTION 7

A technician is connecting a server's secondary NIC to a separate network. The technician connects the cable to the switch but then does not see any link lights on the NIC. The technician confirms there is nothing wrong on the network or with the physical connection. Which of the following should the technician perform NEXT?

- A. Restart the server
- B. Configure the network on the server
- C. Enable the port on the server
- D. Check the DHCP configuration

Answer: B

NEW QUESTION 8

Which of the following licenses would MOST likely include vendor assistance?

- A. Open-source
- B. Version compatibility
- C. Subscription
- D. Maintenance and support

Answer: C

NEW QUESTION 9

Which of the following would a systems administrator implement to ensure all web traffic is secure?

- A. SSH
- B. SSL
- C. SMTP
- D. PGP

Answer: B

Explanation:

Secure Sockets Layer (SSL): SSL and its successor Transport Layer Security (TLS) enable client and server computers to establish a secure connection session and manage encryption and decryption activities.

NEW QUESTION 10

A server administrator must respond to tickets within a certain amount of time. The server administrator needs to adhere to the:

- A. BIA.
- B. RTO.
- C. MTTR.
- D. SLA.

Answer: D

NEW QUESTION 10

A technician is working on a Linux server. The customer has reported that files in the home directory are missing. The /etc/fstab file has the following entry:

```
nfserver:/home /home nfs defaults 0 0
```

However, a `df -h /home` command returns the following information:

```
/dev/sda2 10G 1G 9G 10% /home
```

Which of the following should the technician attempt FIRST to resolve the issue?

- A. `mkdir /home`
- B. `umount nfserver:/home`
- C. `rmdir nfserver:/home/dev/sda2`
- D. `mount /home`

Answer: B

NEW QUESTION 12

An administrator is troubleshooting a RAID issue in a failed server. The server reported a drive failure, and then it crashed and would no longer boot. There are two arrays on the failed server: a two-drive RAID 0 set for the OS, and an eight-drive RAID 10 set for data. Which of the following failure scenarios MOST likely occurred?

- A. A drive failed in the OS array.
- B. A drive failed and then recovered in the data array.
- C. A drive failed in both of the arrays.
- D. A drive failed in the data array.

Answer: A

NEW QUESTION 13

A server in a remote datacenter is no longer responsive. Which of the following is the BEST solution to investigate this failure?

- A. Remote desktop
- B. Access via a crash cart
- C. Out-of-band management
- D. A Secure Shell connection

Answer: C

NEW QUESTION 16

A technician is deploying a single server to monitor and record me security cameras at a remote site, which of the following architecture types should be used to minimize cost?

- A. Virtual
- B. Blade
- C. Tower
- D. Rack mount

Answer: A

NEW QUESTION 21

Users at a company work with highly sensitive data. The security department implemented an administrative and technical control to enforce least-privilege access assigned to files. However, the security department has discovered unauthorized data exfiltration. Which of the following is the BEST way to protect the data from leaking?

- A. Utilize privacy screens.
- B. Implement disk quotas.
- C. Install a DLP solution.
- D. Enforce the lock-screen feature.

Answer: C

Explanation:

Components of a Data Loss Solution

NEW QUESTION 23

A systems administrator is attempting to connect via RDP to a server that is running Windows. However, the systems administrator cannot connect to the machine via RDP to reboot it and apply updates. Which of the following methods should be used to access the machine and perform a reboot if the server is not physically accessible?

- A. ILO/iDRAC
- B. TCP/IP
- C. SSH/SCP
- D. VNC/VPN

Answer: A

NEW QUESTION 24

Which of the following can be used to map a network drive to a user profile?

- A. System service
- B. Network service
- C. Login script
- D. Kickstart script

Answer: A

NEW QUESTION 26

A system administrator has been alerted to a zero-day vulnerability that is impacting a service enabled on a server OS. Which of the following would work BEST to limit an attacker from exploiting this vulnerability?

- A. Installing the latest patches
- B. Closing open ports
- C. Enabling antivirus protection
- D. Enabling a NIDS

Answer: B

NEW QUESTION 29

A server administrator is exporting Windows system files before patching and saving them to the following location:

\\server1\ITDept\

Which of the following is a storage protocol that the administrator is MOST likely using to save this data?

- A. eSATA
- B. FCoE
- C. CIFS
- D. SAS

Answer:

C

NEW QUESTION 32

A server administrator needs to keep a copy of an important fileshare that can be used to restore the share as quickly as possible. Which of the following is the BEST solution?

