## Exam Questions B2B-Solution-Architect

Salesforce Certified B2B Solution Architect Exam

#### NEW QUESTION 1

SharpField is a fast-growing company that provides SaaS for commercial service providers. SharpField has been acquiring other similar companies and plans to continue to do so for the near future.

After a recent acquisition of a company that also has a Salesforce org, the CIO wants to know the correct path forward on deciding whether to integrate the acquired companies into SharpField's existing landscape.

What should a Solution Architect recommend to the CIO to ensure the correct org strategy for SharpField going forward?

- A. Recommend a single-org strategy and development of strict processes for all acquired companies to follow.
- B. Prioritize migrating the newly acquired company to SharpField's Salesforce org first, then perform an org strategy analysis to assess the Business, Technology, Governance, and Operations requirements for any future acquisitions.
- C. Prioritize completing an in-depth org strategy analysis, focused on the Business, Technology, Governance, and Operations requirements at SharpField.
- D. Recommend a multi-org strategy and development of required integration layers to move the required shared data between instances of any and all acquired Salesforce instances.

**Answer: D**

#### NEW QUESTION 2

AC Computers is getting ready to go live with automated subscription invoicing using Sales Cloud and Revenue Cloud. AC Computers' primary goal is to retire its homegrown system used for manual invoicing and migrate any outstanding bookings. The company wants to make sure there is little disruption to a customer's current invoicing schedule when it goes live with Salesforce Billing and retires the existing system.

Which three recommendations should a Solution Architect make to reduce customer impact? Choose 3 answers

- A. Migrate all historical payment methods from the homegrown system.
- B. Utilize the standard user adoption reports and dashboards to track invoice data.
- C. Provide training and enablement for end users and admins prior to go live.
- D. Compare invoices as produced in both systems to ensure customer invoices are as expected.
- E. Create a release and change management process to incorporate feedback and fix issues.

**Answer: CDE**

#### NEW QUESTION 3

Universal Containers (UC) has acquired four companies and is looking to manage revenue across all mergers' territories seamlessly. UC wants to drive major business decision and selling strategies based on an efficient, complete, real-time view of team forecasts across territories from Salesforce. A sales user can be part of multiple territories and is usually working on multiple opportunities at a time.

Which technical consideration should a Solution Architect make when designing collaborative forecasting?

- A. Archiving a territory model does not impact forecasts, quotas, and adjustments for all territories in the model.
- B. If the sales user has many territories assigned to them, it can impact the performance of the forecast.
- C. Important details should be tracked at the opportunity line level.
- D. Forecast category names can be customized by submitting a Salesforce Support case.

**Answer: B**

#### NEW QUESTION 4

Universal Containers (UC) is using Sales Cloud and Service Cloud. UC wants a solution that can send scheduled emails on a daily, weekly, or monthly basis to existing customers and prospects. UC also wants to track if customers have opened the emails. There can be as little as 1,000 emails in a week or as many as 100,000 emails in a month, depending on the season.

Based on that criteria, which solution should the Solution Architect recommend to UC?

- A. Set up scheduled flows to handle email sending and tracking.
- B. Recommend Marketing Cloud Account Engagement.
- C. Develop a custom solution using scheduled Apex to send emails.
- D. Recommend Marketing Cloud Personalization.

**Answer: D**

#### NEW QUESTION 5

Universal Containers (UC) is about to implement Sales Cloud, Service Cloud, and Revenue Cloud within its newly created Salesforce environment. But before UC begins, the CIO would like to understand the options for creating and migrating changes within Salesforce. UC is about to use a sandbox for the initial build and will deploy customisation up to the production environment. UC has decided to build packages of metadata to silo the functionality between the three clouds it is implementing for.

What are two key considerations a Solution Architect should keep in mind when recommending packaging? Choose 2 answers

- A. Design the package as modular, loosely coupled units of metadata rather than large chunks of an org.
- B. Only utilize one functional automation tool (Flow, Workflow Rules, Process Builder) per object.
- C. It is impossible to track source control with package development; either the org owns the source or a source control does, but never both.
- D. Clouds like Revenue Cloud have their own packages so it is easy to work with them because their automation is limited.

