

# Microsoft

## Exam Questions PL-600

Microsoft Power Platform Solution Architect

NEW QUESTION 1

DRAG DROP - (Topic 1)

You need to recommend solutions to meet the organization's communication needs.

What should you recommend? To answer, drag the appropriate technologies to the correct groups of users. Each technology may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Technologies	Group of users	Technology
Microsoft Teams	First Up employees	
Power Apps portals	Workers	
Microsoft 365 Business Voice		

Answer:

Technologies	Group of users	Technology
Microsoft Teams	First Up employees	Microsoft Teams
Power Apps portals	Workers	Microsoft 365 Business Voice
Microsoft 365 Business Voice		

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Microsoft Teams

First up employees must be able to contact each other by using a secure system to ask and answer questions about medical cases.

Microsoft Teams key capabilities:

- ? Connected
- ? Secure
- ? Managed

? Collaborative and productive Box 2: Microsoft 365 Business Voice

Workers must be able to communicate in near real-time with worker support agents.

Microsoft 365 Business Voice makes it easy for small and medium organizations to turn Microsoft Teams into a powerful and flexible telephone system. It's a replacement for

traditional telephony providers and in-house phone systems that can be difficult and costly to manage.

NEW QUESTION 2

DRAG DROP - (Topic 1)

You need to recommend the appropriate messaging channel solutions for the organization. What should you recommend? To answer, drag the appropriate messaging options to the correct user types. Each messaging option may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. NOTE: Each correct selection is worth one point.

Messaging options	User type	Messaging option
Power Apps portals	Worker support agents	
Dynamics 365 Customer Service	Patients	
Omnichannel for Customer Service dashboard		

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Omnichannel for Customer Service dashboard  
Scenario: Workers must be able to communicate in near real-time with worker support agents. The company has a team or worker support agents that respond to inquiries from current and prospective workers. Some of the worker support agents are multilingual. If you choose to expand your customer service offering to provide chat and channels, the Customer Service workspace seamlessly adjusts to support managing conversations as well. Note: As an agent with the Customer Service Representative security role, when you open Customer Service workspace, you start on the Customer Service Agent Dashboard unless your administrator has changed the default view. This dashboard shows you your active cases, cases you can work in queues you are assigned to, and your open activities. You can open existing cases and activities or begin working new cases from the queues you are assigned to and create activities. Box 2: Dynamics 365 Customer Service  
Scenario: First Up uses an on-premises system to manage current and historical patient data including medications and medical visits.

NEW QUESTION 3

HOTSPOT - (Topic 1)

You need to design tables for the solution.

What should you recommend? To answer, select the appropriate options in the answer area.  
NOTE: Each correct selection is worth one point.

Data type	Technical solution
Job placement record	<div><div></div><div>Custom table</div><div>Activity table</div><div>Virtual table</div></div>
Security clearance record	<div><div></div><div>Lookup (N:1)</div><div>Choice</div><div>Lookup (N:N)</div></div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Virtual Table  
A virtual table is a custom table in Microsoft Dataverse that has columns containing data from an external data source. Virtual tables appear in your app to users as regular table rows, but contain data that is sourced from an external database, such as an Azure SQL Database. Rows based on virtual tables are available in

all clients including custom clients developed using the Dataverse web services.

Scenario:

- ? First Up uses an on-premises system to manage current and historical patient data including medications and medical visits.
- ? The company plans to reference historical data in the existing system. The records held in these systems will not be migrated to the new solution except for medication information.
- ? The solution must provide a worker appointment booking system that can access worker historical job placement data.
- ? First Up staff members must be able to view and update worker records. They must be able to see current and historical job placement data on the same form in the new solution.

Box 2: Lookup (N:1)

Each worker can have many security clearances, so need a 1:N relationship.

Scenario: The solution must support tracking of security clearance information for a worker including the date, status, and certifying agency.

**NEW QUESTION 4**

HOTSPOT - (Topic 2)

You need to recommend tools for agents and management.

Which tools should you recommend? To answer, select the appropriate option in the answer area.

NOTE: Each correct selection is worth one point.