- A. Copy the fileshare to an LTO-4 tape drive
- B. Configure a new incremental backup job for the fileshare
- C. Create an additional partition and move a copy of the fileshare
- D. Create a snapshot of the fileshare

Answer: D

NEW QUESTION 36

A technician needs to provide a VM with high availability. Which of the following actions should the technician take to complete this task as efficiently as possible?

- A. Take a snapshot of the original VM
- B. Clone the original VM
- C. Convert the original VM to use dynamic disks
- D. Perform a P2V of the original VM

Answer: A

NEW QUESTION 37

A company is reviewing options for its current disaster recovery plan and potential changes to it. The security team will not allow customer data to egress to non-company equipment, and the company has requested recovery in the shortest possible time. Which of the following will BEST meet these goals?

- A. A warm site
- B. A hot site
- C. Cloud recovery
- D. A cold site

Answer: B

NEW QUESTION 42

A company stores extremely sensitive data on an air-gapped system. Which of the following can be implemented to increase security against a potential insider threat?

- A. Two-person Integrity
- B. SSO
- C. SIEM
- D. Faraday cage
- E. MFA

Answer: E

NEW QUESTION 46

A systems administrator is preparing to install two servers in a single rack. The administrator is concerned that having both servers in one rack will increase the chance of power issues due to the increased load. Which of the following should the administrator implement FIRST to address the issue?

- A. Separate circuits
- B. An uninterruptible power supply
- C. Increased PDU capacity
- D. Redundant power supplies

Answer: C

NEW QUESTION 48

Which of the following BEST describes the concept of right to downgrade?

- A. It allows for the return of a new OS license if the newer OS is not compatible with the currently installed software and is returning to the previously used OS
- B. It allows a server to run on fewer resources than what is outlined in the minimum requirements document without purchasing a license
- C. It allows for a previous version of an OS to be deployed in a test environment for each current license that is purchased
- D. It allows a previous version of an OS to be installed and covered by the same license as the newer version

Answer: B

NEW QUESTION 53

A DHCP server is configured to issue IP addresses. Client machines have successfully obtained an IP address. However, when testing, users are unable to browse the Internet. Which of the following might be the MOST likely cause?

- A. The DHCP server is unable to communicate with the DNS server.
- B. DNS configuration on the DHCP server is missing.
- C. The client machines are not members of the domain.
- D. The DHCP server ran out of IP addresses.

Answer: B

NEW QUESTION 57

Users cannot access a new server by name, but the server does respond to a ping request using its IP address. All the user workstations receive their IP information from a DHCP server. Which of the following would be the best step to perform NEXT?

- A. Run the tracert command from a workstation.
- B. Examine the DNS to see if the new server record exists.
- C. Correct the missing DHCP scope.
- D. Update the workstation hosts file.

Answer: B

NEW QUESTION 62

Network connectivity to a server was lost when it was pulled from the rack during maintenance. Which of the following should the server administrator use to prevent this situation in the future?

- A. Cable management
- B. Rail kits
- C. A wireless connection
- D. A power distribution unit

Answer: A

NEW QUESTION 67

A technician has received multiple reports of issues with a server. The server occasionally has a BSOD, powers off unexpectedly, and has fans that run continuously. Which of the following BEST represents what the technician should investigate during troubleshooting?

- A. Firmware incompatibility
- B. CPU overheating
- C. LED indicators
- D. ESD issues

Answer: B

Explanation:

Unexpected shutdowns. If the system is randomly shutting down or rebooting, the most likely cause is a heat problem.

NEW QUESTION 69

Which of the following can be BEST described as the amount of time a company can afford to be down during recovery from an outage?

- A. SLA
- B. MTBF
- C. RTO
- D. MTTR

Answer: C

NEW QUESTION 71

A company is building a new datacenter next to a busy parking lot. Which of the following is the BEST strategy to ensure wayward vehicle traffic does not interfere with datacenter operations?

- A. Install security cameras
- B. Utilize security guards
- C. Install bollards
- D. Install a mantrap

Answer: C

NEW QUESTION 75

Which of the following describes the installation of an OS contained entirely within another OS installation?

- A. Host
- B. Bridge
- C. Hypervisor
- D. Guest

Answer: D

NEW QUESTION 79

A server administrator is configuring a new server that will hold large amounts of information. The server will need to be accessed by multiple users at the same time. Which of the following server roles will the administrator MOST likely need to install?

- A. Messaging
- B. Application

- C. Print
- D. Database

Answer: D

Explanation:

Few people are expected to use the database at the same time and users don't need to customize the design of the database.

NEW QUESTION 82

Which of the following technologies would allow an administrator to build a software RAID on a Windows server?