**Answer: AD**

#### NEW QUESTION 6

Universal Containers serves customers globally across two businesses. Each business has its own org for managing its sales and support operations. Each line of business also maintains its own reporting systems using both CRM Analytics and Salesforce reports, but the CEO is asking for a unique dashboard that includes the global opportunity pipeline with data from both orgs.

What should a Solution Architect propose?

- A. Use CRM Analytics in the primary org and create a Salesforce External Connectio
- B. Then, create a dataflow to combine data from both orgs.
- C. Use one org as primary and create external objects for the accounts and opportunities of the other one. Then, use standard reports.
- D. Use one org as primary and an ETL tool to synchronize the accounts and opportunities of the other org. Then, use standard reports.
- E. Use CRM Analytics in the primary org and then, in the dashboards, use Salesforce Connect to query the data from the other org.

**Answer:** A

#### NEW QUESTION 7

Universal Containers (UC) is implementing a Salesforce B2B multi-cloud project with large volumes of data and daily transactions from multiple third-party systems via multiple integrations. UC is looking at transactions of more than 1 million records a week and, in higher seasons, 10 million records a week. UC has made the decision to get a full copy sandbox to use to test all of its third-party integrations across its multiple clouds. UC has also invested in MuleSoft and the Anypoint Platform as the single enterprise service bus for all of the third-party data going into Salesforce.

Which type of performance testing should a Solution Architect recommend for testing data at scale on this project?

- A. Perform API load test against the full copy sandbox before go live.
- B. Perform unit testing against the full copy sandbox codebase before go live in production.
- C. Perform page load testing against production after go live.
- D. Perform API load test against the partial copy sandbox before go live.

**Answer:** A

#### NEW QUESTION 8

Universal Containers recently began a project to connect its ERP with Salesforce. One of the requirements is a daily batch process to create and update orders and order product information. The development team, using the corporate ETL tool, has created two processes to create these records using Bulk API. The test in the development environment worked fine, but in the production environment, some order product records were not updated and showed an error "UNABLE\_TO\_LOCK\_ROW:unable to obtain exclusive access to this record". There is one Process Builder on the Order Product object and no async process.

Which two steps should a Solution Architect recommend to avoid this error? Choose 2 answers

- A. Use the import wizard instead of Bulk API.
- B. Sort the order product records by account and order before the Bulk API load.
- C. Change the Bulk API call to use Bulk API 2.0.
- D. Add a retry process for the records rejected by this error.

**Answer:** BC

#### NEW QUESTION 9

Universal Containers (UC) is adding to its existing Salesforce implementation and currently uses Saks Cloud and Service Cloud. UC is looking to add Salesforce Field Service and Experience Cloud to allow its

third-party contractors easier access to the data they need and to provide its customers a way to self-service.

UC has expressed interest m allowing its customers to be able to self-schedule maintenance work on their Assets. UC wants a solution to display scheduling options for the next month to its customers.

What should a Solution Architect consider m a potential solution?

- A. Lightning Web Components Calendar Module
- B. Appointment-Assistant Self Service Scheduling
- C. Salesforce Scheduler
- D. Standard Salesforce Asset Calendar

**Answer:** C

#### NEW QUESTION 10

Universal Containers (UC) needs to support its customers via email, phone, and chat. Service agents are only scheduled to support one communication channel for each shift. UC has implemented a service-focused community but only wants customers to inquire about service in the community through chat.