User type	Tool
Agent	<div><div></div><div>Power BI</div><div>Dashboard</div><div>Microsoft Power Automate</div><div>Microsoft Power Apps</div></div>
Management	<div><div></div><div>Power BI</div><div>Microsoft Power Apps</div><div>Microsoft AppSource</div><div>Microsoft Power Automate</div></div>

Answer:

User type	Tool
Agent	<div><div></div><div><div>Power BI</div><div>Dashboard</div><div>Microsoft Power Automate</div><div>Microsoft Power Apps</div></div></div>
Management	<div><div></div><div><div>Power BI</div><div>Microsoft Power Apps</div><div>Microsoft AppSource</div><div>Microsoft Power Automate</div></div></div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Dashboard  
Agents need dashboards to show a current count of all reservations on the entity.  
Box 2: Power BI  
Management requires paginated reports for stakeholders.

NEW QUESTION 5

- (Topic 2)  
You need to recommend the field type to use for configuring meal selections during reservation.  
Which field type should you recommend?

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Scenario:  
? Customers can select a meal when they make a reservation and can save the meal choices as a customer preference.  
? The company offers two types of meals: standard and vegetarian. Meal types can be temporarily unavailable. The airline is considering offering other meal types, such as gluten-free and low-sodium options.  
In PowerApps Option set is one of the field types you can use in your Entity. The information type that Option Set stores is a list of text values. And here comes the Option Set advantage – once you define its text values you can centrally managed it.  
Example:

Country Name

Poland

USA

England

India

Reference:  
<https://michalguzowski.pl/how-to-work-with-option-set-in-powerapps/>

NEW QUESTION 6

DRAG DROP - (Topic 2)  
You need to recommend a solution for integrating luggage information.  
What should you recommend? To answer, drag the appropriate types to the correct tables. Each type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Types	Table	Type
<div>Custom table</div>	Luggage	<div></div>
<div>Virtual table</div>	Passenger	<div></div>
<div>Activity table</div>		
<div>Custom activity table</div>		

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Luggage: Custom activity table

An activity can be thought of as any action for which an entry can be made on a calendar. An activity has time dimensions (start time, stop time, due date, and duration) that help determine when the action occurred or will occur. Activities also contain data that helps determine what action the activity represents, for example, subject and description.

Passenger: Customer table

The account and contact tables in Microsoft Dataverse are essential for identifying and managing customers, selling products and services, and providing superior service to the customers. A customer address table is used to store address and shipping information for a customer.

Scenario: The company has a custom app for managing and tracking passenger luggage. The app uses Microsoft Dataverse. Agents need to view which pieces of luggage match to each passenger, and then need to add the total on the passenger record.

NEW QUESTION 7

- (Topic 2)  
You need to provide the IT specialists with design diagrams. What should you provide?

- A. Business process modeler (BPM) B AI Builder
- B. Entity relationship diagram (ERD)
- C. Dynamics 365 Product Visualize

Answer: A

**Explanation:**  
Scenario: IT specialists want to design Power BI reports. They need to understand the underlying table relationships of the system.  
Business process modeler (BPM) in Microsoft Dynamics Lifecycle Services (LCS) is a tool that you can use to create, view, and modify repeatable implementations that are based on business process libraries. BPM helps you align your business processes with industry- standard processes that are described by the American Productivity & Quality Center

(APQC)

Reference:  
<https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/lifecycle- services/bpm-overview>

NEW QUESTION 8

HOTSPOT - (Topic 2)  
You need to recommend a collaboration tool for each group.  
Which tool should you use? To answer, select the appropriate tool in the answer area.  
NOTE: Each correct selection is worth one point.

Group	Tool
Maintenance supervisors	<div><div></div><div>Microsoft Teams</div><div>Notes</div><div>Power Apps portal</div><div>Posts</div></div>
Aircraft maintenance vendors	<div><div></div><div>Dynamics 365 Workspace</div><div>Notes</div><div>Power Apps portal</div><div>Posts</div></div>

- A. Mastered
- B. Not Mastered

Answer: A

**Explanation:**  
Box 1: Microsoft Teams  
Maintenance supervisors must not have access to Dynamics 365 Customer Service. The supervisors must be able to communicate with the contracts team about contracts.  
Box 2: Dynamics 365 Workspace

Aircraft maintenance vendors must have only view and upload privileges to their invoices and receipts.  
The Expense management mobile workspace lets users capture and upload a receipt, so that they can attach it to an expense report later.