- A. Logical volume management
- B. Dynamic disk
- C. GPT
- D. UEFI

Answer: B

NEW QUESTION 86

A server administrator is installing a new server that uses 40G0 network connectivity. The administrator needs to find the proper cables to connect the server to the switch. Which of the following connectors should the administrator use?

- A. SFP+
- B. GBIC
- C. SFP
- D. QSFP+

Answer: A

NEW QUESTION 90

After configuring IP networking on a newly commissioned server, a server administrator installs a straight-through network cable from the patch panel to the switch. The administrator then returns to the server to test network connectivity using the ping command. The partial output of the ping and ipconfig commands are displayed below:

```
ipconfig/all
```

```
IPv4 address: 192.168.1.5  
Subnet mask: 255.255.255.0  
Default gateway: 192.168.1.2
```

```
Pinging 192.168.1.2 with 32 bytes of data:
```

```
Reply from 192.168.1.2: Request timed out  
Reply from 192.168.1.2: Request timed out  
Reply from 192.168.1.2: Request timed out  
Reply from 192.168.1.2: Request timed out
```

The administrator returns to the switch and notices an amber link light on the port where the server is connected. Which of the following is the MOST likely reason for the lack of network connectivity?

- A. Network port security
- B. An improper VLAN configuration
- C. A misconfigured DHCP server
- D. A misconfigured NIC on the server

Answer: D

NEW QUESTION 93

A technician recently upgraded several pieces of firmware on a server. Ever since the technician rebooted the server, it no longer communicates with the network. Which of the following should the technician do FIRST to return the server to service as soon as possible?

- A. Replace the NIC
- B. Make sure the NIC is on the HCL
- C. Reseat the NIC
- D. Downgrade the NIC firmware

Answer: D

NEW QUESTION 97

A server administrator has been creating new VMs one by one. The administrator notices the system requirements are very similar, even with different applications. Which of the following would help the administrator accomplish this task in the SHORTEST amount of time and meet the system requirements?

- A. Snapshot
- B. Deduplication
- C. System Restore

D. Template

Answer: D

NEW QUESTION 99

An administrator has attached an old SCSI JBOD to a server to recover archival data. However, the array will not mount to the server. Which of the following should the administrator check FIRST?

- A. Terminators are installed on the controller card and the array.
- B. Disk drivers are not installed on the server.
- C. SCSI BIOS needs to be updates.
- D. Terminators are installed on each hard drive.

Answer: B

NEW QUESTION 104

A systems administrator is investigating a server with a RAID array that will not boot into the OS. The administrator notices all the hard drives are reporting to be offline. The administrator checks the RAID controller and verifies the configuration is correct. The administrator then replaces one of the drives with a known-good drive, but it appears to be unavailable as well. Next, the administrator takes a drive out of the server and places it in a spare server, and the drive is available and functional. Which of the following is MOST likely causing the issue?

- A. The kernel is corrupt.
- B. Resources are misallocated.
- C. The backplane has failed.
- D. The drives need to be reseated.

Answer: D

NEW QUESTION 108

Winch of the following is a type of replication in which all files are replicated, all the time?

- A. Constant
- B. Application consistent
- C. Synthetic full
- D. Full

Answer: A

NEW QUESTION 111

A server administrator mounted a new hard disk on a Linux system with a mount point of /newdisk. It was later determined that users were unable to create directories or files on the new mount point. Which of the following commands would successfully mount the drive with the required parameters?

- A. echo /newdisk >> /etc/fstab
- B. net use /newdisk
- C. mount -o remount, rw /newdisk
- D. mount -a

Answer: C

NEW QUESTION 114

A technician is attempting to reboot a remote physical Linux server. However, attempts to command a shutdown ----now result in the loss of the SSH connection. The server still responds to pings. Which of the following should the technician use to command a remote shutdown?

- A. virtual serial console
- B. A KVM
- C. An IDRAC
- D. A crash cart

Answer: B

NEW QUESTION 115

A server technician is deploying a server with eight hard drives. The server specifications call for a RAID configuration that can handle up to two drive failures but also allow for the least amount of drive space lost to RAID overhead. Which of the following RAID levels should the technician configure for this drive array?

- A. RAID 0
- B. RAID 5
- C. RAID 6
- D. RAID 10

Answer: C

NEW QUESTION 118

A server administrator receives a report that Ann, a new user, is unable to save a file to her home directory on a server. The administrator checks Ann's home directory permissions and discovers the following:

dr-xr-xr-- /home/Ann

Which of the following commands should the administrator use to resolve the issue without granting unnecessary permissions?