Which three options should a Solution Architect recommend to meet the requirements defined above? Choose 3 answers

- A. CTI adaptor with Omni-Channel integration
- B. Customer Community with ability to create a new support Case
- C. Experience Cloud, web-to-case, and a CTI integration
- D. Omni-Channel with defined presence, routing configurations, and Service Channels
- E. Customer Community with Live Agent

**Answer:** ABE

#### NEW QUESTION 10

Universal Containers uses the Salesforce Platform to track customer payments and any late payments. This is accomplished with an architecture that includes Marketing Cloud, Service Cloud, and an integration to the back-office billing system via MuleSoft. Invoices and payments are mastered in the billing system and exposed to Salesforce via MuleSoft. Notifications about customer payments are orchestrated out of Salesforce and emails are sent via Marketing Cloud. The late payment invoice data is required for service representatives to be able to reference within Salesforce.

What should the Solution Architect recommend when determining the role of each system for a use case of sending payment reminders?

- A. Integrate the billing system directly with Marketing Cloud via MuleSoft to trigger based on events from the billing system.
- B. Create cases within Salesforce from the billing system based on payment statues with MuleSoft event orchestration and send payment notifications via Marketing Cloud.
- C. Recommend a trigger from the billing system into Marketing Cloud, which sends customer formattedemails.
- D. Load the payment and invoicing data within Salesforce from the billing system with MuleSoft, and drive payment notifications via Marketing Cloud.

**Answer:** A

#### NEW QUESTION 12

Universal Containers (UC) is undergoing a multi-year digital transformation across its Sales, Marketing, Fulfillment, and Accounting channels. Based on UC's initial success using MuleSoft's API-led approach as its integration strategy, UC chose Salesforce for its transformation. The Solution Architect assigned to the project has just begun pre-planning for the first phase with UC's Implementation team.

Which document should the Solution Architect ask for to get an overview of the customer's current infrastructure so they can begin the first phase of the digital transformation?

- A. A Salesforce ERD Document complete with field definitions
- B. A MuleSoft Application Document complete with integration patterns
- C. A Reference Architecture Diagram complete with system of record notation
- D. A future state roadmap detailing all of the implementation phases

Answer: B

#### NEW QUESTION 14

AC Computers has decided to extend its existing Sales Cloud solution by implementing Service Cloud and Marketing Cloud Account Engagement. AC Computers has defined two different work streams for Service Cloud and Marketing Cloud Account Engagement and wants each workstream to work iteratively in separate sandboxes and migrate to a single sandbox for UAT and integration testing. With the multiple workstreams, AC Computers needs a more rigorous change management process and an audit process.

Which two options should AC Computers consider to support both implementation workstreams? Choose 2 answers

- A. Use multiple development sandboxes and merge the workstream builds using change sets.
- B. Use a version control system and CLI-based deployment tools to merge the workstream builds.
- C. Use scratch orgs and continuous deployment tools to merge the workstream builds.
- D. Use package-based deployments and scratch orgs to merge the workstream builds.

Answer: AC

#### NEW QUESTION 15

Universal Containers (UC) wants to enhance the online purchase experience for its customers. The product and pricing information is managed in a separate ERP, while customer purchases are primarily triggered online through self-service. UC often offers promotions and discounts through various online seasonal events. UC wants the ability to provide customized quotes based on its relationship with the customer, as well as proactively process and monitor renewal and upgrade opportunities.

A Solution Architect has identified Sales Cloud, CPQ, Billing, and B2B Commerce as part of a potential multi-cloud solution.

Based on the above considerations, which option identifies the optimal data flow for this solution?

- A. Pricing and Product data should be pushed from ERP to B2B Commerce via the CPQ B2B Commerce Connector to CP
- B. Promotions should be handled in B2B Commerce
- C. Invoice and Billing should be maintained in Billing and surfaced on B2B Commerce via a Lightning component.
- D. Pricing and Product data should be pushed from ERP to CPQ and from there to B2B Commerce via the CPQ B2B Commerce Connector
- E. Promotions should be managed in CPQ as CPQ is the pricing master
- F. Invoice and Billing should be managed in B2B Commerce and pushed to Billing.
- G. Pricing and Product data should be pushed from ERP to both CPQ and B2B Commerce, keeping single source of truth
- H. Promotions should be handled in B2B Commerce
- I. Invoice and Billing should be maintained in Billing and pushed to B2B Commerce.
- J. Pricing and Product data should be pushed from ERP to CPQ and from there to B2B Commerce via the CPQ B2B Commerce Connector
- K. Promotions should be handled in B2B Commerce
- L. Invoice and Billing should be maintained in Billing and presented on B2B Commerce via a Lightning component.