NEW QUESTION 9

HOTSPOT - (Topic 3)

You need to recommend solutions to meet the inspection requirements.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Solution
View, assign, and resolve inspection bottlenecks.	<div><div></div><div>Booking rules</div><div>Schedule board</div><div>Proficiency models</div></div>
Automatically input measurement readings from inspection gauges	<div><div></div><div>Custom connector</div><div>Azure IoT Hub connector</div><div>Azure IoT Central connector</div><div>Microsoft Dataverse connector</div></div>

Answer:

Requirement	Solution
View, assign, and resolve inspection bottlenecks.	<div><div></div><div>Booking rules</div><div>Schedule board</div><div>Proficiency models</div></div>
Automatically input measurement readings from inspection gauges	<div><div></div><div>Custom connector</div><div>Azure IoT Hub connector</div><div>Azure IoT Central connector</div><div>Microsoft Dataverse connector</div></div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Schedule board

The Dynamics 365 Field Service schedule board provides an overview of resource availability and bookings you can make.

Box 2: Azure IoT Central connector

Information about each machine produced must be transferred to Dynamics 365 Field Service.

The difference between IoT hub and IoT central is that IoT is an application platform that simplifies the creation of Internet of Things solutions. IoT central helps to reduce the challenges of implementing IoT development, operations, and management. IoT Central is a fully managed Software as a Service solution.

Note: There are three ways you can use to connect IoT-enabled devices into the Field Service solution:

? Connected Field Service for Azure IoT Central

? Connected Field Service for Azure IoT Hub

? Connected Field Service for non-Azure IoT providers using the extensible IoT provider framework

NEW QUESTION 10

- (Topic 3)

You need to recommend a solution to collect the information required to meet reporting requirements.

What should you recommend?

- A. Business process flow
- B. Business rule
- C. Business event
- D. Business process modeler

Answer: A

**Explanation:**

Business rule can create business recommendations based on business intelligence. Scenario: Analytics and reporting

The solution must:

? Provide metrics including existing and upcoming demand by inspection station, average time spent per user at a station, and average time a machine spends at each inspection point.

? Provide metrics per inspector including number of inspections performed by month, and number of inspections per rating type (pass, fail).

? Provide a printed quality certificate to be included with each machine.

Reference:

<https://docs.microsoft.com/en-us/learn/modules/define-create-business-rules/>

**NEW QUESTION 10**

HOTSPOT - (Topic 3)

You need to recommend the appropriate components to meet the inspection requirements.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Solution
Prevent editing of finalized inspection orders.	<div> <div>▼</div> <div>Business rule</div> <div>Security role</div> <div>User permission</div> </div>
Prepare documentation for failed inspection steps.	<div> <div>▼</div> <div>Data flow</div> <div>Business rule</div> <div>Form property</div> </div>

- A. Mastered
- B. Not Mastered

**Answer: A**

**Explanation:**

Box 1: Security role

Microsoft Dataverse uses a role-based security model to help secure access to the database.

Scenario:

? You must prevent users from changing inspection order data once an inspection is marked as final.

? Supervisors must be able to modify standard checklists. Other employees must be prevented from modifying checklists.

Box 2: Data flow

Dataflows are a self-service, cloud-based, data preparation technology. Dataflows enable customers to ingest, transform, and load data into Microsoft Dataverse environments, Power BI workspaces, or your organization's Azure Data Lake Storage account.

Scenario: Provide a visual representation of the testing measurement limits for each step. Include an indication of how the measured value compares to measurement limits and whether the measurement is within tolerance. Users must be able to configure the visualizations to display the minimum value and maximum value, and whether the reading is within the tolerance of a single targeted value. It must also be able to be used for maintenance inspections once the machine has been installed.

**NEW QUESTION 15**

- (Topic 4)

A large company experiences high staff turnover rates. As a result, the company must add or remove multiple system user accounts daily.

You need to recommend a security concept which will facilitate complex security profiles to entities for large groups of users across the

Power Apps and Dynamics 365 applications.

What should you recommend?

- A. Hierarchy security
- B. Field-level security
- C. User access management
- D. Team privileges

**Answer: D**

**Explanation:**

User and team management is the area of Microsoft Dataverse where you can create and maintain user accounts and profiles.

A user is any person who works for a business unit who uses Dataverse. Each user has a user account.

A team is a group of users. Teams let users across an organization collaborate and share information.

Note: Why use Dataverse?

Easy to secure – Data is securely stored so that users can see it only if you grant them access. Role-based security allows you to control access to tables for different users within your organization.

Data from your Dynamics 365 applications is also stored within Dataverse, allowing you to quickly build apps that use your Dynamics 365 data and extend your apps with Power Apps. Reference:

<https://docs.microsoft.com/en-us/powerapps/developer/data-platform/user-team-entities> <https://docs.microsoft.com/en-us/powerapps/maker/data-platform/data->

platform-intro

NEW QUESTION 16

- (Topic 4)

A company has a Power Platform environment that connects to a third-party marketing application.