- A. `chmod777/home/Ann`
- B. `chmod666/home/Ann`
- C. `chmod711/home/Ann`
- D. `chmod754/home/Ann`

Answer: D

NEW QUESTION 122

A server is performing slowly, and users are reporting issues connecting to the application on that server. Upon investigation, the server administrator notices several unauthorized services running on that server that are successfully communicating to an external site. Which of the following are MOST likely causing the issue?

(Choose two.)

- A. Adware is installed on the users' devices
- B. The firewall rule for the server is misconfigured
- C. The server is infected with a virus
- D. Intrusion detection is enabled on the network
- E. Unnecessary services are disabled on the server
- F. SELinux is enabled on the server

Answer: AC

NEW QUESTION 126

Hosting data in different regional locations but not moving it for long periods of time describes:

- A. a cold site.
- B. data at rest.
- C. on-site retention.
- D. off-site storage.

Answer: A

NEW QUESTION 130

Which of the following would be BEST to help protect an organization against social engineering?

- A. More complex passwords
- B. Recurring training and support
- C. Single sign-on
- D. An updated code of conduct to enforce social media

Answer: D

NEW QUESTION 135

A datacenter in a remote location lost power. The power has since been restored, but one of the servers has not come back online. After some investigation, the server is found to still be powered off. Which of the following is the BEST method to power on the server remotely?

- A. Crash cart
- B. Out-of-band console
- C. IP KVM
- D. RDP

Answer: B

NEW QUESTION 140

A server room with many racks of servers is managed remotely with occasional on-site support. Which of the following would be the MOST cost-effective option to administer and troubleshoot network problems locally on the servers?

- A. Management port
- B. Crash cart
- C. IP KVM
- D. KVM

Answer: C

NEW QUESTION 142

A technician is attempting to update a server's firmware. After inserting the media for the firmware and restarting the server, the machine starts normally into the OS. Which of the following should the technician do NEXT to install the firmware?

- A. Press F8 to enter safe mode
- B. Boot from the media
- C. Enable HIDS on the server
- D. Log in with an administrative account

Answer: B

NEW QUESTION 144

Which of the following policies would be BEST to deter a brute-force login attack?

- A. Password complexity
- B. Password reuse
- C. Account age threshold
- D. Account lockout threshold

Answer: D

NEW QUESTION 147

Which of the following DR testing scenarios is described as verbally walking through each step of the DR plan in the context of a meeting?

- A. Live failover
- B. Simulated failover
- C. Asynchronous
- D. Tabletop

Answer: A

NEW QUESTION 150

Which of the following backup types only records changes to the data blocks on a virtual machine?

- A. Differential
- B. Snapshot
- C. Incremental
- D. Synthetic full

Answer: C

NEW QUESTION 154

Users are experiencing issues when trying to access resources on multiple servers. The servers are virtual and run on an ESX server. A systems administrator is investigating but is unable to connect to any of the virtual servers. When the administrator connects to the host, a purple screen with white letters appears. Which of the following troubleshooting steps should the administrator perform FIRST?

- A. Check the power supplies
- B. Review the log files.
- C. Reinstall the ESX server.
- D. Reseat the processors.

Answer: B

NEW QUESTION 158

Which of the following server types would benefit MOST from the use of a load balancer?

- A. DNS server
- B. File server
- C. DHCP server
- D. Web server

Answer: D

NEW QUESTION 159

An administrator is configuring a server to communicate with a new storage array. To do so, the administrator enters the WWPN of the new array in the server's storage configuration. Which of the following technologies is the new connection using?

- A. iSCSI
- B. eSATA
- C. NFS
- D. FcoE

Answer: A

NEW QUESTION 164

A server administrator needs to create a new folder on a file server that only specific users can access. Which of the following BEST describes how the server administrator can accomplish this task?

- A. Create a group that includes all users and assign it to an ACL.
- B. Assign individual permissions on the folder to each user.
- C. Create a group that includes all users and assign the proper permissions.
- D. Assign ownership on the folder for each user.

Answer: C

Explanation:

The top portion of the dialog box lists the users and/or groups that have access to the file or folder.

NEW QUESTION 169

Which of the following is the MOST appropriate scripting language to use for a logon script for a Linux box?

- A. VBS
- B. Shell
- C. Java
- D. PowerShell
- E. Batch

Answer: A

NEW QUESTION 174

Which of the following actions should a server administrator take once a new backup scheme has been configured?

- A. Overwrite the backups
- B. Clone the configuration
- C. Run a restore test
- D. Check the media integrity

Answer: C

NEW QUESTION 177

Which of the following are measures that should be taken when a data breach occurs? (Select TWO).