Answer: A

#### NEW QUESTION 20

A software solutions company has created several SaaS applications that it sells to its customers. The company would like an easier way to allow customers to renew their subscriptions each period. Today, the company has to run reports across multiple disparate systems to find out which products each customer has purchased, their usage levels, and when each customer needs to renew. Tracking and identifying when to contact customers is a very manual process and involves sales people sending emails with invoices attached. Customers often mail paper checks to the company, leading to disconnected invoicing and payment processing.

Which two products should a Solution Architect consider to resolve the subscription, invoicing, and payment issues the company is currently experiencing?

Choose 2 answers

- A. Salesforce Billing
- B. Salesforce Order Management
- C. B2B Commerce
- D. Salesforce CPQ

Answer: AB

#### NEW QUESTION 24

Northern Trail Outfitters (NTO) is currently using Salesforce CPQ and would like to implement B2B Commerce Classes. NTO uses a Partner Community to allow partners to build complex bundles to provide detailed quotes to clients. NTO also wants to ensure that it does not have to maintain two databases of products.

Which two considerations should a Solution Architect keep in mind about the CPQ B2B Commerce Connector when synchronizing Product and Price data?

Choose 2 answers

- A. The connector lets you sync simple products with a flat price.
- B. The connector does not support syncing complex CPQ bundles.
- C. Discount schedules from CPQ will sync to discounts and promotions in B2B Commerce Classic
- D. The connector is a two-way sync for product and pricing logic.

**Answer:** AB

**NEW QUESTION 29**

AC Computers is hitting governor limits when trying to create orders and activate orders in Salesforce. Upon further investigation, it's discovered that AC Computers is trying to process hundreds of order products on a single order. The Order object also has various automation processes to update fields and integrate with a third-party order management system.

What is one solution a Solution Architect should evaluate first to resolve this issue?

- A. Create a custom object to hold orders in queue for processing.
- B. Review to determine if moving automation to asynchronous Apex is required.
- C. Enable Advanced Order Management to process large orders.
- D. Install a third-party solution to process large orders.

**Answer:** D

**NEW QUESTION 32**

Universal Containers (UC) manufactures automobile engine components. UC wants to set up an ecommerce website to deliver a seamless customer purchasing experience, both through self-service and field sales. UC also wants to showcase its extensive product offerings, operate regional promotions and discounts, and managed routing and contracting. UC is looking for guidance on a Salesforce multi-cloud solution to be implemented across phases.

What should a Solution Architect recommend to meet UC's business requirements?

- A. Phase 1: Sales Cloud - - Phase 2: Service Cloud -- Phase 3: 626 Commerce
- B. Phase 1: Sales Cloud -- Phase 2: B2B Commerce -- Phase 3: Salesforce Field Service
- C. Phase 1: Service Cloud -- Phase 2: CPQ -- Phase 3: 626 Commerce
- D. Phase 1: Sales Cloud - - Phase 2: CPQ -- Phase 3: 626 Commerce

**Answer:** D

**NEW QUESTION 33**

Recently, Universal Containers (UC) successfully launched a multi-cloud B2B implementation with Sales Cloud, Service Cloud, Experience Cloud, and B2B Commerce. As the Sales and Service Cloud development was performed by separate teams, UC created Process Builder automation for the Account object in separate Process Builder processes. As customers go through the sales process within Sales Cloud, the data on their customer account record is updated. As those same customers make purchases within B2B Commerce, the data on their customer account record is updated as well.

What are two reasons why a Solution Architect should recommend uniting these into a single Process Builder process?