The company reports that the data in the Power Platform lead table does not match data from the marketing application. Issues include:

- ? The owner data in the lead table and the third-party application do not match.
- ? The Topic column has more information than the related record from the marketing application.
- ? There are differences in how telephone numbers are formatted.
- ? You need to determine which processes are causing the issues.

Which three processes may be causing the differences observed? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Dataflow
- B. Business rule
- C. Classic workflow
- D. Power Automate cloud flow
- E. Duplicate detection rule

Answer: ABC

Explanation:

A: With advanced data preparation available in Power Apps, you can create a collection of data called a dataflow, which you can then use to connect with business data from various sources, clean the data, transform it, and then load it to Microsoft Dataverse or your organization's Azure Data Lake Gen2 storage account.

B: By combining conditions and actions, you can do any of the following with business rules:

- ? Set column values
- ? Clear column values
- ? Set column requirement levels
- ? Show or hide columns
- ? Enable or disable columns
- ? Validate data and show error messages
- ? Create business recommendations based on business intelligence.

C: Duplicate detection works by comparing generated match codes of existing records with each new record being created. These match codes are created as each new record is created. Therefore, there is potential for one or more duplicate records to be created if they are processed at the exact same moment. In addition to detecting duplicates as they are created, you should schedule duplicate detection jobs to check for other potential duplicate records.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/data-platform/data-platform-create-business-rule>

<https://docs.microsoft.com/en-us/powerapps/maker/data-platform/create-and-use-dataflows> <https://docs.microsoft.com/en-us/powerapps/developer/data-platform/duplicaterule-entities>

NEW QUESTION 17

HOTSPOT - (Topic 4)

You are implementing a Microsoft Power Platform solution for a customer to include data migration from multiple legacy systems. The data includes lead and contact data. The environment includes an assigned security group.

The following issues have occurred during a go-live deployment attempt:

- Lookup values are not populated when data migration is complete.
- Data is being added to the contacts table that is not part of the data migration.
- Various users do not appear in the list of users available for record assignment. You need to resolve the go-live deployment issues.

How should you resolve the issue? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Issue	Solution
Lookup values are not populated when data migration is complete.	<div><div>Split the import data into smaller import batches.</div><div>Import the data by using an application user.</div><div>Split the import data into smaller import batches.</div><div>Disable all Power Automate flows, plug-ins, and workflows.</div><div>Run data migration in a specific order.</div></div>
Data is being added to the contacts table that is not part of the data migration.	<div><div>Disable all Power Automate flows, plug-ins, and workflows.</div><div>Disable auditing.</div><div>Import the data by using an application user.</div><div>Disable all Power Automate flows, plug-ins, and workflows.</div><div>Split the import data into smaller import batches.</div></div>
Various users do not appear in the list of users available for record assignment.	<div><div>Add to a security group.</div><div>Add to a security group.</div><div>Add a security role.</div><div>Add a Microsoft 365 role.</div><div>Add a field security profile.</div></div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 20

- (Topic 4)

You are designing a Microsoft Power Platform solution for an automobile parts manufacturer. You create the following tables:

Table	Comments
Assemblies	For each assembly record, there will be one or more rows in the Parts table. When the ownership for an assembly record changes, the related parts records must be updated.
Parts	Rows in the Parts table must not be deleted when an assembly is deleted.

You need to recommend a relationship behavior. Which relationship behavior should you recommend?

- A. Referential, Restrict Delete
- B. Custom
- C. Parental
- D. Referential, Remove Link

**Answer:** A

**Explanation:**

Restrict Delete: Prevent the Referenced table record from being deleted when referencing tables exist.

Reference:

<https://docs.microsoft.com/en-us/powerapps/developer/data-platform/configure-entity-relationship-cascading-behavior>

### NEW QUESTION 23

- (Topic 4)

You are designing a self-service portal for a company. The portal must meet the following requirements:

? Customers must be able to submit and review cases.

? Customers must be able to chat with service representatives in near real time.

? Allow service representatives to select cases from queues and use knowledge articles to resolve customer concerns.

You need to recommend solutions for the company that do not require custom development.