- A. Restore the data from backup.
- B. Disclose the incident.
- C. Disable unnecessary ports.
- D. Run an antivirus scan.
- E. Identify the exploited vulnerability.
- F. Move the data to a different location.

Answer: AE

NEW QUESTION 181

Which of the following tools will analyze network logs in real time to report on suspicious log events?

- A. Syslog
- B. DLP
- C. SIEM
- D. HIPS

Answer: C

NEW QUESTION 185

Which of the following is typical of software licensing in the cloud?

- A. Per socket
- B. Perpetual
- C. Subscription-based
- D. Site-based

Answer: C

NEW QUESTION 189

A company wants to deploy software to all users, but very few of them will be using the software at any one point in time. Which of the following licensing models would be BEST for the company?

- A. Per site
- B. Per concurrent user
- C. Per core
- D. Per instance

Answer: B

NEW QUESTION 190

A technician is configuring a server that requires secure remote access. Which of the following ports should the technician use?

- A. 21
- B. 22
- C. 23
- D. 443

Answer: D

NEW QUESTION 192

A technician is checking a server rack. Upon entering the room, the technician notices the fans on a particular server in the rack are running at high speeds. This is the only server in the rack that is experiencing this behavior. The ambient temperature in the room appears to be normal. Which of the following is the MOST likely reason why the fans in that server are operating at full speed?

- A. The server is in the process of shutting down, so fan speed operations have been defaulted to high.
- B. An incorrect fan size was inserted into the server, and the server has had to increase the fan speed to compensate.
- C. A fan failure has occurred, and the other fans have increased speed to compensate.
- D. The server is utilizing more memory than the other servers, so it has increased the fans to compensate.

Answer: B

NEW QUESTION 197

A server administrator is completing an OS installation for a new server. The administrator patches the server with the latest vendor-suggested software, configures DHCP, and verifies all network cables are properly connected in the IDF, but there is no network connectivity. Which of the following is the MOST likely reason for the lack of connectivity?

- A. The VLAN is improperly configured.
- B. The DNS configuration is invalid.
- C. The OS version is not compatible with the network switch vendor.
- D. The HIDS is preventing the connection.

Answer: A

NEW QUESTION 198

A server administrator is installing an OS on a new server. Company policy states no one is to log in directly to the server. Which of the following installation methods is BEST suited to meet the company policy?

- A. GUI
- B. Core
- C. Virtualized
- D. Clone

Answer: C

NEW QUESTION 199

Which of the following is the BEST action to perform before applying patches to one of the hosts in a high availability cluster?

- A. Disable the heartbeat network.
- B. Fallback cluster services.
- C. Set the cluster to active-active.
- D. Failover all VMs.

Answer: B

NEW QUESTION 202

A technician is connecting a Linux server to a share on a NAS. Which of the following is the MOST appropriate native protocol to use for this task?

- A. CIFS
- B. FTP
- C. SFTP
- D. NFS

Answer: A

NEW QUESTION 204

Which of the following encryption methodologies would MOST likely be used to ensure encrypted data cannot be retrieved if a device is stolen?

- A. End-to-end encryption
- B. Encryption in transit
- C. Encryption at rest
- D. Public key encryption

Answer: C

NEW QUESTION 205

A USB drive has been purchased to move files between Windows, *nix, and Macintosh servers. Which of the following filesystems is the BEST choice to ensure the drive can read and be written to by all of the servers?

- A. ext2
- B. FAT32
- C. NTFS
- D. UFS

Answer: B

NEW QUESTION 209

Which of the following techniques can be configured on a server for network redundancy?

- A. Clustering
- B. Vitalizing
- C. Cloning
- D. Teaming

Answer: D

NEW QUESTION 214

Users have noticed a server is performing below Baseline expectations. While diagnosing the server, an administrator discovers disk drive performance has degraded. The administrator checks the diagnostics on the RAID controller and sees the battery on the controller has gone bad. Which of the following is causing the poor performance on the RAID array?

- A. The controller has disabled the write cache.
- B. The controller cannot use all the available channels.
- C. The drive array is corrupt.
- D. The controller has lost its configuration.

Answer: A

NEW QUESTION 219

A systems administrator is performing maintenance on 12 Windows servers that are in different racks at a large datacenter. Which of the following would allow the administrator to perform maintenance on all 12 servers without having to physically be at each server? (Choose two.)

- A. Remote desktop
- B. IP KVM
- C. A console connection
- D. A virtual administration console
- E. Remote drive access
- F. A crash cart

Answer: AB

NEW QUESTION 224