Choose 2 answers

- A. Moving them into a single Process Builder process helps to reduce the number of queries and avoid hitting limits on the Account object.
- B. Moving them into a single Process Builder process provides control over the order of the updates and actions triggered on the Account object.
- C. Moving them into a single Process Builder is the only way to ensure a naming convention is followed on the Account object.
- D. Moving one of the Process Builders into a flow will remove all automation conflicts on the Account object.

**Answer:** AB

**NEW QUESTION 35**

Universal Containers (UC) recently went live with a multi-cloud implementation consisting of Experience Cloud, Service Cloud, and Marketing Cloud Account Engagement. The UC Marketing team wants to generate Marketing Cloud Account Engagement emails using the same dynamic content that users access in Experience Cloud. They want to trigger Marketing Cloud Account Engagement emails based on certain user actions while keeping the content dynamic and configurable via a user-friendly mechanism.

Which approach should a Solution Architect recommend in this case?

- A. Consider finding AppExchange packages that support this functionality on Experience Cloud and Marketing Cloud Account Engagement.
- B. Use Salesforce CMS on Experience Cloud and the new Marketing Cloud Account Engagement Lightning Email Experience.
- C. Change the data model to support sending Marketing Cloud Account Engagement email via the Experience cloud site.
- D. Build a custom application using Lightning Web Components to make the email content dynamic and configurable.

**Answer:** B

**NEW QUESTION 39**

Northern Trail Outfitters (NTO) has a requirement to implement an Experience Cloud solution to allow its partners to log and view cases they have submitted, as well as track their opportunities. As part of the solution, NTO wants to be able to create dashboards that its partners can view within the community.

Which Experience Cloud license should the Solution Architect recommend?

- A. Sales Cloud license
- B. Service Cloud license
- C. Partner Community license
- D. Customer Community Plus license

**Answer:** C

**NEW QUESTION 40**

Universal Containers (UC) acquired two companies. As part of its transformation and consolidation program, UC needs to bring all of its disparate partner strategies together and see what can be combined across all of its indirect sales channels. Each company currently has its own Salesforce environment utilizing Sales Cloud and Experience Cloud for Partners. Each company also follows its own unique business processes for partners. However, UC has recently developed a new vision and journey focused on a single indirect channel with a single Salesforce environment aligned to its corporate strategy.

Given UC's new journey for engaging its indirect channel, what are the next two steps the Solution Architect should recommend?

Choose 2 answers

- A. Completely unify all the channel strategies under the acquiring company's brand and strategy.
- B. Tell the stakeholders to focus on having a single Partner Community across all channels with a singular branding.
- C. Create an adoption plan for the Direct Sales team to engage with the Indirect Sales team in a sell-with model within the new Partner Communities.
- D. Identify the need for multiple Partner Communities by Indirect Sales Channel with branding and content specific to each channel.

**Answer:** AB

#### NEW QUESTION 41

Universal Containers (UC) is at the end of its first and only design phase. UC decided to go ahead and build against the entire future design that was developed and agreed upon by its internal stakeholders and Center of Excellence. But a concern by the executive team is how UC can de-risk itself and stay within budget during the build while still hitting the objectives that were defined in the design phase.

Which recommendation should the Solution Architect make to alleviate the executive team's concerns during the build?

- A. Help the executive team develop a governance framework; and team to focus on those concerns throughout the build and track the budget.
- B. Promise the executive team that the project manager will always give comprehensive budget numbers every week and they will never overrun on budget.
- C. Help the executive team understand that they created their entire complete vision of the solution already and there is no chance anything new will come up during the build.
- D. Assure the executive team that the current project is at a fixed scope and there will not be any overrun on budget.

**Answer:** A

#### NEW QUESTION 43

Northern Trail Health has clients that have more than 10,000 employees. The company's Customer Service team handles requests from its client's employees directly and tracks various rebate programs per employee. Private information should not be shared with the Sales team and they should only see contacts that are relevant to the sales process.

Assuming that Sales and Service teams share certain contacts, in which two ways should a Solution Architect ensure optimal performance?