Which three apps or services should you recommend? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Dynamics 365 Field Service
- B. Dynamics 365 Customer Service
- C. Omnichannel for Customer Service
- D. Customer Insights
- E. Customer self-service portal

**Answer:** BCE

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/portals/portal-templates>

<https://docs.microsoft.com/en-us/dynamics365/customer-service/embed-chat-widget-portal>

### NEW QUESTION 25

- (Topic 4)

You are designing a new Microsoft Power Platform solution for a wedding organizer company.

The company uses a third-party application and plans to migrate the data into Microsoft Dataverse for the new solution. The third-party application has an API that can be connected to programmatically for data migration purposes.

You need to migrate the unique IDs belonging to the records from the third-party application.

Which two Microsoft Dataverse column types should you use to store this information? Each correct answer presents a complete solution.

- A. Text Area
- B. Unique Identifier
- C. Plain Text
- D. Rich Text
- E. Float

**Answer:** B

### NEW QUESTION 27

- (Topic 4)

A company has a website that contains a form named Contact Us. Data from completed forms is saved to a shared document. An office administrator periodically reviews the document. The office administrator sends new submissions to another employee who creates contacts or updates existing contacts.

You need to recommend a solution to automate the process.

What should you recommend?

- A. Excel Online Connector
- B. Dynamics 365 Customer Insights
- C. Dynamics 365 Customer Service
- D. Dynamics 365 Marketing

**Answer:** D

**Explanation:**

Microsoft designed Customer Insights to allow organizations to map, match, merge, and enrich customerbased data from different sources. A classic scenario would be to merge data from customer service software, like Freshdesk, and online sales, such as Shopware, into one source for reporting and further data analysis.

Reference:

<https://msdynamicsworld.com/story/microsoft-dynamics-365-customer-insights-overview>

### NEW QUESTION 31

- (Topic 4)

A company sells antique books. The company stores data about book locations in an existing system by using the following database fields: Room, Shelf. The company must import the data from the existing system into a Power Platform solution. Existing data into must be modified to match the design of the new solution.

You need to recommend a solution to combine the room and shelf fields into a single column during the import process.

Which tool should you recommend?

- A. Power Platform dataflows
- B. Data Import Wizard
- C. import from CSV
- D. Microsoft Excel Online

**Answer: B**

#### Explanation:

Dataverse includes a web application tool called Import Data Wizard. You use this tool to import data records from one or more comma-separated values (.csv), XML Spreadsheet 2003 (.xml), or text files.

Use transformation mapping to modify data before importing it. For example, split a full name that is contained in the source file into a first name and a last name to match the target columns for a table.

Note:

? To implement data import, you typically do the following:

? Create a comma-separated values (CSV), XML Spreadsheet 2003 (XMLSS), or text source file.

? Create a data map or use an existing data map.

? Create a comma-separated values (CSV), XML Spreadsheet 2003 (XMLSS), or text source file.

? Create a data map or use an existing data map.

? Associate an import file with a data map.

? Upload the content from a source file to the associated import file.

? Parse the import file.

? Transform the parsed data.

? Upload the transformed data into the target Dataverse server.

Reference:

<https://docs.microsoft.com/en-us/powerapps/developer/data-platform/import-data>

<https://docs.microsoft.com/en-us/powerapps/developer/data-platform/add-transformation-mappings-import>

### NEW QUESTION 32

HOTSPOT - (Topic 4)

An automobile parts manufacturer wants to replace an existing system with a Microsoft Power Platform solution. The company has been experiencing undesired data changes in their current system. The cause of the changes is due to the relationships that are set up between tables in the database that the system uses.

The new solution must meet the following requirements:

- Track vehicle manufacturers and models.
- Display a list of all models that a manufacturer produces.

Ensure that each vehicle model can be associated to only one manufacturer.

- Delete all associated models when a user deletes a manufacturer.

- Automatically populate information from the manufacturer when creating a new model from the model list on the manufacturer page.

You need to recommend table relationships to meet the business requirements. Which relationship settings should you recommend? To answer, select the appropriate

options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Business requirement	Relationship
The system must delete all associated models when a user deletes a manufacturer.	<div>Use a parental 1:N relationship between manufacturer and model.</div> <div>Use a parental 1:N relationship between manufacturer and model.</div> <div>Use a referential 1:N relationship between manufacturer and model.</div> <div>Use field mappings in 1:N relationship between manufacturer and model.</div> <div>Use an N:N relationship between manufacturer and model.</div>
The system must auto-populate information from the manufacturer when creating a new model from the model list on the manufacturer page.	<div>Use field mappings in 1:N relationship between manufacturer and model.</div> <div>Use a parental 1:N relationship between manufacturer and model.</div> <div>Use a referential 1:N relationship between manufacturer and model.</div> <div>Use field mappings in 1:N relationship between manufacturer and model.</div> <div>Use an N:N relationship between manufacturer and model.</div>