Choose 2 answers

- A. Use profiles and/or permission sets to give View All access to Customer Service on the Contact object.
- B. Set the Contact object to Public Read Only so that the sharing rules do not bog down performance for sharing.
- C. Assign all contacts to Sales team members to ensure sharing is streamlined and hide private fields from them.
- D. For each Account, assign Sales Contacts to the Sales team and all the rest to a Customer Service representative assigned to the Account.

**Answer:** CD

#### NEW QUESTION 48

At Custom Cabinets LLC, the service appointments often span over multiple days but are 2 to 4 hours in duration per day. The company would like to optimize the service resource's day and have them see as many customers as possible. Additionally, Custom Cabinets LLC would like a customer service representative to follow up with the customer once the field work has been completed.

Which approach should the Solution Architect take to meet these requirements?

- A. Leverage declarative automata to clone Service Appointments for multiple day
- B. Like declarative automation to send a follow-up email to the customer.
- C. Leverage out-of-the-box Salesforce Field Service Work Types and out-of-the-box Multiday Service Appointment
- D. Use declarative automation to create a follow-up Case for customer service.
- E. Leverage out-of-the-box Salesforce Field Service Multiday Service Appointment
- F. Use declarative automation to send a follow-up email to the customer.
- G. Leverage out-of-the-box Salesforce Field Service Work Types and declarative automation to clone Service Appointments for multiple day
- H. Use declarative automation to create a follow-up Case for customer service.

**Answer:** C

#### NEW QUESTION 53

Universal Containers (UC) is an international company with activities in Europe and the U.S. UC has two separate Salesforce orgs, one for each region. Quotes are built in different legacy systems, depending on their country. Orders are processed centrally by the back-office team with an ERP. Customer information is saved in both legacy systems and the ERP. The analyst team complains about the inconsistency of customer data between different systems and the lack of connection between a single piece of customer data across all of the systems.

Which approach would make it possible to set up this single source of truth and ensure scalability for orders?

- A. Use MuleSoft Anypoint Platform as the single point of data orchestration across the different systems and Salesforce environments.
- B. Map all of the points of data with a different ETL tool for each Salesforce environment and drive synchronization from Salesforce to the other systems.
- C. Use each Salesforce org as its own system of record (SOR) and use Salesforce Connect to synchronise the two Salesforce orgs.
- D. Map all of the points of data within a custom data manager and drive synchronization between the different systems with a point-to-point approach.

**Answer:** A

#### NEW QUESTION 54

Universal Containers (UC) is undergoing a full digital transformation and has chosen Salesforce as one of the main components. UC will use Sales Cloud for online activities, CPQ for quote generation and renewals. B2B Commerce for online orders through its partnerships and vendors, an external ERP for fulfillment and invoicing, and Marketing Cloud for customer outreach. UC wants to create fluidity between the entire application landscape, and an integration between systems is required.

The application is expected to be able to generate an order based on any of the channels outlined above, and be utilized in UC's outreach to its customers.

Where should a Solution Architect recommend the system of record (SOR) be for all orders going forward?

- A. In the ERP Order Object
- B. Salesforce Custom Object
- C. Salesforce Order Object
- D. B2B Commerce Order Object

**Answer: C**

**NEW QUESTION 55**

Universal Containers (UC) uses Salesforce Sales Cloud to track Opportunities, Quotes, and Orders and is interested in offering self-service capability to its customers via an Experience Cloud site. Most products that UC offers are relatively simple, but some are complex and need to be configured and reviewed by a sales representative before an order can be officially placed. The CIO is concerned about the time to market and would like to see two options to address UC's need.

Which two options should a Solution Architect recommend and present to UC? Choose 2 answers

- A. Implement B2B Commerce on Experience Cloud to allow customers to purchase simple products with Add complex product configurations in a follow-up phase.
- B. Implement Salesforce CPQ internally first, then build "product configurator" functionality in a custom Experience Cloud site in a follow-up phase.
- C. Implement a templated self-service Experience Cloud site to show product information, add a "Request a Quote" component, and recommend B2B Commerce implementation in a follow-up phase.
- D. Implement a custom Experience Cloud site with "product configurator" functionality first, then add headless commerce functionality in a follow-up phase.