- A. Mastered
- B. Not Mastered

**Answer: A**

#### Explanation:

Answer Area

Business requirement	Relationship
The system must delete all associated models when a user deletes a manufacturer.	<div>Use a parental 1:N relationship between manufacturer and model.</div> <div>Use a parental 1:N relationship between manufacturer and model.</div> <div>Use a referential 1:N relationship between manufacturer and model.</div> <div>Use field mappings in 1:N relationship between manufacturer and model.</div> <div>Use an N:N relationship between manufacturer and model.</div>
The system must auto-populate information from the manufacturer when creating a new model from the model list on the manufacturer page.	<div>Use field mappings in 1:N relationship between manufacturer and model.</div> <div>Use a parental 1:N relationship between manufacturer and model.</div> <div>Use a referential 1:N relationship between manufacturer and model.</div> <div>Use field mappings in 1:N relationship between manufacturer and model.</div> <div>Use an N:N relationship between manufacturer and model.</div>

**NEW QUESTION 36**

- (Topic 4)

You are designing a Microsoft Power Platform solution that uses Microsoft Dataverse.

You need to recommend a way to update currency exchange rates within Microsoft Dataverse.

What are two possible ways to achieve this goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Review AppSource for prebuilt solutions.
- B. Create a Power Automate flow that uses a custom connection or HTTP request to an outside source for exchange rates.
- C. Embed an iframe that points to a currency exchange service into a model-driven app.
- D. Use the Power BI connector to establish a link that updates Microsoft Dataverse with the current exchange rate.

**Answer:** AB

**Explanation:**

B: We need is a source for exchange rates. There are some published connectors, but you also use a free service called Exchange Rates API, which are based on the European Central Bank, and create a custom connection.

Now that we have our custom connector defined and have a way to request the latest exchange rates, the next step is to create a Power Automate flow that will update all of currencies setup in our Dataverse environment.

Dataverse is a multicurrency system, in which each record can be associated with its own currency. This currency is called the transaction currency. The multicurrency features enable users to perform financial transactions like opportunities, quotes, orders, and invoices in multiple currencies. This feature also provides a currency choice to the end user when a financial transaction occurs.

Reference:

<https://readyxrm.blog/2021/03/10/updating-currency-exchange-rates-in-dataverse/>

**NEW QUESTION 40**

- (Topic 4)

You are designing a Microsoft Power Platform solution to help a company manage sales leads.

The solution has the following requirements:

? Ensure that users follow a predefined sales process regardless of the device that employees use to access the app.

? Respond to sales events by using organization-defined best practices.

You need to recommend a component for the app. What should you recommend?

- A. Power Automate cloud flow
- B. Business process flow
- C. Power Automate desktop flow
- D. Playbook

**Answer:** B

**Explanation:**

You can help ensure that people enter data consistently and follow the same steps every time they work with a customer by creating a business process flow. For example, you might want to create a business process flow to have everyone handle customer service requests the same way, or to require that people get approval for an invoice before submitting an order. Business process flows use the same underlying technology as other processes, but the capabilities that they provide are very different from other features that use processes.

Reference:

<https://docs.microsoft.com/en-us/power-automate/business-process-flows-overview>

**NEW QUESTION 42**

HOTSPOT - (Topic 4)

You are designing a model-driven app for a hospital. The app will be used to track teams at the hospital including:

Team	Comments
Cleaning	There are three predetermined cleaning teams. Tasks are assigned to a team. Anyone on the team can complete an assigned task.
Emergency room	These teams are formed as needed based on patient needs and staff availability.
Billing	These teams are assigned to specific hospital departments. Team members must only see data for the hospital department to which they are assigned.

You need to recommend the team types to use.

Which team types should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Team type
Cleaning teams	<div><div></div><div>Access</div><div>Owner</div></div>
Emergency room teams	<div><div></div><div>Access</div><div>Owner</div></div>
Billing teams	<div><div></div><div>Access</div><div>Owner</div></div>

- A. Mastered  
B. Not Mastered

Answer: A

Explanation:

Box 1: Owner team

Owner team: An owner team owns records and has security roles assigned to the team. A user's privileges can come from their individual security roles, those of the teams that they're part of or the ones they inherit. A team has full access rights on the records that the team owns. Team members are added manually to the owner team.

Box 2: Access team

Access team: An access team doesn't own records and doesn't have security roles assigned to the team. The team members have privileges defined by their individual security roles and by roles from the teams they're members of. These members share records with an access team, and the team is granted access rights to the records. Access rights include Read, Write, and Append.

Box 3: Owner team

NEW QUESTION 43

- (Topic 4)

You are designing a Microsoft Power Platform solution that will include multiple applications.

You have the following requirements:

- Support agents managing cases.
- Project managers reviewing and updating their projects.
- Stock managers managing warehouses.
- New site visitors self-registering.
- Employees tracking time entries.

Which three requirements can you meet by implementing role-based applications? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. New site visitors self-resisting.  
B. Project managers reviewing and updating their projects.  
C. Stock managers managing warehouses.  
D. Support agents managing cases.  
E. Staff tracking time entries.

Answer: BCD

NEW QUESTION 48

- (Topic 4)

A company has a list of contacts in a Microsoft Excel file. The company wants to load the contact information into a Power Platform solution.

You need to recommend a data-loading solution. What should you recommend?

- A. Use the Excel Template feature.  
B. Add to an existing list of contacts in a static worksheet.  
C. Use the import from Excel feature.

Answer: A

Explanation:

Import data that's stored somewhere else into your model-drvien app using the import feature in Power Apps. Every table has required columns that must exist in your input file. It's recommended that

you download an Excel template, add your data, and then import the file to your app. The template saves time and effort. Don't add or modify columns in the template to avoid issues during the import. Note:

Step 1: Download an Excel template  
To avoid mapping issue, it's recommended that you use an Excel template that you can download from your app. Once the template is downloaded add your data and then import the file back to your app. Remember don't add or modify columns in the template to avoid issues during the import process. Step 2: Import your data  
Use the template that you downloaded in the previous step (modified with your data) and import the file to your app.

**NEW QUESTION 49**

DRAG DROP - (Topic 4)

A company uses Microsoft Power Platform solutions.  
The company plans to set up application lifecycle management (ALM) capabilities to store the solutions in source control, which will be used to automate the release process.  
You need to set up the initial ALM infrastructure to store the solutions in source control. Which four actions should you perform in sequence?  
To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Run the pipeline.

Create an Export pipeline.

Create an Azure DevOps Project.

Install the Microsoft Power Platform Build Tools.

Create a Release pipeline.

Add a task for Microsoft Power Platform Import Solution.

**NEW QUESTION 54**

- (Topic 4)

You are designing a Power Platform solution for a company.  
Users must be granted access only to data that is relevant to them.  
You need to recommend actions to meet the requirements.  
Which two recommendations should you make? Each correct answer presents part of the solution.  
NOTE: Each correct selection is worth one point.

- A. Add column security profiles to applicable teams.
- B. Define and configure security roles.
- C. Create teams and assign security roles and users to the teams.
- D. Create business units and assign security roles to the business units.

Answer: BD

Explanation:

To control data access, you must set up an organizational structure that both protects sensitive data and enables collaboration. You do this by setting up business units, security roles, and field security profiles.

<https://docs.microsoft.com/en-us/power-platform/admin/security-roles-privileges>

**NEW QUESTION 58**

HOTSPOT - (Topic 4)

A company has an on-premises data warehouse and analytics solution- The data warehouse consists of multiple multi-dimensional data cubes representing over five years of operational data. The data warehouse consolidates and normalizes data that is sourced from 20 different systems.  
The company plans to replace the existing solution with a Microsoft Power Platform solution that connects to the data warehouse. The company wants to provide analytical information to executives in a Microsoft Teams channel to support business planning.  
The new solution must meet these requirements: Support the current data warehouse.  
The solution must support drill-through capabilities into the data. You need to recommend a solution.  
What should you recommend? To answer, select the appropriate options m the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Requirement	Solution
Data storage and normalization.	<div>Data Gateway</div> <div>Azure Data Lake</div> <div>Dataverse for Teams</div> <div>Azure Analysis Services</div>
Visibility to key operational metrics from various Teams	<div>Power BI</div> <div>AI Builder</div> <div>Teams adaptive cards</div> <div>Microsoft Teams integration object</div>

Answer:

Answer Area

Requirement	Solution
Data storage and normalization.	<div>Data Gateway</div> <div>Azure Data Lake</div> <div>Dataverse for Teams</div> <div>Azure Analysis Services</div>
Visibility to key operational metrics from various Teams	<div>Power BI</div> <div>AI Builder</div> <div>Teams adaptive cards</div> <div>Microsoft Teams integration object</div>

- A. Mastered  
B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: Azure Data Lake

A data warehouse is a centralized repository of integrated data from one or more disparate sources. Data warehouses store current and historical data and are used for reporting and analysis of the data.