**Answer: AD**

**NEW QUESTION 56**

AC Computers is launching a new subscription bundle service and plans to primarily sell through direct sales and a website storefront for existing customers. Direct Sales needs the ability to configure complex deals and manage subscription. Existing customers need the ability to initialize a request for additional products and services from the storefront and seamlessly send the request directly to Sales to finalize the quote.

Which three recommendations should a Solution Architect make to meet these business requirements? Choose 3 answers

- A. Salesforce CPQ
- B. Salesforce Order Management
- C. Salesforce Billing
- D. B2B Commerce
- E. CPQ B2B Commerce Connector

**Answer: ADE**

**NEW QUESTION 57**

Northern Trail Outfitters (NTO) has a large product catalog containing about 1 million products mastered inside an external PIH system. In its first Salesforce implementation, NTO implemented Salesforce CPQ as its main tool of ... to configure and quote, in conjunction with a nightly batch integration from its PIM to bring over all products, with pricing also being maintained inside of CPQ.

As part of its new fiscal year initiative, NTO would like to introduce a digital sales channel to its customers to allow for a traditional ecommerce self-service experience, and has decided to use its own custom-built solution as a way to accomplish this. One of the main requirements for this custom ecommerce solution is that it must integrate into CPQ in order to present the same entitlements for pre-negotiated contracts that were created in CPQ.

Which two suggestions should a Solution Architect recommend as a starting point to meet NTO's need of effectively integrating both applications together? Choose 2 answers

- A. Use MuleSoft to streamline the peering and product integration between the PIM, ecommerce, and CPQ.
- B. Recommend an ETI tool to synchronize all product data between Salesforce CPQ, PIM, and the custom ecommerce tool.
- C. Harmonise the Pricing and Product structure of the custom ecommerce tool and CPQ to enable a streamlined integration.
- D. Implement an external master Pricing database that can be carted by both ecommerce and CPQ.

**Answer: AC**

**NEW QUESTION 61**

Universal Containers is at the start of a digital transformation program. Members of the executive leadership team have provided a list of internal and external stakeholders who are dedicated to formulating the vision and desired business outcomes in a 2-day workshop. The executive leadership team has made the request to understand what the customer experience will look like out of this workshop.

What should a Solution Architect do to help formulate the high-level business vision and desired business outcomes?

- A. Facilitate a workshop with the executive leadership team, applying the journey mapping process to create a vision and align customer journey to business objectives.
- B. Facilitate a strategy session with the executive leadership team to better understand their individual business units' priorities to achieve the business objectives.
- C. Ask to follow the Customer Service team for a day to gain a better understanding of how they work and identify their pain points to formulate this vision.
- D. Facilitate a business process mapping workshop with the executive leadership team to better understand the potential process improvements.

**Answer: D**

**NEW QUESTION 64**

Universal Containers (UC) is evaluating Salesforce for a Lead to Invoice solution, as its current process for getting payments from customers «s incredibly laborious. UC knows now its current invoice process runs through its back-office ERP, and is unsure how it would work within a front-office tool going from a lead all the way to an invoice. UC is looking to purchase Revenue Cloud, Sales Cloud, Marketing Cloud Account engagement, and MuleSoft to work with its CRP. The CIO also wants to make sure UC is utilizing the data across these clouds in the most automated way possible without a lot of manual data intervention as is required today within its back- office CRP

What should the steps in the business process look like when creating a multi-cloud Lead to Invoice solution in Salesforce if UC's CRP will be the system of record for invoices?

- A. Lead, Opportunity, Quote, Order, Invoice, Payment, ERP
- B. Lead, Opportunity, Quote, Order, ERP
- C. Opportunity, Quot
- D. Invoice, Payment, CRP
- E. Lead, Quote, Opportunity, Order, Invoic
- F. ERP, Payment

**Answer:** A