**NEW QUESTION 59**

- (Topic 4)

A company has a model-driven app. The app has forms with both Business Rules and JavaScript added to handle the business logic on the form. The form contains logic that is enforced by using business rules. The company wants to apply the business rules to all forms in the app. You need to recommend a simplified form setup so the form can be maintained moving forward. What should you recommend?

- A. Manage the business logic with a Power Apps Component Framework (PCF) control.  
B. Evaluate whether complex parts of the logic can be solved by using Power Apps Component Framework (PCF) controls.  
C. Use Business Rules for the remaining functionality.  
D. Remove the Business Rules and use only JavaScript.  
E. Update logic to ensure Business Rules are optimized.  
F. Use JavaScript for the remaining functionality.

**Answer:** B

**Explanation:**

PCF controls are reusable. Reference:

<https://docs.microsoft.com/en-us/powerapps/developer/component-framework/overview>

**NEW QUESTION 60**

DRAG DROP - (Topic 4)

You are designing a Microsoft Power Platform solution that will be deployed to two separate companies in the same Microsoft Office 365 tenant: Contoso, Ltd. and Contoso Pharmaceuticals.

The solution must meet the following security requirements:

- Restrict Contoso, Ltd. users from seeing the Contoso Pharmaceuticals company.
- Restrict access to specific forms.
- Restrict access to specific tables.

What should you recommend? To answer, drag the appropriate security types to the correct restrictions. Each security type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Security objects	Answer Area								
<div>Security role</div> <div>Team</div> <div>Security group</div> <div>User profile</div>	<table><tr><th>Restriction</th><th>Security object</th></tr><tr><td>Restrict Contoso, Ltd. users from seeing the Contoso Pharmaceuticals company.</td><td><div></div></td></tr><tr><td>Restrict access to specific forms.</td><td><div></div></td></tr><tr><td>Restrict access to specific tables.</td><td><div></div></td></tr></table>	Restriction	Security object	Restrict Contoso, Ltd. users from seeing the Contoso Pharmaceuticals company.	<div></div>	Restrict access to specific forms.	<div></div>	Restrict access to specific tables.	<div></div>
Restriction	Security object								
Restrict Contoso, Ltd. users from seeing the Contoso Pharmaceuticals company.	<div></div>								
Restrict access to specific forms.	<div></div>								
Restrict access to specific tables.	<div></div>								

Answer:

Security objects		Answer Area		Security object
Security role			Restriction	
Team			Restrict Contoso, Ltd. users from seeing the Contoso Pharmaceuticals company.	Team
Security group			Restrict access to specific forms.	Security group
User profile			Restrict access to specific tables.	Security role

- A. Mastered
- B. Not Mastered

Answer: A

NEW QUESTION 64

HOTSPOT - (Topic 4)

A company plans to transition from an existing proprietary solution to a Power Platform solution. The company is consolidating data from several sources. The company reports the following data quality issues with the existing solution:

- ? Users often encounter a character limit when entering data.
- ? The database includes multiple instances of duplicate records.

You need to recommend solutions to ensure that the data quality issues are not present in the Power Platform solution.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Issue	Solution
Users often encounter a character limit when entering data.	<div>Define a data mask.</div> <div>Define and implement duplicate detection rules.</div> <div>Define the data type and format for each column.</div>
The database includes multiple instances of some records.	<div>Define requirements for data entry.</div> <div>Define and implement duplicate detection rules.</div> <div>Define the data type and format for each column.</div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Define the data type and format for each column Increase the data type size of the column.

Box 2: Define and implement duplicate detection rules

## Thank You for Trying Our Product

### We offer two products:

1st - We have Practice Tests Software with Actual Exam Questions

2nd - Questions and Answers in PDF Format

### PL-600 Practice Exam Features:

- \* PL-600 Questions and Answers Updated Frequently
- \* PL-600 Practice Questions Verified by Expert Senior Certified Staff
- \* PL-600 Most Realistic Questions that Guarantee you a Pass on Your First Try
- \* PL-600 Practice Test Questions in Multiple Choice Formats and Updates for 1 Year

**100% Actual & Verified — Instant Download, Please Click**
